SERIES TL 1015 TACTILE SWITCHES TACTILE SWITCHES

RoHS Compliant Available

E•SWITCH®

Features:
- Ultra-miniature design
- SMT technology

Specifications:
- Contact rating: 50mA at 12VDC
- Life expectancy: 50,000 cycles min.
- Contact resistance: 100mΩ max.
- Insulation resistance: 100MΩ min
- Contact material: Stainless steel
- Teminals: Brass
- Dielectric strength: 250 VAC
- Operating temperature: -20°C to +70°C
- Travel: 0.20mm

TL3700 SERIES ULTRA MINIATURE TACTILE SWITCHES

RoHS Compliant Available

E•SWITCH®

Markets
- Audio/Visual
- Computer peripherals
- Consumer electronics
- Handheld devices
- Medical equipment
- Telecommunication

Features:
- 3.0mm (W) x 2.6mm (L) x 0.65mm (H) dimensions
- Up to 100,000 cycle life expectancy
- 100gf and 160gf options

Specifications:
- Electric rating: 20mA @ 15VDC
- Contact resistance: 500 Mohm min. at 500VDC
- Dielectric strength: 250VAC for 1 minute
- Operating temperature: -40°C to 85°C
- Travel: 0.15 mm

SERIES TL1105 TACTILE SWITCHES

RoHS Compliant Available

E•SWITCH®

Features:
- Reliable dome contact technology
- Strong tactile/audible feedback
- Multiple operating force options

Specifications:
- Contact rating: 50mA at 12VDC
- Life expectancy: 100,000 cycles
- Contact resistance: 100mΩ max
- Insulation resistance: 100MΩ min
- Contact material: Silver-clad phoshor bronze
- Terminals: Silver plated brass
- Dielectric strength: 250VAC
- Operating temperature: -20°C to +70°C

ILLUMINATED ULTRA-THIN TACTILES

NEW

RoHS Compliant Available

NKK SWITCHES

- Bright, full face illumination with choice of red, green, or amber LEDs.
- Multiple LED arrays and interior reflectors enhance illumination of the large, .75" (19mm) square actuator surface.
- Distinctive design allows full face illumination in extra low profile of 0.31" (7.85mm) from PCB to top of switch.
- Dome contact gives crisp tactile and audible feedback with short stroke and assures high reliability and long life of 1,000,000 operations.
- Crimped terminals provide a spring type action to ensure secure mounting and prevent dislodging during the soldering process.
- Streamlined housing dimensions provide for compact, side-by-side mounting on a standard grid.
- Terminal spacing conforms to standard .100" (2.54mm) PCB grid.

HP02 & HP03 SERIES 6MM ULTRA-MINIATURE TACTILE SWITCHES

NEW

NKK SWITCHES

Specifications:
- Silver Contacts Rated 3VA max DC
- Gold Contacts Rated 0.4VA max @ 28V AC/DC max
- Contact Resistance: 100 milliohms max.
- Dielectric Strength: 250V AC min for 1 minute min between contact & between contacts & case
- Operating Temperature: -20°C to +70°C
- SMT switches have gull-winged terminals

B3AL SERIES LONG STROKE TACTILE SWITCHES

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Switching capacity: 1 to 50 mA at 5 to 16 VDC (resistive load)
- Ambient operating temperature: -40°C to 90°C at 60% max
- Ambient operating humidity: 35% to 85% (at 5°C to 35 °C)
- Contact configuration: SPST-NO
- Contact resistance: 100 mohm max.
- Insulation resistance: 100 Mohm min. (at 100 VDC)
- Dielectric strength: 250 VAC, 50 / 60 Hz for 1 min.
- Bounce time: 5 ms max.
- Pretravel (PT): 1.3

TACTILE SWITCHES

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

B3S

B3SN

B3S series are surface mount switches ideal for high-density packaging. Sealed construction allows tactile switches to be mounted and soldered to a PC board. SPST contacts. Ideal for applications such as audio, office, and communications equipment, measuring instruments, industrial robots, VCRs, TVs, and vending machines. Switching capacity: 50mA 240VDC (resistive load). Permissible load: 1mA 5VDC (resistive load). **"P" suffix** denotes embossed tape packaging.

WITHOUT GROUND TERMINALS

Mfg. Part No.	Operating Force (N)	Stock No.	Price Each 1-24	25-49	50-99

B3S-1100P	1.57	89C4218	0.77	0.69	0.62

B3SN series surface-mount mechanical key switches have a sealed construction for dusty or humid environments. J-lead style SMT. Compact and more than 1 mm thinner than conventional mechanical tactile switches. SPST-NO contacts. Rated 0.1A, 30VDC (resistive load). Switching capacity: 5 - 24VDC, 1 - 30mA. **"P" suffix** denotes embossed tape packaging.

EVQPS SERIES 6.1MM X 4.0MM SIDE-OPERATIONAL SMD LIGHT TOUCH SWITCHES

RoHS Compliant Available

Panasonic

Features:
- External dimensions: 6.0mm x 3.5mm, height 4.3mm, 5.0mm
- Wave soldering availabel

Applications:
- Operating switches for other electronic equipment

Specifications:
- Snap action/push-on SPST
- Rating: 10µA 2VDC to 50mA 12VDC (resistive load)
- Contact resistance: 100mohm (max.)
- Insulation resistance: 100Mohm
- Dielectric withstanding voltage: 250VAC for 1 minute
- Operating temperature: -30°C to +85°C
- Operating Life (Cycles): 50000 for 1N, 1.6N operating force
- Operating Life (Cycles): 30000 for 2.4N operating force

EVQPU SERIES SMALL SIDE-OPERATIONAL SMD LIGHT TOUCH SWITCHES

RoHS Compliant Available

Panasonic

Applications:
- Operating switches for portable electronic equipment such as mobile phones, digital still cameras, camcorders, audio players

Specifications:
- Snap action/push-on SPST
- Straight terminals
- Black push plate
- Rating: 10µA 2VDC to 50mA 12VDC (resistive load)
- Contact resistance: 500mohm (max.)
- Insulation resistance: 100Mohm (at 100VDC)
- Dielectric withstanding voltage: 250VAC for 1 minute
- Boucing: ON/OFF 10ms (max.)
- Travel: 0.3mm
- Operating life: 100000 cycles (min.)
- Operating temperature: -20°C to +70°C
- Size: 4.7mm x 3.5mm; Height 1.65mm

EVQP2 SERIES 4.7MM X 3.5MM SMD LIGHT-TOUCH SWITCHES

RoHS Compliant Available

Panasonic

Features:
- High operating force and long operational life
- High mountability with 4 J-bent terminals

Specifications:
- Snap action/push-on SPST
- Rating: 10µA 2VDC to 20mA 15VDC (resistive load)
- Contact resistance: 100mohm (max.)
- Insulation resistance: 100Mohm
- Dielectric withstanding voltage: 250VAC for 1 minute
- Boucing: ON/OFF 10ms (max.)
- Operating temperature: -40°C to +85°C

Short Push Travel

Applications:
- Operation switches for portable electronic equipment such as mobile phones, digital still cameras, camcorders, audio players
- Car keyless entry systems
- Car audio equipment

EVQP1, EVQ9P SERIES 6MM SQUARE LONG TRAVEL SMD LIGHT-TOUCH SWITCHES

RoHS Compliant Available

Panasonic

Specifications:
- Snap action/push-on SPST
- Rating: 10µA 2VDC to 50mA 12VDC (resistive load)
- Insulation resistance: 100Mohm (at 100VDC)
- Dielectric withstanding voltage: 250VAC for 1 minute
- Boucing: ON/OFF 10ms (max.)
- Operating temperature: 40°C to +85°C
- Size: 6mm x 6.1mm; Height: 5mm (incl. push plate)

Features:
- Steady and low contact resistance (100mohm max.)
- Excellent solderability (J-bent-type terminals)

Applications:
- Car electronics equipment

Mfg. Part No.	Operating Force (N)	Travel (mm)	Push Plate Color	Operating Life (Cycles)	Stock No.	Price Each 1-9

EVQP7, EVQ9P7 SERIES SIDE-OPERATIONAL SMD LIGHT-TOUCH SWITCHES

RoHS Compliant Available

Panasonic

Specifications:
- Snap action/push-on SPST
- Rating: 10µA 2VDC to 50mA 12VDC (resistive load)
- Contact resistance: 500mohm (max.)
- Insulation resistance: 100Mohm (at 100VDC)
- Dielectric withstanding voltage: 250VAC for 1 minute
- Boucing: ON/OFF 10ms (max.)
- Push travel: 0.22mm
- Operating life: 100000 cycles (min.)
- Operating temperature: -20°C to +70°C
- Size: 3.5mm x 2.9mm
- Mounting height: 1.35mm
- Black push plate

Features:
- Excellent light-touch operational feel
- Choice of terminal type: straight, J-bent, or L-shape,
- High mountability

Applications:
- Operating switches for portable electronic equipment such as mobile phones, digital still cameras, camcorders, audio players

Mfg. Part No.	Operating Force (N)	Terminal Type	Boss	Stock No.	Price Each 1-9
● EVQ-P7A01P	2.2	Straight	Without	83T2830	1.07

EVQ11 SERIES TYPE 2R ROUND LIGHT-TOUCH SWITCHES

RoHS Compliant Available

Panasonic

Features:
- Excellent light-touch operational feel
- Cast-processed terminals improve mountability

Specifications:
- Snap action/push-on SPST
- Rating: 10µA 2VDC to 20mA 15VDC (resistive load)
- Contact resistance: 50mohm (max.)
- Insulation resistance: 50Mohm (at 100VDC)
- Dielectric withstanding voltage: 250VAC for 1 minute
- Boucing: ON 3ms (max.); OFF 8ms (max.)
- Travel: 0.25mm ±0.10mm
- Operating temperature: -20°C to +70°C
- Size: 6mm L x 6mm W

Applications:
- Operating switches for electronic equipment

EVQPL SERIES 4.9MM SQUARE SMD LIGHT TOUCH SWITCHES

RoHS Compliant Available

Panasonic

Features:
- External dimensions: 4.9mm x 4.9mm, height 0.8mm (without push plate), 1.5mm (with push plate)

Applications:
- Operation switches for portable electronic equipment (Notebook PC, Camcorders, Portable audio players, etc.)
- Operation switches for car audio systems

Fig. 1 — Without Push-Plate

Fig. 2 — With Push-Plate

Specifications:
- Snap action/push-on SPST
- Rating: 10µA 2VDC to 20mA 15VDC (resistive load)
- Contact resistance: 50mohm (max.)
- Insulation resistance: 50Mohm
- Dielectric withstanding voltage: 250VAC for 1 minute
- Operating temperature: -20°C to +70°C
- Operating Life (Cycles): 500000 for 1N, 1.6N operating force
- Operating Life (Cycles): 200000 for 2.6N, 3.5N operating force

TILT SWITCHES — NON-MERCURY CONTACT

COMUS International

- ABS case material
- Switches operate when tilted from the horizontal position
- Switch movement required to cause contact change is called the differential angle
- Differential angle must be considered when designing a tilt switch
- When in the horizontal position the switch contact may be open or closed

Fig. 1

Fig. 2

TILT AND G FORCE SWITCHES

RoHS Compliant Available

DURAKOOL INC.

Tilt and position switches provide long contact life and quiet, dependable performance. Sealed contacts are closed to external contaminants. Self renewing, liquid mercury contacts. **A series** switches "make" when the electrode is tilted below horizontal, and "break" when tilted above horizontal. Angle specifications are dependent on rotation rates and load parameters. **Mfg. part no. 4380** is a wide angle tilt switch that is combined non-insulated A1S and G5 switch. Tip-over switches are specified by the angle of travel away from the vertical required to make or break the contact. The operating angle designed for the installation must be larger than this specification to ensure proper switch application. **Mfg. part no. T03-1015** has ¼″ male quick-connect center electrical mounting terminal. **Mfg. part no. T03-1026** has ¼″ male quick-connect center electrical, ¼″ male 180°. **G Force** switch has a 50 ohm contact resistance.

GENERAL-PURPOSE AC/DC TOGGLE SWITCHES

RoHS Compliant Available

Carling Technologies™ Innovative Designs. Powerful Solutions.

Features
- Suitable for high voltage applications
- 110 series popular in small application and floor maintenance
- DK/EK series popular in industrial motor control markets

Specifications
- -73 suffix bat style unsealed toggle
- Operating temperature: 0°F to 150°F (-17.8°C to + 65°C)
- All 6A @ 125V, 3A @ 250V, except DK and EK
- DK284 8A @ 250V, 16A @ 125V
- EK 20A @ 125V, 10A @ 250V
- Mounting hole: 0.500″ (12.70 mm)

G SERIES TOGGLE SWITCHES

RoHS Compliant Available

Carling Technologies™ Innovative Designs. Powerful Solutions.

Features:
- Easy to integrate into a variety of applications
- Also appropriate for low voltage DC applications

Specifications:
- 10A at 250VAC; 15A at 125VAC; ¾ HP at 125-250VAC
- Operating temperature: 32F° to 185°F (0° to 85°C)
- Bat actuator styles listed
- Paddle actuator style also available; *go online or call.*

XT SERIES TOGGLE SWITCHES

RoHS Compliant Available

EATON

Features:
- High standard horsepower rating
- Industry standard 0.480″ diameter mounting hole
- For use with: Household appliances, industrial machinery, medical equipment, rail systems, and lab equipment

Specifications:
- Contact rating: 20A at 125VAC; 10A at 277VAC
- Contact resistance: 50
- Operating temperature: 0°C – 65°C
- UL recognized component for Canada (cUR marked): File E2702

- Current Ratings (Maintained): 20A Res., 15A Ind.
- 5A Lamp Load 28VDC
- 18A, 1/4hp @ 125VAC
- 9A, 1/2hp @ 250VAC
- Temperature Range: -85°F to 160°F

One Pole Two Pole Four Pole

Offer highest degree of environmental seal. Fine silver stationary contacts provide lower level current performance. Silver-plated cadmuim oxide moveable contacts for improved higher current performance. Screw terminals. 15/32"-32 threaded bushing, with 0.076" keyway slot. Self-extinguishing base material. *Can use w/ switch guards, order online or call.*

100 SERIES MINIATURE TOGGLE SWITCHES

RoHS Compliant Available

E-SWITCH

- Voltage rating: 120VAC, 28VDC
- Current rating: 5A
- Mechanical life: 40,000 Make-and-Break Cycles
- Electrical life: 6,000 at Full Power
- Contact resistance: 10mOhms Max. Initial
- Insulation resistance: 1,000MOhms Min.
- Operating temperature: -30°C to 85°C
- Torque: Max. 5kg-cm (70 ounce-inch)

ST SERIES 20 AMP POWER TOGGLE SWITCHES

RoHS Compliant Available

E•SWITCH®

Features
- Heavy Duty Rating with UL Approvals
- Many Functions Available
- Tab, Screw, and Solder Terminal Options
- Rubber Boot for Water and Dust Protection

ST1 Series ST2 Series ST3 Series

Specifications
- 20A 125VAC [cULus]
- 15A 250VAC [cULus]
- 2HP 125-250VAC [cULus]
- Operating temperature: -20°C to 85°C
- Electrical life: 6,000 Cycles
- Contact resistance: 50 mohm Max.
- Insulation resistance: 800 Mohm Min. at 500VDC
- Dielectric strength: 1,500VAC for 1 Minute

MICRO SWITCH NT SERIES SEALED TOGGLE SWITCHES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Available with raised panel standoff and "O"-ring seal
- Screw terminals
- Meets NEMA 3, 3R, 4 and 13 as well as IP67 and IP68
- Step-design case for added space between terminals preventing shorting
- Spring-loaded actuating mechanism provides excellent tactile feedback
- High-impact strength, non-tracking case enhances electrical stability
- Temperature Range: –40°C to 71°C (–40°F to 160°F)
- UL Recognized, CSA Certified, CE Compliant

Designed to meet severe environment application needs for a rugged, cost-effective toggle switch. Quality construction features include a one-piece seal between the toggle lever and bushing, and between the cover and case. Terminal inserts are molded into the high-impact strength thermoplastic case. Includes mounting hardware. "NONE" in table indicates toggle lever is blocked from these positions. Toggle becomes 2-position with center being one extreme position. See table below for electrical ratings. 15/32"-32 UNS thread. Mfg. part nos. with **prefixes 61** and **62** denote new version with raised panel standoff and "O"-ring seal.

MICRO SWITCH NT SERIES FLAT BASE, SEALED TOGGLE SWITCHES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features

- Quick-Connect
- Meets NEMA 3, 3R, 4 and 13 as well as IP67 and IP68
- Flat Base With Quick-Connect Terminals Mating Connectors are Available Separately; *go online or call*
- Spring-Loaded Actuating Mechanism Provides Tactile Feedback
- High-Impact Strength, Non-Tracking Case Enhances Electrical Stability
- Temperature Range: –40°C to +71°C (–40°F to +160°F)
- UL recognized, CSA certified, CE Compliant

Designed to meet severe environment application needs for rugged cost-effective manual switches. Identical to the stepped base style in construction and features. Allows for PC Board or connector use for easy wiring/connection. See table below for electrical ratings. 15/32"-32 UNS thread. Mounting hardware included.

SERIES 19A TOGGLE SWITCH GUARDS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Rugged spring-loaded design provides protection against accidental actuation
- Perfect for a variety of applications: Mil-Spec 19PA184-NT for aviation and military, cost effective 19PA217-NT for applications such as industrial work platforms and auto racing

Specifications:
- Designed for use with 2 position standard toggle switches
- Base faceplate is black steel
- Mounting hole accepts 15/32" mounting stems

TOGGLE SWITCHES AND ACCESSORIES

TBAR® A Division of Olympic Controls Corp.

- Dust-Tight Seal
- Rated 1A-5A
- Form C Contacts
- Available in 12 to 144 Pole, Double Throw, Maintained Action
- Connector Packages and Pre-Wired Connectors Available

Protect against normal ambient dust conditions. Designed for use in a controlled environment such as test areas, computer control rooms, broadcast studios and network management centers. **802 series** is used for control and indicator circuits and has a 1A to 5A switching capacity. **902 series** is designed to switch dry circuits to a maximum of 1A for use in data, thermocouple and instrumentation circuits.

F SERIES TOGGLE SWITCHES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Specifications
- Contact rating : 6 A @250 VAC, 6 A @125 VAC
- Gold contact : 0.4 VA max. 20 V AC/DC
- Electrical life : 25,000 to 50,000 cycles
- Mechanical life : 50,000 to 100,000 cycles
- Contact resistance : Max. 10 mOhm
- Insulation resistance : Min. 1,000 MOhm
- Dielectric strength : 1,000 VAC for 1 min.
- Actuation force : Max. 19.6 N
- Panel cut-out : 6.2 mm

Features
- Wide choice of toggles, rockers, and paddles
- Wide range of switch functions
- Terminals are gold-flashed to prevent oxidation and for ease of soldering

Applications
- Industrial
- Instrumentation
- Medical equipment

ALCOSWITCH TT SERIES SUBMINIATURE TOGGLES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5

Fig. 6 Fig. 7 Fig. 8 Fig. 9 Fig. 10 Fig. 11

TT Series fit 0.100″ grid PC. Units indicating letter **"G"** in mfg. part no. have gold contacts rated 0.4VA max. @ 20VDC or peak AC; other **TT** units have silver contacts rated 3A, 125VAC or 28VDC resistive. Mfg. part no. code for PC terminal table below: **PC** = straight terminals, **RA** = right angle, **VRA** = vertical right angles. Mfg. part no. suffix indicates actuator dimension and bushing: **1** =0.21″, **2** =.29″, **3** =.37″, **6** =.590″, **7** =.485″, **8**=.530″, **9**=.415″. **T** = 10-48 bushing, **T1/4** = ¼-40 bushing.

ALCOSWITCH INDUSTRIAL-RATED AC/DC TOGGLE SWITCHES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Quick-make, quick-break action switches feature nonteasable, self-cleaning, wiping action contacts. All feature On-None-Off switching action *except* **Mfg. Part No. 8690K2** which is On-None-On. Units are one-hole mounting and have screw terminals. Mounting hardware, consisting of one hexagon locknut and one nickel-plated facenut, and terminal hardware are furnished unassembled. 0.071″ wide x 0.038″ deep keyway provides anti-rotation feature.

SHAFT LOCKS

RoHS Compliant Available

EHC America's Largest Selection of Knobs For Over 45 Years
Electronic Hardware Corporation

Prevent control shaft from rotating under shock, vibration, or accidental contact. Tapered nylon collar grips control shaft tightly and exerts even, frictional drag. All are shaft-type locks except **SL-110B**. **Mfg. part no. SL-110B** is a knob-type lock, and should be used with **90 series** or larger knobs. **Mfg. part no. SL-105B** has a shaft diameter of ⅛″; all others ¼″. Mount in place of nut and washer on most potentiometers.

Shaft Lock Knob Lock

SPLASHPROOF TOGGLE AND PUSHBUTTON SWITCH SEALS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- For toggle, pushbutton switching applications.
- Protect against contaminants such as dirt, dust, gas, liquids
- Sealing boots are flexible black neoprene
- **Mfg. part no. BP5890** mount color is nickel
- **Mfg. part no. BP5900** mount color is black.

1-AXIS ACCELEROMETER - GF1 SERIES

RoHS Compliant Available

Panasonic

Features

- IP67 enclosure
- Electrostatic capacitance detection
- High reliability: superior offset voltage charecteristics
- Fast response: 15ms (typ.)
- Compact size: 58mm x 36.5mm x 33mm (2.283″ x 1.437″ x 1.299″) for direct mount

Direct Mount

Bracket

Applications

- Inclination detection (for improved safety and operability) in agricultral machines, construction machines, and mobility vehicles
- Photovoltaic station power plant, solar tracking for panels
- Automotive: 4WD ABS control and idling stop system

SENSORS – AIRFLOW

AWM SERIES HIGH-FLOW MASS AIRFLOW SENSOR

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- 200 SLPM Flow Range
- 8-15VDC Excitation Voltage, 60mW Power Consumption
- 5VDC Ratiometric Output (@ 10VDC Supply)
- Low Pressure Drop: 1" H_2O Typical
- 6ms Response Time
- Provided With Amp 103956-3 Connector
- 22mm Diameter Tapered Inlet/Outlet Ports

AWM series flow sensors feature extremely low hysteries and repeatability error (less than 0.35% of reading) and are inherently accurate over the life of the sensor. SLPM = Standard Liters Per Minute.

Mfg. Part No.	Stock No.	Price Each 1-9
● AWM720P1	04M8266	134.68

(68355)

AWM 40000 SERIES MICROBRIDGE MASS GAS-FLOW SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Provides mass gas-flow sensing in a unique manifold mount package. Provides highly accurate, stable, and repeatable performance. Features: precision ceramic flow tube resulting in a non-outgassing flow channel, high common mode pressure capability (250 PSI max.), high operating temperature (to +125°C), and hydrogen compatibility. Recommended excitation: 10VDC. Dimensions: 1.2H x 0.5W x 1.3"D. Response time: 1 msec. typ. Additional flow ranges available; SLPM = Standard Liters Per Minute; SCCM = Standard Cubic Centimeters Per Minute *; go online or call.*

AWM 5000 SERIES MICROBRIDGE HIGHFLOW AIRFLOW SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Sensors feature a venturi-type flow housing. The microbridge chip is in direct contact with the flow stream, greatly reducing error possibilities due to orifice or bypass channel clogging. Maximum pressure drop of 2.25" H_2O. Maximum output voltage: 5.0VDC. Supply voltage (recommended excitation): 10VDC. Common mode pressure 50PSI max. Gas calibration: CO_2 and Argon are available. Weight: 30 grams. Operating temperature range: –20°C to +70°C. Response time 60 msec max. Dimensions: 1.4H x 1.3W x 6.4" L. SLPM = Standard Liters Per Minute.

MICROBRIDGE MASS AIRFLOW SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Operates on theory of heat transfer due to mass airflow directed across surface of a micromachined silicon sensing element. Output voltage mV or V varies in proportion to mass air or other gas flow through inlet and outlet ports of package. Supply voltage (recommended excitation): 10VDC. Common mode pressure: 25PSI max. Weight: 10.8 grams. Operating temperature range: –25°C to +85°C. Response time: 1.0 msec typ. Dimensions: 1.2H x 0.6W x 1.2"D. SCCM = Standard Cubic Centimeters Per Minute.

HONEYWELL ZEPHYR™ DIGITAL AIRFLOW HAF SERIES HIGH ACCURACY SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Long Port, Fastener Mount

22mm O.D. Tapered Male Fitting Port

Manifold Mount Port

Features

- Full calibration and temperature compensation typically allow customers to remove additional signal conditioning components from the PCB, reducing PCB size and costs often associated with those components (e.g., acquisition, inventory, assembly)
- Fast response time allows a customer's application to respond quickly to airflow change, important in medical (i.e., anesthesia) and industrial (i.e., fume hood) applications
- High 12-bit resolution increases ability to sense small airflow changes, allowing customers to more precisely control their application
- Bidirectional flow sensing capability eliminates the need for two airflow sensors, helping customers reduce production costs and implementation time
- Insensitivity to mounting orientation allows customers to position sensor in the most optimal point in the system, eliminating concern for positional effects
- Insensitivity to altitude eliminates customer-implemented altitude adjustments in the system, easing integration and reducing production costs by not having to purchase additional sensors for altitude adjustments
- RoHS-compliant materials meet Directive 2002/95/EC

MEMS FLOW SENSORS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

Specifications:
- Applicable gas: Air
- Supply voltage: 26.4VDC, 5-10VDC
- Output voltage: 6VDC, 0.5-1.5VDC
- Current consumption: 15mA
- Operating humidity: 85% RH
- Operating temperature: -10°C to 60°C

Features:
- Stable output across full scale
- Low power consumption
- Dust resistant design

ASF1400/ASF1430 DIGITAL MASS FLOW SENSORS FOR GASES

RoHS Compliant Available

SENSIRION THE SENSOR COMPANY

- Fully calibrated and temperature compensated
- Linear digital output signal (RS-232)
- Fast response time (**ASF1400**: 150ms / **ASF1430**: 5ms) § Rugged chemically innert PBT housing
- CE-certified / FCC (CFR 47)
- Leading CMOSens® Technology for superior performance
- Unbeatable price-performance ratio
- Easy-to-use due to calibration & standard digital interface

The **ASF1400** and **ASF1430** gas flow sensors enable extremely accurate bidirectional measurement of fast changing gas flow over four orders of magnitude. They are fully calibrated and temperature compensated and provide fast response time at lowest power consumption. The leading performance is based on Sensirion's CMOSens® Technology. Mounted in rugged, chemically inert PBT housing the **ASF1400/1430** is suitable for a wide range of applications. Such include mass flow metering for process control, medical and HVAC applications.

Mfg. Part No.	Calibrated for Gas Type	Range	Stock No.	Price Each 1-9

CURRENTWATCH SENSORS

RoHS Compliant Available

EATON

- AC current sensing up to 2000 amps, DC current sensing up to 300 amps
- Solid or split-core housings for easy installation in new or retrofit applications
- Field adjustable current ranges allow for increased flexibility and reduced stock
- Discrete or analog outputs (4 - 20 mA, 0 - 5 V, 0 - 10 V)
- Five-year warranty, UL and CE approvals

These devices are ideal for providing status information or protection for electrified equipment. CurrentWatch products are available in both switch and sensor variety. Current switches are set to trip at an over or undercurrent condition, are designed with fixed or adjustable trip points and are ideal for providing information on AC electrified equipment. Current sensors operate by monitoring current flow in equipment. The current magnitude is converted into a linear and proportional analog signal (4 - 20 mA, 0 - 5 V or 0 - 10 V). DIN-rail mountable housing and DIN-rail mounting accessory. Visual LED indicators for easy setup and status. Self-powered models available, normally-closed or normally-open configurations.

MINIATURE OPEN-LOOP/WIRED OPEN-LOOP CURRENT SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

CSLS Series **CSLT Series** **CSLW Series**

- Sensed current type: AC or DC
- Output tyype: Sink/Source
- Supply current: 9mA max.
- Supply voltage: 4.5 Vdc to 10.5 Vdc
- Response time: 3 µs
- Operating temperature: -25°C to 100°C

Open-loop current sensors incorporate our SS490 Series miniature ratiometric linear Halleffect sensor (MRLTM). The sensing element is encapsulated in a printed circuit board-mountable plastic package.

OPEN-LOOP CURRENT SENSORS

Mfg. Part No.	Sensed Current Range	Package Type	Sensitivity	Stock No.	Price 1-49
CSLS6B60	-60A to 60A	PCB Right Angle Mount	15 mV/AT	62M4096	15.83
CSLT6B100	-100A to 100A	PCB Right Angle Mount	15 mV/AT	62M4097	12.10
WIRED OPEN-LOOP CURRENT SENSORS					
CSLW6B1	-1A to 1A	PCB Bottom Mount	1020 mV/AT	62M4098	21.48
CSLW6B200M	-200mA to 200mA	PCB Bottom Mount	5.1 mV/AT	62M4099	29.16
CSLW6B40M	-40mA to 40mA	PCB Bottom Mount	15 mV/AT	62M4100	21.62

CSLA SERIES HALL-EFFECT LINEAR OUTPUT CURRENT SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

CSLA series solid-state sensors provide output voltage directly proportional to current flow. AC or DC sensing. 8-16VDC supply for **CSLA1 series**. 6-12VDC supply for **CSLA2 series**. **CSLA2 series** feature temperature compensation circuitry. Offset voltage: Vs/2. Output voltage swings from 25% of Vs to 75% of Vs. **NOTE:** Thru-hole design does not require electrical connection to sensed current. Max. sensed current is only limited by the conductor size. 3µsec. response time. Sensors with 57A to 950A capabilities also available; *go online or call.*

CSN SERIES HALL-EFFECT NULL-BALANCE LINEAR CURRENT SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

CSNA111 **CSNE151**

CSN series solid-state sensors measure AC, DC, and impulse currents. Operation based on the Hall-effect principle and the null-balance or zero magnetic flux method (feedback system). The magnetic field on the sensor is constantly controlled at zero. The amount of current required to balance zero flux is the measure of primary current flowing through conductor multiplied by the ratio of the primary to secondary windings. ±0.5% accuracy. Response time: 1µsec. NOTE: Thru-hole design does not require electrical connection to the sensed current. Max. sensed current is only limited by the conductor size. Sensors with up to 1200A of sensed current also available; *go online or call.*

Mfg. Part No.	Supply Voltage	Sensed Current (peak)	Nominal Output	Stock No.	Price Each
● CSNA111	±15VDC	±70A	50mA	10M8411	41.88

AC AND DC CURRENT SENSORS AND SWITCHES

UL

F.W. BELL

Mfg. part nos. 155125 thru 155128 sensors provide 4-20mA output proportionate to AC current. **SCC series** provide either a 4-20mA or a 0-20mA unipolar output proportional to AC or DC current. **SCV series** provides either a 0-5V or 0-10V unipolar output proportional to AC or DC current. **CS/CSS series** detects AC current from 1A to 150A and provides a switched output when the current exceeds the adjustable switch point. Adjustment is made via multi-turn trim pot. **Mfg. part nos. 115127, 115128,** as well as **CSS, SCC,** and **SCV series** clamp around existing wiring for easy installation. **Mfg. part nos. 115125** thru **155128** and **CS/CSS series** feature simple 2-wire connection and interface to PLCs. **SCC** and **SCV series** require 24VAC/VDC operating voltage. All models are panel-mounted, feature jumper range selection. UL listed. Higher current units are available. *Go online or call.*

Mfg. Part No.	Range AC (A)	Output	Aperture	Stock No.	Price Each

IHA SERIES HIGH FREQUENCY CURRENT SENSORS

RoHS Compliant Available

F.W. BELL

Response <1µs. Frequency range DC to 50kHz. Linearity ±1%. Operating voltage ±12VDC to ±15VDC. Temperature range 0°C to +75°C. Case design allows for either panel or PCB mounting by use of appropriate connector; *go online or call.* Mounting tabs accept No.6 screws for placement on PCB or panel. Ideal for use in solid-state circuits.

Mfg. Part No.	Current Range	Full Scale Output	Aperture	Stock No.	Price Each
IHA-25	±25A	±1V	0.38″	92F4411	185.35
IHA-100	±100A	±5V	0.38″	92F4412	208.68

(3459)

CLOSED LOOP CURRENT SENSORS

F.W. BELL

CLN-25

CLN-50

Closed loop sensors null out the flux produced by the current through the aperture. Output is a current that is proportionate to the aperture current divided by the number of turns on the coil. **Mfg. part nos. CLN-25/50/100** mount directly on PCB. **Mfg. part nos. CLN-200/1000** mounts on the panel. Response time less than 1µs. Linearity 0.2%. Frequency range: DC to 100kHz min.

Mfg. Part No.	Nom. Current (A_{RMS})	Output (mA/A)	Operating Voltage (±VDC)	Aperture	Stock No.	Price Each
CLN-25*	25	1	15	PCB	83F2354	44.27
CLN-50	50	1	15	0.39 x 0.53″	83F2355	41.94
CLN-100	100	1	15	0.39 x 0.53″	83F2357	104.31

CLSM-1000	1000	0.2	18	1.58″ dia.	22J0781	174.00

***CL-25** offers choice of ranges via connection to pins on sensor: 5, 6, 8, 12 or 25 Arms.
(3458)

NT SERIES AND MS-15 CURRENT SENSORS

F.W. BELL

NT-5

NT-15

NT-25

NT-50

MS-15

NT series thin footprint current sensors mount directly to PC Board. All electrical connections are via thru-hole pins. Small size (less than 0.25″ wide) allows placement in applications with limited board space. Measure AC and DC currents. Frequency Response DC to 50kHz. Linearity ±1%. Response time <2µs. Sensors operate from +0°C to +70°C. Ideal replacement for shunts where electrical isolation is required.

Mfg. Part No.	Nom. Current (Arms)	Full Scale Output	Voltage (VDC)	Stock No.	Price Each
NT-5	5	2.5V	±15	16F6749	39.51
NT-15	15	2.5V	±15	16F6750	35.55
NT-25	25	2.5V	±15	16F6751	37.08
NT-50	50	2.5V	±15	16F6752	45.12

MS-15 CURRENT SENSOR
The miniature MS sensor measures DC and AC currents and provides electrical isolation between the circuit being measured and the output. The unipolar power source, small size and low cost make it the most cost effective solution for Hall effect current sensing in the industry. Supply voltage is +5VDC.

Mfg. Part No.	Measurement Range	Output	Stock No.	Price Each
MS-15	(± 15A)	0.08 - 0.15 V/A	49H8118	11.39

(3586)

ULTRASONIC FLOW METERS

RoHS Compliant Available

cynergy3 components

- Non-invasive sensor technology
- Fully electronic, no moving parts
- Automatic viscosity and temperature compensation
- Pulse or analog output selectable
- Low pressure drop
- LED indication of no liquid & flow rate

UF08B100

UF25B100

Supply voltage: 8-24VDC. Response time: better than 0.1s. Flow tube material: glass-filled plastic. Connection thread: 0.375″ straight tube. Case material: ABS black. Connection: 8 core, PVC sheathed, 100cm long standard.

Mfg. Part No.	Pipe Size (mm)	Flow Range (L/min.)	Max. Pressure	Max. Temp. (°C)	Stock No.	Price Each 1-4

FS-550 SERIES HIGH PRESSURE PADDLE TYPE FLOW SWITCHES

Gems Sensors & Controls — Our Experience • Your Solution

- Pipe Line Size: 1¼″ and Up
- Maximum Operating Pressure: 2000 PSIG
- Pressure Drop: 3 PSIG Maximum
- Operating Temperature: -30°F to +300°F (-34.4°C to +148.9°C)
- Switch: SPDT, 20VA

Standard **FS-550** switches sense liquid flow in either direction to monitor flow/no-flow conditions. They are supplied in two paddle lengths. The paddle is trimmed during installation to permit switch actuation at the desired flow rate. As flow increases in a pipe, the paddle of the switch pivots to move out of the liquid path, producing less than 3 PSIG of pressure drop regardless of pipe size.

Mfg. Part No.	Paddle Length	Housing Material	Switch Operation	Stock No.	Price Each 1-9
29609	Long	Brass	N.O. or N.C.	92C8765	252.93
29608		316 SS		92C8764	384.79

(72580)

FS-927 SERIES COMPACT FLOW SWITCHES

RoHS Compliant Available

Gems Sensors & Controls — Our Experience • Your Solution

- Measuring only 1″ x 2¾″
- Brass Housing and Piston
- 316 Stainless Steel Spring
- Operating Pressure: 1000 PSIG Max.
- Operating Temperature: -20°F to +200°F (-29°C to 93.3°C)
- Switch: SPST-NO @ No Flow, 20VA
- Inlet/Outlet Ports: ¼″ NPT
- Designed for us with water and oil
- Ideal for coolant or lubricant monitoring in portable equipment and many other applications with space constraints

Mfg. Part No.	Flow Settings GPM	Stock No.	Price Each 1-9
70820	0.10	92C8782	114.85
70821	0.25	92C8783	119.75

(72577)

FS-925 SERIES GENERAL PURPOSE FLOW SWITCHES

Gems Sensors & Controls — Our Experience • Your Solution

- Brass Housing
- Piston in Brass Housing: Polysulfone for Water, Brass for Oil and Air
- 316 Stainless Steel Spring
- Max. Operating Pressure Rating: 1000 PSIG
- Operating Temperature with Brass: -20°F to +300°F (-29°C to +148.9°C)
- Switch: SPDT, 20VA
- Inlet/Outlet Ports: ¼″ NPT

➤CONTINUED➤

FS-925 SERIES GENERAL PURPOSE FLOW SWITCHES (CONT.)

FS-925 series switches provide accurate detection of excessive or insufficient flow rates in such applications as protecting against loss of fluid flow in hydraulic systems, assuring proper coolant flow in semiconductor processing equipment, monitoring high pressure lubrication systems and ensuring proper air flow in water/waste systems.

Mfg. Part No.	Flow Settings GPM, ±10%	Stock No.	Price Each 1-9
26914	0.10	92C8758	229.70
26915	0.25	92C8759	231.71

(72576)

FS-150 SERIES FLOW SWITCHES

- Port Size: ½″ NPT
- Primary Construction Material: Polypropylene
- Ryton® -R4, 316 Stainless Steel Piston
- 316 Stainless Steel Spring
- Maximum Operating Pressure: 200 PSIG @ +70°F to +150°F (+21.1°C to +65.5°C); 150 PSIG @ +150°F to +212°F (+65.5°C to +100°C)
- Operating Temperature: 0°F to 212°F (-17.8°C to +100°C)
- Length: 5 29/32″
- Quick connect terminals: ¼″
- Switch: SPST, 20VA

These slim, inline switches reduce pressure drop to a minimum. Liquids are able to smoothly pass around the piston and flow through the switch with little pressure loss to the down stream line.

Mfg. Part No.	Flow Settings GPM	Stock No.	Price Each 1-9

MODEL 41 PRECISION LOAD CELLS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Two stabilizing diaphragms reduce side-loading effects
- Stainless steel welded construction
- Measures wide range of both tension and compression load forces from 50lb to 50000lb
- Shunt calibration data included
- Applications include tube mills, extruding processes and weighing

Specifications:
- Low profile, "pancake" type load cell
- Threaded hole runs completely through center of cell
- Bonded foil strain gage type
- Infinite resolution
- Operating temperature: -65°F to 250°F
- Mating connector and cable assemblies not included; order separately below

MODEL 13 SUBMINIATURE LOAD CELLS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Stainless steel construction
- Measure load ranges from 1000g to 1000lbs
- mV/V output
- Subminiature dimensions, with height ranging from 0.13 to 0.25in, allow easy incorporation into limited applications

Specifications:
- Infinite resolution
- Electrical termination: Integral 5ft twisted cable with balance board included 2ft from load cell
- Foil strain gage
- Shunt calibration data included
- Operating temperature: -65°F to 250°F

MODEL 53 LOW COST LOAD CELLS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Designed for low cost production and testing applications
- Stainless steel welded construction
- Excellent long-term stability and reliability under severe operating conditions
- Integral load button machined as part of the load cell

Specifications:
- ±0.25% non-linearity
- Infinite resolution
- Output: 2mV/V
- Operating temperature: -65°F to 250°F
- Bonded foil strain gage
- Shunt calibration data included
- Integral 5ft teflon cable termination

UNIVERSAL IN-LINE AMPLIFIERS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- For applications where transducer must be located away from the display
- Long signal transmission with minimal signal loss
- Compatible with any strain gage sensor
- Meets NEMA 4 and IP66 ratings for water resistance

Specifications:
- Operating voltage: 18-32VDC
- Linearity: 0.02% F.S.

Mfg. Part No.	Model	Output	Stock No.	Price Each 1-5

MODEL 31 PRECISION LOW AND MID RANGE LOAD CELLS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Stainless steel welded construction
- Miniature design
- Measure wide range of both tension and compression load forces from 250g to 1,000lbs
- Shunt calibration data included
- Other applications include cable tension and electromechanical parts testing

Specifications:
- Male threads
- Infinite resolution
- Foil or semiconductor strain gage type
- Integral 5ft. teflon cable termination
- Operating temperature range: -65°F to 250°F
- Call for higher ranges greater than 2,000lbs

LCGD SERIES MINIATURE INDUSTRIAL COMPRESSION LOAD CELLS

NEW

NEWPORT

MADE IN USA

Features:
- Miniature size, low-profile package
- Excellent long-term stability, high accuracy
- Rugged all stainless steel construction withstands severe industrial environments
- 5-Point NIST traceable calibration with 59k ohm shunt cal data
- For mounting on a flat surfaces
- Load button machined is integral part of design
- Electrical connection: 1.5m (5') shielded cable
- IP65 Protection class

Specifications:
- Excitation: 10VDC
- Output: 2mV/V (nom.)
- 5-Point calibration: 0%, 50%, 100%, 50%, 0%
- Linearity: ±0.25% FSO
- Hysteresis: ±0.20% FSO
- Repeatability: ±0.10% FSO
- Zero balance: ±2% FSO
- Operating temperature range: -54 to 121°C (-65 to 250°F)
- Thermal effects: Span ±0.018% rdg./°C / Zero: ±0.009% FSO/°C
- Safe overload: 150% of capacity
- Ultimate overload: 300% of capacity
- Bridge resistance: 350Ω min.

LC302 SERIES 0.75" DIA. STAINLESS STEEL COMPRESSION LOAD CELLS

NEW

NEWPORT

MADE IN USA

Features:
- Low 0.5" (13mm) profile, small 0.75" (19mm) dia.
- Rugged all stainless steel construction for long life
- High-quality strain gage proivides long term reliability
- 5-Point calibration with 59kohm shunt cal data
- Built in load button for easy installation
- Ideal for robotic and test bench applications
- IP5 Protection class
- 1.5m (5') 4-Conductor shielded cable

Specifications:
- Excitation: 5VDC (15VDC max.)
- Output: 1mV/V nominal
- Accuracy (FSO): ±0.5% (linearity, hysteresis, repeatability combined)
- 5-Point calibration: 0%, 50%, 100%, 50%, 0%
- Zero balance: ±2% of FSO
- Operating temperature range: -54 to 125°C (-65 to 250°F)
- Thermal effects: Zero 0.009%/Span 0.036% FSO°/F
- Safe overload: 150% of capacity
- Ultimate overload: 300% of capacity
- Deflection: 0.03 to 0.08mm (0.001 to 0.003")
- Bridge resistance: 350Ω min.

LCKD SERIES SUBMINIATURE INDUSTRIAL LOAD CELLS

NEW

NEWPORT

Features:
- Miniature size, low profile design
- Rugged all stainless steel construction
- High-performance strain gauges provide superior linearity and stability
- Temperature compensation through a miniature circuit board in load cell's cable
- 5-Point NIST traceable calibration included for accurate installation
- Designed to mount on smooth, flat surfaces
- Measures load ranges from 1kg to 1000 lb.

Specifications:
- Excitation: 5VDC (7VDC max.)
- Output: 2mV/V nominal
- 5-Point calibration (in tension): 0%, 50%, 100%, 50%, 0%
- Linearity (FSO): ±0.25%
- Hysteresis (FSO): ±0.25%
- Repeatability (FSO): ±0.10%
- Zero balance: ±2% of FSO
- Operating temperature range: -54 to 121°C (-65 to 250°F)
- Thermal effects: Zero 0.009%/Span 0.018% FSO/°C
- Safe overload: 150% of capacity
- Ultimate overload: 300% of capacity
- Bridge resistance: 350Ω min.
- Full scale deflection: 0.001 to 0.003"

LC101 AND LC111 SERIES "S" BEAM LOAD CELLS

NEW

NEWPORT

Cable-Style

Features:
- High accuracy at economical price
- Choice of cable- or connector-style
- All stainless steel construction ideal for harsh industrial applications
- 0.25% interchangeability for multiple load cell applications
- 5-point NIST-traceable calibration with 59K shunt data included
- Measures wide range of tension load forces

Specifications:
- Excitation: 10VDC, (15VDC max.)
- Output: 3mV/V ±0.0075mV/V
- Linearity (FSO): ±0.03%
- Hysteresis (FSO): ±0.02%
- Repeatability (FSO): ±0.01%
- Zero balance (FSO): ±1%
- Safe / Ultimate overload: 150% / 300% of capacity
- Input/output resistance: 350 ±10Ω
- Full scale deflection: 0.25 to 0.5mm
- Operating temperature: -40°C to 93°C (-40°F to 200°F)

GE's HUMIDITY CHIPCAP2 TEMPERATURE SENSOR

RoHS Compliant Available

Amphenol Advanced Sensors

Features:
- Fully calibrated and temperature compensated
- Digital or analog output with alarm function
- Free operating voltage
- Low current consumption
- SMD package for automated assembly
- Reliable in harsh environments
- Sleep mode option available for reducing power consumption

Applications:
- Energy saving HVAC control: air conditioning, refrigeration, indoor air quality, vent fans, home appliances, humi/dehumidifiers
- Process control and instrumentation: medical instruments, hand-held devices, weather stations, food processing, printers, RFIDs
- Automobile and transportation: cabin climate control, defogging control condensing preventive device
- Medical: Nebulizers, oxygen air, CPAP/Sleep Apnea devices

Specifications:
- Accuracy: ±2% or ±3% RH, ±0.3°C
- Resolution: 14 bit — 0.01% RH, 0.01°C
- Repeatability: ±2% RH, ±0.1°C
- Supply voltage: 2.7V to 5.5V
- Supply current (IDD): 750 µA (typical)
- Operating temperature range: -40°C to +125°C
- Operating RH range: 0 to 100% RH (non-condensing)
- Package size : (4mm x 6mm x 1.9 mm high)

GE's HUMIDITY CHIPCAP2 TEMPERATURE SENSOR (CONT.)

ChipCap 2™ is a capacitive polymer sensor chip and a CMOS integrated circuit with EEPROM that are integrated into one embedded system in a reflow solderable SMD package. Individually calibrated and tested, ChipCap 2™ performs at ±2% from 20% to 80% RH (±3% over entire humidity range), and is simple and ready-to-use without further calibration or temperature compensation. ChipCap 2™ provides linear output signals in various interfaces: I²C interface, PDM convertible to analog signal, and alarm function for preset control at min./max. humidity.

HIH-4000 SERIES HUMIDITY SENSORS

RoHS Compliant Available

Honeywell Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

FEATURES
- Molded thermoset plastic housing
- Linear voltage output vs %RH
- Laser trimmed interchangeability
- Low power design
- High accuracy
- Fast response time

Fig. 1

Fig. 2

A more robust version of the **HH 3610 series, HIH-4000 series** humidity sensors typically draw only 200µA of current, ideally suited for low drain, battery operated systems. Delivers instrumentation-quality RH (Relative Humidity) sensing performance in a competitively priced, solderable SIP (Single In-Line Package). Available in two lead spacing configurations, the RH sensor is a laser trimmed, thermostet polymer capacitive sensing element with on-chip integrated signal conditioning. The sensing element's multilayer construction provides excellent resistance to most application hazards such as wetting, dust, dirt, oils and common environmental chemicals.

Mfg. Part No.	Fig.	Description	Lead Pitch (in.)	Stock No.	Price Each 1-9

HIH-4030/31 HUMIDITY SENSORS

RoHS Compliant Available

Honeywell Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

- Molded thermoset plastic housing, Laser trimmed interchangeability
- Near linear voltage output vs %RH
- Low power design, Enhanced accuracy, Fast response time
- Stable, low drift performance
- Chemically resistant

Direct input to a controller or other device is made possible by this sensor's near linear voltage output. With a typical current draw of only 200 uA, the HIH-4030/4031 Series is often ideally suited for low drain, battery operated systems. Tight sensor interchangeability reduces or eliminates OEM production calibration costs. The HIH-4030/4031 Series delivers instrumentation-quality RH (Relative Humidity) sensing performance in a competitively priced, solderable SMD. The HIH-4030 is a covered integrated circuit humidity sensor. The HIH-4031 is a covered, condensation-resistant, integrated circuit humidity sensor that is factory-fitted with a hydrophobic filter allowing it to be used in condensing environments including industrial, medical and commercial applications. The RH sensor uses a laser trimmed, thermoset polymer capacitive sensing element with on-chip integrated signal conditioning. The sensing element's multilayer construction provides excellent resistance to most application hazards such as condensation, dust, dirt, oils and common environmental chemicals. POTENTIAL APPLICATIONS Refrigeration equipment, HVAC (Heating, Ventilation and Air Conditioning), equipment, Medical equipment, Drying, Metrology, Battery-powered systems, OEM assemblies

TO-5 Package

TO-5 Package

Features:
- Linear voltage output vs. %RH
- Laser trimmed interchangeability
- High accuracy, fast response
- Chemically resistant
- Stable, low drift performance
- Built-in static protection
- Ideal for dew point and absolute moisture measurements
- TO-5 can housings

Applications:
- Refrigeration
- Drying
- Meterology
- Battery-Powered Systems

Specifications:
- Rh range: 0-100%RH
- Temperature range: –40°C to +85°C
- Accuracy: ±3.5%RH
- Voltage output: V_{OUT} = 0.00003(Sensor RH)^2+0.0281(Sensor RH)+0.820 Typical @ 25°C
- Temperature compensation: V_{OUT} = (0.0305+0.000044T-0.0000011T^2)(Sensor RH)+(0.9237-0.0041T+0.000040T^2) T = Temperature in °C

Replacement for the HIH-3602 series humidity sensor. TO-5 package provides hydrophobic sintered SST filtered for maximum protection in harsh or splash-prone environments. TO-5 slotted package provides gross mechanical protection and faster response time.

SENSORS – HUMIDITY • SENSORS – LIQUID LEVEL

HIH-5030/31 SERIES HUMIDITY SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:

- Surface Mount Device
- Complement our existing HIH-4030/4031 line of SMD humidity sensors by operating at lower supply voltage (down to 2.7 VDC)
- Supports demanding system performance, accuracy and response time over the entire humidity range of 0-100% RH
- Allows for application flexibility due to its small, space-saving housing profile
- Provides enhanced resistance to condensation, contaminants due to its multi-layer construction and hydrophobic filter
- Provides instrumentation-quality performance due to its near linear output
- Supply voltage: 3.3 V

Potential Applications:

Industrial:

- Air compressors
- Battery-powered systems
- HVAC
- OEM assembiles
- Process equipment
- Telecommunications cabinets

Medical:

- Infant incubators
- Microenvironments
- Sleep apnea equipment

SHT SERIES HUMIDITY AND TEMPERATURE SENSORS

RoHS Compliant Available

SENSIRION
THE SENSOR COMPANY

- Measurement range: 0-100%RH
- Response time: 8 sec.
- Temperature range: -40°C to +123.8°C

Single chip relative humidity and temperature sensor is fully calibrated and offers excellent long-term stability with ultra-low power consumption. The digital CMOSens technology integrates two sensors and readout circuitry on one single chip. The **EK-H2 Evaluation Kit** offers a "plug and play" solution for test and evaluation. Kit contains a set of two **mfg. part no. SHT11**, two **mfg. part no. SHT15**, two **mfg. part no. SHT75** sensors, the ASD11 microprocessor board (with LCD), a serial interface cable, a sensor interface cable and a power supply.

Mfg. Part No.	Humidity Accuracy (%RH)	Temperature Accuracy (°C)	Package	Stock No.	Price Each

OPTICAL LEVEL SENSORS FOR LIQUIDS

CE RoHS Compliant Available CARLO GAVAZZI

- Ideal for dectection of acids and bases
- Transistor or SCR output
- LED indication
- Housing material: Polysulphone

Infrared probe for liquid level detection based on refraction principle. Resistant to most acids and bases. LED indication for sensor on. Works well with: oil, wine, waste water, hydraulic fluid. Not recommended for use in environments with high ambient light (i.e., flourescent light or sunlight), or for use with any material which may coat or adhere to the tip of the sensor. **E** or **EP suffix**: 10-40VDC, 200mA, transistor output; **110TB suffix**: 115VAC, 100mA, SCR output. Thread: ⅜" ISO 228. 6' cable. Operating temperature: Max. +176°F. CE compliant.

SENSORS – LIQUID LEVEL

LIQUID LEVEL SENSORS — HORIZONTAL MOUNT

RoHS Compliant Available

cynergy3 components

- Quick installation
- Ideal for tanks with inaccessible tops or bottoms
- Many UL recognized components, file number E171218

RS70 series is designed for external fitting, achieving liquid tightness with high grade compression seal and **RS80 series** is designed for external mounting, achieving a seal with a ½″ NPT taper thread. Avoids need for access to inside of chamber. Ideally suited to uses where space or fitting time are prime considerations. Manufactured in a variety of materials with nitrite gaskets to suit most commonly used liquids. SPST-NO contacts. Switch action may be reversed by mounting the device with the orientation arrow pointing downwards, instead of the normal upwards direction. Minimum fluid SG: 0.85. Cable length: 1.0m. Cable size: 16/0.2 20AWG. Switching power max: 25VA. Switching current max: 0.6A. Switching voltage: 240VAC, 120VDC.

LS2050/52100 SERIES ALLOY SIDE MOUNT LIQUID LEVEL SWITCHES

Gems Sensors & Controls — Our Experience • Your Solution

LS-2050

LS-52100

These units solve the problem of point level sensing in tanks with inaccessible tops or bottoms or at intermediate locations in larger tanks. Operation is positive and dependable. The float pivots with changing liquid level, displacing a shuttle which magnetically actuates a hermetically sealed switch within the unit. Installation is through the tank side at the detection point.

TH800 AND LS-270 SERIES SPECIALTY LEVEL SWITCHES

RoHS Compliant Available

Gems Sensors & Controls — Our Experience • Your Solution

TH800

LS270

LS270

- Maximum Pressure: 150 psi
- UL Recognized, CSA Certified

TH800 series temperature level switch is a level monitoring and temperature switch in a single unit. It is intermediate in size and has a single-setting temperature sensor at the bottom of its stem. **LS-270 series** bracket mounting slosh shield is small, lightweight and extremely stable in nonstatic, highly contaminated liquids. Slosh shielding minimizes effects of turbulence and helps prevent interference by foreign material. Bracket-mounted to any convenient surface.

LLE SERIES LIQUID LEVEL SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Accurate Repeatable Switching Point
- Microprocessor Compatible
- Reverse Polarity, Over Voltage, Short Circuit and Transient Protection

Specifications:
- Termination: 250mm Flying Leads
- Operating Temperature: -25°C to 80°C (standard); -40°C to 125°C (high temperature)
- Supply Voltage (V_{CC}): +5VDC to +12VDC ±5%
- Supply Current (mA): 15mA Nominal (standard temperature) 5mA Nominal (high temperature)

Liquid level sensors incorporate a phototransistor trigger which provides a digital output that denotes the presence or absence of liquid. LED and phototransistor are housed within a plastic dome at the head of the device. When no liquid is present, light from the LED is internally reflected from the dome to the phototransistor. When liquid covers the dome, the effective refractive index at the dome-liquid boundary changes, allowing some light from the LED to escape. Therefore, the amount of light received by the phototransistor is reduced and the output switches, indicating the presence of liquid, making this method of liquid level sensing very fast, and almost instantaneous for water.

STANDARD TEMPERATURE

TUBE FLUID SENSORS

RoHS Compliant Available

TT electronics
OPTEK Technology

Features:
- Can identify if liquid is present in clear tubes that have a 1/16", 1/8", 3/16" or 1/4" outside diameter
- Opaque plastic housing enhances ambient light rejection
- Printed circuit board mounting or 24" wires

Applications:
- Non-contact fluid sensing
- IV fluid
- Oils and other petroleum products
- Colored fluids
- Toner fluids
- Water

OPB350 series liquid sensor is designed to work with 1/16", 1/8", 3/16" and 1/4" outside diameter clear tubes. When output reference circuitry is added, multiple output states such as "fluid present," "no fluid present" and "no tube present" can be recognized.

Mfg. Part No.	I_F(mA)	V_{BRCEO} (V)	$I_{C(ON)}$ Min. (mA)	Tube Size O.D. (in.)	On/ Off Ratio	Mount Type	Stock No.	Price Each 1-99

(85508)

TUBE LIQUID SENSOR SELF CALIBRATING MODULES

RoHS Compliant Available

TT electronics
OPTEK Technology

Features:
- Can identify if liquid is present in clear tubes that have an outside diameter of 1/16" [1.6mm], 1/8" [3.2mm], 3/16" [4.8mm], or 1/4" [6.3mm]
- Opaque plastic housing enhances ambient light rejection
- Printed circuit board mounting

Specifications:
- Operating temperature: -40°C to +85°C
- LED forward DC current: 15 mA Max.
- Output Phototransistor collector-emitter voltage: 24 to 30 V
- Input LED forward voltage 1.7V, reverse current 100 uA

The OPB350 series liquid sensor is designed to work with 1/16" [1.6mm] 1/8" [3.2mm], 3/16" [4.8 mm] and 1/4" [6.3 mm] outside diameter clear tubes. The **OCB350** series is configured to optimize the design effort needed to use a fluid sensor with the addition of self calibration circuitry. The **OCB350** series are easy to use requiring only a power supply.

LG01 FLOW SWITCH AND BUBBLE DETECTOR SENSORS FOR LIQUIDS

RoHS Compliant Available

SENSIRION
THE SENSOR COMPANY

- Maximum flow rate up to 220 ml/min (valid for H2O)
- Standard Switch Limit at 4.5 ml/min or 0.25 ml/min (valid for H2O)
- Air-/bubble detection enabled
- Fluid connections: 1/4-28 standard fittings for OD 1/8" (3.2 mm) or 1/6" (1.6 mm) plastic tubing
- Fast response below 100 ms
- Wetted materials: inert, bio-compatible (glass, PEEKTM, Teflon®)
- Supply voltage of 5....12V

The **LG01** Flow Switch sensor detects ultra-low liquid flow rates or the presence of air in fluidic systems and therefore makes them more reliable. The detection of liquid flows is possible within the range of a few ml/min and less. The sensor's output signal of either 0 or 5 volts indicates whether the current flow rate is above or below the specified flow switch level. At flow rates above this limit the identification of air bubbles within the flow channel is equally consistent. The non-invasive measurement principle of the liquid flow sensor **LG01** allows detecting the current state of fluid through the wall of the internal glass capillary. Thus, the sensor provides highest bio-compatibility and chemical resistance. Measurements of the liquid flow detector are performed with a response time of less than 100ms.

Mfg. Part No.	Maximum Flow Rate	Flow Switch Limit	Stock No.	Price Each 1-9
● LG01-2000A090	50ml/min	4.5ml/min	88T9611	184.76
● LG01-2000A005	220ml/min	0.25ml/min	88T9610	183.16

CONNECTIVITY KIT

The optional **LG01** connectivity kit contains material for electrical and fluidic connections: Assembled flat ribbon cable, 30 mm (1-100482-01); 2x barb adapter to connect ID 1.6 mm (1/16") tubing (Value Plastics ABR004-J1A-2); 2x barb adapter to connect ID 3.2 mm (1/8") tubing (Value Plastics ABR013-J1A-1).

PaPIRs PASSIVE INFRARED MOTION SENSORS

RoHS Compliant Available

Panasonic

EKMA Series

EKMB/EKMC Series

Applications
- **Security & Wireless Devices**
- Security sensors and cameras
- Wireless occupancy sensors driven by photovoltaic cells or battery to extend battery life.
- **Housing & Commercial equipment**
- Lighting fixtures and wiring devices
- Video intercoms, HA control panels
- Vending machines etc.
- **Home appliances (Energy savings)**
- Television and PC monitors
- PC, Air-Conditioners
- Air Purifiers
- Wireless and Battery operated monitoring sensing devices

Specifications
- Operating voltage: 3 to 5 VDC
- Output current: 100 uA (max.)
- Operating temperature: -20°C to 50°C
- Mounting: TO-5

Benefits
- Low profile achieved with fitted lens and embedded sensing circuit
- Motion detection with 3mm diameter miniature flat lens
- 1uA low current consumption possible based on Panasonic's proprietary design
- Robust design against false starts

SS360NT/SS360ST/SS460S HIGH SENSITIVITY BIPOLAR LATCHING DIGITAL HALL-EFFECT SENSOR ICs

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

- Fastest response time in its class: Provides more efficiency in commutating a brushless dc motor
- No chopper stabilization: Results in a clean output signal
- High sensitivity: Operates from only 30 Gauss typical, at 25°C [77 °F] and 55 Gauss maximum over the full -40 °C to 150 °C [-40 °F to 302 °F] temperature range, allowing for the use of smaller, magnets or a wider air gap
- Bipolar latching magnetics: Makes these products well-suited for accurate speed sensing and RPM (revolutions per minute) measurement
- Sub-miniature, SOT-23 surface mount package (**SS360NT/SS360ST**) supplied on tape and reel: Allows for compact design with automated component placement
- Small, leaded, flat TO-92-style package (**SS460S**): Allows for a compact PC board layout
- Wide operating voltage range of 3 Vdc to 24 Vdc: Allows for potential use in a wide range of applications
- Built-in reverse voltage: Enhances the protection of the sensor and the circuits
- Durable design: Allows operation up to 150 °C [302 °F] RoHS-compliant material meets Directive 2002/95

The **SS360NT/SS360ST/SS460S** High Sensitivity Bipolar Latching Digital Hall-Effect Sensor ICs are small, sensitive and versatile devices that are operated by the magnetic field from a permanent magnet or an electromagnet. They are designed to respond to alternating North and South poles. The **SS360NT** is turned ON by a North pole while the **SS360ST** and **SS460S** are turned ON by a South pole.

Mfg. Part No.	Package	Operate Point Typ.	Release Point Typ.	Activation Pole	Stock No.	Price Each 1-9

VF401 2-WIRE MR FINE-PITCH RING MAGNET SENSOR

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features and Benefits
- Not damaged by reverse polarity voltages when customer-supplied sense resistor is installed, enhancing protection.
- Enhanced sensitivity, ±7 Gauss typical, allows for larger air gaps (up to 2,5 mm [0.098 in]) and higher pole density (up to 50-pole pairs depending on ring diameter).
- Wide speed capability provides application flexibility with true zero speed sensing and operation up to 3000 Hz.
- Output pattern independent of gap between target and sensor.

Potential Applications

Transportation
- Speed encoding using a multipole ring magnet
- Enhanced accuracy rotational position sensing
- Wheel speed sensing
- Window lift applications
- Speed and direction sensing

Medical
- Shaft speed encoding using a multipole ring magnet

Industrial
- Shaft speed encoding using a multipole ring magnet
- Enhanced accuracy rotational position sensing
- Precision motor speed measurement
- Speed control in machine tools
- Elevator speed sensing
- Speed control in motorized industrial equipment

The VF401 is a high performance, digital, 2-wire, MR (magnetoresistive) sensor in a miniature, flat, TO-92-style, plastic package with a current output, designed for sensing fine pitch ring magnets.

Mfg. Part No.	Supply Voltage	Supply Current (mA)	Stock No.	Price Each 1-9
VF401	3.8V to 24V	18	05N0658	6.11

APS00B HIGH RESOLUTION MAGNETIC DISPLACEMENT SENSOR

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Medical
- High accuracy angular position sensing
- Rotary speed and angle detection
- Non-contact precision displacement sensing

Features and Benefits
- Dual Wheatstone bridges provide a passive, low-noise design, enhancing system performance.
- Small, 8-pin surface-mount package saves room on the PC board when compared to larger IC packages and components.
- Tape and reel configuration allows use with automated pick-and-place equipment, potentially reducing assembly costs (178 mm [7 in] and 330 mm [13 in] reels available).
- Typical 0 MHz to 5 MHz frequency response with 190 G minimum magnetic field applied makes this saturated mode sensor potentially suitable for high speed applications.
- Typically requires only 5 V at 4 mA to operate (20 mW), promoting energy efficiency
- Dual bridges with outputs 45° out of phase make it possible to use outputs as speed and direction signals
- Honeywell APS00A instrumentation amplifier is available separately for additional signal processing
- RoHS-compliant materials meet Directive 2002/95/EC

Potential Applications

Transportation
- High accuracy angular position sensing
- Rotary speed and angle detection
- Non-contact precision displacement sensing
- Speed and direction sensing

Industrial
- High accuracy angular position sensing
- Rotary speed and angle detection
- Non-contact precision displacement sensing
- Valve position
- Robotics control

APS00B is a miniature surface mount sensor for linear, angular, or rotary displacement designed for magnetic saturating field sensing. This sensor is a cost-effective and space-efficient solution for high-volume OEM designs.

SS30AT, SS40A, SS50AT BIPOLAR HALL-EFFECT MAGNETIC POSITION SENSORS

RoHS Compliant Available

Honeywell

Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Subminiature package size often allows for use in applications with tight PCB space where a compact design is needed
- Built-in reverse voltage protection simplifies installation and protects device from damage when mounted on PCB
- Thermally balanced integrated circuit provides stable operation over a full temperature range
- 4.5 Vdc to 24 Vdc supply voltages enhance application flexibility
- Ability to operate up to 125 °C [257 °F] provides application flexibility

SS30AT

Potential Applications:
- **Transportation motion Controll:**
- Tachometer, counter pickup
- Motor and fan control
- Electric vehicle control
- **Industrial:**
- Speed and RPM sensing
- Flow-rate sensing
- Robotics control

The **SS30AT/SS40A/SS50AT** series sensor build upon Honeywell's popular magnetic position sensors and offer severa advantages. These sensors have been designed with the latest technologies to provide reliable, cost-effective solutions to many commercial, computer, medical, and/or consumer applications requiring motor control and RPM sensing. These products are available in three package styles to suit a variety of applications. The **SS40A** in the leaded, flat TO-92 style package. The **SS30AT** in the subminiature SOT-23 surface-mount package, and the **SS50AT** in the small SOT-89B surface-mount package.

SS361RT/SS461R SERIES BIPOLAR LATCH HALL-EFFECT MAGNETIC POSITION SENSORS

RoHS Compliant Available

Honeywell

Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

Features
- Enhanced sensitivity
- Subminiature package size (SOT-23)
- Low voltage capability: 3 V operation
- Low cost
- Built-in reverse voltage protection
- Robust design: will operate up to 150°C [302°F]

Applications
Transportation:
- Speed and RPM sensing
- Motor and fan control
- Convertible roof position
- Automotive transmission position

Industrial:
- Flow-rate sensing
- Robotics control

Medical:
- Medication dispense control

SS461R SS361RT

Specifications:
- Operating temperature: -40 to 150°C
- Supply current: 6mA max.
- Typical operate point: 50 gauss at 25°C

Mfg. Part No.	Supply Voltage	Magnetic Char. (gauss) Operate Max.	Release Min.	Package	Stock No.	Price Each 1-9

HMC5983 3-AXIS DIGITAL COMPASS IC

RoHS Compliant Available

Honeywell

- Temperature compensated data output and temperature output
- Automatic offset compensation
- 12-Bit ADC coupled with low noise AMR sensors achieves 2 milli-gauss field resolution
- I²C (standard, fast, high-speed modes) or SPI digital interface
- Fast 220 Hz maximum output rate
- Built-in self test
- Low voltage operations (2.16 to 3.6V) and low power consumption (100 uA)
- Built-in strap drive circuits
- Lead free package construction
- Wide magnetic field range (+/-8 Oe)

Temperature compensated three-axis integrated circuit e-compass. This surface-mount, multi-chip module is designed for low-field magnetic sensing for applications such as mobile phones, tablets, netbooks, consumer electronics, automotive navigation systems, and personal navigation devices. Includes our state-of-the-art, high-resolution HMC118X series magnetoresistive sensors plus an ASIC containing amplification, automatic degaussing strap drivers, offset cancellation, and a 12-bit ADC that enables 1° to 2° compass heading accuracy. The I²C or SPI serial bus allows for easy interface.

DRM 4000 DEAD RECKONING MODULE

Honeywell

The Dead Reckoning Module (DRM™) 4000 is a miniature, electronic device for personnel on foot that provides the user's position relative to an initialization point. Dead Reckoning (DR) data and external GPS NMEA data are blended by an internal Kalman filter. When GPS data is available the dead reckoning sensors are automatically calibrated continuously and the two data sources are blended into a composite real-time position data output. When GPS data is unavailable, dead reckoning takes over. DRM™4000 position error characteristics are independent of time, and depend primarily on distance traveled.Patented motion classification algorithms analyze walking motion, and compensate when the user is running, or just "fidgeting" in place.

Mfg. Part No.	Output	Product	Stock No.	Price Each 1-24
DRM4000L-N00-232	RS 232	Dead Reckoning Module	76T9065	659.86
DRM4000L-N00-USB DEMO	USB	Dead Reckoning Module Development Kit*	76T9064	1068.60

* The Development Kit includes an enclosure with an internal I/O adapter board with a USB interface, GPS receiver, rechargeable lithium battery, Windows™ Host software, carrying case, GPS antenna, baseball cap and 6-foot USB adapter cable. The mini-USB jack accommodates 38.4kbps data transfer as well as trickle charging the battery when required. An illuminated power on/off doubles as a momentary "event" marker button to help in data collection processing.

3-AXIS DIGITAL COMPASS IC

Honeywell

Demo-board

Features

- 3-Axis magnetoresistive sensors and ASIC in a 3.0x3.0x0.9mm LCC surface mount package
- 12-bit ADC coupled with low noise AMR sensors achieves 5 milli-gauss resolution in +/- gauss fields
- Built-in self test
- Low voltage operations (2.16 to 3.6V) and low power consumptio (100uA)
- Built-in strap drive circuits
- I2C digital interface
- Wide magnetic field range (+/-8 Oe)
- Software and algorithm support
- Fast 160 Hz maximum output rate

The HMC5883L is a magnetic sensor in a 3.0x3.0x0.9 mm surface-mount 16-pin leadless chip carrier (LCC) that includes Honeywell's state-of-the-art, high-resolution magneto-resistive sensors with automatic degaussing (demagnetizing) strap drivers, offset cancellation and a 12-bit ADC for high resolution earth field sensing.

FX-300 SERIES DIGITAL FIBER OPTIC SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24V DC
- Ambient temperature: -10 to +55 °C (-14 to +131 °F)
- Ambient humidity: 35 to 85 % RH, Storage: 35 to 85 % RH

The FX-300 series of digital fiber optic sensors offers a wide range of sensing possibilities in a compact, high-performance unit. Three types are available for optimal application coverage including the standard type (FX-301), high-function type (FX-305), and the high-speed type (FX-301-HS).

STANDARD TYPE

Mfg. Part No.	Output Configuration	Rmitting Element	Stock No.	Price Each 1-9

TURBIDITY SENSOR

NEW

Amphenol® RF

The TSD-10 module measures the turbidity (amount of suspended particles) of the wash water in washing machines and dishwashers. An optical sensor for washing machines is a measuring product for a turbid water density or an extraneous matter concentration using the refraction of wavelength between photo transistor and diode. By using an optical transistor and optical diodes, an optical washing machine sensor measures the amount of light coming from the source of the light to the light receiver, in order to calculate water turbidity.

Mfg. Part No	Voltage Differential	Stock No.	Price Each 1-9
TSD-10	3.0V ± 10%	18X9859	6.12
TST-10	2.7V ± 20%	18X9860	6.43

MINI-BEAM® DC PHOTOELECTRIC SENSORS

RoHS Compliant Available

BANNER® more sensors, more solutions

- Rear-Panel Light/Dark Operate Switch
- DC Models Include Patented Alignment Indicating Device Signal Strength Monitoring Indicator
- Integral Quick-Disconnect (QD) Fitting or attached cable
- Sensing Mode Options: Opposed, Diffuse, Retroreflective, Convergent, and Glass and Fiber Optic
- Temperature Rating: -20°C to +70°C (-4°F to +158°F)
- Bipolar NPN/PNP Output
- Supply Voltage: 10-30VDC
- UL Listed, CSA Certified, CE Compliant

MINI-BEAM® AC PHOTOELECTRIC SENSORS

RoHS Compliant Available

BANNER more sensors, more solutions

Features:
- Signal strength or output indicator
- Solid state outputs
- 2m integral cable or 3-pin Micro-style QD
- Mfg. part nos. with suffix "QD" requires a mating cable; *order separately on* [73584]
- For 9m cable add suffix "W/30" to the mfg. part no.

Specifications:
- Supply voltage: 24-240VAC
- Output configuration: SPST solid-state, 2-wire (light operate, dark operate selectable)
- Operating temperature: -20°C to +70°C

INTEGRAL CABLE

Q60 ADJUSTABLE-FIELD SENSORS

NEMA RoHS Compliant Available

BANNER® more sensors, more solutions

- Detects objects within a defined sensing field, while ignoring objects located beyond the sensing field cutoff
- Two-turn, logarithmic cutoff point adjustment for easy setting of cutoff point at long range
- Rotating pointer indicates relative cutoff point setting
- Easy push-button or remote setting of light/dark operate and output timing; continuous status indicators verify all settings at a glance
- Output ON and/or OFF delays adjustable from 8 milliseconds to 16 seconds
- ABS/polycarbonate blend housing is rated IEC IP67; NEMA 6

Q60BB6 models powered by 10 to 30V dc. **Q60VR3 models** powered by 12-250V dc or 24-250V ac, 50/60 Hz.

MULTI-BEAM® SENSORS

RoHS Compliant Available

BANNER® more sensors, more solutions

Selection of Components For MULTI-BEAM® Sensors

- 1. Choose a sensor block for the required sensing mode
- 2. Choose a power block for the required sensor power (AC or DC) and interface
- 3. Choose a logic module (not required for opposed emitters)
- 4. Simply plug components together without interwiring to create a complete self-contained photoelectric sensor that is tailored to your exact needs

MULTI-BEAM® sensors are compact *modular* self-contained photoelectric switches. The *scanner block* contains the complete modulated photoelectric amplifier as well as the emitter and receiver optoelements. It also contains the sensing optics and the housing for the other two modules. The *power block* provides the interface between the scanner block and external circuit. It contains a power supply for the MULTI-BEAM® plus a switching device to interface with the circuit to be controlled. The *logic module* interconnects the power block and scanner block both electrically and mechanically. It provides the ability to program the output for either light- or dark-operate. The emitters of MULTIBEAM® emitter-receiver pairs do not require a logic module. Emitter scanner blocks are supplied with a blade-pin to interconnect the scanner block and power block. This modular design, with field power block and logic module, permits over 5,000 sensor configurations, resulting in exactly the right sensor for any photo-electric application. Three- and four-wire sensors permit either AC or DC operation and offer the fastest response times and the greatest ranges. The circuitry of all MULTI-BEAM® components is encapsulated within rugged, corrosion VALOX® housings, which meet or exceed NEMA 1, 2, 12, and 13 ratings. Scanner blocks include an Alignment Indicating Device (AID™) which lights a top-mounted LED when the sensor sees its own modulated light source and pulses the LED at a rate proportional to the received light signal.

MULTI-BEAM® 3- AND 4-WIRE SCANNER BLOCKS

R58 SERIES EXPERT REGISTRATION MARK SENSOR

RoHS Compliant Available

BANNER® more sensors, more solutions

Features:

- Ultra-fast 10kHz switching frequency
- Sensor automatically selects red, green or blue LED during TEACH to optimize application contrast
- Outstanding color contrast sensitivity, detects contrasts as low as 2% over a wide range of colors
- Rugged zinc alloy die-cast housing with high-quality acrylic lens suitable for food processing applications; rated IP67, NEMA 6

Specifications:

- Focus: 10mm (0.39")
- Supply voltage: 10 to 30VDC
- Output type: Bipolar NPN/PNP

Right-angle bracket

PA18C & PH18C SERIES PHOTOELECTRIC SENSORS

CARLO GAVAZZI

Axial Radial Square

- Miniature sensor range
- Sensitivity adjustment by potentiometer
- Supply voltage: 10 to 30 VDC
- Output: 100 mA, NPN or PNP, N.O + N.C.
- Degree of protection: IP67, IP69K
- LED indication for output, stability and power ON
- Protection: reverse polarity, short circuit and transients
- All cable connections
- Excellent EMC performance

The **PA18C & PH18C** series is part of a family of general purpose diffuse reflective, retro-reflective, and through-beam sensors in industrial standard 18 mm cylindrica (sqaure for PH18C)I ABS housing. The sensors are useful in applications where high accuracy detection as well as small size is required. Compact housing and high power LED for excellent performance-size ratio. The potentiometer used for adjustment of the sensitivity makes the sensors highly flexible. The output type is NPN or PNP and the output switching function is NO and NC.

PA18C AXIAL TYPE

SM SERIES MINIATURE PHOTOELECTRIC SENSORS

- Miniature size measures just 1.7″ tall, 1.29″ wide and 1.63″ deep
- Visible sensing beams and TargetLock™ marginal gain LED for easy install and alignment
- Multiple mounting options including industry-standard 18mm threads
- Available in AC/DC or DC-only voltages
- DC models feature both NPN and PNP outputs
- Perfect Prox® models offer the most reliable background rejection
- Reverse polarity, overload and short circuit protection
- Available with 6 ft. (2m) cable or 4-pin Euro quick-disconnect

HARSH DUTY PHOTOELECTRIC SENSORS

30 mm

Connector Version

- Thru-beam sensors operating voltage: 20-132VAC, 15-30VDC
- Optimum range: 0.1 to 300ft, (0.03 - 90m)
- 30 mm diameters
- Tempered glass lens cover
- 360° output indicator
- High temperature, high pressure washdown (1200 psi)
- Thru-beam component source

Design to withstand the harshest physical, chemical and optical environments. Ideal for automotive applications where exposure to lubricants, cutting fluids, coolants and glycols is common. Withstands the use of sanitizers, surfactants, and cleaning agents including diluted bases and acids.

SA1U HEAVY DUTY PHOTOELECTRIC SENSORS

RoHS Compliant Available

- Long range sensing distance from 1 meter to 50 meters
- 3 A relay contact SPDT
- Time delay functions
- Spring up screw terminals
- 12-240 VDC / 24-240 VAC universal voltage
- Response time: 20 ms max.

These sensors are assembled in a fully automated robotic process and are UL/c-UL listed, CE marked and IP67 rated, making them ideal for use in wet environments such as bottling and food processing industries. Built-in 3 amp relay contacts (NO/NC) and time delay functions give customers the ability to configure the sensor for their specific needs. There are four timing delay functions to choose from: one shot, ON delay, OFF delay and normal mode, as well as a 0.1 to 5 second time range.

SA1E MINIATURE PHOTOELECTRIC SENSORS

RoHS Compliant Available

- Seven sensing methods
- IP67 waterproof design
- Compact size (31.5 x 19.5 x 10.8 mm)
- Choose NPN output, PNP output, light ON, or dark ON
- Long sensing ranges, high-speed response
- Rated operational voltage: 12 to 24VDC
- Operating temperature: -25°C to +55°C (no freezing)

Cable Type

SA1E sensors are UL listed, CE marked and IP67 rated. With advanced interference protection circuity (except for the through-beam type), sensors can be mounted very close together without affecting their performance. Each model has several options: NPN or PNP outputs, and light ON or dark ON sensing modes. Cable included.

NEXT GENERATION MINIATURE PHOTOELECTRIC SENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Convergent

Thru-Beam

- Pin-Point Beam for Detecting Extremely Small Objects
- Thru-Beam, Retro-Reflective and Diffuse Models
- IP67
- 12-24VDC Input Voltage
- 50mA Max.
- Prewired with 6.6' (2m) of Cable
- Utilizes Omron's "Hyper LED" Technology to Achieve Industry's Smallest Visible Red Beam
- Self-Contained Sensor Ideal for Compact Applications
- Convergent-Beam Model Spot Diameter: 0.15mm
- CE Compliant

Mfg. Part No.	Sensing Method	Operation Mode	Sensing Range (mm)	Dimensions Inches (mm)	Stock No.	Price Each 1-4

CYLINDRICAL PHOTOELECTRIC SENSORS

NEW

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Universal M18 cylindrical plastic or nickel-plated brass housing in straight or 90° angled (radial) models
- Rugged IP67, IP69K housing withstands highpressure and high-temperature wash down
- Bright LED indicators provide status visibility from almost any angle
- High power red LED for easy sensor alignment and dependable outputs in dusty environments
- All retro reflective models are polarized to prevent false reads on mirrored surfaces
- High EMC protection and ambient light immunity for detection stability in environments with excess noise or background light
- Compact size and shape for increased installation flexibility

E3X-HD FIBER OPTIC SENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Long-term stable detection with no maintenance
- Smart Power Control function detects the decrease in light intensity due to LED aged deterioration and the decrease in incident level due to dirt, then automatically compensates the optimum detection condition
- Maintenance-free operation that withstands the ambient environments
- Detect workpieces without concern for color and size
- Reduces wiring work for fiber amplifiers with zero-line connection

Power supply voltage: 12 to 24VDC ±10%, ripple (p-p) 19% max. Light source (wavelength): Red, 4-element LED (625nm). Load power supply voltage: 26.4VDC max., open-collector output (varies with the model depending on whether the output is PNP or NPN). Load current: 50mA max. OFF current: 0.5mA max.

Mfg. Part No.	Sensor Output	Connection	Stock No.	Price Each 1-4

LONG-RANGE PHOTOELECTRIC SENSORS WITH PLUG-IN BASE

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

UL CSA NEMA

- Universal AC/DC Supply Voltage
- Sensing Head Replaceable Without Rewiring
- Built-In ON- and OFF-Delay Timers Available
- Switch Selectable Light-ON and Dark-ON Operation
- Mutual Interference Protection
- Ready-to-Use: Includes 3A Relay, Mounting Bracket and Reflector
- Power consumption: 2VA (AC), 1.5W (DC)
- Supply Voltage: 24 to 240VSC, 50/60Hz; 12 to 240VDC
- SPDT Contacts
- Min. Load: 10mA, 5VDC
- NEMA 1, 3, 4, 12, 13, IP66

Replacement mounting bracket **mfg. part no. E39-L35** also available; *go online or call.* Dimensions: 90.3H x 73W x 36mm (3.56 x 2.87 x 1.42"). UL listed, CSA certified.

PLASTIC-BODY CYLINDRICAL PHOTOELECTRIC SENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Threaded M18 size
- Built-in amplifier
- Chemical-resistant, ABS resin case type
- Polarized models available
- Compact and space-saving
- Long detection distance -- up to 7m
- Light-on / Dark-on selectable by wiring
- DC switching types with connectors for easy maintenance
- Wide operating voltage range (10 to 30VDC, or 24 to 240VAC)
- Short-circuit and reverse connection protection (DC switching type)
- Light source: infrared LED

Dimensions: through-beam and retro-reflective: 90 x 16.8mm; diffuse reflective: 65 x 16.8mm. Pre-wired 2m (6.56′) cable length. Power and light receive status indicators. Additional stainless and nickel-plated brass versions, polarized and connector versions and NPN types also available; *go online or call.* UL recognized, CSA certified, CE compliant, NEMA approved.

E32 SERIES FIBER-OPTIC CABLE SETS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Extensive Selection of Fiber-Optic Sensing Heads Offers Many Unique Solutions for Tough Problems
- Fiber-Optic Sensors Detect Small, Fast-Moving Objects in Space-Confined Installations and Harsh Environments
- For a Customer Fit in the Field, Most Plastic Filament Cables Can Be Cut to Length
- For Detection in Hard-to-Reach Places, sensing heads With Bendable Stainless Steel Tubing Retain Complex Shapes
- Coiled and Ultra-Flexible Cables - Ideal for Flexing and Reciprocating Machinery Such as Robots
- Side-View Sensing Heads or Accessories Save Space in Right-Angle Detection
- Convergent Beam Sensing Heads Allow Accurate Positioning and Background Suppression Even for Shiny Objects
- Narrow Detection Zone of Concentric Beam Sensing Heads Help Eliminate Background Object and Gives Consistent Sensing, Regardless of Object Direction
- High Flexible Fibers With Minimum 1mm Bending Radius Allows Cable to Conform to Machine Contours
- Most Fiber Cables Offer IP67 Protection
- Temperature Range: -40°C to 70°C (-40°F to 158°F)

Fiber-optic photoelectric sensor cables are provided as a complete set. Cable length: 2M. Sensing distance and object detection are typical when used with a general purpose amplifier. Most cable can be cut to fit. **Sold as a package of 2 cables.**

E3X-NA41	PNP LO/DO	74C1459	204.68

E3X-DA SERIES WITH DIGITAL DISPLAY

High performance amplifier with 3 user selectable sensing modes; standard, long distance, and high speed. Display is user-selectable for digital level, percentage or analog. Teach or manual sensitivity adjustment. Adjustment off-delay. IP50 enclosure rating. Supply voltage: 12-24VDC.

CX-400 SERIES COMPACT PHOTOELECTRIC SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24VDC
- Current consumption: 10 to 25mA
- Ambient temperature: - 25 to +55°C (-13 to +131 °F)
- Response time: 1ms or less

The CX-400 series of photoelectric sensors is a wide-ranging lineup of 116 different models. Whatever your application entails, Panasonic has covered it with this series. Built to IP-67 standards, the CX-400 series is designed for the most demanding environments.

STANDARD TYPE

Mfg. Part No.	Sensing Type	Sensing Range	Sensing Output	Stock No.	Price Each 1-9

EX-10 SERIES ULTRA-SLIM PHOTOELECTRIC SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24V DC
- Ambient temperature: -25 to +55 °C (-13 to +131 °F)
- Ambient humidity: 35 to 85 % RH, Storage: 35 to 85 % RH

The EX-10 series is one of the smallest sensors on the market today. The ultra small size allows for mounting in the smallest areas. The size is achieved by locating all of the electronics and controls in an in-line amplifier. A bright 2-color indicator on the sensor head allows for quick determination of the sensor state. The EX-10 series is also equipped with a 0.5ms response time for high-speed detection and an IP-67 rated housing for wash-down environments. The mounting options available include a front sensing type as well as a side sensing type. Each type has two, metal reinforced M3 mounting holes for stable sensor placement. All types are available as either Light ON or Dark ON and PNP or NPN.

FRONT SENSING SENSORS

Mfg. Part No.	Sensing Type	Sensing Range	Sensing Output	Stock No.	Price Each 1-9
● EX-11A	Through-Beam	0mm to 150mm	NPN	25H9036	102.93
● EX-11B	Through-Beam	0mm to 150mm	NPN	25H9037	103.76
● EX-13A	Through-Beam	0mm to 500mm	NPN	25H9041	104.86
● EX-13B	Through-Beam	0mm to 500mm	NPN	25H9042	103.76
● EX-14A-PN	Convergent	2mm to 25mm	PNP	25H9048	89.73
● EX-14B-PN	Convergent	2mm to 25mm	PNP	96H2542	90.68
● EX-15	Through-Beam	0mm to 150mm	NPN	96H2545	186.19
● EX-17	Through-Beam	0mm to 500mm	NPN	96H2547	186.19
● EX-19A	Through-Beam	0m to 1m	NPN	96H2549	121.51
● EX-19B	Through-Beam	0m to 1m	NPN	96H2552	121.51
SIDE SENSING SENSORS					
● EX-13EA-PN	Through-Beam	0mm to 500mm	PNP	96H2535	104.86
● EX-13EA	Through-Beam	0mm to 500mm	NPN	25H9044	103.76
● EX-15E	Through-Beam	0mm to 150mm	NPN	96H2546	186.19
● EX-17E	Through-Beam	0mm to 500mm	NPN	96H2548	186.19

(196425)

EX-20 SERIES ULTRA-COMPACT PHOTOELECTRIC SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24V DC
- Ambient temperature: -25 to +55 °C (-13 to +131 °F)
- Ambient humidity: 35 to 85 % RH, Storage: 35 to 85 % RH

The EX-20 series reaches the pinnacle of sensor miniaturization. By fabricating the photodiode and the A/D conversion circuit on the same chip, Panasonic has achieved one of the smallest built-in amplifier sensors in the world. With integrated sensitivity adjustment, the EX-20 series is great for use as an all-purpose sensor. Even though the sensor is extremely small, the sensing distance is not compromised. Up to a 2m detection distance is possible with the thrubeam type, 200mm with the retro-reflective type, and 160mm for the diffuse reflective type.

FRONT SENSING SENSORS

Mfg. Part No.	Sensing Type	Sensing Range	Sensing Output	Stock No.	Price Each 1-9
● EX-21A	Through-Beam	0m to 1m	NPN	96H2555	126.43
● EX-21B	Through-Beam	0m to 1m	NPN	96H2557	126.43
● EX-24A	Convergent	2mm to 25mm	NPN	25H9051	94.48
● EX-24B	Convergent	2mm to 25mm	NPN	25H9053	94.48
SIDE SENSING SENSORS					
● EX-22A	Diffuse-Reflective	5mm to 160mm	NPN	96H2558	102.07
● EX-22B	Diffuse-Reflective	5mm to 160mm	NPN	96H2560	97.26
● EX-26A	Convergent	6mm to 14mm	NPN	25H9054	115.13
● EX-26B	Convergent	6mm to 14mm	NPN	25H9055	110.65
● EX-28A	Reflective	45mm to 115mm	NPN	96H2567	116.08
● EX-28B	Reflective	45mm to 115mm	NPN	96H2569	116.08
● EX-29A	Retroreflective	30mm to 200mm	NPN	96H2571	120.12
● EX-29B	Retroreflective	30mm to 200mm	NPN	96H2573	120.12

EX-30 SERIES THREADED MINIATURE PHOTOELECTRIC SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24V DC
- Ambient temperature: -25 to +55 °C (-13 to +131 °F)
- Ambient humidity: 35 to 85 % RH, Storage: 35 to 85 % RH

The EX-30 series of photoelectric sensors offers a fresh new alternative to traditional fiber optic sensors. Unparalleled in its ease of installation, this sensor is highly effective for basic production line sensing. The design of this sensor has been simplified to offer a fully integrated solution in a package that only needs one anchor point. The sensing element is threaded to allow mounting through a 4 or 6mm size hole by utilizing a "nut and bolt" type screw mount. The sensing axis is the same as the center of the mounting hole, making placement on your assembly line incredibly easy.

Mfg. Part No.	Sensing Type	Sensing Range	Sensing Output	Stock No.	Price Each 1-9
EX-31A	Through-Beam	0mm to 500mm	NPN	96H2575	132.25
EX-31B	Through-Beam	0mm to 500mm	NPN	96H2577	137.61
EX-32A	Diffuse-Reflective	0mm to 50mm	NPN	25H9056	121.51
EX-32B	Diffuse-Reflective	0mm to 50mm	NPN	96H2580	121.51
EX-32A-PN	Diffuse-Reflective	0mm to 50mm	PNP	96H2579	125.34

(196427)

PM2 SERIES CONVERGENT REFLECTIVE MICRO PHOTOELECTRIC SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 5 to 24 VDC
- Average current consumption: 25mA or less
- Ambient temperature: - 10 to +55°C (-14 to +131 °F)
- Response time: 0.8ms or less

The PM2 series of micro photoelectric sensors offers a convergent reflective sensing solution for incredibly stable sensing. Because the sensor only detects in a limited area, it is not affected by background objects, color, or reflectivity. Small objects down to 0.05mm can be detected reliably as well. Three sensor head styles are available in both connector and cable types. One control output is provided (NPN).

Mfg. Part No.	Sensing Type	Sensing Range	Sensing Output	Stock No.	Price Each 1-9
PM2-LF10	Convergent	2.5mm to 8mm	NPN	02H5855	44.50

OSISENSE® XU SERIES PHOTOELECTRIC SENSORS

RoHS Compliant Available

Telemecanique Sensors

XUB Cable

XUB Connector

Features

- Increased ranges in all sensing modes, sensing distance easy to adjust
- All standard product enclosures (complete range, cylindrical, minature and compact rectangular)
- Output LEDs on the sensors for easier alignment during installation
- DC and AC/DC versions available for maximum flexibility
- Meet the International Electrotechnical Commission (IEC) standards , NEMA, UL, CSA, VDE and more.
- High operating rates
- Fast response

Specifications

- Voltage rating: 12VDC to 24VDC
- Long sensing distances: up to 14 m (46 ft) retroreflective,
- 40 m (131 ft) thru-beam, and 2 m (6.5 ft) diffuse
- High insensitivity to light sources: withstands up to 40,000 lux natural light/10,000 lux incandescent light
- Good resistance to severe environments: -30 to 60 °C (-22 to 140 °F)
- IP67 degree of protection rating"

PM SERIES U-SHAPED MICRO PHOTOELECTRIC SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 5 to 24 VDC
- Average current consumption: 15mA or less
- Ambient temperature: - 25 to +55°C (-13 to +131 °F)
- Response time: light received condition: 20 ms or less; light interrupted condition: 100 ms or less

The ultra-small PM series of u-shaped photoelectric sensors provides a wide range of 29 different models to suit any of your application needs. With the industry's smallest size, the PM series plays a key role in the miniaturization of your equipment. All models are equipped with two outputs, one for Light-ON and the other for Dark-ON sensing. The PM series conforms to the European EMC Directive and carries UL Recognition. *"PNP types also available, go online or call"*.

MODEL 600 LINEAR MOTION POSITION SENSOR

RoHS Compliant Available

BEI SENSORS

- Infinite Resolution
- Insulation Resistance at 500 VDC: 1000 Megohms
- Dielectric Strength: 500 VDC
- Temperature Range: -55°C to +125°C
- Output Smoothness: 0.1%
- Actuation Force: 2 oz (.56 Newtons) max.
- Life: 10 x 10^6 Cycles
- Resistance Tolerance: +/-20%
- Power Rating: 0.25 Watts at 70°C
- 16mm Diameter

600 series linear motion position sensors provide extremely accurate measurements in applications that require a rugged instrument operating in a tight area. Long life, infinite resolution and smooth output deliver high reliability in critical measurements. Floating shaft design allows for shaft/interface misalignments up to 0.010". Repeatablity within .0005 inch. Supplied with #29 AWG Teflon insulated wire 12 inches min. length.

MODEL 9600 MINIATURE SPRING RETURN LINEAR MOTION POSITION SENSORS

RoHS Compliant Available

BEI SENSORS

- Linearity: ±2%
- Actuation Force: 14.4 (4.0) Newtons max.
- Temperature Range: -40°C to +135°C
- Mechanical Life: 2,000,000 Full Cycles; 5,000,000 Dither Cycles
- Spring return design allows for interface-free installation.

9600 series spring return linear motion position sensors are ideal for a variety of applications requiring a highly miniaturized solution. Plastic housing and shaft. Plated brass eyelet style terminals. 4.8mm diameter shaft. Supplied with internal spring to return actuator to extended position. Ideally suited for use with microprocessor-based systems including joystick controls, robotics and industrial automation and controls.

SOLID-STATE SPEED SENSORS

RoHS Compliant Available

CHERRY

- Hall-Effect Technology with High Speed and Near-Zero Speed Capabilities
- Sense Rotation of Ferrous Target Such as Gearwheel, Sprocket or Chain
- Digital Sinking Output
- Maximum Supply Current: 6mA except Type SD100203: 20mA

GS100502

Mfg. part no. SD100203 provides two separate digital outputs for speed and direction. All except **mfg. part no. GS100701** provide additional circuit protection for immunity against electrical interference. **Mfg. part no. SD100203** includes 12″ 20AWG leads. **Mfg. part no. GS100101** meets all IEC requirements for heavy industrial environments.

INDUSTRIAL-GRADE

SMART ROTARY POSITION SENSORS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Non-contact design: Eliminates mechanical failure mechanisms, reducing wear, which improves reliability and durability, and minimizes downtime
- Combined patented MR sensor and ASIC technology provides absolute position sensing: Helps OEMs reduce warranty costs because they don't have to replace worn or broken component parts, helps end-users reduce downtime due to fewer calibration requirements
- No internal moving parts: Automotive-grade potting makes the sensor more resistant to vibration, shock, and extreme temperatures, improving reliability
- Repeatable output: Occurs within a 3.0 mm ±2.0 mm [0.118 in ±0.079 in] air gap between the sensor and magnet collar, expanding application opportunities
- High accuracy: Measures values down to 0.01°; better sensor accuracy can provide better system accuracy in the application
- IP67 and IP69K sealing: Allows for use in harsh environments such as dust, immersion up to 1 m [39.37 in] of water for 30 minutes, and high pressure water sprays
- High shock and vibration resistance: Allows for use in a wide variety of tough applications
- Minimal signal error: Exists up to 2.50 mm [0.10 in] of radial error, simplifying design-in
- RoHS-compliant: Materials meet Directive 2002/95/EC

Honeywell's **SMART** Position Sensors are some of the most durable, adaptable, and lightweight absolute position sensors available in the industry, enabling highly accurate motion control and improving operation efficiency and safety.

HALL-EFFECT ROTARY POSITION SENSORS - RTY SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features and Benefits

- 12M Cycles
- Rugged IP67-sealed package w/integral connector
- Automotive-grade EMI/EMC testing
- Industry standard AMP termination
- 32mm mounting pitch
- North American and European pinout styles
- Eight operating ranges up to 360°

Potential Applications

Transportation

- Position and movement detection of pedals, throttles, gear shift, levers, steering, linkages, and hitches (trucks, buses, off-road vehicles, industrial/construction/agricultural vehicles and equipment, cranes)
- Suspension displacement/kneeling (buses, trucks)
- Tilt/trim position (boat engines, tilling equipment)

Industrial

- Valve control
- HVAC damper control
- Irrigation pivot control

CONTINUED

HALL-EFFECT ROTARY POSITION SENSORS - RTY SERIES (CONT.)

RTY series Hall-effect rotary position sensors provide angle monitoring in harsh transportation and industrial applications. These products use a magnetically biased, Hall-effect integrated circuit (IC) to sense rotary movement of the actuator shaft over a set operating range. Rotation of the actuator shaft changes a magnet's position relative to the IC. The resulting flux density change is converted to a linear output. The IC, together with conditioning and protection circuitry, and the permanent magnet, is sealed in an IP67-qualified rugged package for durability in most harsh environments. Eight operating ranges are tolerant to over-travel and allow use in most common applications. Low voltage and high voltage versions cover an input voltage range of 4.5 Vdc to 30 Vdc.

HALL-EFFECT ROTARY POSITION SENSORS - RTY SERIES

NEW

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:

- 35 M cycle PRODUCT LIFE
- Solid-state Hall-effect technology
- Rugged IP67-sealed package with integral connector

Transportation

- Position and movement detection of pedals, throttles, gear shift, levers, steering, linkages, and hitches (trucks, buses, off-road vehicles, industrial/construction/agricultural vehicles and equipment)
- Suspension Kneeling Position (buses, trucks)
- Tilt/trim position (boat engines, tilling equipment)

Industrial

- Valve control
- HVAC damper control
- Irrigation pivot control

The RTY Series Hall-Effect Rotary Position Sensors provide angle monitoring in harsh transportation and industrial applications at a competitive cost. These products use a magnetically biased, Hall-effect integrated circuit (IC) to sense rotary movement of the actuator shaft over a set operating range. Rotation of the actuator shaft changes a magnet's position relative to the IC. The resulting flux density change is converted to a linear output. The IC, together with conditioning and protection circuitry, and the permanent magnet, is sealed in an IP67-qualified rugged package for durability in most harsh environments. Eight operating ranges (50°, 60°, 70°, 90°, 120°, 180°, 270° and 360°) are tolerant to over-travel and allow use in most common applications. Low voltage and high voltage versions cover an input voltage range of 4.5 Vdc to 30 Vdc. Although most applications require no lever, a lever version is available. The lever may allow customers to reduce the number of mechanical linkages required for their application, which may reduce the cost of the overall customer solution. No brackets are necessary.

MLT SERIES LINEAR POSITION TRANSDUCERS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Anodized Extruded Aluminum Housing
- 0.375″ Diameter
- Stainless Steel Shaft
- Absolute Continuous Measurement
- 4-40 Thread Shaft
- Operating Temperature: -40°C to +80°C (-40°F to +176°F)

Rugged enough to withstand the hostile environment of the factory, the **MLT series** linear position transducers are small in diameter. By using a proprietary dual wiper, internal ball joint and the MystR® conductive plastic film, the **MLT series** transducers provide usable output at high vibration levels for long periods of time. The use of precious metal wipers further enhances reliability. V max = 30V, I max = 100mA, Ci = 0, µF, Li = 0 mH. Intrinsically safe for Class I, II and III Division 1, Groups A, B, C, D, E, F, and G for Hazardous (indoor/outdoor) NEMA 4 locations.

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- 0.081″ Thick Housing with 0.25″ Shaft
- ¼ -28 Thread Shaft
- Operating Temperature: -65° to +105°C

SLF series transducers are frequently used for measuring linear position or displacement up to 6″ on a wide variety of manufacturing and process equipment. The mechanical design of the unit's front and rear bearings, anodized extruded aluminum housing, stainless steel shaft and precious metal wipers are suitable for a factory's harsh environment. Based on the proprietary MystR® conductive plastic film, it provides a high resolution, absolute position measurement without external signal conditioners. V max. = 30V, I max. = 100mA, Ci = 0, µF, Li = 0 mH. Instrinsically Safe for Class I, II, and III Division I, Groups A, B, C D, E, F, and G for Hazardous (indoor/outdoor) NEMA 4 locations.

SL353 SERIES MICROPOWER OMNIPOLAR DIGITAL HALL-EFFECT SENSOR ICS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features and Benefits

- Supply voltage as low as 2.2 Vdc, combined with very low average current (1.8 uA typ. for SL353LTthe lowest in its class), reduces power consumption, provides extended battery life, and promotes energy efficiency.
- Non-chopper stabilized design: Does not utilize chopper stabilization, eliminating the noise generated by products using this technique.
- Omnipolar capability with high and low duty cycle options allows for use in a variety of potential applications with low power requirements and/or battery operation, including motion control, lid closure detection, presence-absence, metering, and displacement sensing
- Thermally balanced integrated circuit provides for stable operation over a wide temperature range, from -40° to 85 °C [-40° to 185 °F]
- The SOT-23 subminiature package size requires less PCB space

Potential applications

- Battery-operated, mobile equipment such as:
- Door or lid closure detection in computer notebooks, scanners, hand-held industrial computers and instrumentation
- Mobile printer head position sensing
- Small, hand-held medical and dental equipment
- Trigger switch for battery-operated hand tools (i.e., drills, drivers)
- Reed switch replacement in battery operated security systems
- Magnetic encoder for building access (array)
- Power switch or open-close detection in small battery-operated appliances (vacuum cleaners, fan. etc.)
- Gas or water consumption measurement in remote, battery-operated utility meters

VALUE PROPOSITIONS SL353LT: For device manufacturers who need ultra low power sensing for battery-operated, mobile applications, Honeywell's SL353LT Omnipolar Hall-Effect Sensor IC provides an ultra low power (1.8 uA, 2.8 Vdc) sensor IC and helps minimize PCB (Printed Circuit Board) space, part count and cost for the entire application.

Mfg. Part No.	Description	Current (uA)	Stock No.	Price Each 1-9
● SL353HT	High duty cycle, SOT-23 package	330	29T6155	1.25
● SL353LT	Low duty cycle, SOT-23 package	1.8	29T6156	1.34

SS4/SS5 HALL-EFFECT POSITION MAGNETIC SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Operating speed: 0 to over 100kHz
- Supply voltage: 3.8-24VDC
- Output voltage: 0.4V max
- SOT89 package
- Built-in timing circuit

Digital position sensors have current sink output. Feature temperature compensation. **SS4 series** dimensions: 0.160 × 0.118″ (4.06 × 3.00). **SS5 series** are SOT89 packages. **SS42R series** features digital dual complementary sink/source outputs. Operate/release points are trimmed for zero symmetry. Reverse voltage polarity protection for full supply range. Operate temp. range: -40 to +105° C. **SS421 series** feature an operate temp. range of -40 to +105° C. Bipolar operation for easy RPM counting using ring magnets. Built-in timing circuit greatly simplifies and reduces the cost of PC board design. Speed trip point adjustable with external resistor and capacitor. "L" version is active low, "H" version is active high.

SR13/SR15 SERIES HALL-EFFECT POSITION SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Snap-In or Flat Mount Packages
- Digital Output (Current Sinking)
- Operating Temperature: -40°C to +150°C
- Temperature Compensated Magnetics
- 24 AWG Radox Wire Leads

SR13C–A1

SR15C–A3

SR13 and **SR15 series** position sensors are not susceptible to common occurrences of humidity, vibration or dust contamination yet provide easy installation. Devices can be installed without additional hardware, using the pre-leaded snap-in or flat-pack housings. Sensors utilize time-proven **SS400 series** position sensors, which have a thermally balanced integrated Hall–effect circuit providing predictable performance over a wide operating temperature range. Snap-in mount feature accepts a panel thickness up to 0.135″. Supply voltage: 3.8–30VDC. Supply current: 13mA. Output voltage: 400mV. Sinking current: 20mA continuous, 50mA cycled. Dimensions: 0.80L x 0.30W x 0.20″D. *Magnets available on page 1848.*

103SR AND SR4 SERIES HALL-EFFECT SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

103SR series have adjustable mounting, threaded aluminum housing contains Hall-effect sensor operated by proximity to external magnet. Sealed housing meets NEMA enclosure types 3, 3R, 3S, 4, 4X, 12, and 13. 24-gauge, 6″ stranded, color-coded lead wires at termination. Mfg. part nos. with "2" suffix are supplied with one meter, 22AWG, PVC jacketed cable. **Mfg. part nos. 103SR13** are digital current sinking output. **Mfg. part nos. 103SR12** are current sourcing. Magnetics type for **mfg. part nos. 103SR:** unipolar. Dimensions: 1⅝-32NS x 1″L. Operating temperature range: –40°C to +100°C. *Magnets available on page 1848.* SR4 series are very sensitive magnetoresistive sensors. Call for details.

SMART POSITION SENSOR, 75M LINEAR CONFIGURATION

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Potential applications

Aerospace
- Aircraft ram door

Medical
- Syringe pumps

Industrial
- Cutting and slitting machinery
- Elevator level position
- Material handling
- Packaging
- Plastic molding machines
- Valve position
- Wafer handling equipment
- Woodworking machinery

Features
- Resolution of up to 16 bits provides enhanced accuracy
- Non-contacting technology can provide enhanced product life and durability with less downtime
- Combined patented MR sensor and ASIC technology provide enhanced differentiation and performance
- Air gap of up to 3,0 ±2,5 mm [0.118 ±0.098 in] between sensor and magnet expands application

➤CONTINUED➤

SMART POSITION SENSOR, 75M LINEAR CONFIGURATION (CONT.)

opportunities
- Other output options (CAN bus, RS232) available upon request
- Self-diagnostics feature can reduce equipment downtime
- Small size, taking up less space than most competitive technologies, allows for use where space is at a premium
- IP67 and IP69K sealing allow use in a variety of harsh applications

Superior Measurement. Accurate. Reliable. Thinking. SMART means that this is a sensor that can essentially think for itself. The SMART Position Sensor has the ability to self-calibrate because it uses a patented combination of an ASIC and an array of magnetoresistive (MR) sensors to accurately and reliably determine the position of a magnet attached to a moving object (e.g., elevator, valve, machinery, etc.) so that the object's position can be determined. Honeywell has utilized MR technology through the ASIC at a level never before accomplished.

Mfg. Part No.	Sensing range (mm)	Supply voltage (VDC)	Sensor Output	Stock No.	Price Each 1-5

SMART POSITION SENSORS, 100° AND 180° CONFIGURATIONS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Specifications
- Supply current: 45 mA
- Output: 0.5 Vdc to 4.5 Vdc (10% to 90% of 5 Vdc)
- Linearity: +/- 0.4% full scale output
- Measurement frequency: 312 Hz typ.
- Termination: 4-pin, M12 connector
- Operating temperature: -40°C to 85°C

100° 180°

Features
- Reliable, durable: Non-contact design reduces wear and tear, improving reliability and durability, minimizing downtime
- Easy to install: Installation takes 4 steps (1: position device; 2: drill holes 3: mount sensor; 4: locate magnet/ connect sensor) vs. up to 14 steps some competitive products require, simplifying installation and reducing set-up costs
- Rugged: As there are no moving parts within sensor, Honeywell utilizes unique packaging materials that make it resistant to vibration, shock, and extreme temperatures
- Flexible: Air gap tolerance of 7,8 ±2,5 mm [0.307 ±0.098 in] (100°) and 8,5 ±2,5 mm [0.338 ±0.098 in] (180°) between sensor and magnet expands application use
- Cost effective: Adaptable, non-contacting design allows customers to eliminate unnecessary connections for installation, thereby reducing installation steps/time and components

Potential applications
- **Transportation**
- Aerial work lift platform, front end loader and digger/ excavator boom position
- Scissor lift position
- Refuse truck lift and automatic reach arm position
- Mobile crane steering
- Timber harvester/processor equipment cutter arm angle
- On-board loader weighing system position
- **Industrial**
- Telescoping conveyor elevation
- Power generation contact angle
- Rail-road crossing arms position
- **Military**
- Remote weapon systems elevation
- Chassis suspension systems position height
- Military vehicle door position
- **Aerospace**
- Ground-based solar panels elevation and azimuth
- Ground-based satellite dish elevation and azimuth
- **Medical**
- Robotically-assisted surgery equipment position
- Patient bed elevation

SIX DEGREE OF FREEDOM INERTIAL MEASUREMENT UNITS - 6DF SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features
- IP67 and IP69k ratings provide resistance to weather
- Test to mechanical shock, thermal shock, and random vibration
- Voltage input flexibility (7 V to 32 V)

Honeywell's 6DF (degrees of freedom) Inertial Measurement Unit (IMU), 6-D Motion Variant, is designed to provide 6-dimensional motion sensing from a single device over six degrees of freedom by sensing motion in the forward/ backward, up/down, left/right accelerations and inclination angles, combined with rotation rates about three perpendicular axes (pitch, yaw, roll). Because the movements and the rotation along the three axes are independent of each other, such motion is said to have "six degrees of freedom". The 6DF IMU measures the motion of the equipment onto which it is attached and delivers the data to the equipment's control module using CAN communications protocol, allowing the operator to focus on other equipment functions, enabling more precise control than can be achieved by using only the human eye, and increasing safety, stability and productivity. The CAN baud rate and CAN 29 bit IDs are according to J1939.

Mfg. Part No.	Variant	Range (m/s^2)	Stock No.	Price Each Each

EVWAE SERIES 10MM GS POSITION SENSORS

RoHS Compliant Available

Panasonic

Features:
- Voltage rating: 5V
- Power rating: 0.05W
- Low profi le (H=2.2 mm), shaft hole diameters of up to 4 mm are available.
- Long operation life: 1 million operation cycles.
- A wide electrical output angle of a maximum 343°, ready for SMDs

Recommended Applications:
- Detection of air conditioner damper angles
- Detection of various control unit angles

GE's NOVASENSOR NPP-301 SERIES SURFACE MOUNT PRESSURE SENSORS

RoHS Compliant Available

Amphenol
Advanced Sensors

Features:
- Ultra-small Silicon Fusion Bonded (SFB) SO-8 surface mount package
- Non-ported
- Wide operating temperature range: -40°F to 257°F (-40°C to 125°C)
- Four element Wheatstone bridge configuration for circuit design flexibility
- Wide range of applications, including pneumatic controls, altimeters and barometers, cable leak, detection, portable gauges

Specifications:
- 10VDC maximum input excitation
- Compatible with most non-corrosive gases and dry air

GE's NOVASENSOR NPI-15 SERIES CURRENT DRIVEN MEDIA ISOLATED HIGH PRESSURE SENSORS"

RoHS Compliant Available

Amphenol
Advanced Sensors

Features

- Solid state, high reliability
- High sensitivity, 200 mV typical FSO with 1.0 mA excitation
- 316 L stainless steel, IsoSensor design
- Linearity 0.1% FSO typical
- Three standard ranges: 0 psi to 500 psi to 0 psi to 5,000 psi (0 bar to 34 bar to 0 bar to 345 bar) available, sealed gage or absolute
- Standard configurations include:
- —1/2–20 UNF threaded male port with 1.0 in (25.40 mm) flange
- —0.59 in (15 mm) diameter x 0.87 in (22 mm) long cylinder with o-ring seals
- —1/4–18 NPT male port with ⅞ in flange
- —1/8–27 NPT male port with ⅞ in flange

GE's NOVASENSOR NPA SERIES SURFACE MOUNT PRESSURE SENSORS

RoHS Compliant Available

Amphenol
Advanced Sensors

- Differential, gauge, absolute & low pressure
- 10" H2O to 30 psi full scale
- 60 psi proof pressure on all ranges
- Output options: Amplified analog, digital serial (14bit), digital I2C, uncalibrated mV
- Dual pressure and temperature output in digital mode
- On chip temperature sensor in digital mode
- 3.3VDC or 5VDC supply
- Operating temperature range of -40 to 125°C
- Total error band < ±1.5% FSO

The NPA product series is provided in a miniature size as a cost effective solution for applications that require calibrated performance. Packaged in a SOIC14 pin surface mount, the NPA series is available in gauge, absolute or differential pressure ranges with either mV, amplified analog or digital outputs. The sensor is intended for printed circuit board mounting and delivered in tape and reel form to simplify manufacturing handling.

GE's NOVASENSOR NPH SERIES LOW/MEDIUM PRESSURE SENSORS

RoHS Compliant Available

Amphenol
Advanced Sensors

Features

- Solid state, high reliability
- Standard TO-8 package suitable for PC board mount
- Low cost, small size
- Available in gauge, absolute, and differential pressure versions
- Media compatible with non-corrosive gases and dry air
- Thermal accuracy FSO 0.5% typical
- Overpressure capability to five times maximum rated pressure
- Three standard ranges: 0 to 10 inH2O (0 to 25 mbar), 0 to 1 psi (0 to 0.06 bar), and 0 to 5 psi (0 to 0.34 bar)
- Three standard ranges: 15, 30 and 100 psi (1, 2 and 7 bar)
- Nonlinearity 0.05% FSO typical
- Standard 3/16 in OD pressure port
- Ceramic substrate with temperature compensation resistors

GE's NOVASENSOR NPI-19 SERIES LOW PRESSURE SENSORS

Amphenol
Advanced Sensors

Features
- Solid state, high reliability
- 316L stainless steel, ISO sensor design
- ±0.5% static accuracy
- Temperature compensated 32°F to 158°F (0°C to 70°C)
- 125 mV typical FSO on current version
- 75 ±1 mV FSO on voltage version
- Thermal errors less than 2% FSO
- Two standard ranges: 0 to 2.5 psig (0 to 1 bar), 0 to 5 psig (0 to 17.24 bar)
- Standard configurations include: _ 0.74 in (19 mm) diameter x 0.28 in (7.1 mm) long cylinder with o-ring seals
- Custom configurations and other pressure ranges available. Please consult the factory.

ADJUSTABLE MINIATURE PRESSURE AND VACUUM SWITCHES

Gems Sensors & Controls
Our Experience • Your Solution

Featuures:
- Low pressure and vacuum switches have brass ports
- High pressure units are zinc plated carbon steel
- Available with either 18" flying leads or DIN electrical connections

Wire Leads

DIN Connector

Specifications:
- Contact rating: 5A at 12/24VDC and 120/240VAC
- Repeatability: 2%
- Circuitry: SPDT
- Port: ¼ NPT
- NEMA 4 rated; IP65 rated
- Electrical termination: DIN 43605A w/ 9mm cable clamp (HC) or flying leads (FL)

BASIC BOARD MOUNT PRESSURE SENSORS: NBP SERIES UNCOMPENSATED/UNAMPLIFIED

Honeywell

DIP - DAN | DIP - DLN | Leadless SMT - LAN | Leadless SMT - LLN | SMT - MAN

➤ CONTINUED ➤

BASIC BOARD MOUNT PRESSURE SENSORS: NBP SERIES UNCOMPENSATED/UNAMPLIFIED (CONT.)

- Small Size 7mm x 7mm (0.276in x 0.276in)
- Durablility which allows using in a tough evironment
- Operating Temperature Range: -40°C to 125°C
- Supply Voltage: 12 VDC
- Non-gel coating
- Measures absolute and gage pressures
- Package Type: DIP, Leadless SMT, & SMT

SMT - MLN

NBP Series Uncompensated/Unamplified are designed for customers who require a simple, basic performance, mV output, high quality, high resolution for medical and industrial applications. These sensors offer infinite resolution of the pressure signal. They will operate as specified from -40 °C to 125 °C [-40 °F to 257 °F]. This series is ideal for those customers who want to do their own compensation, calibration, and amplification in order to make use of the maximum resolution of the bare sensor output, leveraging a custom algorithm required for the application. Several package styles and mounting options, making it easier for device manufacturers to integrate the product into their applications. The NBP Series measures absolute and gage pressures. The absolute versions have an internal vacuum reference and an output value proportional to absolute pressure. Gage versions are referenced to atmospheric pressure and provide an output proportional to pressure variations from atmosphere. This series sensors are intended for use with noncorrosive, non-ionic gases, such as air and other dry gases and for non-corrosive, non-ionic liquids. All products are designed and manufactured according to ISO 9001.

BOARD MOUNT PRESSURE SENSORS

NEW | RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features:
- Temperature compensated and unamplified.
- Compensation makes it easier to integrate the sensor into a system by eliminating the need to calibrate the system over temperature and also offers reduced part-to-part variation.
- Compensated temperature range is 0 °C to 85 °C [-32 °F to 185 °F].
- Operating temperature range is -40 °C to 85 °C [-40 °F to 185 °F].
- Measures differential or gage pressures

Specification:
- Sensor Output: Analogue
- Supply Current: 600 µA
- Voltage Rating: 5 VDC

BASIC BOARD MOUNT PRESSURE SENSORS

RoHS Compliant Available

NEW

Honeywell
Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

Specifications:
- Port Style: Single Axial Barbed
- Pressure Measurement Type: Gage
- Sensor Output: Analogue
- Supply Current: 600 µA
- Voltage Rating: 5 VDC

Features:
- Provides a cost-effective, highvolume solution with a variety of options
- Ideal for customers who want a temperature-compensated sensor with the maximum possible resolution
- Package and pressure port options simplify integration into the application
- Wide operating temperature range and media compatibility options
- Six Sigma standards provide the highest level of product quality, performance, and consistency
- Dependable supply chain is there throughout your development cycle
- Fast response to orders and sample requests

Honeywell's Basic Board Mount Pressure Sensors, TBP Series, Compensated/Unamplified, are piezoresistive silicon pressure sensors designed for customers who require a simple, high quality, cost-effective, mV output, unamplified, temperaturecompensated sensor for use in medical and industrial applications. These unamplified and temperature-compensated sensors offer infinite resolution of the pressure signal. They will operate as specified from -40 °C to 125 °C [-40 °F to 257 °F]. The TBP Series is often ideal for those customers who want to do their own amplification in order to make use of the maximum resolution of the bare sensor output, leveraging any algorithm needed for the application. They are available with several package styles and mounting options, making it easier for device manufacturers to integrate the product into their applications. The TBP Series measures gage pressures. Gage pressure sensors are referenced to atmospheric pressure and provide an output proportional to pressure variations from atmosphere. They are intended for use with non-corrosive, non-ionic gases, such as air and other dry gases, and for non-corrosive, nonionic liquids when the silicone gel coating option is selected. All products are designed and manufactured according to ISO 9001.

PX2 HEAVY DUTY PRESSURE TRANSDUCER

NEW

RoHS Compliant Available

Honeywell
Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- The PX2 Series is a precise pressure measurement solution that optimizes system performance at a competitive cost.
- With over 15,000 standard configurations, the PX2 Series easily meets our customers' specific application needs.
- Knowledgeable application engineers are available to answer customers' specific design questions during the development of their product.
- Honeywell's global presence offers customers immediate product and application support throughout the development cycle, from design to global manufacturing.

Specifications:
- Voltage Rating: 5 V
- Supply Current: 5 mA
- Sensor Output: Ratiometric
- Pressure Measurement Type: Absolute

Honeywell's PX2 Series Heavy Duty Pressure Transducer is a portfolio of highly configurable pressure sensors that use piezoresistive sensing technology with ASIC (Application Specific Integrated Circuit) signal conditioning in a stainless steel housing. The PX2 Series is fully calibrated and compensated for offset, sensitivity, temperature effects and non-linearity using the on-board ASIC. This provides a Total Error Band of ±2% over the operating temperature range of -40 ##UndefTag-786##C to 125 ##UndefTag-786##C [-40 °F to 257 °F].The PX2 Series is compatible with a variety of harsh media including brake fluid, refrigerants, engine oil, tap water, hydraulic fluids, and compressed air. The wide operating temperature range, ingress protection up to IP69K, and 100 V/m radiated immunity allow for reliable performance in tough environments.These transducers measure absolute or sealed gage pressure. The absolute versions have an internal vacuum reference and an output value proportional to absolute pressure. The sealed gage versions have an internal pressure reference of one atmosphere at sea level.

ST SERIES PRESSURE TRANSDUCERS

RoHS Compliant Available

Honeywell
Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

The **ST series** are temperature compensated (-40°C to 100°C), calibrated, and have amplified outputs from a silicon sensing element. Applications include: pneumatic equipment, air compressors, air filtration monitoring, and industrial controls. Less than 500 microseconds response time. Port size: ⅛ NPT, stainless steel (¼ NPT and brass port options.) Pressure ranges down to 5 psi are available. Reverse polarity and EMI/RFI protection. Meet IEC enclosure IP65 classifications. Accuracy: ±1.0% FSO. Operating temperature: -40°C to 100°C (-40°F to 212°F). Connection: Packard Electric Metri-Pack™ Connector (**mfg. part no. 3685302**) 3M Leads.

SENSORS – PRESSURE

SPT SERIES STAINLESS STEEL PRESSURE SENSORS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Supply Voltage: +12 to +30VDC
- Response Time: 100msec
- Operating Temperature: -40°C to +125°C
- Pressure Connection: Steel 1/4-18 NPT Port
- Cable Length: 2' Standard (Pigtail Cable Connection)

Designed for pressure applications that involve measurement of hostile media in harsh environments. Will accommodate any media that will not adversely attack 304 or 316 stainless steel wetted parts. Calibrated and temperature compensated. Feature NEMA 4 design. Ideal for industrial automation and flow control, pressure instrumentation, hydraulic systems and process control applications.

MLH SERIES ALL METAL PRESSURE SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- All metal wetted parts
- No internal elastomeric seals – no o-ring compatibility issues
- Amplified outputs – eliminates cost of external amplifiers
- Reverse polarity and overvoltage protection
- Less than 2ms response time – accurate high speed measurement

Combines the latest in ASIC technology with a proven media isolating, steel diaphragm design. Exceeds CE heavy industrial EMC allowing for use in areas of high EMI/RFI. Accuracy: +/- 0.25% FSO. Compensated operating and storage temperature range: -40°C to +125°C. Gauge parts <300 psi, -40 to 85°C +/- 3%, 85 to 125°C +/- 105. Connection: Packard Electric Metri Pack™ Connector (**mfg. part no. 3685302**) 3M leads.

HEAVY DUTY PRESSURE TRANSDUCERS - PX2 SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features and Benefits
- Broad compensated temperature range allows customers to design the same transducer into a broad set of apps
- EMC protection means that the transducer will not be damaged by environmental electromagnetic interference

Potential Applications
- HVAC/R
- Air Compressors
- Injection molding knock-out valves
- Pumps
- Valves

PX2 series heavy duty pressure transducers are highly configurable pressure transducers that use piezoresistive sensing technology with ASIC (Application Specific Integrated Circuit) signal conditioning in a stainless steel housing that is compatible with a variety of harsh media. The PX2 Series is fully calibrated and compensated for transducer offset, sensitivity, temperature effects and non-linearity using an on-board ASIC. This provides a Total Error Band of ±2% over the operation temperature range of -40 °C to 125 °C [-40 °F to 257 °F].

TRUSTABILITY PRESSURE SENSORS LIQUID MEDIA OPTION

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Specifications

- Output options: ratiometric analog output or digital I2C or SPI compatible digital output
- Total error band: +/-1% of full scale for HSC series, +/-2% of full scale SSC series
- Operating temperature: HSC series 0°C to 50°C, SSC series -20°C to 85°C
- Supply voltage: 3.3VDC or 5VDC

Potential applications

- **Industrial:**
- Barometry
- Flow calibrators
- Gas chromatography
- Gas flow instrumentation
- HVAC
- Life sciences
- Pneumatic
- **Medical:**
- Airflow monitors
- Gas flow instrumentation
- Hospital diagnostics (gas chromatograph, blood analysis machines)
- Kidney dialysis machines
- Oxygen concentrotors
- Pneumatic controls
- Respiratory devices/machines (ventilators, anesthesia machines, patient monitoring
- Sleep apnea equipment

The new single sid Liquid Media Option allows the end customer to use port of the sensor with condensing humidity or non-corrosive liquid media (i.e. de-ionized water). eliminating the complexity or added expense of having to protect the sensor from this type of media.

TruStability™ SILICON PRESSURE SENSORS HSC AND SSC SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:

- HSC (High Accuracy Silicon Ceramic) Series
- SSC (Standard Silicon Ceramic) Series
- Stability: These sensors are the most stable silicon pressure sensors availiable.
- Accuracy: They are designed to provide an extremely tight accuracy specification.
- Flexibility: Their modular and flexible design offer customers a variety of package styles and options, all with the same industry-leading performance specifications.
- **Applications:**
- **Medical:**
- Airflow monitors
- Anesthesia machines
- Blood analysis machines
- Gas chromatography
- Gas flow instrumentation
- Kidney dialysis machines
- Oxygen concentrators
- Pneumatic controls
- Respiratory machines
- Sleep apnea equipment
- Ventilators
- **Industrial:**
- Barometry
- Flow calibrators
- Gas chromatography
- Gas flow instrumentation
- HVAC
- Life sciences
- Pneumatic controls

Specification:

- Output options: ratiometric analog output or digital I2C or SPI compatible digital output
- Total error band: HSC +/-1% of full scale span max. , SSC +/-2% full scale span max.
- Compensated temp range: HSC 0 to 50°C (32 to 122 °F), SSC -20 to 85°C (-4 to 185°F)
- Pressure types: absolute, differential, gage, compound
- Pressure ranges: 1 psi to 150 psi [60 mbar to 10 bar]
- Standard calibration units: psi, mbar, bar, kPa
- Supply voltage: 3.3 Vdc or 5.0 Vdc
- Mounting: lead through SIP or SMT

26PC SERIES TEMPERATURE COMPENSATED PRESSURE SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Differential and Gage Pressure Measurement
- Miniature Package
- Silicon Piezoresistive Sensor Chip
- Can be Used to Measure Vacuum or Positive Pressure
- Temperature Compensated for Interchangeability from 0°C to 50°C

Differential Gage

Contain straight port, compensated circuitry and fluorosilicone seals. Temperature compensated from 0°C to +58°C. Null and full-scale output are calibrated. .600″ long 4-pin SIP termination. Operating temperature: –40°C to +85°C. Recommended excitation voltage: 10VDC ratiometric (16VDC max.). Sensors are available with threaded, barbed, luer, and needle pressure port options. Other seal materials for media compatability are available. DIP termination option is available.

40PC SERIES MINIATURE SIGNAL CONDITIONED PRESSURE SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features
- Smallest amplified sensor package
- Operating temperature range from -45 °C to +125 °C
- Supply voltage: 5 VDC +/- 0.25
- Supply current: 10 mA max.
- Silicon piezoresistive technology
- Monolithic design
- 6 Pin DIP package
- Port designed for O-ring interface
- Excellent media compatibility
- Accuracy of 0.2%

The cost-effective 40PC Series miniature pressure sensor is the smallest amplified pressure sensor manufactured by Honeywell. The fully calibrated and temperature-compensated sensor is very robust, covering a wide range of temperature extremes. Additionally, the 40PC Series is compatible with a broad array of media, from dry air and water to refrigerant coolants and engine fuel. The 0.5 Vdc to 4.5 Vdc analog output voltage signal is linearly proportional to input pressure. These devices operate on a single end supply voltage of 5.0 Vdc.

140PC AND 160PC SERIES PRESSURE SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

140PC series sensors are for use in applications where high accuracy is desired. Supply current is 20mA max. Full-scale output: 5V. Shock specs meet MIL-STD-202, Method 213. Temperature range: –40°C to 85°C. **160PC series** pressure sensors are for use in low-pressure measurement applications. Recommended supply voltage: 8VDC. Input current: 8mA. Differential styles have two ports that allow connection to two pressure sources, and differential style functions same as gage when Port 1 is left open to atmospheric pressure. *Single port* **142PC** gauge types may be ordered by *substituting a "G" for the* **suffix** *"D."* Product to be used for service parts only. Not to be considered for new designs or applications.

Mfg. Part No.	Pressure Range	Measurement	Stock No.	Price Each
● 142PC01D	0-1 PSI	Differential	51F2590	226.79

ASDX SERIES ULTRA-LOW SILICON PRESSURE SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Specifications
- Ultra-low pressure products: 0 to 10 in H2O gage, +/-10 in H2O differentil, +/-5 in H2O differential
- Output options: ratiometric 12-bit analog or 14-bit I2C or SPI digital
- Temperature range: precision ASIC conditioning and temperature compensated over 0 °C to 85°C [32°F to 185°F]
- Pressure ranges: 10 inches H2O to 5 psi
- Power supply: 5 Vdc

Axial Port

Radial Port

Benefits
- Digital ASIC output provides faster performance through reduced conversion requirements and the convenience of direct interface to microprocessors or microcontrollers
- On-board signal conditioning allows for removal of signal conditioning components from the printed circuit board
- Custom calibration ranges for ASDX sensors combined with digital output options provide support for many applications
- Achieves tight total error band, providing enhanced sensitivity and accuracy even at ultra-low pressure ranges

Potential applications
- Barometry
- Flow calibrators/gas flow instrumentation
- Sleep apnea equipment
- Pneumatic controls
- Ventilation/air flow monitors

SCX AND SCXL SERIES PRECISION COMPENSATED PRESSURE SENSORS

RoHS Compliant Available

Honeywell
Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

- *SCX series* response time: 100msec
- Operating temperature: -40°C to +85°C
- SIP Package
- *SCXL series* response time: 500msec
- Operating temperature: 0 to +70°C

Provide a very cost-effective solution for pressure applications that require high accuracy over a wide temperature range. Feature an integrated sensor element and laser-trimmed thick film ceramic housed in a compact nylon case. All devices are calibrated for span to within +/-1% and provide a very low pressure output of +/-300 microvolts maximum. Ideal for medical equipment, computer peripherals and pneumatic control applications.

SCX SERIES

All Found Here.

- Supply Voltage: +20VDC
- Response Time: 100msec
- Operating Temperature: -40°C to +85°C
- DIP Package

Provide a very cost-effective solution for pressure applications that require small size plus performance. Feature an integrated circuit sensor element and laser-trimmed thick film ceramic housed in a compact, solvent-resistant case. Double wide (0.600" lead spacing) dual-inline package. The PC board area used by each DIP is approximately 0.26 square inches, enabling the use of multiple sensors in limited board space. Thru-hole mounting. Ideal for medical equipment, computer peripherals, HVAC and pneumatic control applications.

M5100 INDUSTRIAL PRESSURE SENSORS

RoHS Compliant Available

measurement SPECIALTIES

Features:
- Heavy industrial CE approval
- Reverse polarity protection
- Leak proof: No o-rings, organics, or welds exposed to the pressure media
- Over 10million pressure cycles without failure

Specifications:
- 1/4 NPT male connection
- Termination: Series M5146: DIN 43650 C connector with mate; Series M5131: 24" cable
- Media compatibility: Fluids compatible with 17-4 PH stainless steel
- 1% total error band

MSP-300 MICROFUSED STAINLESS STEEL ISOLATED PRESSURE TRANSDUCERS

measurement SPECIALTIES

- Accuracy: < 1% FS
- Zero/span and thermal error: <±2% FS
- Operating temperature: -20°C to +85°C
- Compensated temp range: 0°C to +55°C
- Connection: 2 feet cable

MSP-300

Suitable for measurement liquid or gas pressure, even for difficult media such as contaminated water, steam, and mildly corrosive fluids or gases. Machined from a solid piece of 17-4 PH stainless steel. Includes a ¼ NPT pipe thread allowing a leak-proof, all metal sealed system. There are no o-rings, welds or organics exposed to the pressure media.

PX309 SERIES HIGH PERFORMANCE GENERAL PURPOSE PRESSURE TRANSDUCERS

NEWPORT

PX309

PX319

- Long-Term Stability (1 Year): ±0.25% typical
- Typical Life: 10 million cycles
- Operating Temperature: -40 to 85°C (-40 to 185°)
- Proof Pressure:
- All psia and <50 psig Ranges: 3x capacity or 20 psi, whichever is greater
- 100 psig Ranges: 2x capacity
- Burst Pressure: 500% of capacity or 25 psi, whichever is greater (exclusive of fitting)
- Response Time: <1 ms
- Shock: 50 g, 11 ms half-sine
- Vibration: ±20 g
- Protection Class: IP 65
- Wetted Parts: 316 SS for all psia ranges and 1 to 50 psig; 17-4 PH SS for ranges 100 to 10,000 psig
- Pressure Port: 1/4-18 MNPT
- Other Electrical Connections Available :
- **PX309**: 1.5 m (5') 3-conductor cable
- **PX319**: 9.4 mm Mini DIN connector with mating connector included
- **PX329**: Twist-lock connector, mating connector sold separately (**PT06V-10-6S**)

NEWPORT's **PX309 Series** high performance general purpose pressure transducers use two state-of-the-art silicon technologies. Pressure ranges below 100 psi use a high-accuracy silicon sensor protected by a fluid filled stainless steel diaphragm. Ranges 100 psi and above use high-accuracy silicon strain gages molecularly bonded to the stainless steel diaphragm. Both systems provide a rugged sensor with high accuracy and excellent long term stability.

HIGH PERFORMANCE CURRENT OUTPUT PRESSURE TRANSMITTERS

NOSHOK

- Accuracy up to +/- 0.25 % Full Scale (Best fit straight line)
- Welded stainless steel pressure chamber, High overpressure protection
- Advanced diffused semiconductor and sputtered thin film sensor for maximum stability
- High alternating load resistance
- CE compliant to suppress RFI, EMI and ESD noise interference
- Output: 4 mA to 20 mA
- Power Supply: 10 Vdc to 30 Vdc

NOSHOK 100 Series Current Output Pressure Transmitters are designed to provide a previously unequalled level of performance, utilizing diffused semiconductor and sputtered thin film strain gage technology. 100 Series transmitters are highly repeatable, shock resistant and are extremely stable over long periods of time. CE compliance which includes substantial levels of RFI, EMI and ESD noise protection combined with reverse polarity and over-voltage protection hardens the product so it performs well in the most demanding applications. Advanced manufacturing techniques combined with technologically advanced standard features allow NOSHOK to offer a level of performance previously found only on transducers costing hundreds of dollars more. Final calibration tests performed on all NOSHOK transmitters prior to shipment ensures 100% "out of the box" reliability.

DP-100 SERIES DIGITAL PRESSURE SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24 VDC
- Ambient temperature: -10 to +50 °C (14 to +122 °F)

An industry first dual, three-color digital display enhances ease of use of pressure sensors. The user can concurrently view the real-time pressure reading and threshold value for quick changes during routine machine maintenance. The highly readable display offers the setting of two colors to indicate the output state (red and green) as well as a third (orange) to indicate the menu settings. Also, both displays feature 12 segment characters, which allow for the display of letters in addition to numbers. This enables easy on screen labeling of sensors in large arrays, for instantaneous identification.

DPC-L100 SERIES DUAL DISPLAY DIGITAL PRESSURE SENSOR CONTROLLERS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24 VDC
- Ambient temperature: -10 to +50 °C (14 to +122 °F)

For the detection of air and liquid pressure, the DPC/DPH-L100 series has been developed to achieve complete application coverage for all your pressure sensing needs. With one sensor head, you can now accurately detect the pressure of gases as well as liquids such as water and oil. The separate amplifier design allows for the panel mounting of the amplifier while the sensor head is mounted remotely.

Mfg. Part No.	Rated Pressure Range	Output Type	Stock No.	Price Each 1-4
DPC-L101	Positive pressure: 0 to 50 MPa Compound pressure: -0.1 to 1.0 MPa	NPN open-collector	40T7692	123.90
DPC-L101-P		PNP open-collector	40T7694	123.90

9016 SERIES INDUSTRIAL VACUUM SWITCHES / 9012G SEREIS PRESSURE SWITCHES

RoHS Compliant Available

SQUARE D by Schneider Electric

Features

- Maximum allowable positive pressure: 100 psig
- NEMA type 4, 4X & 13 enclosure
- Diaphragms are oil resisting, nitrile butadiene rubber (BUNA N)
- Pipe tap (NPTF): 1/4 - 18

9012GAR

9012GAW

GAW types are provided with double throw contacts; normally open and normally closed circuits allow these controls to be used for standard or reverse action applications. Standard controls can be mounted from the front with the bracket provided. Two mounting screws will be required for a firm attachment to any smooth, flat surface. Range and differential adjustments are internal and exposed by removal of the front cover.

OSISENSE XM XMLP SERIES PRESSURE TRANSMITTERS

RoHS Compliant Available

Schneider Electric

- Simple installation
- Compact design, great for use in confined spaces
- Rugged 304 SS enclosure
- Pressure ranges from 0 to 3000psi
- M12, electrical connection
- Repeat accuracy: 0.1% of the measuring range
- 4-20mA, analog output
- Operating temperatures: -22°F to +212°F
- IP65 and IP69K rated
- Thin film gasket free technology suitable for use with most fluids including hydraulic fluids, refrigerent fluids, fresh water and air

OsiSense™ XLMP, a new range of compact pressure transmitters for industrial operations and use in thin film technology to reduce noise levels, reduce temperature coefficients and achieve high accuracy. This technology makes the transmitter particularly compact while offering impressive precision and long term stability.

CYLINDRICAL INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

Autonics Sensors & Controllers

- Improved noise resistance with dedicated IC DC 3-wire
- Reverse power polarity, surge, overcurrent protection (Except PR08 Series)
- Long life cycle and reliable simple operation
- Connector types shorten maintenance time
- Red LED status indication
- IP67 rated waterproof structure (IEC standard)

ELECTRIC CAPACITIVE PROXIMITY SENSORS

RoHS Compliant Available

Autonics Sensors & Controllers

- Able to detect iron, metal, plastic, water, stone, wood, etc.
- Long life cycle and high reliability
- Reverse power polarity, surge, overcurrent protection
- Easy to adjust the sensing distance with sensitivity adjuster
- Red LED status indication
- Easy to control of level and position

CAPACITIVE PROXIMITY SENSORS

RoHS Compliant Available

CARLO GAVAZZI

- For sensing of granulates, plastics and other ferrous and non-ferrous materials
- Featuring patented TRIPLESHIELD™ protection from noise interference caused by ESD, GSM or transient bursts
- Newer types feature "teach-in' pushbutton programming for sensing range, material detection and N/O or N/C output programming; humidity, dirt and moisture compensation; and automatic detection of NPN or PNP loads
- 12, 18 and 30 mm diameters and compact flat pack housing
- Rugged and cost effective polyester housings
- Adjustable sensitivity, up to 30mm
- 3 or 4 Wire DC, 2 wire AC/DC or 2 wire AC
- Easy to View LED Indication
- 2 meter PVC cable (except types ending with -6)

ICB SERIES - INDUCTIVE PROXIMITY SENSORS

CARLO GAVAZZI

- Environmentally friendly design and construction
- For sensing metal parts and materials
- Advanced microprocessor
- 12, 18 and 30mm diameter housings
- Rugged and cost effective nickel plated brass housings
- Standard and extended sensing range options
- Easy to view LED indication
- 3 wire sensors
- *Compact housing length
- *6.6 feet (2m) PVC cable
- *NPN or PNP, NO or NC outputs
- 10-36VDC supply with 200mA maximum output
- Common Applications Include: Detection of moving parts in construction equipment, Object position detection on conveying equipment, and Detecting parts and tools in CNC equipment

GLOBAL PLUS INDUCTIVE PROXIMITY SENSORS

EATON

Proximity Sensors

Connector Cable

- Most cost-effective inductive proximity sensor on the market
- Choose from cable or connector versions
- 4 LED indicators on all connector versions, single LED indicator on cable versions
- Short-circuit protection on all DC models

The Cutler-Hammer® Global Plus Proximity Sensor Family was designed by Eaton's Electrical business as the optimal solution for high volume OEM customers. It has been optimized to include the basic functions for high sensing reliability, at the price you need. The Global Plus line offers 12mm diameter connectorized and cable versions with a bright LED indicator to show output status. Nickel-plated brass housing, IP67 degree of protection. CE certified.

GLOBAL SERIES INDUCTIVE SENSORS

RoHS Compliant Available

EATON

- Cost effective inductive sensor for high volume use
- Available in industry-standard 8, 12, 18 or 30mm diameters
- DC models available in 2-wire or 3-wire (NPN or PNP) operate on 10-30 VDC
- AC models operate on 20-250 VAC
- Switching frequence of 2 kHz for DC models
- Shielded and unshielded models available
- Models available in either 6.5 ft. (2m) cable or 4-pin euro quick-disconnect

The Cutler-Hammer Global Series inductive proximity sensor family was designed by Eaton's electrical business as the optimal solution for high volume OEM customers. It has been developed to include the basic functions for high sensing reliability, at the price you need. The Global Series line offers 8, 12, 18 and 30mm diameter connectorized and cable versions with a bright LED indicator to show output status. Nickel-plated brass housing, IP67 degree of protection, CE and cCSAus certified.

PANCAKE STYLE INDUCTIVE PROXIMITY SENSORS

CE RoHS Compliant Available EATON

- Auto configures to sinking (NPN) or sourcing (PNP) when wired
- Available in AC/DC 2-Wire or DC 4-Wire varieties
- Dual LEDs indicate both power and output status
- Operating temperature: -40°C to 70°C
- Repeatability: <3%
- Hysteresis (max): 15%

iPROX INTELLIGENT INDUCTIVE PROXIMITY SENSORS

CE EATON

Fig. 3

Fig. 1

Fig. 2

- Auto configures to sinking (NPN) or sourcing (PNP) when wired
- Stainless steel tubes with shock resistant front caps
- Bright dual color 360° status LED, green for power, red for output
- Extended sensing ranges, double that of standard proximity sensors

This full featured proximity sensor combines extended ranges with ruggedness to solve even the toughest applications. It's high vibration absorbing potting compound ensures a longer sensor life and superior resistance to high pressure wash downs and corrosive environments. The DC models make installation easy by sensing whether it needs to NPN or PNP, then auto configuring to that mode. This allows for one sensor to be used in either application. Superior temperature range of -40°C to 70°C. High noise immunity level of 10 v/m.

MAGNETIC PROXIMITY SENSORS

RoHS Compliant Available

HAMLIN // NOW PART OF Littelfuse Expertise Applied | Answers Delivered

- Initial contact resistance: 0.200Ω
- Typical operating time: 1.00ms
- Operating and storage temperature: -40°C to +105°C
- Shock without misoperation: 100Gs, 11ms, ½ sine wave
- **57145/57150** actuators sold separately

RECOMMENDED ACTIVATING POSITIONS

Sensor contacts are activated by an approaching magnetic actuator or selected magnet and released as it is withdrawn. Sensors are connected in series with the load. No additional power is required for operation. They are unaffected by any non-ferrous material placed between sensor and actuator. Contacts are hermetically sealed for protection from hostile environments. Operating Characteristics: Typical operate time: 1ms. Operation and storage temperature: –40°C to +105°C. Shock without false operation: 50G's 11ms, ½ sine wave. Typical life @ 5Vdc, 10 ma. 50×10^6. **59150 series** are identical to **59145 series** except leads exit from opposite ends of package. Notes: **59085 series** contains both sensor and magnet. Actuation is obtained by inserting a ferrous vane between them. Operate and release positions depend on thickness of vane. (See position B.) **59050 series** PINS 0.0185D x 0.130"L, 0.8" spacing. **59125 series** terminals 0.025", 0.240"L, 0.100" spacing. **Mfg. part no. 59135-12"** Flying leads, 20 AWG, 19 x 32 teflon-insulat. 200°C, 300V, UL 1180. All others-12" Flying leads, 24 AWG, 7/32 PVC, 105°C, UL 1430 or UL 1569, 59135 Series CSA certified. **59030** and **59050 series** are not UL listed.

SHORT BODY INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

E2E proximity sensors detect ferrous metal objects. Packaged in threaded, cylindrical nickel-plated housing. All are normally open. All are shielded for reliable sensing even when mounted near metal housings. All feature operation indicators include mounting nuts. Rated NEMA 1, 4, 6, 12, 13 and IP67. Mounting accessories and protective silicone covers are also available; *go online or call.*

Input voltage: 24-240VAC, switching to 300mA. Mfg. part numbers with **-53-US suffix** are short-circuit protected. Prewired with 6.5 feet (2 meters) cable. UL recognized. **-US suffix** are CSA certified. Dimensions and sensing ranges are in inches and (mm).

PLASTIC INDUCTIVE DC, CYLINDRICAL PROXIMITY SENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

E2F series detects metal objects and offer excellent resistance to chemical and water washdown environments. Shielded for mounting near metal. Features operation indicators and is prewired with 6.5' of cable and 2 mounting nuts. Meets NEMA enclosure types 1, 3, 4, 6, 12, 13, IEC IP68 classification. UL recognized, CSA certified, CE compliant.

2-WIRE AC SENSORS
Input voltage: 20-264VAC, switch up to 100mA; except circuit protected type with **53-US suffix**, which is 90-140VAC, 300mA. CSA certified (**53-US** version only).

EXTENDED RANGE INDUCTIVE PROXIMITY SENSOR

CE

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

E2EM Series DC 2-wire and 3-wire models provide greater sensing distance and design flexibility. Prewired 2m (6.56′) cable. Voltage supply: 12 to 24VDC. 100mA output. Enclosure rating IP67. 2-wire models have no polarity, eliminating reverse wiring. Models below are normally open; PNP models also available; *go online or call.* CE compliant.

2-WIRE MODELS

Mfg. Part No.	Size	Description	Sensing Distance	Stock No.	Price Each 1-9
E2EM-X30MX1 2M	M30	Unshielded	30mm (1.18″)	19C7889	261.02

(60570)

EXTENDED RANGE DC 3-WIRE PROXIMITY SENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

E2A DC 3-wire proximity sensors provide a sensing distance approximately 1.5 to 2 times longer than standard proximity sensors. Choice of prewired cable or M12 connector. Voltage supply: 12 to 24VDC. Normally open NPN output.

TL-W SUBMINIATURE, FLAT-PACK PROXIMITY SENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Fit tight spaces as small as 0.39″ x 1.06″ (10mm x 27mm). Watertight construction conforms to IEC enclosure type IP67 classification. Ideal for conveyor mounting. Mount directly onto metal base or rail. Rugged, low-profile plastic housing. Prewired with 2m (6.56′) cable length. Mounting bracket included. Inductive, 3-wire DC, 10-30VDC supply, 100mA switching, unshielded. PNP output models also available; *go online or call.* UL registered, CSA certified, CE compliant.

E2K-F FLAT-PACK CAPACITIVE PROXIMITY SENSORS

CE

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Flat-pack, thin rectangular plastic DC sensor fits space-confined installations
- Non-contact detection of metallic and non-metallic targets including water, oil, glass, plastic and wood
- Detect level inside non-metallic containers
- 10mm (0.39″) plastic body is ideal for conveyor wall mounting
- Unshielded sensor has LED indicator and fixed sensitivity for simple installation

Built-in DC amplifier provides NPN switching of loads up to 100mA. Supply voltage: 10-30VDC. Prewired with 2m 3-conductor cable. Enclosure ratings include IEC IP66, NEMA 1, 4, 12 and 13.

CAPACITIVE PROXIMITY SENSORS

NEMA

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

E2K-X standard and **E2K-C series** adjustable range capacitive proximity sensors detect metallic and non-metallic objects such as glass, wood, paper, water, oil, and plastic. Switching up to 200mA. Both versions are unshielded, feature operation indicators, come pre-wired with 6.5′ of cable, and operate in temperatures from -13°F to +158°F. **E2K-C series** adjustable versions have plastic body construction, are 3.23″ (82) long, and include mounting brackets. **E2K-X series** standard versions have threaded plastic body construction and are 3.15″ (80) long with mounting nuts. Diameters are listed in description column. All sensors are CSA certified. **E2K-C series** are UL listed. **E2K-X series** are UL recognized. All meet IEC enclosure IP66 classification and NEMA enclosure types 1, 4, 12, and 13.

LIMIT SWITCH STYLE PROXIMITY SENSORS

OMRON AUTOMATION & SAFETY

E2Q2 series offers flexibility with a sensing face that easily changes to any of 5 positions. Installation uses same mounting dimensions as a standard limit switch. Conduit opening: ½-NPT. **E2QWN series** are weld field and noise immune, 9-way configurable with 3-pin micro-connector. Both are shielded except 30mm sensing distance versions. Rugged plastic body and stainless steel screws. Enclosure rating IP67. NO=normally open; NC=normally closed. CE compliant.

Mfg. Part No.	Output Type	Sensing Distance	Supply	Stock No.	Price Each 1-9
E2Q2-N15Y4-51*	SCR (NO or NC)	0.59" (15mm)	20-250VAC	19C7898	284.28
E2Q2N15Y4-U	SCR (NO or NC)	0.59" (15mm)	20-250VDC	98B7939	269.67
E2Q2-N30MF3-U	PNP (NO + NC)	1.18" (30mm)	10-60VDC	19C7902	226.80

*Weld field immune.

GX-U/FU 2-WIRE CYLINDRICAL INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

Panasonic

- Supply Voltage: 12 to 24VDC +10/-15% Ripple P-P 10% or less
- Current: 800mA or less
- Ambient Temperature: -25°C to +70°C

The GX-U/FU series of cylindrical proximity sensors is a high-performance, easy to use solution for your metal detection needs. It features a robust mounting area that has been improved to accept approx. four times greater tightening torque than that of conventional models. Because the sensor can be securely tightened, it is suitable for use in applications that are susceptible to vibration or shock.

GX-F/H SERIES RECTANGULAR INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

Panasonic

- Supply voltage: 12 to 24VDC
- Current consumption: 15 mA or less
- Ambient temperature: -25 to +70°C (-13 to +131°F)
- Ambient humidity: 45 to 85 % RH, Storage: 35 to 95 % RH

Introducing the newest member of the rectangular proximity sensor line, the GX-F/H series. This exciting new series offers an unprecidented level of stability, durability, and workability. Using advanced manufacturing techniques, Panasonic is able to create sensors that are minimize part to part variance and offer a detection distance that only varies by a maximum of 0.4mm! The result is an incredibly stable detection that is suitable for usage in high volume applications where precision from installation to installation is imperative.

CYLINDRICAL RELAY OUTPUT INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

PEPPERL+FUCHS SENSING YOUR NEEDS

Specifications

- Supply Voltage: 10-30 VDC, 20-132 VAC
- Max. Relay Switching Voltage: 30 VDC/250 VAC
- Max. Relay Switching Load (Resistive): 6 Amps
- Output Circuit: Form C relay (SPDT)
- Operating Temperature: –14°F to +158°F
- Terminal style: 3 meter cable

Rugged P+F relay output sensors switch load currents to 6 amps. Designed for demanding applications, these products withstand severe mechanical shocks and operate reliably at temperatures down to –40°F.

LIMIT SWITCH STYLE INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

PEPPERL+FUCHS SENSING YOUR NEEDS

- Input voltage: 20-250 VAC; 45-65 Hz
- Max. load current: 500 mA
- Operating temperature: -14°F to +158°F
- 5 position head style for easy mounting
- Conduit opening: ½" NPT
- Dimensions: 118 x 40 x 40 mm
- Screw terminal termination
- Dual LED status indicators for power and output
- IP67/68 sealing

P+F limit switch style inductive sensors mount in the same footprint as traditional mechanical limit switches. Their sensing ranges extend from 15 mm to 40 mm. They are available in multiple output configurations. P+F sensors utilize state-of-the-art technology to achieve unparalleled product reliability. Replace mechanical limit switches with solid-state sensing and switching.

CUSTOM PANEL METERS

Standard modification or customization of analog or digital panel meters.

newark.com/custom-panel-meters

(212570)

OSISENSE® XS INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

Telemecanique Sensors

Features

- Increased range (x2), sensing distance easier to adjust
- All standard diameters (complete range, from ∅ 6 to ∅ 30 mm)
- Long and short product lengths to meet the most demanding dimension standards on the market
- DC and AC/DC versions available for maximum flexibility
- Meet the International Electrotechnical Commission (IEC) standards , NEMA, UL, CSA, VDE and more
- Nickel plated brass housing
- Short barrel body style

Specifications

- Voltage range: 12 to 24 VDC
- Load current max.: 200 mA
- Temperature range: -20°C to 70°C
- Cable size: 2m (6.56ft)
- NEMA 4X (indoor use only)
- M12 connector type

Enable sensing, without physical contact, of metal objects. Their range of applications is very extensive and includes:monitoring the position of machine parts (cams, end stops, etc.), counting the presence of metal objects, etc. Advantages of OsiSense® XS Inductive proximity sensors: High operating rates. Fast response. Excellent resistance to industrial environments (robust products, fully encapsulated in resin). Solid-state technology: no moving parts, therefore service life of sensor not related to number of operating cycles.

OSISENSE™ XS INDUCTIVE PROXIMITY SENSORS - CYLINDRICAL

Telemecanique Sensors

OsiSense® XS9 stainless steel inductive proximity sensors are tough enough for your harsh industrial application and environment. Manufactured with unique one-piece stainless steel housing they are highly resistant to mechanical shock and vibration. OsiSense XS9 stainless steel inductive sensors are offered in 303 stainless for harsh duty industrial environment and corrosion resistant 316L for Food & Beverage applications. Both 303 and 316L versions meet IP69K for high pressure chemical and water wash down applications. Thanks to Factor 1 sensing feature, both ferrous and non-ferrous material can be detected from the same distance. They are offered in both flush and non-flush versions to fulfill all application mounting requirements. With a sensing distance up to 40mm, **OsiSense XS9** ensures reliable detection in most critical applications. This "3 times" sensing distance also provides a fast and simple set-up and reduces potential exposure to impact. With a high switching frequency this sensor allows you to detect rapidly and precisely fast moving metal parts. Operating frequency is 3 to 6 times higher than standard inductive sensors to give more accuracy to small objects detection.

Mfg. Part No.	Diameter (mm)	Connection	Sensing Distance	Discrete Output	Wiring Technique	Stock No.	Price 1-24

OSISENSE™ XS INDUCTIVE PROXIMITY SENSORS - RECTANGULAR

RoHS Compliant Available

Telemecanique Sensors

- Simple installation, easier maintenance: One-click concept makes operation and servicing easier
- Robustness and compliance with SIL2: The first general purpose proximity sensor with SIL2 certification (Safety Integrity Level 2)
- Selection guide: Easily select the product best suited to your application

A sensor that adapts quickly and easily to your machines. With unique one-click mounting and a rotating detection head, the new **OsiSense™ XS** cubic sensor can be installed quickly and easily on your machines or equipment. The orientation of the head can be adjusted manually and quickly without any special tools. Maintenance is simplified thanks to quick mounting and removal, as well as LED indicators of sensor status that are clearly visible from a long distance and from any direction.

XS6 INDUCTIVE PROXIMITY SENSORS

RoHS Compliant Available

Schneider Electric

Telemecanique Sensors

- Increased range (x2), sensing distance easier to adjust
- All standard diameters (complete range, from ∅ 8 to ∅ 30 mm)
- Long product lengths to meet the most demanding dimension standards on the market
- DC and AC/DC versions available for maximum flexibility
- Subjected to climatic cycle tests: -25°C to +70 °C (-13°F to 158°F) cycle, 95% RH
- Solid-State Output with Yellow LED state indicator
- Flush mountable / shielded
- Switching capacity: 200mA with overload and short-circuit protection
- Resistance to environment– IP 67 and IP 68 for pre-cabled versions

XS Inductive proximity sensors enable sensing, without physical contact, of metal objects. Their range of applications is very extensive and includes: monitoring the position of machine parts (cams, end stops, etc.), counting the presence of metal objects, etc. Advantages of OsiSense XS Inductive proximity sensors: High operating rates. Fast response. Excellent resistance to industrial environments (robust products, fully encapsulated in resin). Solid-state technology: no moving parts, therefore service life of sensor not related to number of operating cycles.

UPROX+ INDUCTIVE PROXIMITY SENSORS

TURCK

Industrial Automation

BI4U

Features:
- Replaces conventional wound coil system used in previous generation of sensors
- Sensing distances up to 250% higher than conventional ferrite core
- 4-pin M12 Eurofast Q.D. termination
- Short-circuit and overload protection incorporated
- Reverse polarity and wire-break protection
- LEDs indicate: Output energized and short circuit warning

Specifications:
- Environmental rating: NEMA 1, 3, 4, 4x, 6, 13; IP68
- Operating temperature: -13°F to 167°F ("WD style" 32°F to 185°F)
- Continuous load current: 200mA
- Voltage drop: 1.8VDC at 200mA
- Input voltage: 10-30VDC
- Normally open output
- Threaded barrel style

Solve space problems with picprox miniature inductive proximity sensors. Perfect for positioning control, small parts placement, robotic grippers, counting, inspecting, and other applications where space is a problem. Self contained DC units switch 100 mA loads with tiny 4 mm, 5 mm, 6.5 mm and 8 mm diameter housings with built-in LEDs.

12-30 MM BARREL AC/DC INDUCTIVE PROXIMITY SENSORS - 2-WIRE

RoHS Compliant Available

TURCK works

Industrial Automation

Features:
- Choice of Barrel with Potted-In Cable or ⅞-16 (minifast) or ½-20 (microfast) Quick Disconnect
- Short-Circuit and Overload Protected
- LED Indicator: Output Energized, Short-Circuit and Power-On (For M12 Only Output Energized)

Specifications:
- Environmental rating: NEMA 1, 3, 4, 6, 13; IP67
- Operating temperature: -13°F to 158°F;
- Voltage drop: 6.0 VDC at Full Rated Current
- Max. Leakage Current: 1.7 mA
- Input voltage: 20-250 VAC, 10-300 VDC
- Max. Load Current: AC 400mA, DC 300mA
- Output type: AC/DC

RECTANGULAR DC CAPACITIVE PROXIMITY SENSORS 3-WIRE

RoHS Compliant Available

TURCK works

Industrial Automation

Specifications:
- Environmental rating: NEMA 1, 3, 4, 6, 13; IP67
- Operating temperature: -13°F to 158°F
- Continuous load current: 200mA
- Voltage drop: 1.8VDC at 200mA
- Input voltage: 10-30VDC

Q08 — QF5.5

Features:
- Short-Circuit and Overload Protected Incorporated
- Choice of Potted-In Cable or M8 (picofast) Quick Disconnect Termination
- Reverse Polarity and Wire Break Protection
- LED Indicator: Output Energized and Power On
- Normally Open Output

Turck's compensation electrode technology prevents false triggers. In practice, sensors can be effected by water droplets, humidity, dust, etc., causing false outputs. To combat this effect, each Turck capacitive sensor incorporates a compensating electrode which forms part of a negative feedback circuit. When contaminants are on the sensor face, they affect the sensor's main field, as well as its compensation field. The negative feedback circuit detects the increase in both fields and can filter out the effect of contaminants.

RECTANGULAR DC INDUCTIVE PROXIMITY SENSORS - 3 AND 4-WIRE

RoHS Compliant Available

TURCK works

Industrial Automation

Q08 — Q10S — Q12

Features:
- Choice of Potted-In Cable or M8 (picofast), M12 (eurofast) Quick Disconnect
- Short-Circuit and Overload Protected
- Reverse Polarity and Wire Break Protection
- LED Indicator: Output Energized and Power On (Both on Q08 and CK40 only)
- Normally Open or Complementary Output (1 N.O. and 1 N.C.)

Specifications:
- Environmental rating: NEMA 1, 3, 4, 4x, 6, 13; IP67
- Operating temperature: -13°F to 158°F; Except Bi 7 +32°F to 140°F
- Continuous load current: 200mA
- Voltage drop: 1.8VDC at 200mA
- Input voltage: 10-30VDC
- Max. load current: 200mA

Turck Q-pak sensors are changing the shape of sensing, They fit in confined sensing areas where other sensors won't work their superior 2-50 mm ranges in packages up to 10 times narrower than the competition.

SENSORS – TEMPERATURE

CYLINDRICAL WIRE LEADED PLATINUM RESISTANCE TEMPERATURE DETECTORS (RTDs)

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Small cylindrical ceramic bodies are designed for drill holes and probe assemblies. Applications include HVAC room, duct and refrigerant equipment, temperature compensation in instrument and probe assemblies, and temperature regulation in process control. RTD type: 1000Ω/375 Alpha or 100Ω/385 Alpha. Interchangeability: ±0.1% (±0.3°C) or ±0.2% (±0.5°C) @ 0°C. Temperature range: –200°C to +260°C, Teflon®, –75°C to +540°C fiberglass. **HEL-705** have Teflon® insulated wire; **HEL-707** have fiberglass insulated wire.

EWS SERIES WALL MOUNT ENVIRONMENTAL SENSORS

RoHS Compliant Available

NEWPORT

NEW

Features:

- Interfaces with most process meters, controllers, recorders, dataloggers and data acquisition systems
- Solid state
- Output: 4-20mA or 1-5VDC (user selectable)
- Max. loop resistance: Ω = (V supply – 8 V)/0.02A
- Stylish design blends in well with office, computer room or lab decor
- For indoor applications only
- Miniature size: 3.12″ (79mm) L x 2.12″ (54mm) W x 1.78″ (45mm) H
- One-year manufacturer's warranty
- CE compliant

EWS-TX/N

EWS-BP-A

WALL MOUNT TEMPERATURE SENSOR

Mfg. part no. EWS-TX/N wall mount temperature sensor features temperature range of -18 to 57°C (0 to 135°F). Accuracy in still air: ±0.7°C (±1.2°F) @ 25°C; ±1.4°C (2.5°F) @ 25°C across full range. Accuracy in moving air: ±1.4°C (2.5°F); ±1.7°C (3°F) across full range. Repeatability: ±0.3°C (0.5°F). Temp. time constant: 9 sec. in moving air (1m/sec), 30 sec. in still air (for 63.2% response). Power: 12 to 24VDC.

Mfg. Part No.	Description	Stock No.	Price Each
● EWS-TX/N	Wall Mount Temperature Sensor	48M6129	80.00

WALL MOUNT BAROMETRIC PRESSURE SENSOR

Mfg. part no. EWS-BP-A wall mount barometric pressure sensor features range of 20.8 to 32 in Hg (10.20 to 15.72 psi). Accuracy: ±1% FSO. Repeatability: ±0.2% FSO. Pressure hystersis: ±0.15% FSO. Long-term stability: ±0.1% FSO/Yr. Operating temperature range: 0 to 60°C (32° to 140°F). Temperature compensation across full range. Output: user-selectable 4 to 20mA, 1 to 5VDC. Power: 12 to 24VDC.

TYPES RSJ AND RMJ ROUND-HOLE PANEL JACKS

RoHS Compliant Available

NEWPORT

NEW

MADE IN USA

RSJ-K-R/N

RSJ-T-S/N

RMJ-U-R/N

Features:

- **Type RSJ** standard size accepts all industry standard size connectors
- **Type RMJ** miniature size accepts all industry miniature size connectors
- Mounts in round or "D" punch holes
- Choice of round or square bezel
- Heavy-duty glass-filled nylon, rated to 220°C (425°F)
- Thermocouple-grade alloy formed contacts preserve accuracy of circuit even in changing ambient temperatures
- Polarity keyed
- Color-coded
- Front mount hardware and dust cap included; *order an extra supply separately below*
- Easy to install -- no special tools needed
- Ideal for single circuit applications

RTD-800 SERIES PRECISION RTD PROBES SPECIALIZED FOR LABORATORY APPLICATIONS

NEWPORT

RTD-830

RTD-860

RTD-830

- Housing Made From Aluminum for Fast Thermal Response
- Small Housing Size Allows for Installation on Most Flat Surfaces
- Housing Includes a 0.115″ Diameter Mounting Hole (Clearance Hole for a #4 Bolt), Can Also Be Cemented Into Place
- Sensor Contains a High-Accuracy, 100 Ohm, Class "A" DIN Platinum Element and 1 Meter (40″) of PFA Insulated & Jacketed Cable and 3-Pin Miniature Connector
- Temperature Coefficient (Alpha) = .00385 ohm/ohm/°C
- Temperature Range -60 to 230##UndefTag-786##C

RTD-860

- High-Accuracy Class "A" 100 Ohm DIN Platinum Element Standard
- Temperature Coefficient (Alpha) = .00385 ohm/ohm/°C
- Temperature Range Is -200 to 230##UndefTag-786##C
- Includes Stainless Steel Sheath and Flange with Pre-Drilled Mounting Holes for Easy Installation
- 3-Wire PFA Insulated & Jacketed Cable with Miniature 3-Pin Connector for Connecting to Most Instruments

The **RTD-830** is designed for use as a surface temperature sensor. The aluminum housing allows for fast transfer of heat to/from the sensing element. The housing contains a clearance hole for a #4 mouting screw so the sensor can be bolted or cemented into place. If bolt mounted, a small amount of High Conductive Paste placed between the housing and surface can improve thermal response. The sensor includes a 100 ohm Class A DIN Platinum element connected to 1 meter (40″) of PFA insulated & jacketed cable and a 3-pin miniature connector. The **RTD-860** sensor is designed for easy installation into air ducts, laminar flow booths or other applications where temperature measurements must be taken through thin walls or structures. The sensor features an all stainless steel welded construction consisting of a closed-end tube and mounting plate. The platinum RTD sensor is housed in the tip of the ⅛″ diameter tube for fast response. The 1″ dia. mounting plate has two (2) 0.15″ diameter holes for convenient mounting, and the sensor is supplied with 1 meter (40″) of PFA insulated & jacketed cable and miniature 3-pin connector.

5003 SERIES THERMAL SWITCHES

RoHS Compliant Available

AIRPAX

- Overall Depth: 0.250" (Without Projecting Terminals)
- Contact Rating for 100,000 Life Cycles: 5A Resistive, 120VAC; 3A Resistive, 240VAC
- Temperature Settings: +35°F to +325°F

Thin, lightweight, water-type thermal switches, for use when space is at a premium. The basic switch assembly is operated by a bimetal disc with positive, reinforced snap-action. Excellent shock and vibration resistance. Dielectric: 1500Vrms, 60Hz, 1min. Terminals to case. Loads under 100mA. 5VDC will require gold-plated contacts, with recommended minimum load of 10mA, 5VDC. UL recognized to 130°C operating temperature. CSA certified to 168°C.

6600 SERIES PC BOARD THERMOSTATS

RoHS Compliant Available

AIRPAX

6600 series is a miniature bimetallic snap-acting thermostat that provides sensing and switching in a single device. Lamp switching capability at 48VDC over its operating temperature range of 40°C to 120°C. Designed around the standard 8-pin N8A dual inline package, it is ideal for use on printed circuit boards, and can be installed using auto-insertion equipment.

6700 SERIES PC BOARD THERMOSTATS

RoHS Compliant Available

AIRPAX

Standard Tozzo Package

6700 series is a miniature, bimetallic, snap-acting thermostat that provides sensing and switching in a single device. It was developed for thermal management applications on power supplies but is also suited for use on crowded PC boards. Switching capability: 1A @ 48VDC. Operating temperature: 40°C to 130°C. The single-pole/single-throw switch assembly features a bimetallic element that is rated 100,000 cycles @ 5VDC 20mA resistive load.

TC-x-NPT SERIES PIPE PLUG THERMOCOUPLE PROBES

NEW

RoHS Compliant Available

NEWPORT

Features:

- Choice J, K, T or E thermocouple types
- Rugged 304SS design with strain relief spring
- ¼ NPT mounting thread
- Fiberglass insulated thermocouple-grade lead wires are stranded 20 AWG
- Leads protected with stainless steel overbraiding – resists abrasions and cuts, yet remains flexible
- Withstands pressures up to 2500 psi
- Grounded or ungrounded junction
- Stripped leads at end
- Probe temperature range to 650°C (1200°F)
- Transition joint/cable temperature range to 480°C (900°F)

TC-K-NPT-U-72/N

These high-pressure thermocouple plug sensors are ideal for vessel applications, pressurized containers and applications requiring mounted NPT security. The 304SS sheath has a 6.4mm (0.25") dia. that extends 0.5" from the end of the ¼ NPT pipe plug. To tighten mounting threads, there is a hex section that is 22mm (0.56") across flats that are 5.8mm (0.23") wide.

ULTRA HIGH TEMPERATURE THERMOCOUPLE CONNECTORS RATED TO 560°C (1200°F)

RoHS Compliant Available

NEWPORT

High Purity Alumina body connectors used for high temperature Thermocouple connections. Extra heavy-duty construction, color dot coded for applications such as high vacuum furnaces where contamination would adversely affect the process. Available in types J (iron-constantan), K (chromel-alumel) and T (copper-constantan). Types E,R,S,G,C,D,U and N are available upon request. Type **SHX** connector is miniature flat pin. Type **NHX** connector is standard size round pins.

THERMOCOUPLE TERMINAL BLOCKS WITH AUDIT CAPABLE FEMALE CONNECTOR

NEWPORT

- Screw type terminal for secure and maintenance free connections
- Type K, J, T, E, N, R/S and U calibrations
- Built in miniature female thermocouple connector for auditing and troubleshooting
- Fully enclosed - no end plates required
- DIN rail mountable - narrow 10.7 mm width
- Identified with calibration and "+, -" connections
- Write-on window included
- Terminal width: 10.7 mm (0.422 in)
- Terminal length/height: 51 mm (2.008 in)/42.3 mm (1.666 in)
- Installed height to 35 x 7.5 mm/35 x 15 mm DIN rail: 43.5 mm (1.713 in)/51 mm (2.009 in)
- Maximum wire size: 12 AWG/2.5 mm²
- Stripping length: 8 mm (0.31 in)
- Torque in Nm (in-lb): 0.6 to 0.8 (5.3 to 7.1)
- Temperature rating: -40 to 85°C (-40 to 185°F)

The new DRTB Series thermocouple terminal blocks are manufactured with thermocouple alloys to guarantee accurate readings. A built-in SMP compatible female receptacle accepts a miniature thermocouple connector. The female connector allows the user to connect to a handheld meter for applications such as data collection, quality assurance compliance, capability studies and troubleshooting installation or repairs. The plastic housing is made from gray polyamide 6.6 thermoplastic resin with a UL 94 V0 rating for 85°C. These thermocouple terminal blocks are fully enclosed and require no end plates. The screws and clamps are zinc plated, and together they provide an excellent vibration, maintenance free and corrosion resistant connection. DRTB terminal blocks mount on standard 35 mm DIN rails or 32 mm G-type rails, and are identified with calibration type and positive (+) and negative (-) connections. Wire entry is funneled to allow quick wire insertion even with stranded wire.

Mfg. Part No.	Description	Stock No.	Price Each
DRTB-J	Thermocouple terminal block, type J	39T9902	9.50

WORLD-BEAM QS18U ULTRASONIC SENSORS

RoHS Compliant Available

BANNER more sensors, more solutions

Features:
- Fast, easy-to-use TEACH-mode programming; no potentiometer adjustments
- Ultra-compact, rugged housing for harsh environments
- Two bi-colored LEDs
- Temperature compensation
- Fast response time: 15ms
- Supply protection: Protected against reverse polarity and transient voltages

Specification:
- Sensing range: 50 to 500mm (2″ to 20″)
- Supply voltage: 12 to 30Vdc
- Temperature range: -20°C to +60°C (-4°F to +140°F)
- Leakproof design rated IEC IP67, NEMA6P,or DIN40050 (depending on model)

Low cost, compact ultrasonic sensor for harsh environments in the versatile WORLD-BEAM standing housing. Ideal when the sensing target is made of clear or transparent materials, or the target surface varies.

ULTRASONIC SENSORS

QUICK DISCONNECT CABLES

Mfg. Part No.	TEACH Options	Cable Connection	Output	Stock No.	Price Each 1-2
● QS18UNA	Integral pushbutton or remote TEACH	4-wire, shielded cable, 2m	NPN	69K7353	120.18
● QS18UPA			PNP	69K7357	120.18
● QS18UPAQ8		4-pin integral Euro-style QD		69K7360	121.23

Mfg. Part No.	Length	Description	Stock No.	Price Each 1-2
● MQDEC2-415	5m	Straight, 4-pin Euro-style	34K8139	36.27

MOUNTING BRACKETS

Mfg. Part No.	Description	Stock No.	Price Each 1-2
● SMB18A	12-gauge, stainless steel right-angle bracket, clearance for M4 (#8) hardware	02H7579	4.76
● SMB18SF	18mm swivel bracket, black thermoplastic polyester with stainless steel hardware	02H7580	9.37

S18U — 18mm BARREL ULTRASONIC SENSORS

RoHS Compliant Available

BANNER more sensors, more solutions

- Fast, easy-to-use TEACH-Mode programming; no potentiometer adjustments
- Short dead zone
- Two bi-colored status LEDs
- Rugged encapsulated design for harsh environments
- Wide operating range of -20°C to +60°C (-4°F to +140°F)
- Temperature compensation
- 10 to 30V dc operation

Straight Housing

Right Angle Housing

S18UB series is configurable for normally open or normally closed operation and has a fast response time (5 milliseconds). **S18UI** and **S18UU series** has a scalable output that automatically distributes the output signal over the width of the programmed sensing window and has selectable response times of 2.5 or 30 ms.

Mfg. Part No.	Connection	Output Type	Housing	Stock No.	Price Each 1-2
● S18UBA	5-wire, 2 m (6.5') cable	NPN, PNP	Straight	99H2741	224.33
● S18UBAQ	5-pin Euro-style QD	NPN, PNP	Straight	86H7371	220.94
● S18UBARQ	5-pin Euro-style QD	NPN, PNP	Right Angle	99H2745	236.92
● S18UIA	5-wire, 2 m (6.5') cable	Current	Straight	99H2746	275.00

PEPPERL+FUCHS SENSING YOUR NEEDS

Specifications
- Input voltage: 10-30 VDC
- Operating temperature: -14 °F to +158 °F
- Sensing face: Epoxy resin/silica composite
- Housing material: Nickel-plated brass (UB), stainless steel (UC)
- Sensor protection: Short-circuit, overload, reverse polarity
- Protection: IP65
- Standard target: 100 mm x 100 mm flat plate
- Connection type V15: 5-pin micro DC
- Connection type V1:4-pin micro DC

Ultrasonic sensors use sound waves for measurement, making them ideal for consideration in applications that are difficult to solve with photoelectric devices. They are available with adjustable single or dual switch points, or with analog outputs.They're often used for web detection or level control.

Mfg. Part No.	Sensing Range	Output	Stock No.	Price Each 1-2

OSISENSE™ XX ULTRASONIC SENSORS

RoHS Compliant Available

Telemecanique Sensors

- Connection: M12
- Nominal Sensing Distance: 2 mm to 50.8 mm (0.08 in. to 2.0 in.)
- 18 mm Ultrasonic Sensor

A technology suited to your needs. Ultrasonic sensors provide detection without physical contact for all objects, regardless of: material (such as metal, plastic, wood, or cardboard), nature (such as solid, liquid, powder, or paste), color and degree of transparency.

Optimize detection with OsiSense XX. With detection range of up to 50 mm (2.0 in.) and ability to detect all types of objects, the OsiSense XXV18 is ideally suited for industrial proximity sensor applications!

DIFFUSE SYSTEM - FIXED SENSING

MICRO VIBRATION SENSOR

RoHS Compliant Available

COMUS International

- Operating voltage: +15 V
- Operating temperature: -20°C to 70°C
- Reaction point: approx. 50 mg
- Size 2.45 mm x 2.85 mm x 1.7 mm
- Noiseless
- Protected against environmental stress
- Automated SMD-mounting

The micro vibration switch detects vibrations by means of a micro ball (d=0.8mm). The ball bridges two contacts reducing the resistance between the two external connection pads from several mega ohms (>30MOhm) to below 100 ohms.

Mfg. Part No.	Stock No.	Price Each 1-499

TRU-VUE PANEL METERS

Simpson

Modern, clear acrylic lens to update your panel design. All models shown have black knife-edge pointer and ±2% f.s. accuracy. Available in 5 sizes: 1½", 2½", 3½", 4½", 4"x 6"; *go online or call for sizes and ranges not shown. Order external shunts separately on page 1897 and current transformers separately online or call.*

"CROMPTON" EXTERNAL SWITCHBOARD AND PORTABLE SHUNTS

Crompton INSTRUMENTS

Features:

- Accuracy +/- ¼% (0.25%)
- Temperature coefficient of resistance: +/- 0.000015 between 40-60° C
- Standard 50mV drop

FN 100-50mV

DC Shunts are a separately mounted device for extending the measured current beyond the limits of selfcontained DC ammeters. Switchboards non-insulated style, are for use on Busbar in Switchgear applications. Base-mounted insulated types are for light control panels, educational and laboratory application. Lightweight insulated units are for Industrial application where strength and applications where space savings are needed, or for Military applications where dimension to MIL 10304 is required. For use with BUS. Standard 50mV drop; 60A, 70A, 100A, and 150mV units also available online .

NANOMETER SERIES DMR20-1-ACV LED DISPLAY LINE MONITOR

NEW

RoHS Compliant Available

muRata Ps Murata Power Solutions

IP67 NEMA

- Universal 85 to 264Vac measurement range
- Self-powered directly from the AC supply
- Installs in "oiltight"1.20 inch (30.5mm) round cutouts
- Four-digit LED display with overvoltage indication
- Reads true-rms value to 0.1V resolution
- Knockout punches and tooling available
- Digital replacement for analog panel meters
- Screw-style terminal block simplifi es installation
- Self-resetting internal fuse for long-term reliability
- Provides moisture resistance to IP67/NEMA 6
- Supplied with EPDM rubber gasket and plastic hex nut
- Approvals to UL/cUL/IEC/ 61010-1

Murata Power Solutions' new **DMR20-1-ACV** self-powered, AC line-voltage monitors are designed to measure and display the true-rms voltage of AC power systems. Simply con nect any 85 to 264Vac 50/60Hz power source and these meters are fully operational—no additional components or power sources are required. The unit can also measure distorted AC power sources including triangle, square, and the quasi-sine output of many DC to AC power inverters. The **DMR20-1-ACV** is housed in a rugged, round polycarbonate case that provides excellent protection against moisture, dust, shock and vibration. Panel installation is straightforward: Using readily available tooling, simply drill and punch a 1.2 inch (30.5mm) diameter hole and anti-rotation notch, insert the meter and gasket, and securely fasten the meter using the supplied hex nut. The supplied hardware is designed to provide protection to IP67/NEMA 6. Their large, 0.30"/7.6mm, bright LED displays can be easily read from 10 feet away (3 meters). These meters accurately display ac voltages with 0.1V resolution. A built-in reset-table fuse assures long term reliability. All DMR20-1-ACVs employ a 13-bit A/D converter and precision metal-film resistors to achieve outstanding performance over an operating temperature range of –25 to +60°C.

Mfg. Part No.	Description	Stock No.	Price Each 1-4

(212226)

NANOMETER SERIES DMR20-10-DCM AUTO-RANGING DC VOLTAGE MONITOR

RoHS Compliant Available

muRata Ps Murata Power Solutions

NEW

IP67 NEMA

- Self-powered, requires only two connections
- Auto-ranging 6 to 75Vdc input range
- Installs in round "oiltight" 1.20 inch (30.5mm) cutouts
- Reverse polarity protected to –100Vdc
- Four-digit LED display with overvoltage indication
- Digital replacement for analog panel meters
- Screw-style terminal block simplifi es installation
- Self-resetting internal fuse for long-term reliability
- Provides moisture resistance to IP67/NEMA 6
- Supplied with EPDM rubber gasket and plastic hex nut
- Panel knockout punches and tooling available

Murata Power Solutions' new **DMR20-10-DCM** self-powered, auto-ranging DC voltage monitors are designed to measure and display the outputs the most popular DC power systems. Simply connect any 6 to 75V DC power source and these meters are fully operational—no additional components or power sources are required. Their large, 0.30"/7.6mm, bright LED displays can be easily read from 10 feet away (3 meters). These auto-ranging meters accurately display DC voltages with 0.01V in the LO Range (below 51V), or 0.1V resolution in the HI Range (above 51 V). A built-in resettable fuse assures long term reliability. All **DMR20-10-DCM's** employ a 13-bit A/D converter and precision metal-fi lm resistors to achieve outstanding performance over an operating temperature range of –25 to +60°C. The **DMR20-10-DCM** is housed in a rugged, round polycarbonate case that provides excellent protection against moisture, dust, shock and vibration. Panel installation is straightforward: using readily available tooling, simply drill and punch a 1.2 inch (30.5mm) diameter hole and anti-rotation notch, insert the meter and gasket into the panel, and securely fasten the meter using the supplied hex nut. The supplied hardware is designed to provide protection to IP67/NEMA 6.

POWER MONITORS

GIMA® SERIES 3-PHASE METERS

Simpson's GIMA® series replaces ammeters, voltmeters, switches, power factor and kW indicators, and kWh meters. Provides a single source of instrumentation for all measurement and metering requirements. Offers accurate, high-speed, continuous measurement, regardless of harmonics and waveform interruptions. "Auto-Commissioning" ensures that a reverse current transformer connection will not cause reading errors. Per phase kW and power factor allow cross-phase connection errors to be quickly and easily detected. Full 4-digit resolution of single-phase values and 5-digit resolution of 3-phase values. Offers maximum visibility with a custom backlit LCD display. The display is fully visible under most conditions and from all angles. Clear display legends ensure simple reading with no multipliers required. Power: 115VAC. Input current: 5A. Also available with 230VAC power; *go online or call.* CE compliant.

POWERLOGIC® POWER METERS AND DIGITAL PANEL METERS

RoHS Compliant Available

SQUARE D by Schneider Electric

PM800
- Cost-effective, modular design
- Easy installation
- High-visibility display
- High accuracy measurements
- Power quality analysis
- Extensive data logging, trending and forecasting
- Custom alarming with time stamping
- Expandable I/O
- Multi-port serial and Ethernet communications

PM800

PM1000 / DM6000

PM1000 / DM6000
- Easy-to-read display
- Analog load bar
- Turbo Key access to information
- Quick and easy installation
- Color-keyed terminal board labeling
- Secure settings

Model	PM800	PM1000 / DM6000
Input Voltage	347VAC (l-n), 600VAC (l-l)	44 to 277VAC/VDC
Load Burden:	15VA or 10W w/ All Options	3VA max.
Ride Through Time:	45ms at 120VAC or 125VDC	100ms at 50V
Frequency Range:	45 to 67Hz, 350 to 450Hz	45 to 65Hz

PowerLogic® PM800 series power meters combine accurate, 3-phase energy and power measurement with data logging, power quality analysis, alarm and I/O capabilities not typically available in a compact meter. **PowerLogic PM1000 and DM6000 series** meters are easy-to-use, cost-effective meters that offer the basic measurement capabilities required to monitor an electrical installation. These state-of-the-art multi-function meters are characterized by their rugged construction, compact size and low installation costs.

ACM20 SERIES FOUR-FUNCTION AC POWER METERS

RoHS Compliant Available

Murata Power Solutions

Features
- Displays AC volts, amps, watts, and power factor
- User-selectable display modes: continuous auto cycling, or fixed reading
- Universal 85-264Vac (47-63Hz) operating range
- Built-in current transformers simplify installation
- Ideal for power distribution units (PDUs) and power strips
- True-rms readings of complex voltage and current waveforms
- Low-power consumption: less than 1/4watt from 120Vac
- One-piece polycarbonate housing fits 0U and 1U racks
- Surface mount design occupies minimal panel space
- Bright red LED-display with four annunciators
- Optional frequency reading models (0.1Hz resolution)

ACM20 series AC power meters display the most critical measurements in mains-powered equipment: voltage, amperage, active power (watts), and power factor. A front panel selector-switch provides two modes of operation: a fixed reading of any of the four parameters, or a continuous cycling through all four measurements. An optional model displays line frequency with 0.1Hz resolution. All ACM20 multi-function power meters include built-in current transformers—no other user-supplied components are required. **ACM20 series** AC power meters are available in a choice of two input ranges: 0-32A (with 0.01A resolution, 9999 watts max.); 0-100A (0.1A resolution, 26.4kW max.). An 85-264Vac (47-63Hz) operating supply range makes these power meters perfect for worldwide power monitoring applications. And, unlike conventional, average-responding products, ACM20 power meters can accurately display the true-rms voltage and current values of triangle waves, square waves, and other irregularly shaped waveforms, with an accuracy of ±1% of full scale.

Mfg. Part No.	Measurement Range	Reading	Stock No.	Price Each 1-4

IDEC

High Performance Series: 5.7″ HG2G, 8.4″/10.4″ HG3G, 12.1″ HG4G TFT LCD Touchscreen

- 65,536 Colors
- Mount Landscape or Portrait
- Remote Access, Monitor and Control
- Video In and Audio In/Out (Except HG2G)
- Support USB Flash Drive, SD Card
- USB, Serial and Ethernet Ports
- UL , c-UL, ANSI/ISA 12.12.01-2007 Haz. Loc.,
- Type 4/4x, ABS, LR, NK, and CE

Basic Series: 4.6″ HG1F STN LCD Mono Touchscreen

- Power Voltage: 24 VDC
- Super Bright LCD Screens with 500 cd/m2
- Mount Landscape or Portrait
- RS232, RS485 or RS422 Compatible
- UL , c-UL, Type 13, IP65, ANSI/ISA-12.12.01-2007

Basic Series: 5.7″ HG2G Mono STN or Color TFT LCD Touchscreen

- Power Voltage: 24 VDC Mono and 12-24 VDC (Color)
- 256 Color or Monochrome
- Super Bright Screens with 500 cd/m2 (Mono), 400 cd/m2 (Color)
- Serial Port, Ethernet Port as an Option
- UL, c-UL, ANSI 12.12.01-2007 Haz. Loc., Type 13, IP65, CE

IDEC touchscreens create an efficient interaction between the user and the equipment. All touchscreens come with high pixel resolution and super bright LCD display for sharp quality images. The 5.7″, 10.4″ and 12.1″ TFT LCD color screens have an Ethernet port to allow for remote programming, monitor, and control over the Ethernet network. User can monitor application right from the office. The 5.7″ STN LCD screens are available in monochrome or color. The entire touchscreen family works with all of IDEC's PLCs, and drivers are available to make them compatible with PLCs from other manufacturers.

MULTIFUNCTIONAL CAPACITIVE CUSTOMIZABLE TOUCHSCREEN GRAPHICS METER

NEW

LASCAR

- Eight digital input/output pins
- Two alarm outputs (max current sink 10mA)
- RS232 serial interface
- Four 16-bit bi-polar analog inputs (scalable in software to ±40V)
- I2C, SPI, RS485 and Ethernet support

PanelPilot ACE is a software and hardware platform that makes development of industrial user-interfaces a simple matter of dragging and dropping elements on a screen. The design software provides a number of building blocks to allow users to quickly add elements to their project. From background images to text elements, analog style meters, touch-screen navigation elements and even complex logic statements, users can build up multi-screen interfaces without needing to write a line of code. The **SGD 43-A** is the first in a range of **PanelPilot ACE** compatible displays. The low-profile display features a 4.3″ capacitive touch-screen pwoered by a Freescale ARM 9 processor running Linux. The display is powered by a 5V to 30V DC supply and offers users a wealth of connections.

Mfg. Part No.	Description	Range	Stock No.	Price Each 1-9
SGD 43-A	Multi-function 4.3″ Color TFT Display	4 x ±40V 4-20mA	54X1821	300.30

LASCAR

SGD 24-M-IP

SGD 24-M

SGD 28-M

- Use FREE Windows-based Lascar software to program displays
- Multiple customizable meter styles available to choose from
- Upload programmed app to meter via USB
- Measures voltage of 0-40VDC
- Wide operating voltage of 4-30VDC
- NEMA 6 and 4-20mA options
- Optional thermocouple add-on board

SGD 35-M

Customize PanelPilot-compatible displays in seconds with a simple click of the mouse. Using a Windows-based software supplied free with the display, select a meter style (digital and analog), choose colors, text labels, scaling and even display a company logo on power-up. Once programming is complete, the user can save all selections to the meter via USB, detach and mount in panel. Available in 2.4″, 2.8″ and 3.5″ sizes with NEMA 6 and 4-20mA measurement options.

KADET 2 OPERATOR INTERFACE WITH TFT DISPLAY

NEW

RoHS Compliant Available

red lion®

IP65 NEMA

G304K200

G307K200

- Configured using Crimson® 3 software
- Serial communication ports (RS-485 and RS-323/422/485)
- 10 Base-T/100 Base-TX Ethernet port communicates with up to four protocols simultaneously
- Unit's configuration is stored in non-volatile flash memory
- SD card socket for loading database in field (**G307K200**)
- Bright 4.3" TFT active matrix 32K color 480x272 pixel display (**G304K200**)
- 7" TFT LCD 32K color 800x480 pixel display (**G307K200**)
- Three front panel LED indicators
- NEMA 4/IP65 front panel
- Power unit with 24VDC ± 20%
- Resistive analog touchscreen

The **G3 Kadet 2** performs the functions of a multiple protocol converter, using high-speed RS-232/422/485 communications ports and a 10 Base-T/100 Base-TX Ethernet port. The Ethernet port supports up to four protocols simultaneously, allowing dissimilar Ethernet based products to communicate with one another. The **G3 Kadet 2** range of HMIs is programmed with Red Lion's free Crimson 3 software. Crimson 3 offers easy to use drag and drop communications configuration, while the embedded image library allows the programmer to create intuitive screens and prompts for the operator.

MAGELIS™ GTO OPTIMIZED ADVANCED PANEL TOUCH SCREEN TERMINALS

IP65

Schneider Electric

- Energy Savings
- State of the art display
- Open and robust communication
- Easy installation and a sustainable offer
- Simple adaptation to your environment
- Rugged design for industrial applications

The **Magelis GTO** is the ideal optimized terminal that does not compromise features or performance. The energy efficient LED backlight uses 55% less energy compared to HMI using compact fluorescent. Additional dimming and screen saver can save even more. The 65 K color TFT screen provides excellent color and a wide viewing angle for a clear picture of your machine or process. LED backlight allows energy savings and dimming functionality. Embedded Ethernet provides easy integration into your IT structure as well as remote viewing and control. USB 2.0 and Mini USB allow easy connection to peripherals, expanded storage, screen updates, and maintenance.

MAGELIS SCU SMALL HMI CONTROLLERS

NEW

RoHS Compliant Available

Schneider Electric

- LED backlight offers low energy and brilliant color display
- Compact All-In-One Unit (Controller is included, so no need to purchase a PLC)
- Made with Recycled Plastic toreduce overall environmental impact
- 22mm mounting system with quick installation
- USB ports for easy field updates
- USB mini B port to download HMI program with standard cable

The **Magelis small SCU** range includes 2 sizes of 65k color TFT screen displays to deliver superior quality visualization. LED backlight allows dimming and energy efficiency. The **Magelis SCU** Small HMI controllers integrate full HMI functionality combined with PLC and on-board I/O. Serial, Ethernet, CanOpen and USB communications ports provide class leading connectivity to control systems and peripherals. They feature the same innovative 22mm mounting system as the **Magelis STU** Small panels.

MAGELIS GOT GRAPHICAL TOUCH SCREENS TERMINALS

RoHS Compliant Available

Schneider Electric

Features
- Integrates Ethernet and can be simultaneously connected on Uni-Telway/Modbus® TCP/IP
- Embedded FTP server
- Memory Type: Flash
- Long-life LED backlight

Specifications
- Operating temperature: 0 to +55°C
- Front face IP65 conforms to IEC 60529. NEMA 4X (indoor)
- Rear IP20 conforming to IEC 60529
- Supply voltage: 24VDC

The Magelis Advanced Panels consists of touch screen terminals GOT available with a wide choice of screen sizes in TFT LCD Color.

EATON

E5-024-C / E5-224-C

E5-148-C

E5-648-C

E5-024-C series display counters are battery powered and are controlled by contact or voltage pulses. They may be used in various applications, like totalizing, parts counting, position acquisition, differential counting, etc. In addition, the various models with specific input types may be extended using control inputs to select operating modes. **E5-148-C series** count control counters that provide output signal(s) at preset count value(s). Typical applications include cut-to-length, batching, filling, mixing and dispensing. **E5-024-C series** timers have a non-replaceable battery (min. 8-yr. life) and include a manual or electricall reset. **E5-324-E series** digital panel meters allows for programmable scaling of inputs, has input for Display-Hold and is run with 24VDC power. **E5-648-C series** preset counters have a two-line LCD with optional two-color display, are programmable as impulse counters, frequency meters or time meters with sign and zero blanking, have a batch mode and add/subtract/ratio functions.

A103 SERIES TOTALIZERS, RATE INDICATORS, PRESET COUNTERS, TACHOMETERS, AND PRESET TIMERS

VEEDER-ROOT

Eagle Signal Controls

A103 series totalizing and preset counters are compact and cost-efficient. Accepts input signals from dry contact, PNP, or NPN sensors and encoders. High and low speed count inputs. Reset on front panel or remotely. Tachometers provide readout of motor, machine shaft or other RPM. Rate indicators provide a readout of virtually any rate: gallons/minute, parts/hour, feet/minute, etc. Features include a supertwist LCD with .47″ (12mm) high digits and green illumination display backlight capability. 3-volt lithium battery eliminates need for external power. Magnetic input is capacitative coupled; 10kHz (50% duty cycle); 0.2V peak (28VDC max.). Fits 68 × 33 mm cutout. Input scale multipliers for rate (0,001 to 9,999) and total (0.0001 to 99,99999). Weight: 2.25 oz. (64 g). Front panel is rated NEMA 4/IP65 for use in washdown environments. *Order matching elapsed time indicators, and quick-action option modules separately, go online or call.*

Eagle Signal Controls

DIN-sized family of count totalizing, elapsed-time totalizing, and speed meters with LCD or LED displays. Self-powered models contain long-life lithium battery. Externally powered models accept 12-24VDC power supply and nonvolatile RAM to provide data memory. Counters and timers have panel and remote reset. Display: 7mm-high, 8-digit LCD, or 7.6mm-high, 6-digit LED. Dimensions: 0.94H x 1.9W x 1.25″D (24 x 48 x 32). Operating temperature: –10°C to +50°C. Front panel meets IEC enclosure IP65 classification.

TOUCH TYPE COUNTER/TIMER

Autonics Sensors & Controllers

- Selectable Counter or Timer function
- Multi-functional Counter/Timer (Includes 829,728 functions)
- Prescale function
- High speed counting of 10kcps
- Selectable Voltage input (PNP) or No voltage input (NPN)
- Supply voltage: 100-240VAC @ 50/60Hz, 24VAC @ 50/60Hz, 24-60VDC (option)
- Able to set ON/OFF time individually in Flicker (FLK) mode
- Key Lock function

MULTIFUNCTION DIGITAL COUNTER

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Advanced 1/16 DIN Preset Counter with Enhanced Features
- Configure as 1- or 2-Stage, Total, Batch, or Dual Counter or Tachometer, Depending on Model
- High-Speed Response up to 5kHZ, Can Be Scaled to 10kHZ
- All Parameters Set Via Front Panel or DIP Switch Settings
- PNP/NPN Selectable Input
- Key Protection Function
- NEMA4/IP66 Front Panel
- Programmable Display Color Alerts Any Output Status Change

All units have 12VDC sensor power supply, contact output type and black case. UL listed, CE compliant. Units with no power supply, transistor output and light gray case are also available; *go online or call.*

NEW

VEEDER-ROOT

VersaCount™ XP

The Veeder-Root VersaCount 1/16 DIN size multifunction counter is the most versatile counter on the market today. Whatever your application, timing, counting, rate measuring, position indicating, volume measurement, speed monitoring, length cutting or batch, shift, pulse or piece counting – the VersaCount is the only device you need when Versatility Counts.

VEEDER-ROOT BRAND C346 PRESET COUNTERS

VEEDER-ROOT

Eagle Signal Controls

Simple button per digit setting and choice of single-line 6-digit LED or LCD display allow optimum operator interface. Very flexible input circuit with scaling feature accepts signals from encoders, NPN (sinking), PNP (sourcing), and contact-closure inputs. Suitable for most preset counting applications. Size: 1/16 DIN (48W x 48mmH) Display: 6 digit. LED or LCD. Power: 120VAC standard; optional 240VAC, 24VDC. Preset levels: 1 or 2.5 amp relay and NPN transistor per output. Input scaling: x0.001 to 9.999. Input: sinking, sourcing, contact closure, add/subtract, add/add, quadrature. Maximum count speed: 5kHz.

VEEDER-ROOT BRAND V4545 SERIES PRESET COUNTERS

VEEDER-ROOT
Eagle Signal Controls

V45450-1 Counter, Single Preset

V4545 series counters are suited for applications such as cut-to-length and filling. Dual input channels accept input from a variety of sources, including encoders, dry contact, and PNP and NPN sensors. Prescale function translates signals into useful units of measure. Can be used for reversible or quadrature counting. Models available with single or dual preset, and the ability to direct batching operations. Each preset value features a transistor and a relay output. Outputs can be programmed for latching or timed operation. Large dual line LED. Scale function allows display of engineering units. High speed counting up to 10kHz. 48W × 48mm H. Panel mount (bracket supplied), fits 45 × 45mm cutout. 7 ounces (198 g).

VERSACOUNT 1/16 DIN MULTIFUNCTION COUNTERS

VEEDER-ROOT
Eagle Signal Controls

- Functions include Timing, Rate measurement, Batch counting, Shift counting and Preset counting
- Fast input frequency up to 60kHz allows for high speed counting and measuring applications
- 3 presets with 3 outputs (3 solid state outputs standard); options include 1 or 2 outputs as relays
- Relay hold times programmable up to 10 minutes for a variety of application requirements
- Prescaler adjustable from 0.0001 to 99.9999
- Fast installation and replacement with plug in terminals
- View two separate parameters at the same time with the large two line LCD display

DITAK 8 - ADJUSTABLE TIMEBASE 5-DIGIT RATE INDICATORS

CE RoHS Compliant Available red lion

- Adjustable timebase from 4 msec to 32 sec
- Internal lithium battery provides over 7 years of continuous operation
- NEMA 4X/IP65 sealed front panel bezel
- Accepts magnetic or logic type signal inputs
- Wire connections made via screw clamp type terminals

Self-powered rate indicators that feature selectable timebase increments by setting the appropriate DIP switches on the rear of the unit. 5-digit LCD display with 0.6″ high digits. Displays are available in positive image reflective (black digits, reflective background) or negative image transmissive (illuminated digits, dark background). Backlight versions require power from an external 9-28VDC power supply. CE compliant. Yellow/Green backlight available; *go online or call.*

MODEL CUB7 COUNTERS AND MODEL CUB7T PROGRAMMABLE ELECTRONIC TIMERS (CONT.)

CUB7T PROGRAMMABLE ELECTRONIC TIMERS

Contact versions operate from a switch or an open collector NPN transistor. Contact burden 15µA. A maintained closed switch to COM will actuate the timer. Voltage versions operate from a signal voltage of 10-300V (AC 50/60Hz or DC). 150V max. for backlight versions. Any offstate leakage current may activate the timer. Constant voltage applied to the input will actuate the timer. Due to the internal digital filtering to this input, up to 30 msec. of error may be added per activation of the signal input.

LAUREATE™ FREQUENCY, RATE, TOTALIZER, TIMER AND PERIOD COUNTERS

CE RoHS Compliant Available

LAUREL ELECTRONICS

- Two pulse input channels independently scalable for frequency, rate or, total.
- Frequency or rate from 0.005 Hz to 1 MHz at update rates to 25/s
- Stopwatch operation from 1 µs to 999,999 hours
- Selectable "count by" of 10 or 100 with rounding
- ⅛ DIN case sealed to NEMA 4X (IP65) from front

Two channels (A or B) may be independently scaled for frequency, rate, or period, or be combined for A-to-B timing. Frequency and rate are determined with quartz crystal accuracy by timing an integral number of periods over a specified gate time and then taking the inverse of period. The inverse period allows greater accuracy and faster update times than conventional counters. Isolated 5, 10 or 24VDC excitation supply to power sensors. Green or red LED display. Totalizer display will flash and go into 4-digit XXXEX scientific notation when count exceeds 999,999. Square root extraction is standard and can be applied to rate or total. ⅛ DIN case meets NEMA 4X (IP65) from front. Choice of isolated plug-in options for control and data I/O: dual 8A relays, 16-bit analog output, Ethernet, USB, RS232, RS485 I/O, 12-32 Vac or 10-48 Vdc supply voltage; *go online or call*. CE certified.

STANDARD MAIN BOARD

Scalable to ±999,999 for frequency, rate, square root of rate, up or down total, period, or stopwatch. Selectable H, M or S decimal format or HH.MM.SS clock format for timing.

Mfg. Part No.	Analog Output	Stock No.	Price Each
L60000FR	...	84K0401	240.00
L60010FR	Isolated 0-20mA and 0-10V	84K0402	330.00

EXTENDED MAIN BOARD

All features of Standard Main Board plus rate and total simultaneously, up/down counting, arithmetic functions (A/B, A+B, A-B, A/B-1), phase angle, power factor, duty cycle, batching, custom curve linearization.

L80000FR	...	84K0404	270.00

CABLE ACCESSORIES

Mfg. part no. CBL01 cable connects meter RS232 port to a PC RS232 port. **Mfg. part no. CBL02** adapter needs to be added to connect meter RS232 port to a PC USB port. **Mfg. part no. CBL05** cable connects meter USB port to a PC USB port.

UNIVERSAL COUNTER/TIMER/TOTALIZER

NEWPORT

Universal 6-digit 0.56" (14.22) LED display is a frequency meter, tachometer, rate meter, timer, or totalizer with RS-232 interface. 7MHz maximum frequency. Fast low-frequency measurements, such as power-line monitoring to 5-digit accuracy every 150 micro-seconds. Selection of operating mode, scaling and setpoints via front-panel push-buttons (with selectable hardware lockout). Units capable of handling TTL, NPN, PNP sensors, contact closures and passive magnetic pickups (not included). Fit ⅛ DIN panel cutout. Screw terminals for signal and power. 115VAC, 50/60Hz or non-isolated 9.5-32VDC power optional. Relay output provides dual 10A relays for ON/OFF control or alarm applications, with latched or unlatched modes.

P5000 SERIES WITH NEMA4-RATED INFINITY STYLE BEZEL

INFCTRA SERIES ⅛ DIN 6-DIGIT RATEMETER/TOTALIZER

NEWPORT

- Measures Rate from 0.5Hz to 30kHz
- Totalizes Up or Down from -99999 to 999999
- Optional HI and LO Setpoints for Control or Alarm
- ⅛ DIN Case with 5 Programming Keys
- Functions: rate and totalize selected by menu
- Display: 6-digit, 7-segment red LED display
- Universal Input choices, selectable by dip switches

INFCTRA Series ratemeter/totalizer offers user programming via 5 front panel keys. Programs are stored in non-volatile memory. Selectable sensor excitation of 12.5VDC @ 50mA, 8.2VDC @ 40mA or 5.0VDC @ 30mA. Wide selection of signal inputs such as TTL compatible with protection to 25VDC, low level (25mVrms), high level signals protected to 115VAC, NAMUR or open collector PNP or NPN. Accuracy: 0.01%. Power: 115VAC. Other configurations are available; go online or call.

PRESET COUNTERS

UL CE Simpson

The **S660** series of counters are capable of handling count speeds of up to 20kHz (30kHz S661). Simple menu-driven programming features word prompts, not difficult codes. The rugged NEMA 4X case fits standard ⅛ DIN cutouts, and is equipped with large tactile buttons that can be pressed easily even when the user has gloves on. The counters feature a 6-digit LED display and 120VAC power. Optional features include quadrature inputs, two 5-amp mechanical relays and 12VDC excitation output @ 100mA (220VAC power upon request). **Mfg. Part No. S660** is an up/down, add/subtract totalizing counter, **mfg. part no. S661** is a rate counter, and **mfg. part no. S662** is a totalizer/batch counter.

DYNAPAR BRAND MAX JR TACH 1 & 2 PROGRAMMABLE RATE CONTROLLERS

VEEDER-ROOT

Eagle Signal Controls

Choose from two compact, economical models, both offering high-accuracy measurement techniques and simple programming. **Mfg. part no. MTJR1S00** MAXjr Tach 1 rate indicator/controller is ideal for basic rate or speed measurement functions. **Mfg. part no. MTJR2S00** MAXjr Tach 2 rate/ratio/time interval controller provides a choice of operating modes: rate of input A, as in the MAXjr Tach 1 model; ratio of two independent inputs A and B; and time interval, which can be the period of A or the elapsed time between inputs A and B; and time interval, which can be the period of A or the elapsed time between inputs A (start) and (stop). Both MAXjr Tach 1 and 2 models feature programmable 0.0001 to 99999 calibration high/low setpoint alarm capability with outputs and built-in diagnostics. Large 5-digit 0.56" (14.22) red LED display, 0.01% accurate time interval measurement and programmable decimal point position. Sealed NEMA-4 rated front panel with panel mounting in ⅛ D 1.78x3.56" (45.21x90.42) cutout; 5.68" (144.27) depth. 115/230VAC, 50/60Hz.

Mfg. Part No.	Description	Stock No.	Price Each
MTJR1S00	MAXjr Tach Rate Controller	84F765	976.16

DYNAPAR BRAND MAX® JR. ELECTRONIC TOTALIZING AND PRESET COUNTERS

VEEDER-ROOT

Eagle Signal Controls

Mfg. part no. MCJR1S00 8-digit totalizing counter features bidirectional operation, with ± polarity indicator and reference preset function. **Mfg. part no. MCJR2S00** is 5-digit predetermining counter for cut-to-length, filling, batching, locating, and similar applications. Features two presets with programmable output action. Programmable features include independent calibration and decimal point location for count and rate, allowing totals and speed to be displayed in different units, such as: totals in feet; speed in RPM. All models have bright, high-contrast red LED displays, NEMA-4 front panel rating with panel mounting in 1/8 DIN cut-out. Calibrator scales input signal for display in engineering units. Selectable decimal point positioning. Non-volatile memory retains count and program during power loss. 115/230VAC; 50/60Hz.

red lion®

EPAX AND LPAX DISPLAYS

Versatile displays that can increase productivity by offering the plant floor or production area a large visual display of their status. Supply voltage: 85-250VAC. 5-digit displays accept various analog inputs through the use of input modules (MPAX) which allow the unit to adapt to almost any application. 6-digit displays accept various digital inputs through the use of input modules (MPAX) which allow the unit to adapt to almost any application. NEMA 4X/IP65 casing. Additional plug-in cards; *ordered separately below*, can add alarms, analog output and communications/bus capabilities.

EPAX, LPAX AND MPAX LARGE DISPLAYS (CONT.)

MPAX INPUT MODULES

Serve as the input to the EPAX or LPAX display. There are several different modules to cover a variety of inputs. The MPAX module provides input scaling which allows the EPAX and LPAX to display most any engineering unit. Once the MPAX is inserted into the EPAX or LPAX, the unit has the same functions and capabilities of the PAX Series intelligent panel meters. A full set of PAX programming instructions are included with the MPAX module. **NOTE:** The MPAX provides the operating power for the EPAX or LPAX display.

MPAX MODULES INPUT RANGES

Signal Type	Input Ranges
Universal DC Inputs	DC Voltage: 200mV, 2V, 20V, 300V DC Current: 200µA, 2mA, 20mA, 200mA, 2A Resistance: 100Ω, 1000Ω, 10KΩ
Process Inputs	0-20mA or 0-10VDC
Temperature Inputs	Thermocouples: T, E, J, K, R, S, B, N, C, or Custom Scaling RTDs: 100Ω Pt (platinum) 385/392, 120Ω Nickel 672, or 10Ω Copper 427
True RMS AC Voltage/Current	AC Voltage: 200mV, 2V, 20V, 300V AC Current: 200µA, 2mA, 20mA, 200mA, 5A

LD LARGE DISPLAYS AND TIMER AND CYCLE COUNTERS

RoHS Compliant Available

red lion®

- 2.25″ or 4″ high red LED digits
- Readable up to 130ft (2.25″ high models) or 180ft (4″ high models)
- Supply voltage: 85-250VAC/11-16VDC
- Constructed of NEMA 4 enclosure in lightweight aluminum

LARGE DISPLAYS

Versatile displays that can be configured as a single or dual counter with rate indication, scaling, serial communications and a relay output. The 6-digit programmable model has two signal inputs and a choice of eight different count modes including bi-directional, quadrature and anticoincidence counting as well as a dual counter mode. When programmed as a dual counter, each counter has separate scaling and decimal point selection. The meter display can be toggled either manually or automatically between the count and rate values. Programmable models come with 5A SPDT relay output and jumper selectable RS232 or RS485 communications.

Mfg. Part No.	Function	Output Signal	No. of Digits	Digit Height (mm)	Stock No.	Price Each

LD4006P0	Programmable Counter/Rate Indicator	Relay	6	101	84K7462	716.00

LARGE DISPLAY TIMER AND CYCLE COUNTERS

Versatile displays that function as an elapsed timer or preset timer, with full-featured programmability. Includes a built-in cycle counter, 5A SPDT relay output and serial communications capability, two signal inputs and eight input operating modes. These modes provide level active or edge triggered stop/start operation. The timer features 18 selectable timer ranges. Built-in cycle counter can be linked to timer operation to count timing cycles, or function as a totally independent counter, accepting count speeds up to 500Hz. The display can be toggled either manually or automatically between the timer and counter values. DIP switches are used to configure the inputs for current sinking (active low) or current sourcing (active high) operation. Setpoint output can be assigned to the timer or counter value, and configured to a variety of control and alarm requirements. The meter also includes jumper selectable RS232 or RS485 serial communications.

LD2T06P0	Timer/Cycle Counter	Relay	6	57	14P9746	507.00

Y-RMF AND Y-MF HEAVY-DUTY TOTALIZING COUNTERS

RoHS Compliant Available

EATON

6-Y-1-MF-120A

6-Y-1-2-RMF-PM-115A

Mfg. part nos. 32651400 and **32654400** are shaded pole electric counters with straight AC operation. They feature a non-rectified, shaded pole coil designed to withstand transient and high voltage spikes. This, combined with a simplified, hinged escapement drive, also eliminates the possibility of miscounts and greatly adds to the life of the counter. Tallies at speeds up to 750 cpm. **Mfg. part nos. 31155402, 31066416** and **31083403** provide accurate counts through a wide range of speeds up to 1000 cpm. Feature fast, silent DC electromagnetic drive with built-in, higher capacity rectifier for dependable AC operation. Moving parts never need lubrication under normal operating conditions. 0.188″H (4.78) 6-digit readout. 115VAC operating voltage with 7 watt count coil. Available with knob reset in base, panel mounting, or panel mount key reset. Panel models fit 3.703W × 1.250H × 2.469″D (94.06 × 31.75 × 62.71) opening. UL recognized.

Model 10 Panel Mount

Model 10 Base Mount

Model 44

P2-4816

Model 49

Model 10 6-figure electromechanical counter with heavy-duty rectifier, transient protection, convenient reset, 1000 cpm capability. **Mfg. part no. 2-1006** dimensions in inches: 3.68(H) x 1.74(W) x 2.51(D). Panel cutout in inches: **Mfg. part no. P2-1006**, 3.85 x 1.75; **Mfg. part no. P32-1206**, 4.88 x 1.75. 8″ wire leads, 22AWG. UL recognized, CSA certified, CE compliant. 7-figure counters available, *go online or call.*

Mfg. Part No.	Voltage	Mount	Reset	Stock No.	Price Each 1-9
2-1006	115VAC	Base	Manual	57F3501	152.47

APM SERIES ADVANCED PANEL METERS

NEW

trumeter
innovation by design

- 40 segment bar graph display
- Large 4 digit display
- Separate Starburst display area for annunciators, custom messages and alarm information
- Dynamic backlight color
- Scale (offset and gain) and Range (min and max)
- Custom annunciators
- Two independent alarm set-points
- Two independent outputs (output models only)
- 4-20mA Analog monitor output (output models only)
- User adjustable backlight brightness and color
- High contrast LCD screen
- Large display
- Wide viewing angle (both horizontal and vertical)
- Custom annunciators

The Trumeter **APM** is the most visible, easy to use, multi-format, programmable panel meter on the market. Providing you with the highest level of accuracy and an immediate visual indication of your critical parameters. The **APM** has been specifically designed for engineers requiring a more effective way of monitoring and displaying data. The Trumeter **APM** is a cost-effective alternative to the traditional moving coil and expensive digital panel meters.

MODULAR DIGITAL PANEL METERS

RoHS Compliant Available

CARLO GAVAZZI

BD35, BD40, BD60 Displays

BP Power Supply Card

BQ Input Card

Output Cards

- ⅛ DIN, 3.5, 4 or 6 digit digital indicators and controllers
- Selectable display color on DB40: red, amber or green
- Dual (analog/digital) backlit LCD display on DB60
- Modular design facilitates many different inputs/outputs
- Rugged IP67 / NEMA4x splash-proof front cover
- AC/DC voltage/current, frequency, tachometer, counter, temperature, rate and resistance inputs
- T_{rms} AC current and voltage measurements
- Microprocessor-based design
- Up to four optional alarm outputs
- Optional analog, excitation, serial output
- MODBUS, JBUS communication protocol

UDM series µP-based indicators/controllers feature a rugged ⅛ DIN housing, rated IP67 / NEMA4x. The **UDM40's** unique display can be programmed in one of three colors (red, amber or green), or it can be programmed to display in a different color should an alarm setting be eclipsed, (i.e., green: OK, amber: caution, red: trouble.) Indicator's features include min/max recording, data hold, display/input range scaling and password protection. When a power supply card and multirange configurable input card are slid into a **BD** type display, a **UDM** indicator is the end result. Output cards are easily inserted into the back of the **UDM** indicator, thus making them controllers. It is possible to obtain one or two relay output(s) (not both) and/or a proportional analog or excitation output (not both); output cards are listed separately at the bottom of this page. Controllers feature up to four alarms, with adjustable hysteresis, delay and high/low/input fault alarms. All parameter settings are controlled by the front keypad via easy-to-use menu-driven format. 120VAC supply; other voltages are available.

DISPLAYS - A REQUIRED COMPONENT

Mfg. Part No.	Description	Max. Value	Stock No.	Price Each
BD35	3.5 digit, red display	1999	27K4038	148.00

SENSOTEC MODEL GM SINGLE-CHANNEL SIGNAL CONDITIONERS

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Versatile full function signal conditioner, amplifier, and power supply
- Large 0.56" readout display size
- Short circuit protected
- 20,000 count resolution
- 14+ bit accuracy (20,000 steps)

Specifications:
- 4 ½ digit LED display
- ±0.03% accuracy
- Supply voltage: 115VAC
- Operating temperature range: 32°F to 130°F
- Panel mount bracket included
- Bench mount bracket and NEMA 4 splash cover also available; *order separately below*

LAUREATE™ CURRENT, VOLTAGE, STRAIN GAGE AND LOAD CELL PANEL METERS

CE RoHS Compliant Available

LAUREL ELECTRONICS

- Full-scale voltage ranges from 20 mV to 600V
- Full-scale current ranges from 2 mA to 5A
- 0.01% FS ± 2 count DC error, 0.1% FS AC RMS error
- Scalable 5-digit displays to ±99,999
- User scalable for use with current shunts and transformers
- 1 GΩ input resistance on scales from 20 mV, 200 mV, 2V DC scales
- Up to 60 conversions per second
- Programmable adaptive digital filter

Supply voltage: 85-264 Vac or 90-300 Vdc. Up to 60 conversions per second while integrating over a full power cycle for fast relay response and peak/valley capture. Red or green LEDs. ⅛ DIN case meets NEMA 4X (IP65) standards from the front. All ranges factory calibrated. 99.99% full-scale accuracy for DC signals, 99.9% accuracy for AC RMS. Selectable fixed zero or active least significant digit. 5, 10 or 24VDC sensor excitation supply. External controls for reset, meter hold and decimal points. Panel meters have a DC signal conditioner board, high accuracy, high read rate and isolated output options. Can be used with external shunts. Selectable signal filtering: unfiltered selection, batch average filter or adaptive moving average filter which provides a choice of 8 time constants from 80ms to 9.6s. Choice of isolated plug-in options for control and data I/O: dual 8A relays, 16-bit analog output, Ethernet, USB, RS232, RS485 I/O, 12-32 Vac or 10-48 Vdc supply voltage; *go online or call.* CE certified.

AC AMMETERS

NEWPORT

3½-digit units feature bright 0.56"(14.22) LED displays, screw terminal barrier strip for power and signal connections, operate on 120VAC, fit standard ⅛ DIN panel cut-out. Decimal point programmable at barrier strip. Factory-calibrated precision op-amp rectifier circuit to read true RMS values of sinusoidal waves. 5A signal input range for direct connection to current transformer with 5A secondary without a step-down transformer.

Mfg. Part No.	Display Range	Stock No.	Price Each
Q2000-DCR7-1	1-10/100/1000	89F1835	290.00
Q2000-DCR7-3	0-20/200	89F1823	290.00
Q2000-DCR7-4	0-30/300	92B9012	290.00
Q2000-DCR7-5	0-40/400	95B0627	290.00
Q2000DCR7-6	0-50/500	89F1826	290.00
Q2000-DCR7-7	0-60/600	04R7903	290.00
Q2000-DCR7-8	0-80/800	04R7904	290.00

(37270)

AC POWER-LINE MONITORS

NEWPORT

3½-digit units feature bright 0.56" (14.22) LED displays, screw terminal barrier strip for power and signal connections, operate on 120VAC and fit standard ⅛ DIN panel cut-out. Decimal point programmable at barrier strip. **201AN-AC** series AC power-line monitors use factory-calibrated half-wave rectifier to read RMS values of sinusoidal signals. Provide AC voltmeter performance for AC ranges.

201AN-AC

Mfg. Part No.	Signal Input Range, VAC	Display Range	Stock No.	Price Each
201AN-AC5	20-199.9	±1,999	89F1833	190.00
201AN-AC6	20-650	±1,999	89F1834	190.00

(2297)

QUANTA PROCESS INDICATORS AND CONTROLLERS

NEWPORT

The QUANTA process indicators and controllers feature 0.56" (14.22) LED displays, screw terminal barrier strip for power and signal connection. Units are standard ⅛ DIN panel cutout. Input signal is selectable via jumpers for 0-1mA, 4-20mA, 10-50mA, ±200mV to ±20VDC and pot adjustable to display engineering units. Dual set point option includes 2 internal Form C relays rated at 10A at 20VDC or 240VAC resistive. 2 LED lamps indicate on/off status of either relay. Set points are screwdriver adjustable over entire display range or over narrower ranges selected by jumpers on screw terminal strip. Analog output is adjustable for 4-20mA or 0-10VDC. Factory scaling available for different display range (FS), other input signal and outputs are available.

INPUT SIGNAL CURRENT

Mfg. Part No.	Description	Display Range	Stock No.	Price Each
Q2000-P	Process Monitor	4-20mA = 0-100.0	50B5920	285.00
Q2001-P	Process Controller, 2 Relay (10A) Output	4-20mA = 0-100.0	50B5921	480.00
INPUT SIGNAL VOLTS				
Q9000-P	Process Monitor	4-20mA = 0-99.99	98B5720	350.00
Q9040-P	Process Meter, Analog Output 4-20mA	4-20mA = 0-99.99	02E6855	395.00

IDP SERIES PROCESS METER

NEWPORT

4-digit LED process meter that has user-selectable inputs of 4-20mA, 20-4mA, 0-5V, 1-5V or 0-10V ⅛ DIN case 4" deep. Removable screw terminals for easy connections. CE compliant. UL listed.

Mfg. Part No.	Power	Display	Stock No.	Price Each
IDP-0	115VAC	Red LED	88F1042	199.00
IDP-2	115VAC	Green LED	92B7223	199.00
IDP-4	10-32 VDC	Red LED	16F1116	259.00

(2387)

INFCAC SERIES TRUE RMS VOLTAGE AND CURRENT METERS

NEWPORT

The Newport INFCAC true RMS meters compute the true root-mean-square value of complex signals. Both DC + AC and AC coupled connections are included. AC coupling allows the measurement of the AC component (or ripple) from a signal with both AC and DC components. True RMS meters are especially useful in monitoring voltage and current supplied to motors or heaters controlled by an SCR or Triac circuit. Optional user scalable analog output of 4-20mA or 0-10V allows either control or recorder interface. Optional dual 5A relays give additional control capability. The optional plug-in communication options can be added at any time allowing the instrument to grow with your application.

Mfg. Part No.	Signal Inputs	Description	Stock No.	Price Each
INFCAC-0000-C5	0-1mA, 0-10mA, 0-100mA, 0-1A, 05A ac	True RMS Ammeter, No Output	90B6647	360.00
INFCAC-0100-C5		True RMS Ammeter, Dual Relay Output	31C2009	430.00
INFCAC-0110-C5		True RMS Ammeter, Dual Relay and Analog Output	11C0687	510.00
INFCAC-0000-V5	0-1V, 0-10V, 0-100V, 0-750V ac	True RMS Voltmeter, No Output	88F6316	360.00
INFCAC-0110-V5		True RMS Voltmeter, Dual Relay and Analog Output	93B5745	510.00

PAX LITE DIGITAL PANEL METERS

RoHS Compliant Available

red lion

- NEMA 4X/IP65 sealed front bezel
- Selectable decimal points
- Over-range indication
- 0.56" (14.2mm) LED readout

MODEL PAXLPV — PAX LITE PROCESS VOLTMETER

Wide span and offset scaling range (covers 1-5VDC process input). 24VDC excitation supply. Optional custom units overlay with backlight available; *go online or call.*

Mfg. Part No.	No. of Digits	Supply Voltage	Signal Input	Stock No.	Price Each
PAXLPV00	3½	85-250VAC	Selectable Voltage	84K7502	162.00

MODEL PAXLCL — PAX LITE CURRENT LOOP METER

Dual range, 4-20mA or 10-50mA. 24VDC excitation supply. Wide span and offset scaling range.

PAXLCL00	3½	85-250VAC	Selectable Current	84K7495	162.00

MODEL PAXLI — PAX LITE CURRENT METERS

Multi-range units cover 199.9µA to 1.999A. Built-in scaling provisions. Auto zeroing circuits. Optional custom units overlay with backlight available; *go online or call.*

PAXLIA00	3½	115/230VAC	Selectable AC Current	84K7499	149.00
PAXLID00	3½	115/230VAC	Selectable DC Current	84K7500	124.00

MODEL PAXLIT — PAX LITE 5AMP AC CURRENT METER

5A AC current input. Built-in scaling provisions. Auto zeroing circuits. Optional custom units overlay with backlight available; *go online or call.*

PAXLIT00	3½	115/230VAC	Current	84K7501	162.00

MODEL PAXLHV — PAX LITE AC VOLTAGE MONITOR

Auto zeroing circuit. Up to 600VAC max. Optional custom units overlay with backlight available; *go online or call.*

PAXLHV00	3	115/230VAC	Selectable Voltage	84K7498	162.00

MODEL PAXLV — PAX LITE VOLTMETER

Multi-range units cover 199.9mV (AC or DC), 1.999 to 300V (AC or DC). Built-in scaling provisions. Auto zeroing circuits. Optional custom units overlay with backlight available; *go online or call.*

PAXLVD00	3½	115/230VAC	Selectable DC Voltage	84K7507	118.00

MODEL PAXLSG — PAX LITE STRAIN GAGE METER/MILLIVOLT METER

High sensitivity, 10mV full scale. Wide range gain and offset adjustments. Built-in excitation 5 or 10VDC. Applicable as regular millivolt indicator (single-ended or differential input). Optional custom units overlay with backlight available; *go online or call.*

PAXLSG00	3½	85-250VAC	Strain Gage	84K7505	229.00

CONTINUED

PAX LITE DIGITAL PANEL METERS (CONT.)

Mfg. Part No.	No. of Digits	Supply Voltage	Signal Input	Stock No.	Price Each
Programmable TC type (T, E, J, K, R, S, B, N or mV scale). Conforms to ITS-90 standards. Selectable °F or °C. Programmable temperature offset. Programmable digital filtering enhances stability. Peak/valley (Hi/Lo reading) memory. Custom units overlay with backlight available; *go online or call.*					
PAXLTC00	4	85-250VAC	Selectable Thermocouple	84K7506	202.00
MODEL PAXLRT — PAX LITE RTD METER Accepts standard 3-wire 100Ω RTD sensors (alpha = 0.00385 or alpha = 0.00392). Conforms to ITS-90 standards. Selectable °F or °C. Programmable temperature offset. Programmable digital filtering. Peak/valley (Hi/Lo reading) memory. Custom units overlay with backlight available; *go online or call.*					
PAXLRT00	4	85-250VAC	Selectable Thermocouple and RTD	84K7503	202.00
MODEL PAXLC — PAX LITE COUNTERS Available in 6- or 8-digit versions. Accepts input count rates up to 25KHz. Bi-directional counting. Remote reset capability. Display store. Programmable scale factor.					
● PAXLC600	6	115/230VAC	Pulse	84K7496	156.00
PAXLC800	8	115/230VAC	Pulse	84K7497	167.00
MODEL PAXLR — PAX LITE RATE METER Input rates up to 25KHz. Accepts a wide variety of sensors. Programmable scaling. Programmable update time.					
● PAXLR000	6	115/230VAC	Pulse	84K7504	156.00

(88717)

PAX 1/8 DIN DIGITAL PANEL METERS

RoHS Compliant Available

red lion®

- Process, voltage, current, temperature and strain gage inputs
- 5- or 6-digit variable intensity 0.56" red sunlight readable display
- 16 point scaling for non-linear processes
- Four setpoint alarm outputs, communication and bus capabilities and retransmitted analog output (with option card)
- NEMA 4X/IP65 sealed front bezel

PAX analog panel meters offer many features and performance capabilities to suit a wide range of industrial applications. Provides a MAX and MIN reading memory with programmable capture time. The signal totalizer (integrator) can be used to compute a time-input product. This can be used to provide a readout of totalized flow, calculate service intervals of motors or pumps, etc. The totalizer can also accumulate batch weighing options. Once the meters have been initially configured, the user interface may be completely protected leaving only the setpoints accessible. Accept digital inputs from a variety of sources including switch contacts, outputs from CMOS or TTL circuits, magnetic pickups and all standard RLC sensors. Can accept directional, uni-directional or quadrature signals simultaneously. Maximum input signal varies up to 34KHz depending on the count mode and function configurations programmed. Each input signal can be independently scaled to various process values.

INPUT SPECIFICATIONS

Model PAXC Dual Counter	Active: Sinking (Vin < 0.9VDC), Sourcing (Vin > 2.4VDC) Inactive: Sinking (Vin > 2.4VDC), Sourcing (Vin < 0.9VDC)
Model PAXD Universal DC Input	±200µADC, ±2mADC, ±20mADC, ±200mADC, ±2ADC, ±200mVDC, ±2mVDC, ±20VDC, ±300VDC, 100Ω, 1000Ω, 10kΩ
Model PAXP Process Input	20mA (-2 to 26mA), 10VDC (-1 to 13VDC)
Model PAXH AC True RMS Volt and Current	200mV, 2V, 20V, 300V, 200µA, 2mA, 20mA, 200mA, 5A
Model PAXS Strain Gage Input	±24mVDC, ±240mVDC
Model PAXT Thermocouple Input	T (-200°C to +400°C, -270°C to -200°C), E (-200°C to +871°C, -270°C to -200°C) J (-200°C to +760°), K (-200°C to +1372°C, -270°C to -200°C) R (-50°C to +1768°C), S (-50°C to +1768°C), B (+100°C to +300°C, +300°C to +1820°C), N (-200°C to +1300°C, -270°C to -200°C) C (W5/W26) (0 to +1215°C)
Model PAXT RTD Input	100Ω Pt, alpha = 0.00385 (-200°C to +850°C) 100Ω Pt, alpha = 0.03919 (-200°C to +850°C) 120Ω Nickel, alpha = 0.00672 (-80°C to +260°C) 10Ω Copper, alpha = 0.00427 (-100°C to +260°C
Model PAXT Custom Range Input	-10 to 65mV, 0 to 400Ω (high range), 0-25Ω (low range)

MODEL PAXD — UNIVERSAL DC INPUT
Selectable 24Vm 2C, 1.75mA excitation output

Mfg. Part No.	No. of Digits	Supply Voltage	Signal Input	Stock No.	Price Each
● PAXD0000	5	85-250VAC	Selectable DC Current and Voltage	84K7490	267.00
PAXD0010	5	11-36VDC/24VAC	Selectable DC Current and Voltage	84K7491	297.00
MODEL PAXP — PROCESS INPUT Dual range input. 24VDC transmitter power.					
● PAXP0000	5	85-250VAC	Selectable Current and Voltage	84K7508	256.00
PAXP0010	5	11-36VDC/24VAC	Selectable Current and Voltage	84K7509	284.00
MODEL PAXH — AC TRUE RMS VOLT AND CURRENT Accepts AC or DC coupled inputs. Three-way isolation: power, input and outputs.					
PAXH0000	5	85-250VAC	Selectable AC Current and Voltage	84K7492	333.00
MODEL PAXS — STRAIN GAGE INPUT Selectable 5VDC or 10VDC bridge excitation. Programmable auto-zero tracking.					
● PAXS0000	5	85-250VAC	Strain Gage	84K7512	379.00
PAXS0010	5	11-36VDC/24VAC	Strain Gage	84K7513	408.00

Jewell Instruments MODUTEC

Figure A

Figure B

- High-Impact Polycarbonate Case
- NEMA 4, 12, and IPC 55 (Splash-Proof / Hose Down) Standards
- DIN Industry Standard Cutout

Universal selectable true RMS AC voltage and current model or Process DC voltage/DC current meters allow you to select different inputs, scale in engineering units, select decimal point and calibrate from the rear of the instrument without opening the case. Surface mount and special design features result in unit that is only 1″ deep behind the panel (1½″ for **mfg. part no. 2153-3419-04**) and is splash- and hose-down proof. Screw terminals eliminate added cost of plug-on screw terminals or solder connectors. Operating temperature: –20° to +60°C. Over-range indication.

DIMENSIONS

Input Type	Figure	A	B
AC	A	0.99″ (25.1)	1.15″ (29.2)

INF-B ULTRA HIGH PERFORMANCE METER

RoHS Compliant Available

NEWPORT

NEMA

- Universal Inputs: DC Voltage/Current, T/C, RTD, Strain
- Accuracy: ±0.005% rdg
- Up to 142 Readings per Second
- 6-Digit Color Changing LED Display, 9-Segment (0.68")
- 10-Point Linearization
- 4 Isolated Open-Collector Ouputs
- Isolated Analog Output (Optional)
- 4 Relays (Optional)
- RS232/RS485 or Ethernet Communications (Optional)
- Power: 90 to 240VAC or 10 to 32VDC
- NEMA 4 (IP65) Protection from front bezel
- Five-year manufacturer's warranty
- CE compliant

INF-B ⅛ DIN ultra high-performance digital panel meter can measure a broad spectrum of DC voltage and current, 9 thermocouple types, variety of RTDs, inputs from pressure transducers, load cells, strain gauges, as well as potentiometer inputs. Also features 10 point linearization of input signals, programmable by the user for custom applications. Built-in excitation to power virtually any sensor or transmitter, and 4 isolated open collector outputs for control or alarms are standard. Output options include isolated programmable analog voltage or current and four relays. Serial communications option is selectable by user for RS-232, RS-485 and either a straightforward ASCII protocol or MODBUS. The Ethernet option enables direct connection to the network and transmits data in TCP/IP protocol. It is possible to monitor and control a process through a web browser from anywhere on the Internet.

INFINITY® SERIES ⅛ DIN METER/CONTROLLERS

RoHS Compliant Available

NEWPORT

NEMA

- Six-digit, 14-segment digital display
- Four isolated open collector outputs
- Digital tare
- Peak and valley detection and memory
- Accuracy: ±0.005% rdg
- Sensor excitation: 10V @ 30mA, 24V @ 25mA
- NEMA 4 (IP65) protection from front bezel
- Five-year manufacturer's warranty
- UL listed, CE compliant

INFINITY® family of digital panel meter/controllers are high-quality, highly accurate instruments designed for Process (DC voltage and current), Strain Guage measurements, Temperature (thermocouple and RTD) or Weight (NTEP certified). These meters feature six full digits making them ideal for demanding process control applications. On-board excitation is included to power virtually any sensor or transmitter, and four standard setpoints give the flexibility to control or alarm the system completely.

INFINITY® "C" SERIES INDICATORS/CONTROLLERS

RoHS Compliant Available NEWPORT®

Common Specifications:

- Display: 4-Digit, 9-Segment, 21mm (0.83") Color-Selectable (Red, Green, Amber) LED
- Analog-To-Digital Technique: Dual Scope
- Internal Resolution: 15 Bits
- Polarity: Automatic
- Read Rate: 3/Sec.
- Step Response: 2 Seconds
- Power: 115VAC, 230VAC or 10-32VDC
- Operating Temperature: 0°C to 50°C
- Dimensions: 48H x 96W x 152mm D (1.89 x 3.78 x 6.0")
- Five-year manufacturer's warranty
- UL listed, CE compliant

The **Infinity® C Series** features the biggest and brightest ⅛ DIN panel meter display. Red, green or amber LED color is menu-selectable. Options include dual 5A Form C relays for alarm or control, plus a choice of isolated or non-isolated analog output scalable from 0-10VDC, 0-20mA, or 4-20mA. Covers many signal inputs including: process (DC voltage and current), strain gauge, thermocouple, RTD, dual-differential thermocouple, RTD, PH, ORP, and AC voltage and current.

INFCR SERIES RTD TEMPERATURE PANEL METERS

Standard features include 100ohm Pt (0.00385 curves) 2, 3 and 4 wire selectable, resolution of 0.1° or 1.0°, °F or °C indication, dual setpoints, 115VAC power and menu selectable color display: Red, Amber or Green.

Mfg. Part No.	Signal Input	Meter Power	Control Output	Analog Output	Stock No.	Price Each
INFCR-010B	0.00385 or 0.00392 RTD 100ohm Pt (0.00385 curves)	115VAC	Yes	No	92F6552	320.00
INFCR-011B		115VAC	Yes	Yes	93F9334	400.00

Optional Power: 26-56VDC and 10-32VDC are available on all models; *go online or call.*

INFCT SERIES THERMOCOUPLE INPUT TEMPERATURE METERS

Standard features include 0.1° or 1.0° resolution and dual setpoints. Rated 115VAC. Red, green or amber LED color display is menu selectable. Dual setpoint, analog output and DC power optional.

Mfg. Part No.	Signal Input	Meter Power	Control Output	Analog Output	Stock No.	Price Each
INFCT-010B	J,K,T,J-DIN	115VAC	Yes	No	67C1808	320.00
INFCT-011B	J,K,T,J-DIN	115VAC	Yes	Yes	67C1850	400.00

INFCP SERIES PROCESS PANEL METERS

Accepts a wide range of DC voltage and current inputs to cover any typical process application. Features easy front panel scaling to virtually any engineering units, selectable excitation of four voltages to work with most transducers and transmitters. Red, green or amber LED color is menu selectable. Signal Input: 0-100mV (±50mV), 0-10V ±(5V), 0-20mA, 4-20mA.

Mfg. Part No.	Meter Power	Control Output	Analog Output	Stock No.	Price Each

INFCS SERIES STRAIN PANEL METERS

The Newport Infinity C Strain meter accepts a wide range of DC voltage and current inputs to cover any typical application. Easy front scaling to virtually any engineering units. Selectable excitation of 4 voltages. Front panel and remote tare function for weighing applications and a hardware lockout to prevent unauthorized changes in setup. Red, green or amber LED color is menu selectable. Input ranges: 0-100mV, ±50mV, 0-10V, ±5V, 0-20mA, 4-20mA. Excitation voltage: 24V at 25mA or 12V at 50mA; 10V at 120mA or 5V at 60mA. Max. error strain/process: ±0.03% rdg.

DPI1701 SERIES1/8 DIN GRAPHIC DISPLAY PANEL METER AND DATA LOGGER FOR TEMPERATURE AND PROCESS MEASUREMENT

RoHS Compliant Available NEWPORT® NEW CE

- Monochrome, High Resolution Graphic Display
- Universal Input Accepts Thermocouples, RTD, and Process (Voltage and Current)
- Displays Process Input in Horizontal Bar Graph, Line Graph Charting, or Standard Digital Format
- Records 85,000 Data Points with Time Stamping
- Data Logging Based on Time and Date, Alarm 1 or 2, or Key Press
- Monitors and Displays Minimum and Maximum Process Values
- Universal Power Input from 90 to 240 Vac
- Isolated 24 Vdc Excitation to Power External Transmitters

⅛ DIN **DPI1701 Series** graphic display panel meter and data logger provides unmatched display functionality and performance. The high intensity, backlit, graphic display (240 x 64 dots) provides powerful display features such as horizontal bar graph, line graph, and data logging in real time. The unit can be configured to accept Thermocouples (J, K, T, E, R, S), RTDs (2- or 3-wire), Voltage (0 to 10 Vdc), or Current (0 to 20 mA). Optional features are two Form C relays, isolated USB or RS232 PC interface, isolated analog output, isolated 24 Vdc excitation, and wireless receiver.

Mfg. Part No.	Description	Stock No.	Price Each
● DPI1701/N	Graphic panel meter and logger with isolated RS232 interface	04X5553	300.00
● DPI1701-USB-R/N	Graphic panel meter and logger with 2 relays, isolated USB and 24 Vdc excitation	04X5552	375.00
● DPI1701-USB-AR/N	Graphic panel meter and logger with 2 relays, isolated USB interface, and analog output	04X5550	425.00
● DPI1701-USB-ARW/N	Graphic panel meter and logger with 2 relays, isolated USB interface, analog output, and wireless receiver	04X5551	475.00

⅛ DIN PROCESS INDICATORS

RoHS Compliant Available NEWPORT®

2002B

202A

Indicators, when integrated with sensors or transducer, reflect changes in voltage or current by displaying calibrated engineering units for pressure, loads or distance (depending on transducer) once indicator is scaled in the field. All units feature 0.56" (14.22) LED displays, screw terminal barrier strip for power, signal connections, and a standard ⅛ DIN panel cut-out (45 × 92mm). Signal range: 4-20mA, 1-5V, 0-10V. Default calibration: 4-20mA = 00.0 - 100.0. Models with excitation output provide voltage supply (10-24VDC) to power transmitters, active transducers or passive networks. Mfg. part no. with **suffix FS** features custom calibration, specify volts or mA: min./max. input, min./max. display.

BIG-LITTLE LCD 3½-DIGIT PANEL METERS

Jewell Instruments MODUTEC

BL-300202-01-U

BL100202-U

- High-Contrast LCD Readout
- User-Selectable Decimal Point
- Low Power Consumption
- Auto-Polarity (–) Displayed

BL series digital panel meters feature 0.5″ (12.70) high digits on high-contrast LCD. 1999-count maximum. Accuracy: ±0.1% reading +2 count. Resolution: one art in 2000. User-selectable decimal point. Automatic polarity (–) displayed. **BL-100** is surface/window mount. **BL-130** is bezel mount. Both types have a 13-pin terminal. **BL-176** is flat pack DPM with solder pad connections. *Order* **176-BK** *bezel kit with mounting hardware separately below.* **BL-300** and **BL-500** are LCD digital panel meters with LED backlighting. Easily read in dark or bright sunlight. Digits are 0.5″ (12.70) high. 1999-count maximum. Decimal point user-selectable. Auto polarity. Red or green backlight. Backlight power: 5VDC. Voltage range: 4.7V to 5.25V maximum. Red current: 130mA to 200mADC, 165mA nominal. Green current: 75mA to 160ADC, 115mA nominal. 13-pin terminal. Operating temperature range: -20° to +60°C. **BL-300** positive image dark on green background; **BL-500** negative image, red segments on dark background.

DATEL® 3½ DIGIT, MINIATURE LED/LCD PANEL METERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

Red LED Display — **LCD Display**

- Expoxy-encapsulated, 12-pin DIP package
- 4 differential input voltage ranges
- High accuracy, ±1 count
- User-selectable decimal point placement
- Numerous "plug-on" application boards
- 0 to 60°C temperature rating

The **DMS-30PC series** includes built-in color filter and bezel, is panel or pc-board mountable and optional high-intensity or low-power red LED. LED miniature size: 2.17 x 0.92 x 0.56″. The **DMS-30LCD series** provides autopolarity changeover and overrange indication, consumes power as low as 3.2mW, and offers optional backlit display and 9V battery power. LCD miniature size: 2.17 x 0.92 x 0.43″.

DATEL® 4½ DIGIT, MINIATURE LED/LCD PANEL METERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

Red LED Display — **LCD Display**

- Expoxy-encapsulated, 12-pin DIP package
- Panel or board mountable
- Display HOLD function standard
- 3 differential, dual, input voltage ranges
- Scientific-grade accuracy, ±2 counts
- 0 to 50°C temperature rating

The **DMS-40PC series** includes built-in color filter and bezel, precision, autozeroing, factory calibrated A/D converter, and optional high-intensity or low-power red LED's and BCD data outputs for CPU interface. LED miniature size: 2.17 x 0.92 x 0.56″. The **DMS-40LCD series** includes user-selectable decimal point placement, low-battery annunciator, consumes typically 12.5mW, and offers optional backlit display and 9V battery power. LCD miniature size: 2.17 x 0.92 x 0.43″.

MODEL CUB4V DC VOLTAGE METER

CE c UL us RoHS Compliant Available red lion®

- Four selectable DC voltage ranges
- Fits DIN standard cut-out 2.68 x 1.30" (68 x 33mm)
- NEMA 4X/IP65 sealed front panel bezel
- 9 to 28VDC powered
- Auto zeroing circuit and built-in scaling provided

3½-digit LCD, positive reflective display with 0.6" high digits and a DIP switch selectable decimal point. Wire connections are made with screw clamp type terminals. LCD negative transmissive with yellow/green or red backlighting also available; *go online or call.*

SPLASHPROOF ROUND-HOLE FITTING PANEL METERS

LASCAR

The **EM Series** is a splashproof range of LCD meters each fitted with a threaded stud, allowing users to mount the product through a 7/32 hole. A rubber seal (supplied) provides splashproof protection when fitted between the meter and mounting panel. The **EM32 Series** is designed to be panel mounted with 1.28″ diameter hole, is NEMA 4-x protected and available in LCD and LED 3 ½ digit format.

⅛ DIN 3½-DIGIT PANEL MINI-METERS

RoHS Compliant Available

NEWPORT

CE

Indicators have 0.56″ (14.22) LED display. 115VAC, 50-60Hz. Panel space 37.5% of standard ⅛ DIN meter. Process meters provide zero and span adjustments for readout in engineering units. Thermocouple meters include cold junction compensation, linearization, jumper selection of C or F, thermocouple break detection and analog output (1mV/count). Connection to sensor can be 2, 3 or 4 wire (RTD). Other power options available; *go online or call.*

MODEL CUB5RT MINIATURE ELECTRONIC 5-DIGIT RTD METER

RoHS Compliant Available

NEW

red lion®

IP65 NEMA

- Minimum and maximum display capture
- LCD, reflect or green/red LED backlighting
- 0.48″ (12.2mm) high digits
- Optional setpoitn output card
- Optional seral communication card (RS232 or RS485)
- Optional USB programming card
- Operates from 9 to 28VDC power source
- Front panel or crimson programmable
- Display color change capability at setpoint output
- NEMA 4X/IP65 sealed front bezel

The **CUB5RT** accepts an RTD input and provides a temperature display in Celcius or Farenheit. The meter also features minimum and maximum display capture, display offset, °F or °C indicator, and programmable user input. The display can be toggled either manually or automatically between the selected displays. The CUB5 display has 0.48″ (12.2 mm) high digits. The LCD is available in two versions, reflective and red/green backlight. The backlight version is user selectable for the desired color and also has variable display intensity. The capability of the CUB5 can be easily expanded with the addition of option cards. Setpoint capability is field installable with the addition of the setpoint output cards. Serial communications capability for RS232 or RS485 is added with a serial option card. The **CUB5** can be powered from an optional Red Lion Micro-Line/Sensor Power Supply (MLPS), which attaches directly to the back of a **CUB5**. The MLPS is powered from 85 to 250 VAC and provides up to 400 mA to drive the unit and sensors.

MODEL MDMU MINIATURE DISPLAY MODULE COUNTER/TIMERS

RoHS Compliant Available

red lion®

NEW

- LCD, positive reflective or negat0ive transmissive with yellow/green or red backlighting
- Counter and timer all in a single unit
- Count positive or negative edge
- 9 ranges in timer mode
- Selectable decimal points
- 5VDC powered
- Panel mount or PC board mount

The **MDMU** is a complete 6 digit Counter/Timer in a small panel or printed circuit board mounted package. It is designed to operate from a 5 VDC power supply. It has a 6 digit LCD, with 0.35″ high digits, and 3 selectable decimal points. In the timer modes, a flashing annunciator is supplied to indicate that the signal input of the **MDMU** is active. The displays are available in positive image reflective (black digits, reflective background) or negative image transmissive (illuminated digits, dark background) with red or yellow/green backlighting. The **MDMU** has four Mode Select and two Decimal Point Select inputs available for determining the basic operation. In most applications, the MS and DP inputs are hard wired to select the appropriate function (counter or timer) and counter decimal point position. The COUNTER mode is selected by setting the Mode select inputs to the appropriate levels (Hardware selection). Decimal points may also be set using the DP Inputs (Hardware selection). The TIMER mode and range is selected by setting the Mode Select inputs to the appropriate levels (Hardware selection). The timing range increments available are 1 msec, 10 msec, 100 msec, 1 sec, 0.1 min, 1 min, 0.01 hr, 0.1 hr, and 1 hr. The TIMER ACTIVE annunciator will flash at a 1 Hz rate when the input to the timer is activated.

HANDHELD STRAIN GAGE INDICATOR

NEW

NEWPORT

- Portable, hand held indicator for bridge type transducers
- 9 Volt battery powered
- Scalable display with dummy zero
- Built-in transducer excitation
- Track/peak modes available
- Selectable decimal point
- Low battery indication
- Blanking overrange

The hand held calibrator is a digital indicator for strain gage type transducers such as load cells, torque sensors, or millivolt pressure sensors. It provides excitation voltage for the transducer and displays the readings on a liquid crystal display (LCD). The LCD has a 3 ½ active digits (0-1999 counts) and an additional dummy zero if needed. The calibrator can display either the actual value of the signal (tracking mode) or the peak value (peak mode). It operates on a standard 9 Volt battery and provides an indication of low battery. It has two internal reference voltages for powering the bridge. The 1.24 Volt reference is used with the 1K Ohm bridge and below whereas the 2.5 Volt with the 2.5K/5K Ohm bridges and above. Failure to properly select the excitation voltage can result in the calibrator drawing excessive current. The calibrator provides amplification, common-mode rejection and controls the LCD Display. The calibrator is designed for 0.5 to 4.0 mV/V bridge sensitivity range. A ZERO POT and SPAN POT is provided for calibration.

1/16 DIN DIGITAL LCD TIMERS

Autonics Sensors & Controllers

LE3S / LE3SA / LE3SB

- Wide range of power supply: 24-240VAC @ 50/60Hz, 24-240VDC
- Easy to switch Up/Down mode
- 10 programmable output modes and timing ranges
- Selectable function by front digital switches
- Graphic output contact status display (NO/NC)
- BAR graph display of time progressing in 5% increments

LE4S

LE3S

LE4S / LE4SA

- Wide range of power supply: 24-240VAC @ 50/60Hz, 24-240VDC
- Set each value and time range separately when choosing Flicker (FK, FK I) or ON-OFF Delay (ON OFF D, ON OFF D I) output mode
- Add Flicker 1 mode (**LE4SA**)
- Set one-shot output time (0.01-99.99sec)
- Choose min. input signal: 1ms or 20ms (**LE4S**)
- Improved return time: 100ms
- Easy function setting modes
- Lock setting function for saving setting value
- Function setting with soft touch
- High visibility display with back light ON/OFF function

ON-DELAY TIMERS

RoHS Compliant Available

IDEC

- Delay-on-make (ON delay) function
- DPDT or SPDT + instantaneous SPDT contacts
- Contact rating: 24VDC/120VAC 5A, 240VAC 3A
- 8 time ranges
- Adjustable from 0.1 sec. to 10 min. or 0.1 min. to 10 hours
- Large, clear knob for easy setting
- Repeat error ±0.2% maximum
- Instant monitoring of operational status by LED indicators
- 8-pin, octal base

GE1A series timers are single-function (On Delay) time-delay relays. Extremely easy to configure for a wide variety of set times, the **GE1A series** serves as a simple "plug-and-play" timing solution. Handles settings up to 10 hours. 2 different contact configurations are designed to meet most application requirements. With IDEC's accessories, DIN rail, socket or through-panel (with a clear plastic protective cover) mounting configurations are available.

1/16 DIN MULTIFUNCTION DIGITAL TIMER

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- ON-Delay, Twin Timer, Repeat Cycle, Interval and Cumulative Timing Functions Available
- Large Backlit Negative LCD Display for Dim Lighting Conditions and Wide Angles
- Wide Variety of Timing Ranges from 0.0015 to 9999h
- Finger-Safe Terminal Sockets and Cover Available
- Supply Voltage: 100 to 240VAC, 50/60Hz
- Operating Voltage: 85% to 110% VAC or 90% to 110% VDC
- Power Consumption: Approx. 6.2VA at 264VAC
- Display: 11.5mm High Characters (Present Value); 6mm High Characters (Set Value); 7-Segment Negative Transmissive LCD
- Input Signals: Start, Gate (H5CX-A) and Reset; 1 or 20 ms Input Signal Width

Use the external DIP switch to configure the timer for simple jobs and the front panel switches for more complex settings. 5A at 250VAC, SPDT contact output. Control output: SPDT contact, rated 5A@250VAC resistive load. Twin timer available on all models. Units with transistor output also available; Go online or call. UL listed, UL recognized, CE compliant.

1/16 DIN DIGITAL SET TIMER WITH BAR GRAPH DISPLAY

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

H3CA timer offers accurate digital thumbwheel setting and easy-to-read LCD bar graph display for time remaining and LCD indicator of output status. Eight field-selectable operation modes include ON-delay, signal interval/OFF-delay I, repeat cycle, signal OFF-delay (I and II), interval, cycle, and signal ON-delay/OFF-delay. Seven selectable timing ranges from 0.1 second to 9990 hours. Universal voltage 24-240VAC or 12-240VDC, control output SPST 3A, 250VAC. Includes three no-voltage inputs for start, reset, and gate. Dimensions: 1.89H × 1.89W × 3.50"D (48 × 48 × 89). Requires 11-pin socket, *ordered separately; go online or call.* UL recognized, CSA certified.

PROGRAMMABLE 24-HOUR TIMER

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

H5L series programmable 24-hour weekly timer features easy front-panel set-up, 24-hour (military time), 7-day programming, and large, easy-to-read LCD display. Unit offers 2 independent SPST 15-amp circuits (with manual override switches) and wide operating voltage: 100-240VAC. Ideal for HVAC, lighting, and other system operations in commercial or industrial environments. Programs may be tailored to daily routines within single 24-hour periods. Built-in 10-year battery protects programming. Unit may be panel, surface or DIN rail mounted. Dimensions: 3.8H × 3.8W × 2.25"D (96 × 96 × 57mm). UL recognized, CSA certified.

HONEYWELL 20000 SERIES AC HOUR METERS

Honeywell Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

Features:

- Polycarbonate, shock resistant, tamper proof case
- Totally sealed
- Single phase, synchronous, permanently lubricated motor

Specification:

- Accuracy: 0.02%
- Records up to 99,999 hours
- Automatic recycle to zero
- Operating frequency: 60Hz
- Power rating: 3.0W
- Operating temperature: -54°C to 68°C
- Weight: 3oz
- Lens material: 3-screw mount: Glass, 2-screw mount: Polycarbonate
- Number size: 0.12" (3mm)

Fig. 1

MODEL 722 AND 732 ELECTROMECHANICAL TOTALLY SEALED HOUR METERS

RoHS Compliant Available

REDINGTON® COUNTERS INC.

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5 Fig. 6

- Model 722 operating range: 90-240VAC 50/60Hz
- Model 732 operating range: 18-30VDC
- Totally Sealed
- UL/cUL Recognized, CE & RoHS Compliant
- 6 Figure, 99999.9

The Reding Model 722 (AC Hour Meter) no longer requires two separate meters, one for 115VAC and one for 230VAC. The Redington Model 732 (DC Hour Meter) are protected for 2x battery voltage and/or reverse polarity. A quartz time base insures accurate long-term time keeping. Models have a square front panel dimension of 1.90″ [48mm x 48mm]. Three adapter panels are also available for fitting additional panel dimensions.

MODEL 34 LCD COUNTERS AND HOUR METERS

RoHS Compliant Available

REDINGTON® COUNTERS INC.

Two Hole Mount

Three Hole Mount

Round Flush Mount

- AC or DC voltage input in the same unit
- Hour Meter or Counter versions
- Front face totally sealed from moisture or dirt when used with proper gasket

Rectangular Flush Mount

The Redington Model 34 LCD provides a large, always ON display, with 0.28" [7mm] high characters, in the standard industry size housings (1.45 x 0.95" [36.8 x 24.1mm]). The hour meters and counters are available in 7 different housings. All models are totally sealed. A wide operating voltage, 10-300VDC and 20-300VAC make the Model 34 versatile for all indoor and outdoor applications. All models are NEMA 4/4X, 12, & IP66 rated when used with the optional gasket and have a polarized lens which assures high visibility in an outdoor environment.

ELAPSED AND PRESET TIMERS

VEEDER-ROOT

Eagle Signal Controls

A103 series elapsed time indicators and preset timers can be programmed to meet your needs. They display in seconds, minutes, hours, or hours: minutes: seconds. All units use an internal 3-volt single or dual battery. Features include a 7-digit supertwist LCD with .47" (12mm) high digits and green illumination display backlight capability. Accepts input signals from dry contact, PNP, or NPN sensors. Timing start/stop can be initiated by solid-state signals or mechanical switches. Reset on front panel or remotely. Ranges and resolution: seconds, minutes to 1/10, hours to 1/10, hours: minutes: seconds. Connections made at screw terminals. Weight: 2.25 oz. (64 g). Front panel rated NEMA 4/IP65 for use in washdown environments. *Order matching counters, rate indicators, and quick-attach option modules separately; go online or call.*

INTERVAL COUNTDOWN TIMERS

RoHS Compliant Available

ARTISAN

4972

4970-2

Series 4970 and 4972 are microcontroller-based interval countdown timers offering a digital display of time. Feature four time base codes; tenths-of-seconds, seconds, minutes and seconds and hours and minutes. UP/DOWN buttons allow for setting the countdown time period. Preset time kept in non-volatile memory. **Mfg. part no. 4970-2** offers SPDT power contacts rated for 20A operating @ 115VAC. *Additional operating voltages available, call or go online.* **Mfg. part no. 4972** features operation of a customer-supplied remote control switch for the start/stop and reset functions and a voltage switch selector of 115VAC or 230VAC with SPST power contacts rated 20A. **Mfg. part no. 4970-2** is UL/cUL approved.

FUSION™ SERIES COUNT CONTROL MODULES

- Combines high speed counter with micro PLC
- 10 digital and 4 analog inputs
- 7 digital and 2 analog outputs
- Built-in user configurable operator interface
- Modbus RS485 serial communication

The Fusion™ is a high-speed count control module and a logic controller capable of processing up to 100 rungs of ladder logic. Configuration can be done using the input display keys or utilizing the programming software, (available at no charge from www.durant.com). The Fusion™ has three form C and two form A relay output and two NPN transistor outputs. The 6kHz speed counter consists of a 5-digit ratemeter with high/low presets, a main counter with five presets, a totalizer and a batch counter (both pre-settable). The NEMA 4X operator interface can display counter data, alarms, operator prompts and ladder logic information. The display includes 18 pushbuttons for operator input. In addition to the 10 control inputs and three high-speed count inputs, the logic inputs also include: one power up signal, eight analog comparators for use with the four analog inputs, eight real time clock comparators, eight counters and eight timers. UL listed, cUL listed, CE certified.

STB SERIES SOLID-STATE TRIGGERED DELAY-ON-RELEASE TIMERS

- 100% solid-state circuitry
- CMOS digital timing circuitry
- Fixed- or field- adjustable delays from milliseconds to hours
- 2A continuous load current

Solid-state triggered delay-on-release timers are solid state switching devices with SPST; normally-open series connection. Epoxy-sealed, center mount, black plastic 2 x 2 x ¾" enclosure, 4 or 6¼" quick-connect male terminals. Continuous current rating: 2A. Maximum inrush: 20A. Voltage drop: 2.5Vrms or less @ 2A. Timing: factory-fixed, or adjustable with range from milliseconds to hours. Other voltages and timing and custom voltages also available; *go online or call.*

SWDC SERIES DELAY-ON-MAKE TIMERS

Widely specified for use in power supply sequencing as well as in industrial and process control equipment. Ideally suited for any application where specific operations need be delayed or sustained for precise intervals. Feature 3 standard timing ranges that each covers a 1023:1 span), +/- 1% repeatability and rated 10A at 240VAC (resistive). Relay operating temperature range: -45°C to +70°C. Contact arrangement is DPDT, with 8-pin octal plug-in base. 11-pin spade terminals style available; *go online or call.*

ST1A

SST1 Adjustable

- 100% solid-state circuitry—no moving parts
- CMOS digital timing circuitry
- SPST-NO contacts
- 2 x 2 x ¾" black plastic epoxy sealed enclosure

Maximum inrush: 20A. Voltage drop: 2.5VRMS or less @ 2A (10A load current available, *go online or call*). Maximum current rating for 110VDC is 2A (heat sink required).

DC10 TIME-DELAY RELAYS

AMPERITE

- CMOS digital TDR's have an 8-pin octal base
- Rated 10A@240VAC; 15A @ 30VDC
- Contacts: DPDT
- Dimensions: 2⅝L x 1¾W x 2⅜"
- Temperature range: -45° to +70° C.
- Mfg. part no. prefix denotes input voltage

11-pin spade terminal style available. Other time delays and voltages available; *go online or call*. UL recognized, CSA certified.

MINI DIN RAIL MOUNT TIME-DELAY RELAYS

RoHS Compliant Available

CARLO GAVAZZI

- Compact DIN rail mount housing
- Economically priced
- Universal power supply
- 0.1 seconds to 100 hours

Mini **D-Series** housed in 3H x 0.7W x 2"D housing (except the **DMB71**, which is 1.4W"). Snaps onto DIN rail. Provides an 8A SPDT output (with the exception of the **DMB71**, which provides a 5A DPDT output). All timers (with the exception of the **DBB series**) provide 6-switch selectable timing ranges from 0.1 seconds to 100 hours. Timing functions are listed below. The **DMB series** multifunction timers offer the following switch selectable choice of delays: delay-on-operate, interval, interval with external trigger, double interval, delay on release, and symmetrical recycler. Repeat accuracy: ≤0.2%. UL recognized, CSA certified, CE compliant.

Mfg. Part No.	Timing Function	Supply Voltage	Stock No.	Price Each
● DAA51CM24	On Delay	24-230VAC or 24VDC	05M4078	67.00
● DBB51CM2410S	Off Delay (1 to 10 Seconds)	24-230VAC or 24VDC	89C4336	101.00
● DMB51CM24	Multi-Function	24-230VAC or 24VDC	05M4092	78.00
● DMB51CW24	Multi-Function (12VDC)	24-230VAC or 12VDC	05M4093	93.00
DCB51CM24	Asymmetrical Recycler	24-230VAC or 24VDC	89C4354	142.00
DMB71DW24	Multi-Function	12-240VAC/DC	26K5686	135.00

(60577)

MULTI-FUNCTION AND MULTI-RANGE TIMERS

RoHS Compliant Available

CARLO GAVAZZI

- Universal 24-240VAC/DC Supply Voltage
- 100mS to 100 hour range, split into several sub-ranges
- Each timer has multiple switch selectable delay functions
- 8A SPDT output
- For DIN-rail or 11-pin socket mounting

DIN Rail

Plug-In

8A output. Universal power supply: 24VDC and 24-240VAC (DBB, PBB and all DPDT types can be powered by 24-240VAC/DC). Two LED indicators: output on and supply voltage applied. Multi-function models have 7 timing modes: delay-on-operate (on-delay), delay-on-release (off-delay), 3 interval modes and 2 symmetrical (repeat cycle) modes. The asymmertical model (repeat cycle) has two separately adjustable timed outputs, one for on-time and one for off-time. Except where noted, timing range is 0.1 sec to 100 hrs. Dimensions in inches: DIN rail models: 3.6H x 0.9W x 3.7D; Plug-In models: 3.2H x 1.4W x 3.7D. Repeat accuracy: ≥0.2%. UL recognized, CSA certified, CE compliant.

CHRONOS II TIMERS

RoHS Compliant Available

CROUZET AUTOMATION

- Multi-function or mono-function
- Multi-range (7 ranges, available options)
- SPDT relay output: 10A - 250V, or DPDT (Octal Plug-In Style)
- Screw or spring terminals (17.5 and 22.5 mm)
- LED status indicator
- 3-wire sensor control option

8- and 11-pin plug-in models are 35 x 35 x 79mm. 22.5mm DIN rail models are 22.5 x 78 x 99mm. All Chronos II timers rated at 10A@250VAC. Time range is selectable from 0.1 seconds to 100 hours.

TIME RANGER™ PROGRAMMABLE TIME-DELAY RELAYS

RoHS Compliant Available

MACROMATIC

UL LISTED with Appropriate Macromatic Socket

Single Time

Dual Time

- 16 timing ranges in a single time-delay relay
- User selects desired range by setting a rotary switch, no math required or DIP switches to set
- Adjust within selected range using potentiometer
- Covers 0.1S-2H (0.6S-24H on TR-631, TR-651 and TR-661 and 0.05S-30M on TR-606
- Repeat cycle and delayed interval units have independently selectable and adjustable ON and OFF times

Output: DPDT 10A resistive 240VAC/28VDC, 1/2hp @ 240VAC. Repeat accuracy: ±0.1%. Temperature: –28° to 65°C (–20° to 150°F). Power required: 3VA. Dimensions: 3.5″ H x 1.7″ D x 2.4″ W. *Order 8-pin and 11-pin sockets separately on page 1932.*

➤CONTINUED➤

TIME RANGER™ PROGRAMMABLE TIME-DELAY RELAYS (CONT.)

ON-DELAY (8-Pin)
Upon application of input voltage, a preset time begins. At the end of the preset time, the relay contacts transfer. Input voltage must be removed and reapplied to reset the time delay relay.

Mfg. Part No.	Control Voltage	Socket	Stock No.	Price Each 1-14	15-24	25-49
TR-60222	120VAC/DC	70169-D	**04M6606**	71.12	67.79	65.37
TR-60221	240VAC	70169-D	**28B4847**	94.76	90.33	87.11
TR-60228	24VAC/DC	70169-D	**04M6608**	71.86	68.49	66.05
TR-60226	12VAC/DC	70169-D	**04M6607**	71.86	68.49	66.05

INTERVAL-ON (8-Pin)
Upon application of input voltage, the relay contacts transfer and a preset time begins. At the end of the preset time, the contacts return to their normal condition. Input voltage must be removed and reapplied to reset the time delay relay.

TR-60522	120VAC/DC	70169-D	**04M6609**	71.84	68.47	66.03
TR-60528	24VAC/DC	70169-D	**04M6610**	71.84	68.47	66.03

OFF-DELAY (11-Pin)
Input voltage must first be applied. Upon closure of the control switch, the relay contacts transfer and hold. Upon opening of the control switch, a preset time begins. At the end of the preset time, the relay contacts will return to their normal condition. Any application of the control switch will reset the time. The time delay relay is reset by closing the control switch.

TR-61622	120VAC/DC	70170-D	**04M6614**	80.63	76.86	74.11
TR-61628	24VAC/DC	70170-D	**04M6615**	78.33	74.66	71.99
TR-61621	240VAC	70170-D	**28B4859**	101.12	96.39	92.95

OFF-DELAY – POWERED TRIGGER (11-Pin)
Action. Same as **616 series.**

TR-61922	120VAC/DC	70170-D	**04M6617**	83.86	79.93	77.08
TR-61928	24VAC/DC	70170-D	**04M6618**	84.75	80.78	77.89

MOMENTARY INTERVAL – SINGLE SHOT (11-Pin)
Input voltage must first be applied. Upon closure of the control switch, the relay contacts transfer and the preset time begins. During the time-out, the trigger input is ignored. The time delay relay is reset by applying the trigger when the relay is not energized.

TR-61522	120VAC/DC	70170-D	**04M6611**	78.96	75.26	72.57
TR-61528	24VAC/DC	70170-D	**04M6613**	79.79	76.06	73.34

WATCHDOG – POWER TRIGGER (11-Pin)
Input voltage must first be applied. Upon closure of the control switch, the relay contacts transfer and the preset time begins. At the end of the preset time, the relay contacts return to their normal condition unless the control switch is opened and closed before the preset time elapses. Continuous cycling of the trigger at a rate faster than the preset time will cause the relay contacts to remain closed.

TR-61822	120VAC/DC	70170-D	**04M6616**	85.64	81.64	78.73
TR-61828	24VAC/DC	70170-D	**48F5939**	85.64	81.64	78.73

TRUE OFF DELAY (8-Pin)
Upon application of input voltage, the relay is energized. When the input voltage is removed, the preset time begins. At the end of the preset time, the relay is de-energized. No external trigger switch is required.

TR-60622	120 VAC/VDC	70169-D	**01N5003**	119.02	113.44	109.39
TR-60628	24 VAC/VDC	70169-D	**01N5004**	117.49	111.99	107.99

REPEAT CYCLE -OFF FIRST (8-Pin)
Upon application of input voltage, OFF time begins. When the OFF time is completed, the ON time begins. The sequence repeats until the input voltage is removed. The OFF time and ON time are independently adjustable.

TR-63122	120VAC/DC	70169-D	**04M6619**	98.09	93.50	90.18
TR-63128	24VAC/DC	70169-D	**04M6620**	98.09	93.50	90.18

REPEAT CYCLE-ON FIRST (8-Pin)
Upon application of input voltage, ON time begins. When the ON time is completed, the OFF time begins. The sequence repeats until the input voltage is removed. The ON time and OFF time are independently adjustable.

TR-65122	120VAC/DC	70169-D	**04M6621**	98.09	93.50	90.18
TR-65128	24VAC/DC	70169-D	**04M6622**	97.06	92.52	89.22

DELAYED INTERVAL (8-Pin)
Upon application of input voltage, OFF time begins. When the OFF time is completed, the ON time begins. When ON time is completed, sequence stops. Input voltage must be removed and reapplied to initiate action again. The ON time and OFF time are independently adjustable.

TR-66122	120VAC/DC	70169-D	**04M6623**	98.09	93.50	90.16

RoHS Compliant Available

MACROMATIC

UL LISTED with Appropriate Macromatic Socket

Compact, economical design. Timing is adjustable with low-profile knob. Output: 5A resistive @ 120VAC/28VDC, ⅙ hp @ 120VAC. Repeatable accuracy: ±2%. Temperature: 0°C to +60°C (32°F to +140°F) Power required: 2.5VA. Dimensions: 2.4″H x 1.4″D x 1.4″W. UL listed when used with **mfg. part no. 70169-D** sockets. Order separately *on this page.*

- Digital or Analog Set
- 50ms to 100 Hours programmable timing range
- Universal 24-240V AC/DC input voltage
- Panel, track or surface mounting
- ⅙ DIN style case (comes with panel-mounting adapter)

Output: DPDT 3A at 240VAC/DC, Temperature: -28°C to +65°C. Dimensions in (mm): 1.9″x2.4″x2.9″ (48x60x74).

DIN RAIL MULTI-RANGE / MULTI-MODE SOLID-STATE TIMERS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- A wide AC/DC power supply range (24 to 240 VAC/DC)
- All sub-series include models with 12-VDC power supply
- UL, CSA, and CCC certification and EN 61812-1 compliance, CE Marking
- EMC (EN 61812-1) compliance for application in heavy industrial, residential, commercial, or light industrial environments
- Finger-safe terminal block and captive screws according to EN 50274

MINIATURE SOLID-STATE TIME-DELAY RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

H3YN series miniature solid-state time-delay relays combine 4 switch-selectable operation modes and time ranges into a single compact unit. Selectable operation modes include ON-delay, interval, or repeat cycle (ON-start or OFF-start). Choose long-range or short-range versions, each with 4 switch-selectable sub-ranges to meet your application requirements and improve accuracy (1% FS max.). Analog set dial lets users fine-tune timing for their specific applications. Dimensions: 1.10H x 0.85W x 2.50"D (28 x 21.5x 63). Requires mounting socket, *ordered separately*. UL recognized, CSA certified and CE compliant. Other supply voltages and DC models are available; *go online or call.*

Mfg. Part No.	Supply Voltage (VAC)	Range	Output Configuration	Stock No.	Price Each 1-9	Price Each 10-24

AGASTAT INDUSTRIAL ELECTROPNEUMATIC TIMING RELAYS

TE connectivity

Authorized Distributor

- Available in On-delay, true Off-delay and On/Off-delay
- Timing from 0.1 s to 60 min., fully calibrated in linear increments
- Operating voltages: 6 to 550VAC and 12 to 550VDC with special voltages available
- Available in 2-pole or 4-pole models
- Many enclosure options: explosion proof, dust tight, watertight, hermetically-sealed, NEMA 1
- Mounting options: surface mount, panel mount, octal plug-in mounting
- Options and accessories: quick-connect terminals, dial stops and transient protection module
- Front terminals: easy-to-reach screw terminals

Initiate, delay, sequence and program equipment actions over wide range of applications. **7000 series** dielectric withstands 1500Vrms 60Hz between terminals and ground. Normal mounting in vertical position, from back of panel. A front mounting bracket is also supplied with each basic unit. Standard screw terminals (8-32 truss head screws supplied) located on front of unit, with permanent schematic markings. Barrier isolation accommodates spade or ring tongue terminals. Seismic and radiation tested E700 models available; *go online or call.* UL listed, CSA certified, CE compliant.

P&B 10A MULTIFUNCTION TIME-DELAY RELAY

RoHS Compliant Available

TE connectivity

Authorized Distributor

DPDT multifunction time-delay relay for plug-in or panel mounting. Five timing functions selectable via rotary switch. 0.1 sec. to 9,990 hr. timing range. Fixed input type (120VAC ±15%). Rated 10A @ 30VDC/277VAC resistive. 1/16 DIN style enclosure with 11-pin octal plug-in base. Thumbwheel switches for programming delay time. Outline dimensions in inches (mm): 2.83 (71.9)L x 1.88(47.8)H x 1.88(47.8)W. Use **SSA-24C667** mounting clip to secure relay in panel-mount applications. UL recognized E22575, CSA certified LR15734.

AGASTAT INDUSTRIAL GRADE SOLID-STATE MINIATURE TIMING MODULES

TE connectivity

Authorized Distributor

VTM1

VTM2

Designed for demanding industrial applications. Repeat accuracy ±1% at constant temperature. 100,000,000 operations at rated load. **VTM1/VTMA1** time-delay operation begins when operating voltage is applied. At the end of the preset time-delay, the output relay (load) is energized until operating voltage is removed. To reset, remove operating voltage. Operation for **VTM2** off-delay models: operating voltage is applied continuously. The output relay (load) is energized when a normally-open control switch is closed (the load remains energized as long as the switch is closed). When the control switch is reopened, time delay begins. If the control state is reversed during time-delay period, the delay generating circuit automatically resets to zero. Dimensions: 2.00" x 2.00" x 1.25". UL recognized, CSA certified, CE compliant.

Mfg. Part No.	Time Range (sec.)	Voltage	Timing Function	Stock No.	Price Each 1-4	5-9
VTM1ACD	0.5-10	120VAC/VDC	On-Delay	98F9870	84.23	81.65

AGASTAT UNIVERSAL ON-DELAY TIMING MODULES

TE connectivity

Authorized Distributor

- On-delay operating mode
- Timing from 1 to 1000 seconds
- 1A solid-state SPNO output
- Quick-connect 1/4" terminals
- Universal voltage: 24 to 240VAC/DC or 12VDC available
- Rated to 10 million operations
- ±2% repeat accuracy
- Operating temperature: -22°F to +150°F (-30°C to +65°C)

Simple, encapsulated units, remarkably small in size and highly reliable. In-line timing module is wired in series with load circuit. Time delay is initiated when power is applied to the series network. Connecting a resistor across the center terminals provide tamper-proof setting of time delay from 1-1000 secs. UL recognized, CSA certified.

Mfg. Part No.	Description	Operating Voltage	Stock No.	Price Each 1-4	5-9	10-24
VTM-1	1-1000 Secs	24-240VAC/VDC	27C3921	206.16	188.57	171.98

88974085	16	...	10	Relay	240VAC	52T7257	390.20

SMART RANGE PROGRAMMABLE LOGIC CONTROLLERS WITH REMOVABLE TERMINAL BLOCKS

Designed for industrial, commercial, medical and paramedical machines. Improves the machine availability rate thanks to a fast maintenance process. Easier for cabling, allows pre-cabling of the installation. Simplifies the panel mounting. Suitable for applications subject to vibration and for mobile applications thanks to the spring cage connectors. Compatible with standard 5.08mm pitch spring cage or screw connectors (angled or straight). Features identical to the Millenium 3 Smart range, compatible with any extensions and accessories.

MILLENIUM 3 + PROGRAMMABLE LOGIC CONTROLLERS

RoHS Compliant Available

CROUZET AUTOMATION

CB12

CB20

XD10

- Expandable up to 50 I/O
- 10 bit analog inputs on DC powered models
- Large back-lit display - 4 lines by 18 characters
- Ethernet communication - modbus TCP/IP expansion module
- RS485 modbus communication expansion module
- Fully user programmable display and buttons
- Program via function block or ladder logic
- Analog output expansion available
- Single point modbus communication via programming port
- Real time clock calendar standard on all controllers
- Available unit voltages; 12VDC, 24VDC, 24VAC, 100-240VAC

CD20

CD series standard 12 I/O and 20 I/O controllers display and buttons. Program up to 250 blocks relay, transistor or PWM outputs. Relay outputs: 8A @ 250VAC. Transistor outputs: 650mA @ 28.8VDC. Single point modbus communication. **XD series** expandable 10 I/O and 26 I/O controllers expand up to 50 I/O display and buttons. Program up to 500 blocks relay, transistor or PWM outputs. Communications expansion modules. Analog output expansion modules.

ELCs, (EATON LOGIC CONTROLLERS), SOFTWARE AND ACCESSORIES

RoHS Compliant Available

EATON

ELCs

Graphic Display Panel

- Directly mounts on DIN rail
- Scalable I/O - from 10 to 256 I/O
- 240 instruction sets
- Modbus RTU and ASCII standard, Profibus and Devicenet modules available
- Removable terminal strips

At 1" wide, the ELC is one of the smallest PLC's available on the market today. Ideal for smaller applications of 40 I/O or less, but can be expanded up to 256 I/O. Expansion modules snap easily together, allowing for expansion without the use of rack. PC and PA controllers include a built-in numeric display for user-assigned process monitoring, error codes, display counts and more. PC controller includes two potentiometers. Analog and AC/DC digital I/O modules available. Capable of 1, 4, 8, 16 and 32 bit instructions, block compare, block move communications, interrupts, retentive memory, up to 512 counters and timers, PID and floating point. The programming software is available as an evaluation copy as a free download on the website. A 1 hour training guide is also available as a free download on the website.

EASY® PROGRAMMABLE CONTROLLER

RoHS Compliant Available

EATON

- Program in Ladder Logic Directly on Unit Using Built-in Keypad
- Up To 12 Inputs and 8 Outputs
- High Current Relay Outputs
- Performs Basic PLC Functions
- Up To 121 Lines of Logic
- Local or Remote Expansion of Inputs and Outputs

Replace counters, timers and analog comparators using built-in user-friendly operating elements and an LCD display. Units are programmed in ladder logic right on the device itself with no external programming software or hardware required. Draw circuit diagrams on the LCD display using the built-in keypad. Expansion units increase the number of I/O. Optional software allows programing from a PC (requires optional cable and Windows 95). DIN rail mounting . UL listed, CSA certified, CE compliant.

Feature	Easy 500	Easy 700
Rung Lines	128	128

FT1A SMARTAXIS TOUCH HMI+PLC

NEW

RoHS Compliant Available

IDEC

- 3.8" HMI with embedded 12 I/O PLC
- Available in Monochrome or 65K TFT color
- 740 cd/m2 monochrome, 400 cd/m2 color
- 8 inputs, 4 relay outputs
- 10 Amp Relay contacts
- Embedded 2-pt analog inputs (0-10V DC, 10-bit, DC power type)
- Embedded Ethernet port
- USB Mini-B and USB Type A ports
- RS232C/RS485 interface
- IP66f

Mfg. Part No.	Screen Type	Bezel color	PLC I/O	Output Type	Stock No.	Price Each
FT1A-C12RA-B	3.7" Monochrome	Light Gray	8in/4out	10A Relay	72W3979	410.58

COMBINATION STARTER KITS - TOUCHSCREEN AND PLC

RoHS Compliant Available

IDEC

Starter Kits include components built to work together to give you the most for your money. Starter Kits provide everything you need to automate an existing system with ease, providing a complete automation control strategy at a bargain price. Each Package includes an IDEC touchscreen, a MicroSmart Pentra PLC (Slim or All-in-One design), a slim power supply, cables and software.

Mfg. Part No.	Description	Stock No.	Price Each 1-2
KIT-PENTRA-12-HG1F	4.6" LCD Screens, RS232 Interface Module, PLC, Power Supply, Cables and Software	93T2119	1105.77
KIT-PENTRA-12-HG2G-HP	5.7" LCD Screens, Interface Module, PLC, Power Supply, Cables and Software	93T2120	1597.77
KIT-PENTRA-12-HG2G-TE	5.7" LCD Screens, Ethernet, Interface Module, PLC, Power Supply, Cables and Software	93T2121	1413.27
KIT-PENTRA-12-HG3G-AHP	10.4" LCD Screens, Interface Module, PLC, Power Supply, Cables and Software	93T2122	2274.27
KIT-PENTRA-12-HG3G-8HP	8.4" LCD Screens, Interface Module, PLC, Power Supply, Cables and Software	93T2123	1981.48
KIT-PENTRA-12-HG4G-HP	12.1" LCD Screens, Interface Module, PLC, Power Supply, Cables and Software	93T2124	2581.77

MICROSMART PENTRA PLCS

RoHS Compliant Available

IDEC

PLC Starter Kits

FC5A Features
- Embedded Ethernet port
- Modbus TCP, RTU and ASCII
- Email and Text notifications
- Custom web page
- USB programming port
- Up to 7 Communication ports
- Use FC4A expansion I/O modules
- Max. 512 local I/Os
- Online Edit
- UL/cUL, Class 1 Div 2, CE, ABS

FC4A Features
- Max. 264 I/O
- Datalink up to 32 PLCs
- Easy programming
- 20kHz high speed I/O
- Standard RS232C port, optional RS485/RS232 port
- UL, c-UL, Class 1 Div 2, CE

The MicroSmart and MicroSmart Pentra systems can be used in any type of control application and can handle very sophisticated tasks. Available in two different CPU styles. Up to 264 I/Os can be configured in the MicroSmart system using FC4A MicroSmart expansion modules. Up to 512 I/Os can be configured in the MicroSmart Pentra system using the same FC4A MicroSmart expansion modules.

FC4A ALL-IN-ONE CPU

SMART RELAYS

FM APPROVED — RoHS Compliant Available — IDEC

Features:
- Optional Text Message Display panel
- 4 built-in 0-10V analog inputs
- 4 built-in 5 kHz high speed inputs
- Universal voltage – 12-24 VDC, 24 VAC/DC, 100-240 VAC/DC
- Bright, high contrast, and controllable backlit LCD
- Extended programming memory
- New USB programming cable
- Worldwide approvals – cULus, CE, FM Class 1 Div 2, Lloyds Registered, and ABS approved

FPO MICRO PLC'S

RoHS Compliant Available

Panasonic

- High expansion capability with up to 384 /I/Os
- Fastest processing time, 0.3usec/basic command
- Compact design (W 30 x H 90 x D 60mm)
- Short circuit protected transistor outputs
- Built-in analog volume with two points
- Backup battery

A control unit is a mere 25mm in width. Even expanded to 128 I/O points, the width is still only 105mm. The attachment area is one of the smallest in its class. The control unit's dimensions are: W25* x H90 x D60mm. Also, the I/O unit can be expanded to a maximum of 128-points. Even so, the size is still only W105 x H90 x D60mm, a super compact design that breaks all previous common sense rules on small-scale PLCs. With the smallest ever attachment area, the FPO is perfect for installation in machines, facilities, and control boards where miniaturization is progressing even further. The expansion unit can easily be attached directly to the control unit. Special expansion cables, backplanes and so forth are unnecessary as the expansion unit employs a stacking system that uses expansion connectors and locking levers on the surface of the unit itself.

DIN W72×H36MM FREEZING/DEFROST TEMPERATURE CONTROLLERS

c UL us Autonics Sensors & Controllers

- ON/OFF control
- Basic input specification: NTC (Thermistor), Option: RTD (DIN Pt100Ω)
- Indication range: -40.0 to 99.9°C / 40 to 212°F (NTC sensor type), -99.9 to 99.9°C / -148 to 212°F (RTD Sensor type)
- Includes various delay functions
- Auto/Manual Defrost selection function, Start-up delay of compressor, Re-operation delay, Minimum ON time, Delay of defrost-end, Operation delay of evaporation-fan
- Input correction function
- Allows setting of operation period for protecting compressor in error

TC4W

TC series is one of the most cost effective temperature controlling solutions with essential functions and improved performance. It realizes ideal temperature controlling with newly developed PID control algorithm and 100ms high speed sampling. Both SSRP output and relay output are supported to realize effective and economical controlling; in addition, improved visibility and compact size is another feature of the **TC series. TC4S** is terminal block type and **TC4SP** is plug type. Power supply range: 100VAC to 240VAC @ 50/60Hz.

iSERIES iR2™ ULTRA HIGH-PERFORMANCE FIBER-OPTIC INFRARED TEMPERATURE METER/CONTROLLER

RoHS Compliant Available

NEWPORT

NEW

Features:

- Wide temperature range: 300°C to 1800°C
- Highly accurate — 0.2% of full scale
- Extremely fast — 10msec response time
- Totally programmable analog ouput
- 1 SPDT form "C" relay 200mA @ 30VDC
- Big, bright programmable three-color dual LED displays
- User-friendly, simple to configure
- Two-color ratio measurement technique
- Ethernet with embedded Web-server
- Isolaterd RS-485/422/MODBUS
- On/Off or full autotune PID control
- Stainless steel 8mm spot-size optic lens, NEMA 4 rated
- Flexible fiber-optic 3-ft (1m) cable assembly
- Built-in laser sighting shows user precisely what lens is seeing
- Rugged cast aluminum enclosure, NEMA 4 rated, mounts on any surface
- Five-year manufacturer's warranty
- CE compliant

Specifications:

- Outputs: Two Control or Alarm
- Output types: Analog Voltage or Current, Relay, DC Pulse
- Analog/Pulse Output response: 1 sec.
- Accuracy: 0.02% of full scale
- Repeatability: 0.02% of full scale
- Temperature resolution 1 degree
- Temperature range:
  300 to 1300°C (572 to 2372°F) Single color 300 to 1300°C/Dual color 450 to 1300°C
  600 to 1800°C (112 to 32672°F) Single/Dual color
- Response time: 10msec
- Spectral response: 0.8 to 1.7 microns
- Selectable IR temperature measurement — single or dual color
- Wavelength (color): 650nm RED
- Optical field view: 25:1, adjustable focus from 200mm to more than 4M distance
- Max. laser power output: <1mW
- Operating temperature: 0 to 50°C (32 to 122°F)
- Power: 20 to 36VDC or 24VAC
- Protection: NEMA 4/ IP65 rated optical assembly and front panel
- Dimensions: 5.88" (149.35mm) W x 3.165" (80.39mm) H

iR2™ series ultra high-performance two-color ratio fiber-optic infrared thermometer/controller is a state-of-the-art instrument for difficult and demanding high-temperature applications. Ideally suited for measurement and control applications involving metals, glass, semiconductors and much more. Two-color ratio temperature measurement computes from the ratio of two different IR frequencies unlike standard IR thermometers that measure the absolute amount of IR energy. The ramp-to-setpoint feature allows user to define the rate of rise to setpoint minimizing thermal shock to the load during start-up. Comes complete with a compact NEMA 4 rated lens and flexible fiber-optic cable assembly that can be replaced in the field without the need of recalibration. Unique built-in laser sight illuminates the precise spot on the target that the lens is viewing. The laser can be easily turned on and off with the simple push button on the front panel, or remotely via network or serial communications.

Mfg. Part No.	Description	Temperature Range	Stock No.	Price Each
IR2C-300-53-C4EI/N	Fiber-Optic IR Thermometer/Controller	300 to 1300°C	04X5563	3495.00
IR2C-600-53-C4EI/N		600 to 1800°C	04X5564	2995.00

i32 SERIES 1/32 DIN TEMPERATURE AND PROCESS PID CONTROLLERS

NEW

RoHS Compliant Available

NEWPORT

Features:

- Universal inputs: RTD, Thermocouple, Analog Voltage/Current
- No outputs or dual outputs for controlling or alarming functions
- High accuracy: 0.5°C, 0.03% rdg
- User-friendly, simple to configure
- Full autotune PID control
- Totally programmable color-changing display
- Built-in excitation
- Power: 90 to 240VAC ±10%, 50 to 400Hz
- Dimensions: 25.4H x48W x 127mmD (1 x 1.89 x 5")
- NEMA 4/Type 4 (IP65) rated front bezel
- Five-year manufacturer's warranty
- UL listed, CE compliant

i32 Series 1/32 DIN size (1.89" x 1") digital panel meters feature universal inputs for thermocouples (K, J, T, E, R, S, B, C, N & J DIN) RTDs: 100-, 500-, and 1000-ohm with 2-, 3-, and 4-wire connections, plus totally scalable process voltage 0–100mV, 0–1V, 0–10V ranges and process current: 0-20mA. Features the innovative **iSeries** display that can be programmed to change between green, amber and red at any set or alarm point. Options include isolated RS-232 and RS-485/422 and low-voltage power supply.

i18 SERIES 1/8 DIN TEMPERATURE, PROCESS AND STRAIN PID CONTROLLERS

RoHS Compliant Available

NEWPORT

NEW

Features:

- Universal inputs: RTD, Thermocouple, Process Voltage/Current, Strain
- No outputs or dual outputs for controlling or alarming functions
- High accuracy: ±0.5°C, 0.03% rdg
- User-friendly, simple to configure
- Full autotune PID control
- Totally programmable color-changing display
- Built-in excitation
- Power: 90 to 240VAC ±10%, 110 to 375VDC, equivalent voltage
- Dimensions: 1.89"H x 3.78"W x 5"D (48mmH x 96mmW x 127mmD)
- NEMA 1/Type 1 rated front bezel
- Five-year manufacturer's warranty
- UL listed, CE compliant

i8 Series 1/8 DIN size (3.7" x 1.9") digital panel meters feature universal inputs for thermocouples (K, J, T, E, R, S, B, C, N & J DIN) RTDs: 100-, 500-, and 1000-ohm with 2-, 3-, and 4-wire connections, plus totally scalable process voltage 0–100mV, 0–1V, 0–10V ranges and process current: 0-20mA. Features the innovative **iSeries** display that can be programmed to change between green, amber and red at any set or alarm point. Options include isolated RS-232 and RS-485/422, Ethernet, and low-voltage power supply.

INFINITY® INFCPH SERIES MICROPROCESSOR-BASED pH PANEL METER/CONTROLLERS

NEW NEWPORT

Features:

- Microprocessor-based versatility
- High and low alarm setpoints
- Programmable deadband hystersis around setpoints
- Scalable 4 to 20mA, 0 to 20mA or 0 to 10V output
- Automatic and manual temperature compensation of pH
- Quick calibration to 4, 7 and 10 pH
- Compact panel design
- Easy to operate through front keypad
- Large 4-Digit LED display, 0.54" (13.7mm)
- Ideal for environmental monitoring applications
- Interfaces with most BNC combination pH electrodes
- Five-year manufacturer's warranty
- UL listed, CE compliant

Specifications:

- Accuracy: ±0.1pH; 0.5°C
- Range: -2 to 16 pH; 0 to 100°C
- Resolution: 0.01 pH, 0.1°C
- Calibration pH: 2 or 3 point
- Relays: dual SPDT (form C) 5A @ 240VAC, mechanical
- Output: 4 to 20mA, 0 to 20mA or 0 to 10V (scalable)
- Analog output selectable in volts DC or mA DC
- Input impedance: $>10^{12}$ ohms
- Temperature compensation: 0 to 100°C using Pt 100/K ohm RTD (manual or automatic)
- Power: 115VAC, 230VAC or 10-32VDC
- Dimensions: 1.89"H x 3.78"W x 7"D (48mmH x 96mmW x 177mmD)

Mfg. Part No.	Description	Power	Stock No.	Price Each
INFCPH-011A	pH Controller with Red LED Display	115VAC	97H7627	395.00
INFCPH-211A	pH Controller with Red LED Display	230VAC	97H7624	395.00

iSERIES TEMPERATURE/PROCESS LIMIT ALARM CONTROLLERS

RoHS Compliant Available NEW NEWPORT

Features:

- Universal inputs
- High accuracy
- Two relay alarm outputs
- Totally programmable color displays (visual alarms)
- User-friendly, simple to configure
- Built-in excitation source for transmitters or other devices
- AC or DC powered units
- Front removable and plug connectors
- Programmable digital filter
- High/Low limit
- Remote reset input
- Five-year manufacturer's warranty
- UL listed, CE compliant

Specifications:

- Input types: Thermocouple, RTD, Analog Voltage/Current
- Accuracy: ±0.5°C temp; 0.03% rdg
- Process: 50ppm/°C
- Reading rate: 3 samples/s
- Display: Single 4-digit 9-segment LED 0.83" for ⅛ DIN; 0.4" for 1/32, 1/16 DIN
- Thermocouple types (ITS 90): J, K, T, E, R, S, B, C, N, L (J DIN)
- Voltage input: 0 to 100mV, 0 to 1V, 0 to 10VDC
- Input impedance: 10Mohm for 100mV, 1Mohm for 1 or 10VDC
- Current input: 0 to 20mA (5 ohm shunt)
- Voltage excitation: 24VDC @ 25mA
- Operating temperature: 0 to 55°C (32 to 131°F)
- Power: 90 to 240VAC ±10%, 50 to 400Hz, 110 to 375VDC
- Protection: ⅛ DIN: NEMA 1/Type 1 front bezel; 1/32, 1/16 DIN: NEMA 4X/Type 4 (IP65) front bezel

iSeries Limit Alarm Controllers offer flexibility in process measurement and alarm applications. Front panel configuration switches allow user to select the type of input, the alarm conditions and the resulting display color. Process inputs are fully scalable, supporting virtually all engineering units with a selectable decimal point providing a perfect solution for pressure, flow or other process inputs.

iTH SERIES HUMIDITY + TEMPERATURE MONITORS AND CONTROLLERS

NEWPORT

- Output1 - Humidity, Output2 - Temperature
- High Accuracy ±0.5°C and ±2% RH
- 4 Popular DIN Sizes
- Ethernet and Serial Communications (optional)
- Full Autotune PID Control
- Programmable Ramp and Soak for Humidity and/or Temperature
- RH/Temperature Probe included

The NEWPORT® iTH Series instruments monitor and control both temperature and relative humidity. Available in four true DIN Sizes: the ultra compact 1/32 DIN (the world's smallest dual loop Humidity + Temperature controller); the popular midsize 1/16 DIN square bezel with dual display; the ⅛ DIN vertical, and the ⅛ DIN horizontal with the big bright 21mm digits. There are two Control or Alarm Output options: Form "C" 3A Relays, SSR, DC Pulse or Analog output.

Mfg. Part No.	Description	Stock No.	Price Each
ITH-I8DH00-2	1/8 DIN Dual Display Horizontal Temp and RH Monitor, 2" probe	05R6294	390.00
ITH-I8DH33-5	1/8 DIN Dual Display Horizontal Temp & RH Controller, 2 SPDT Relays, 5" probe	05R6295	490.00
ITH-I16D33-2-C24	1/16 DIN Dual Display! Temp & RH Controller, 2 SPDT Relays, Serial RS 232 and RS485 Output 2" probe	05R6291	520.00
ITH-I16D33-5-C4EI	1/16 DIN Dual Display! Temp & RH Controller, 2 SPDT Relays, Ethernet and serial output, 5" probe	05R6292	605.00
ITH-I3233-5-C24	1/32 DIN Temp & RH Monitor, 2SPDT Relays and Serial Output, 5" probe	05R6293	480.00

ACCESSORIES

Mfg. Part No	Description	Stock No.	Price Each
ITHP-2	Replacement Industrial Probe 2" (51mm), cable 3ft. (0.9m) with stripped wire ends	05R6296	115.00
ITHP-5	Replacement Industrial Probe 5" (137mm), cable 10ft. (3m) with stripped wire ends	05R6297	125.00

Wi8 SERIES WIRELESS MONITOR, SCANNER AND CONTROLLERS

NEWPORT

- Wireless Inputs: Thermocouple and RTD
- Easily Configure through your Web Browser
- Ethernet and Embedded Web Server (standard)
- Two Outputs for Alarm or Control: Relays, SSR's, dc Pulse, Analog Voltage and Current
- Free Software

Compatible with Newport wireless sensors

- UWTC "Universal Wireless Thermocouple" Types J, K, T, E, R, S, B, N,and C.
- UWRTD "Universal Wireless RTD".
- zSeries wireless end devices with sensors for temperature

The wiSeries ⅛ DIN Panel Meter & Controller can monitor up to eight (8) wireless sensors. The compact instrument connects directly to an Ethernet network and the Internet and features NEWPORT's award-winning embedded Web Server. It is easily configured and monitored with a Web browser over the Ethernet network or the Internet. Alternatively, the wi8 meter-controller can instead be connected to the USB port of a single computer with a "USB Ethernet Adapter" that are inexpensive and widely available. The wi8 meter-controller comes standard with a choice of either two Form C relays, or two SSR's (solid state relays) that can be used for control functions or alarms. The wi8 meter can monitor alarm conditions for any or all of the wireless sensors. For example, the wi8 meter can be set up to trip an alarm if any one of the sensors indicated it was above or below a pre-set alarm point. A complete wireless system requires at least one reciever (wi8**-U) and one end device (UWTC-* or UWRTD-*) or reciever (wi8**-zT) and one end device (zED-*).

Mfg. Part No.	Description	Stock No.	Price Each
WI833-U	Wireless Controller (Receiver) with 2 Relays: Form C SPDT 3 A @ 120 Vac, 3A @ 240 Vac	05R8697	405.00
WI853-U	Wireless Controller (Receiver) with Analog Output 0 to 10 Vdc or 0-20 mA @ 500 ohm max. and Form "C" Relay	05R8699	405.00

ILD SERIES BIG DISPLAYS AND CONTROLLERS

NEWPORT

The BIG display features big bright 2.3" (57.2) or 4.0" (101.6) LED digits that can be programmed to change colors between red, amber and green at any set point or alarm point. The changes in color are quickly seen from a distance and equipment operators can intuitively react to changing conditions. The BIG display offers a wide assortment of signal inputs for process (DC) voltage and current, thermocouples, RTDs, strain gage, AC voltage and current, and frequency/pulse. The ethernet BIG display can display data transmitted via serial or TCP/IP communication from a computer or from other devices which transmit ASCII data via RS-232, RS-422 or RS-485. Optional outputs include SPDT relays for alarm or full PID control, isolated analog output, and RS-232/422/485 serial communications and MODBUS. The BIG display can be mounted flush in a panel or surface mounted with the included brackets and features full NEMA 4/IP65 protection. Available with 2 output relays; *go online or call.*

i16 SERIES 1/16 DIN TEMPERATURE, PROCESS AND STRAIN PID CONTROLLERS

RoHS Compliant Available

NEWPORT

Features:

- Universal inputs: RTD, Thermocouple, Process Voltage/Current, Strain
- Single or dual display models
- High accuracy: 0.5°C, 0.03% rdg
- User-friendly, simple to configure
- Full autotune PID control
- Totally programmable color-changing displays (visual alarms)
- Built-in excitation
- Temperature stability
- Ratiometer mode for strain gauges
- Programmable digital filter
- Power: 90 to 240VAC ±10%, 110 to 375VDC, equivalent voltage
- Dimensions: 1.89"H x 1.89"W x 5"D (48mmH x 48mmW x 127mmD)
- NEMA 4/Type 4 (IP65) rated front bezel
- Five-year manufacturer's warranty
- UL listed, CE compliant

Single or Dual Display Models

i16 Series 1/16 DIN size (48mm²) digital panel PID controllers feature universal inputs for thermocouples (K, J, T, E, R, S, B, C, N & J DIN) RTDs: 100-, 500-, and 1000-ohm with 2-, 3-, and 4-wire connections, plus totally scalable process voltage 0–100mV, 0–1V, 0–10V ranges and process current: 0-20mA. Its innovative **iSeries** display can be programmed to change between green, amber and red at any set or alarm point. Measures inputs from load cells, pressure transducers and most any strain gauge sensor, as well as, process voltage and current ranges. **i16 Series** has built-in 5 or 10 excitation for bridge transducers andl supports 4- and 6-wire bridge communications, ratiometric measurements. Features fast and easy "in process" calibration/scaling of the signal inputs to any engineering units and offers 10-point linearization which allows the user to linearize the signal input from extremely nonlinear transducers of all kinds. Options include a second display for set point, isolated RS-232 and RS-485/422, Ethernet, and low-voltage power supply.

CONTROLLERS – TEMPERATURE

⅛ DIN SIZE METER/PID CONTROLLERS

NEWPORT

The **iSeries** color display can be programmed to change between green, amber and red at any set or alarm point. Display features LEDs twice the size of typical ⅛ DIN meters for easier viewing. Contains a universal input for 10 thermocouples (K, J, T, E, R, S, B, C, N and J DIN), plus 100-, 500-, and 1000-ohm RTD's with 2-, 3-, and 4-wire connections for the most accurate RTD measurements. Totally scalable process voltage of 0–100mV, 0–1V, 0–10V ranges and process current of 0–20mA. Includes built-in 24VDC excitation, standard and optional RS-232 and RS-485 serial communications, and Ethernet output. Offers on/off or full autotune PID control with optional outputs: relays, SSR's, DC pulse and analog. The universal power supply runs on 90–240VAC/DC. Low-voltage 12–36VDC and 24VAC is optional.

STANDARD VERSION - 48H x 96W x 104.1mmL

E5GN SERIES DIGITAL TEMPERATURE CONTROLS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Indication Accuracy
- Thermocouple input: ±0.3% of PV (previous models: ±0.5%)
- Pt input: ±0.2% of PV (previous models: ±0.5%)
- Analog input: ±0.2% FS (previous models: ±0.5%)
- Models are available with screw terminal blocks or screwless clamp terminal blocks.
- A PV/SV-status display function can be set to automatically alternate between displaying the status of the temperature controller (auto/manual, RUN/STOP, and alarms) and the PV or SV.
- Preventive maintenance for relays in the temperature controller using a control output ON/OFF counter.
- Switch the PV display between three colors.
- Compatible with Support Software (CX-Thermo version 4.2 or higher).
- Eleven-segment displays.
- Models are available with one or two alarm outputs.

OMRON AUTOMATION & SAFETY

- Automatic Adjustment and PID Control in a 48x48mm Package
- Control Accuracy to ±1% of Full Scale
- Selectable Temperature Ranges in °C or °F
- Easy-to-read 13.5mm-High LED Display
- Models for Thermocouple Types J/L and K Inputs and Platinum RTD Inputs
- PID and On/Off Control Modes
- Wide Power Supply Range: 100 to 240VAC, 50/60Hz
- Tamper-proof Setting, Faulty Sensor Detection and Controller Diagnostics

Versatile, low-cost controllers have °F scales. Voltage output is rated 12VDC, 21mA with short-circuit protection. Relay output is SPST-NO rated 3A, 250VAC. Accepts J/L, K thermocouples, auto-tuning of P band. Accurate to ± 0.5% of full scale. Eight-function alarm output (SPST-NO relay, 1A, 250VAC). Rated IP50 (NEMA 4 with optional cover *go online or call*). **E5CSV:** 1.89H x 1.89W x 3.07"D (48 x 48 x 78mm), 5VA power consumption. Panel mounting adapter is supplied. UL recognized, CSA certified.

EAO CONFIGURABLE HMI PANEL DEVELOPMENT KIT

RoHS Compliant Available

eao

Features

- Completely customizable size, function, appearance, etc…
- "Mixed technology" helps differentiate critical functions
- Plug-and-play USB interface
- Illuminated animated buttons and engravable legends
- East-label slide-in legends for function keys
- Incorporated 5.7" LCD display with resistive touchscreen
- Single board computer integration available

Contents of Kit

- Configurable HMI Panel demo unit, user manual, and datasheet
- Touchscreen calibration driver
- Integrated USB, power, and monitor cables
- Carrying case

Add a Human Machine Interface to your equipment quickly and easily with EAO's Configurable HMI Panel. Awarded as industry's "Best New Products", the Configurable Panel's design flexibility allows for speedy customization to accommodate electronics, medical, aerospace, transportation, and CNC machinery applications effortlessly.

ES 9513 ROTARY CONTACTOR LENGTH (FEET) MEASURING SYSTEM

RoHS Compliant Available
EATON

Electronic rotary contactor measures shaft revolutions at speeds to 2400 RPM at 1:1 ratio; 2400 counts per minute maximum. Use for lineal paper, veneer, textile, steel, and jute lineal measurement applications. **Mfg. part no. 40891400** has leaf switch rated 5 amps, 120-240V for output into electromechanical circuits. Measuring system comprises rotary contactor, mounting bracket, and wheel; *each ordered separately.*

Mfg. Part No.	Description	Stock No.	Price Each 1-4
20154300	Rubber-Rimmed Measuring Wheel	87F6108	108.41
● 40460400	Mounting Bracket	87F6107	185.91
● 40891400	Rotary Contactor	83F7294	332.20

(2697)

SERIES D MECHANICAL MEASURING (ft.) SYSTEM

RoHS Compliant Available
EATON

Lightweight counter for measuring soft, delicate fabric, paper, etc. at speeds up to 800 yards per minute. Measure in feet with maximum count of **99999**. Wing nut reset. Oil-less maintenance-free bearings. System comprises rotary contactor, mounting bracket, and wheel.

Mfg. Part No.	Description	Stock No.	Price Each 1-4
40187401	Clockwise	87F6142	408.06

MINIATURE LENGTH SENSORS

RoHS Compliant Available
red lion

- Supply Voltage: 4.75 to 28 VDC @ 100 mA max.
- Output: NPN Open Collector Transistor
- Max. Frequency: 200KHz
- High precision (Up to 2500) PPR
- Max. Mechanical Speed: 6000 RPM
- Compact Size
- Quadrature Output
- Built-In spring tensioning
- Vertical, Horizontal, or Upside-down mounting
- Various measuring wheels available

Designed for light to medium duty sensing applications, the Miniature Length Sensor, Model ZMD, is compact in size and easy-to-use. It features a built-in spring-loaded torsion arm that adjust torsion load, allowing the unit to be mounted in almost any orientation, including upside down. Using a 6″ or 200 mm wheel, the ZMD can be used on almost any surface, while operating at speeds up to 3000 feet per minute. The housing is a durable, conductive composite material that will eliminate static build up. Whether you need to measure speed, position, or distances, the Model ZMD is the ideal solution. For other pulse rates and/or wiring configurations, contact the factory for further details.

Mfg. Part No.	PPR	Stock No.	Price Each
● ZMD0500B	500	19P7183	272.00

0.25″ SHAFT STANDARD SERVO MOUNT ROTARY PULSE GENERATORS

RoHS Compliant Available
red lion

- Supply Voltage: 4.75 to 28 VDC @ 100 mA max.
- Output: NPN Open Collector Transistor
- Max. Frequency: 200KHz
- High precision (Up to 2500) PPR
- Max. Mechanical Speed: 8000 RPM
- Low Cost
- Miniature size

The Model ZSD encoder is ideal for applications requiring a miniature, high precision, low cost encoder, designed with all metal construction for years of trouble-free operation. The NPN Open Collector outputs are each current limited to 20 mA. The outputs are standard quadrature with index, available in resolutions up to 2500 pulses per shaft revolution. The quadrature separation is typically 90 electrical degrees. Output A leads output B for clockwise rotation of the encoder shaft.

ZBH SERIES STANDARD DUTY ENCODERS

RoHS Compliant Available
red lion

- Current Sink Outputs
- High Pulse Per Revolution (PPR) Rates Up to 1200 PPR
- Quadrature Output
- Available with MS and M12 Connectors
- Shaft Speed: 600 RPM
- Supply Voltage: 5 to 28 VDC @ 80 mA max.

The units contain an L.E.D. light source and a photo sensor that scans a shaftmounted, slotted disc. An internal pulse-shaping amplifier circuit delivers a rectangular pulse signal from the current sinking output in response to the passing slots as it rotates. They can be direct-coupled to a machine shaft by means of a flexible-bellows, spring, or rubber sleeve type coupling that allows for axial and radial misalignment. They can also be coupled with light instrument timing-belts. Timing-belt drives also allow convenient gear-up or gear-down speed ratio changes that can be useful for obtaining non-standard PPR rates.

THRU-BORE ROTARY PULSE GENERATORS

RoHS Compliant Available

red lion®

- Supply Voltage: 4.75 to 28 VDC @ 100 mA max.
- Output: NPN Open Collector Transistor
- Max. Frequency: 200KHz
- High precision (Up to 2500) PPR
- Max. Mechanical Speed: 8000 RPM
- Flexible Butterfly Mounting
- Current Limited Outputs

The Model Z0D and Z0H are Thru-Bore Encoders. The Z0D has a bore of 0.25″ (6.35 mm) and the Z0H is a 0.375″ (9.5 mm) bore. These units are ideal for applications requiring a miniature, high precision, low cost encoder, designed with all metal construction for years of trouble-free operation. The encoders have a flexible butterfly mount and blind hollow shaft. These encoders use two set screws that are 90° apart to clamp the encoder's hub to the motor shaft. The NPN Open Collector outputs are each current limited to 100 mA. The outputs are standard quadrature with index, and are available in resolutions up to 2500 pulses per shaft revolution. The quadrature separation is typically 90 electrical degrees. Output A leads output B for clockwise rotation of the encoder shaft.

2″ AND 2.5″ FLANGE MOUNT ROTARY PULSE GENERATOR

RoHS Compliant Available

red lion®

- Supply Voltage: 4.75 to 28 VDC @ 100 mA max.
- Output: NPN Open Collector Transistor
- Max. Frequency: Up to 1 MHz
- Max. Mechanical Speed: 8000 RPM
- Up to 250 PPR
- NEMA 4, 13 and IP65 standards

The ZDH and ZNH series of sensors are heavy duty, extremely rugged, reliable, yet compact encoders designed for harsh factory and plant floor environments. Both models are flange mount. Typical applications include motion control feedback, machine control, process control, elevator controls, conveyors, textile equipment, robotics and food processing. The ZDH and ZNH series of sensors have open collector outputs. An open collector output brings the uncommitted collector of the encoder switching device to the external world. Because the collector element is not associated with the sensor supply voltage, the sensor output collector may be "pulled up" to external voltages different than the encoder supply voltage (40 VDC maximum). NPN open collector outputs are current sinking devices. An output signal will not be generated unless a pull-up resistor is connected from the open collector to the positive side of an external supply. The same supply can be used for powering the unit and for the pull-up resistor.

I/O MODULES (CONT.)

SMT construction for high reliability. 4KV optical isolation. Quad pack modules denoted with suffix **"Q"**; all others single point modules. Suffix **"N"** denotes modules with noise immunity per NEMA ICS2-230. **"M"** prefix denotes miniature modules for **M series** mounting boards. Prefix **"SM"** denotes miniature modules which plug into standard or sub-miniature mounting boards and offer nylon retaining pin for fast, secure installation. Both **"M"** and **"SM"** series are 33% thinner than standard I/O modules and feature open collector output. Suffix **"F"** denotes fast switching modules 47-63Hz. UL recognized and CE compliant.

"NEW GENERATION" DIN RAIL MOUNTABLE OUTPUT MODULES

RoHS Compliant Available

CROUZET AUTOMATION

DIN rail series I/O modules offer a packaging approach addressing installation and space-saving needs. DIN rail mountable (17.5mm wide) modules snap into place with an integral spring element which is part of the I/O assembly. Electrical connections made by wiring directly via a screw-clamp terminal design, conforming them to a "Touch Safe" IP-20 standard. Module includes LED indication, and output modules feature a quick and easy-to-change fuse (5A-Littlefuse Type 2290035). All units can also be configured for direct panel mounting. Input voltage is 4-32VDC. UL recognized and CE compliant. Dimensions mm (in.)

DR SERIES SINGLE POINT I/O MODULES

RoHS Compliant Available

CROUZET AUTOMATION

DR Series I/O modules offer a packaging approach that addresses installation and space saving needs. I/O modules snap into place with an integral spring element which is part of the I/O assembly. Electrical connections are made by wiring directly to color code and numbered terminal blocks designed to accept 28 to 14AWG wire. I/O modules include LED indicator, and output modules contain a replaceable 5A fuse. Mounting holes provided for panel-mount applications. I/Os available with 5 or 24VDC logic voltages. AC and DC outputs are suitable for most load requirements up to 5A.

G5 I/O MOUNTING RACKS

Grayhill

G5 mounting racks are designed to accommodate G5 modules, which incorporate a status LED in the module. The G5 output modules also have an integral fuse that eliminates the need for module fuses and LED status indicators on the rack. The G5 modules are slightly thinner than the standard modules. When used on the MicroDAC LT® controllers, analog and digital I/O modules can be intermixed on the same G5 rack.

SERIES 70G: G-5 I/O RACKS

Mfg. Part No.	Description	Stock No.	Price Each 1-14

STANDARD DIGITAL INPUT/OUTPUT MODULES

Grayhill

TUV Rheinland

70 Standard Package

70 Standard Package

70 series I/O modules provide 4000VAC optical isolation between sensitive logic circuits and external AC and DC power devices. Output modules have built-in transient surge protection to prevent false operation. All input modules except high speed IDC5B and IDC5D types have filtered inputs and transmit clean on/off status signals to the controller. Modules are epoxy-filled for shock and vibration immunity and operate from −40° to +100°C. UL recognized, CSA certified and CE compliant. TÜV certified. Lifetime warranty. All modules pass the EMC directive (89/336/EEC) for industrial products. ISW1 and OSW1 modules have toggle switches for simulating inputs and outputs during troubleshooting. Four types available: AC Output (Black); DC Output (Red), AC Input (Yellow), and DC Input (White).

TERMINAL NUMBER AND CONNECTION

Type	#5	#4	#3	#2	#1
OAC	N/A	DC-In	DC+In	AC Out	AC Out
ODC	N/A	DC-In	DC+In	DC-Out	DC+Out
IAC	Ground	Output	+Vcc	AC In	AC In
IDC	Ground	Output	+Vcc	DC-In	DC+In

Only input modules have terminal #5.

STANDARD I/O MOUNTING RACKS

Grayhill

Standard I/O Rack

Passive backplates accept I/O modules and connect one of the logic side terminals from each module to an associated pin on the logic side connector for interface to the controller. Up to 8 racks may be stacked along a DIN rail. Modules on standard racks are plugged into receptacle cups or connectors and are held in place by hold down screws, bars or clips. An LED indicates status of each digital module. 5A replaceable fuse protects outputs from short circuits. Miniature racks are much smaller than industry standard racks to save panel space.

SNAP PAC SERIES CONTROLLERS

RoHS Compliant Available

OPTO 22

SNAP PACs are high-performance, Ethernet-based programmable automation controllers suitable for automation and control, remote monitoring, and data acquisition applications. **SNAP-PAC-S1** standalone controller, **mfg. part no. SNAP-PAC-S1**, can run up to 32 ioControl flowcharts simultaneously. It features two independent 19/100 Mbps Ethernet interfaces for host and I/O communication, one RS-485 serial port for connection to Opto 22 mistic I/O units, two RS-232 serial ports (one with full handshaking) for PPP host connection or serial device connections, and multiple protocol support including TCP/IP, SNMP, FTP, and OptoMMP™. SNAP PAC R-series controllers, **mfg. part no. SNAP-PAC-R1** and **mfg. part no. SNAP-PAC-R2,** are rack-mounted I/O processors with two 19/100 Mbps Ethernet network interfaces, one RS-232 port with full handshaking for PPP host connection or serial device connections, and multiple protocol support. The **SNAP-PAC-EB1** and **SNAP-PAC-EB1** brains are I/O and communications processors for your SNAP PAC System. New Wireless/Wired versions add **-W suffix** to part numbers.

E1 AND E2 BRAINS

OPTO 22

E1

E2

- Drop-in replacement for existing B1 and B2 brain boards on an Optimux® serial network
- Dual network connectivity: RS-422/485 serial and 10/100 Mbps Ethernet
- Optomux® Modbus/TCP and OptoMMP protocol support
- Can use Opto 22 ioProject software for control, HMI, and OPC server

E1 and **E2** brain boards are Ethernet-ready I/O and communication processors for digital and analog I/O systems. **E1** connects to rack of Opto 22 G1, G4, or Quad Pak™ digital I/O modules. **E2** connects to a rack of Opto 22 G1 analog I/O modules. Drop-in replacements for B1 and B2 brain boards. Connect to 10/100 Mbps Ethernet networks while including support for serial Optomux®-based networks.

ETHERNET NETWORK INTERFACE SPECIFICATIONS

Type	IEEE 802.3 network, 10Base-T/100Base-TX
Connector	RJ-45
Rate	10/100 Mbps, half or full duplex
Protocols	Optomux® over Ethernet, Modbus/TCP, OptoMMP
Max. Segment Length	100m (328 ft.) with Cat 5 or superior UTP

SERIAL NETWORK INTERFACE SPECIFICATIONS

Type	RS-422/485 serial link
Connector	**E1** Terminal block; **E2** Terminal block on mounting rack
Data Rates	300, 600, 1200, 2400, 4800, 9600, 19200, 38400 baud
Protocols	Optomux

➤CONTINUED➤

E1 AND E2 BRAINS (CONT.)

SERIAL NETWORK INTERFACE SPECIFICATIONS

Range	Up to 32 Optomux stations for multidrop on serial network up to 1524m (5000 ft.) total length
Optomux I/O functions	**Digital I/O (E1):** Read point, write point, latch point (on/off), count, pulse duration, time delay*, pulse generation* **Analog I/O (E2):** Read point, write point, input averaging*, min/max recording (peak and valley), waveform generation*

* Functions not available with Modbus/TCP, OptoMMP, and OPC.

CLASSIC DIGITAL AND ANALOG BRAIN BOARDS

OPTO 22

Classic brain boards are distinguished by the protocol that they support. Mistic protocol brain boards include the B100 (digital) and B200 (analog). The Optomux protocol is supported by the B1 and B100 (digital) and B2 and B200 (analog) brain boards. Pamux brain boards include B4 (32 channel digital), B5 (16 channel digital) and B6 (16 channel/analog). The mistic protocol provides seamless integration with Opto 22's FactoryFloor software.

DIGITAL

Mfg. Part No.	Description	Stock No.	Price Each
B1	16-Channel Digital Brain Optomux Protocol	92F3447	267.57
B4	32-Channel Digital Brain Pamux Prototcol	92F3449	247.38

SNAP I/O™ MODULES

RoHS Compliant Available

OPTO 22

- Convenient Pluggable Connector for Removable Top-Mounted Field Wiring
- Ready Access to Standard Fuses
- Modules "SNAP" Securely on Racks - No Screws Required
- Highly Visible LED Status Indicator for Each Channel
- Mix Analog and Digital Modules on the Same Rack
- Handy Snap-On ID Plates for Channel Labels

SNAP I/O is Opto 22's highest density I/O packaging. SNAP I/O includes AC and DC digital modules and intelligent analog modules. SNAP's compact design delivers space savings while innovative packaging allows modules to simply snap in place. Factory Mutual (FM) approved versions of many SNAP I/O modules are available, *go online or call.*

G4 I/O MODULES

RoHS Compliant Available

OPTO 22

- High-density, single-channel analog & digital modules
- Digital modules include LED status indicator. Also available with manual switching (MA) capability for field wiring and control logic testing
- Digital output modules feature a top-mounted replaceable fuse (FUSEG4)
- Analog modules are factory-calibrated, offer 12-bit resolution and require a single 24-volt power supply

G4EB2 BRAINS

RoHS Compliant Available

OPTO 22

Features

- Upgrades older serial-based G4 and Quad Pak I/O to Ethernet-based I/O
- Equipped with two switched Ethernet network interfaces
- Multi-protocol communications and I/O processor
- Handles a mix of digital input and output modules in any position on one mounting rack
- No changes required to I/O and field wiring
- Multidrop capability

Announcing the **G4EB2 brain**: an Ethernet-based brain that talks OptoMMP protocol. It's a drop-in replacement, so you can leave I/O and field wiring intact while you upgrade. Now you can use legacy digital G4 and Quad Pak I/O with the latest SNAP PAC controllers.

BRAINS

Type	Description	Stock No.	Price Each 1-4
● G4D32EB2	Ethernet Simple Brain for 32 Position Racks	58T9567	909.65
● G4D32EB2-UPG	G4EB2 Ethernet Brain on a G4PB32R Rack	58T9568	523.25
● G4EB2	SNAP-PAC Ethernet Brain, Digital Only for G4PB32	58T9569	537.60

ADAPTER CARDS

OPTO 22

ISA BUS

PC Board Mount (Typical)

ISA BUS

Mfg. part no. PCI-AC5 adapter card provides an interface between personal computers with a 33MHz PCI Bus and Opto 22's digital I/O mounting racks, for direct connection to input/output points. 100 times as fast as the **mfg. part no. AC5**. Controls up to 48 I/O points. Includes header connectors and 6' cables. Adapter cards provide an interface between personal computers and Opto 22 mounting racks for direct connection to input/output points.

Stand-Alone (Typical)

Mfg. Part No.	Description	Stock No.	Price Each
AC24AT	Serial Port RS-422/485, Isolated	92F3394	292.52
AC422AT	Serial Port RS-422/485, Nonisolated	92F3414	250.73
AC5	ISA Bus to I/O Rack Adapter with 6 ft. Cable, Edge Connector	96F7185	193.82
AC28	ISA Bus to Pamux Bus Adapter	92F3396	195.06
PCI BUS			
PCI-AC51	PCI Bus to Pamux Bus Adapter	88H3857	413.14
PCI-AC5	ISA Bus to I/O Rack Direct Adapter	01C7187	507.00
STAND-ALONE			
AC7A	RS232-RS422/485 Converter, 120V	92F3416	203.75
AC7B	RS232-RS422/485 Converter, 220V	92F3417	203.75

TWIDO EXPANSION MODULES (TM2)

RoHS Compliant Available

Schneider Electric

Benefits:
- Open to numerous communication networks
- Flexible due to 3 basic types (Compact, Modular and Extreme) and wid range of I/O's
- Twido and its associated TwidoSuite software provide simple and astute solutions for all your predicaments

Applications:
- Simple stand-alone installations
- Repetitive and compact machines

P&B SLIMLINE AND SOLID-STATE INPUT/OUTPUT MODULES

RoHS Compliant Available

TE connectivity
Authorized Distributor

OACM-5

IAC-5

Slimline input/output modules provide interfacing between microprocessor- or computer-based control systems and external input devices and loads such as switches and sensors. Color-coded with high isolation and noise immunity. Packaged in a 0.4" enclosure. SPST-NO contacts. Mfg. part nos. beginning with **IA** indicate module function is AC input. **ID** indicates DC input, **OA** indicates AC output, and **OD** indicates DC output. Solid state modules are photo-isolated and feature excellent transient immunity. Packaged in industry-standard plug-in enclosure. Units interchange easily without disturbing wiring. Maximum load current derating for output modules is linear from 3A to 0.8A between +25°C and +80°C; **OAC-5H** and **ODC-5H** are linear from 5A to 1.3A between +25°C and +80°C. Both module types ideal for series operation. Dimensions for slimline modules in inches (mm): 1.7 (43.18) L x 0.4 (10.16) W x 1.00 (25.4) H. Dimensions for standard modules: 1.7 (43.18)L x 0.6 (15.2)W x 1.25 (38.10)H. UL recognized, CSA certified. *Order mounting boards separately on this page.*

WIMODPAK SERIES WIRELESS SOLUTIONS

invensys EUROTHERM

Features

- Highly cost effective
- Space saving DIN rail package
- 2.4GHz (Global), 900MHz (US & Australia), and 868MHz (Europe) versions available
- Gateways have secure data transmission with 256 bit AES (900MHz, US) or 128 bit AES (900MHz, AU and 868MHz, Europe) encryption
- Modbus compatible
- I/O expandable (up to 6 modules plus base unit)
- CE, CUL, Class 1 Division 2, RoHS (900MHz only)
- Up to 25 Miles (40.2km) LOS* with standard antenna (included)
- 10 to 48 VDC or 18 to 30 VAC power
- Free software included - or free download from our website
- Rugged construction with -40 to 80°C operating temperature range
- Flexible design - the same unit can be programmed as a transmitter, receiver or repeater

UW SERIES WIRELESS CONNECTOR / TRANSMITTER RECEIVERS

NEWPORT

UWTC-1/N

UWTC-REC1/N

- **UWTC**: User Configurable For Type J, K, T, E, R, S, B, N, C Thermocouple Input
- **UWRTD**: 3-wire, 100 Ω, 0.00385 or 0.00392 Curve RTD Sensor
- Free Software Converts Your PC Into a Multi- Channel Chart Recorder or Data Logger
- FCC Compliant (all versions)
- Built-In Cold Junction Compensation and Linearization
- Both Miniature and Standard Size Probes and Connectors
- One Receiver Works with Multiple Wireless Remote Connectors
- Low Power Operation and Sleep Mode For Long Battery Life
- Each Wireless Connector Transmits Thermocouple Temperature, Ambient Temperature, Signal Strength and Battery Status in Real Time
- **UWTC-REC1**: 48-channel receiver, USB powered, PC Chart Recording and Data Logging
- **UWTC-REC3**: 32-channel wireless receiver with ethernet for web-based temperature monitoring

The **UWTC-REC1** is a 48-channel receiver with USB connection. It's available with an optional NEMA rated enclosure. The **UWTC-REC3** receiver lets you monitor and record temperature over an Ethernet network or the Internet without any special software-just your web browser. Each Receiver can directly support up to thirty-two (32) Thermocouples, RTD, Infrared and Humidity wireless Connectors / Transmitters. The receiver is an independent node on the network sending and receiving data in standard TCP/IP packets. It is easily configured from a web browser and can be password protected. The **UWTC-REC3** can trigger an alarm if variables go above or below a setpoint that you can determine. Your alarm can be sent by e-mail to a single user or to a group distribution list, including text messages to Internet enable cell phones and PDA's. The Mail Notifier software is a free and easy-to-use program for this application.

Mfg. Part No.	Description	Stock No.	Price Each
UWTC-1/N	Wireless thermocouple connector (standard distance)	72W3016	135.00
UWTC-2/N	Wireless thermocouple connector (Extended distance)	72W3017	145.00
UWRTD-1/N	Wireless RTD connector (standard distance)	72W3013	135.00
UWTC-REC1/N	48-channel receiver/host (USB powered) for UWTC-1 or UWTC-2	72W3014	235.00
UWTC-REC3/N	32-channel receiver/host with Ethernet for UWTC-1 or UWTC-2	72W3015	285.00

WIRELESS DIN RAIL MOUNT RECEIVER W/ ANALOG OUTPUTS

NEW

NEWPORT

- Works with Up to 48 Wireless Transmitters
- Four 0 to 5 Vdc, 0 to 10 Vdc or 4 to 20 mA Analog Outputs
- Interface Directly to PLCs, Chart Recorders and Data Loggers
- Standard DIN Rail Enclosure
- Built-in Programmable Alarms for Each Channel
- Field Programmable via USB
- Included Software Turns a PC Into a Multi-Channel Meter, Chart Recorder or Data Logger

The **UWTC-REC4** wireless DIN rail receiver can work with up to 48 wireless transmitters, displaying their data in real time on your PC. The **UWTC-REC4** also has four independent analog outputs, which can be user-programmed as a retransmission signal from any input channel, driving a PLC or data logger. The **UWTC-REC4** is compatible with the full line of UW wireless transmitters from Newport; choose from thermocouple, RTD, %RH, infrared (non-contact) temperature, pH, as well as process voltage/ current models. The standard DIN rail mount design provides for easy mounting, and fast connections to other DIN rail equipment, including PLCs. The optional **IDRN-PS-1000** power supply can power up to three **UWTC-REC4** units, which can give you up to 144 wireless input channels, and 12 analog outputs.

Mfg. Part No.	Description	Stock No.	Price Each
UWTC-REC4-MA/N	48-channel DIN rail receiver with 4 analog outputs and alarms, 4 to 20 mA signal	04X9790	325.00

(212209)

GROOV HUMAN DEVICE INTERFACE (HDI)

RoHS Compliant Available

OPTO 22

- Ready-made gadgets let you quickly create a browser-based operator interface to monitor and control your company's assets
- A groov interface runs on any device with a modern web browser—regardless of manufacturer or operating system
- No server required; no software to install; no per-user fees
- Secure Sockets Layer (SSL) encryption protects data

groov is Opto 22's new way to build, deploy, and view simple, effective, and scalable operator interfaces to monitor and control systems and equipment using computers and mobile devices. Using only a modern web browser, **groov** lets you quickly and securely build and deploy browser-based interfaces for automation, monitoring, and control applications. These operator interfaces can then be viewed on almost any computer or mobile device regardless of its manufacturer or operating system, including PCs, tablets, smartphones, and even smart high-definition televisions.

INDUSTRIAL ETHERNET SWITCH

NEW · RoHS Compliant Available · ADVANTECH

- Supports IEEE 802.3az, Energy Efficient Ethernet standard: Automatically powers down ports that have no link, Budgets power output for different Ethernet cable length
- Support IEEE 802.1p QoS- VIP port setting: Ensures time sensitive data gets delivered efficiently, even during bursts of high data traffic, Ensures video streaming through switch with high priority.
- Supports redundant 12 ~ 48 VDC power input and P-Fail relay
- In Loop detection

Fig. 1

Fig. 2

Fig. 3

- Save space on DIN rail by placing GFCI in door
- Enhances compliance towards NFPA 70e
- Designed to fit the Inside-Outlet® GFCI for NFPA 79 compliance
- Interior status LED's (port P2 - P5) duplicated on front for thru-door diagnostics
- Program multiple devices safely from outside the panel
- External RESET and Power LED indication
- Required external power supply: 24VDC only
- Cast aluminum base housing w/ polycarbonate cover and thermoplastic elastomer gasket
- Choose from silver (UL Type 4, UL Type 12) or black (UL Type 4X) housing
- External port: RJ45 jack x 1
- Internal ports: RJ45 jack x 5

RoHS Compliant Available

HARTING

eCon 2050 -A
20 76 105 3000

- Flat housing format
- Robust metal housing
- Adapted for mounting onto top hat mounting rail 35 mm according to EN 60 715

The Ethernet Switch **eCon 2050-A** can be used in industrial environments and supports Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s). Up to 5 Ethernet devices can be connected via the RJ45-ports. The Ethernet Switch supports a simple and quickly network diagnostics with integrated LEDs at every port. It works as unmanaged switch in the Store and Forward switching mode and supports Auto-crossing, Auto-negotiation and Auto-polarity. DIN-rail, panel mount and flat-mount bracket kits are also available; *go online or call.*

ETHERNET SWITCHES SERIES 852

RoHS Compliant Available

WAGO

852-101 852-102 852-103 852-104 852-111

Features

- ECO & standard unmanaged plus managed
- Copper only plus copper and fiber
- SFP fiber optic ports
- Alarm relay for power and loss of signal
- 3 configuration options for managed switch
- E-mail notifications on managed switch
- High speed recovery on redundant ring - managed switch

SFP Modules

Ethernet switches are used to enable ethernet devices like controllers, couplers, IPCs, operator terminals and computers to communicate with each other efficiently and at high speeds. Customers that are using ethernet protocols like MODBUS TCP. EtherNet/IP, or profinet on our controllers, couplers and IPCs will in most cases need ethernet switches

Mfg. Part No.	Description	Stock No.	Price 1-4

UNMANAGED NETWORK SWITCHES 3, 5, 6, 8 PORTS

RoHS Compliant Available

Weidmüller

Industrial Ethernet

- Economic Plug and Play unmanaged switch with 3 to 8 Ethernet ports/DIN-rail mounting
- Automatic recognition and negotiation of data transmission rates
- Class 1 Division 2 approved
- AC input voltage, min.-max.: 12-24 VAC
- DC input voltage, min.-max.: 10-35 VDC

Media Converters

- Transparency in network
- Auto Link detection
- Multi-mode or single-mode versions
- Class 1 Division 2 approved
- AC input voltage, min.-max.: 12-24 VAC
- DC input voltage, min.-max.: 10-35 VDC

The **WaveLine** products integrate 3 to 8 RJ45 and Fiber Optic ports in a compact housing. With integral features such as Auto Negotiation and Auto Crossing, and an operating temperature range of 0°C to 60°C, the **WaveLine** is ideal for establishing Industrial Ethernet wherever you require a simple link between your device and your Ethernet network. **Media converters** can be switched between half duplex and full duplex by use of a small switch, making them ideal for use in demanding real-time applications. Auto Link detection checks the link status on the I/O ports and drops if one side is down. The multi-mode version provides interference-free transmission over distances of up to 2 kilometers, and the single-mode version up to 20 kilometers.

2210-T/B SERIES COMPACT VANDAL-RESISTANT KEYBOARDS WITH INTEGRATED TRACKBALL

RoHS Compliant Available

Storm Interface

Features
- Weather resistant (IP65)
- Integral PS2/USB interface (switchable)
- Optional PC connection cables
- Operational life of 4 million cycles per key
- Compact format: 360mm x 118.5mm x 38.5mm
- Operating temperture: -20°C to +60°C
- 63 keys

Keyboard Keytop

Storm 2210-T/B keyboards are constructed to survive in exposed, unsupervised, public environments. Their responsive key action ensures rapid, reliable and responsive data entry in tough, wet or hostile conditions. A hardened stainless steel front plate and captive, cast metal or high impact polymer keys ensure the keyboard's resistance to hard use, abuse and vandalism. A water and impact resistant trackball makes this keyboard the complete and ideal solution for PC

Mfg. Part No.	Description	Stock No.	Price Each 1-9
2210-452223	Robust T/B keyboard with polymer keys and 2.5m USB cable	39T2259	388.88

2210 SERIES VANDAL-RESISTANT/ ROBUST KEYBOARDS WITH INTEGRATED TRACKBALL

NEW

Storm Interface

Features
- Vandal resistant (10J BS EN 60068-2-75: 1997)
- Weather resistant (IP54)
- With factory fitted 2.5m USB cable
- RFI/EMI Protection
- Operational life of more than 4 million cycles per key
- Resistant to most commonly used cleaning agents
- Integral 38mm trackball with left & right click keys
- 63 keys
- Compact format: 360mm x 118.5mm x 438.5mm

Storm's 2210 Series high contrast keyboard is great for use in public access and industrial installations. This responsive and reliable keyboard was developed specifically for use in unsupervised or semi-supervised environments where hardware may be subject to hard use or abuse. The 2210 Robust keyboard was designed to provide maximum systems accessibility to those with sensory or mobility impairments. Ideal for use in kiosk and retail applications.

Mfg. Part No.	Description	Stock No.	Price Each 1-9
2210-252223	Robust T/B keyboard with polymer keys and 2.5m USB cable	23X5587	472.03

2200 SERIES REDUCED FOOTPRINT VANDAL RESISTANT KEYBOARD

RoHS Compliant Available

Storm Interface

- Tough, Vandal Resistant Construction
- Sealed against Water & Dust to IP65 Specification
- -20°C (Dry) to +75°C Operational
- Operational Life of More than 4 Million Cycles per Key
- Resistant to Most Corrosives and Cleaning Agents

Constructed to survive in exposed, unsupervised, public environments. Responsive key action ensures rapid and reliable data entry in tough, wet or industrial conditions. A hardened stainless steel front plate and captive, high impact polymer keys ensure the keyboard's resistance to hard use and abuse. **Mfg. part no. 2220** has reduced footprint with function row keys; **Mfg. part no. 2230** has reduced footprint with function row and number pad. Each size is available with engraved chromed metal or high-impact polymer keys. Supplied with switchable PS2/USB encoding electronics. Approx. size 11"(W) x 5"(H). PS/2 and USB cables are available; *order separately below.*

Mfg. Part No.	Description	Stock No.	Price Each 1-9

1200 SERIES MINIATURE VANDAL-RESISTANT KEYBOARD

RoHS Compliant Available

Storm Interface

- Environmentally Sealed Against Liquids and Dust to IP65 Specifications
- Permanent Laser-Engraved Keytop Graphics
- Operating Temperature Range: -20°C to +75°C

Developed for use in a new generation of web-enabled public telephones and transaction terminals, this small (approx. 7" x 3") but highly responsive keyboard is suitable for use in exposed or hostile environments. Robust construction is highly resistant to hard use, abuse and vandalism. It is sealed against water and dust to allow responsive, reliable data entry in the most demanding situations. Includes integral PS/2 to USB switchable encoder. *Order PS/2 and USB cable separately below.*

Mfg. Part No.	Description	Stock No.	Price Each 1-9

BLDC DRIVER WITH SPEED CONTROL

RoHS Compliant Available

LINENGINEERING Step Motor Specialists

- Input voltage from 12VDC to 48VDC
- Peak current up to 20 Amps Peak
- Continuous current up to 10 Amps
- Maximum wattage of 500 Watts
- Chopping frequency of 20kHz
- Three fault outputs via LED (flashes on and off)
- Closed-loop with hall sensors for speed control
- Direction of rotation change via hi/lo input change
- Direction mode which allows potentiometer to be used to rotate motor forwards and reverse
- Brake input, which will stop motor rotation suddenly using hi/lo input
- Speed control via 0-5VDC or 0-10VDC with external voltage input
- Speed reader output that outputs the speed of the motor in the form of a square wave
- GUI Software provided for easy installation and operation
- User selectable P & I values for smoother motion via closed loop with the hall sensors
- Communication via RS485, RS232 or USB converter card kits available

MICROSTEPPING DRIVERS

RoHS Compliant Available

LINENGINEERING Step Motor Specialists

R208-R0

R356-R0

R208-R0 Dimensions

R208-R0 features automatic current reduction. Provides up to 2A peak of phase current to any bipolar step motor. Microstepping resolution from 200, 400, 800, 1600 steps per revolution. Utilizes a 12-24VDC power supply to produce constant sinusoidal current waveforms.

R325 is rated the smoothest microstepping driver in the industry due to its ability to hold position over the zero-crossing point regardless of which motor is being used. Output currents from 0.3 to 3A peak. Input voltage: 12-48VDC. Step resolutions from 200, 400, 800, 1600, 3200, 6400, 12800, 25600, and 51200. Able to change microstepping currents and run and hold currents via DIP switches or RS-485 communication. Contains three optically isolated inputs and one optically isolated control input that can be used for step, direction, disable/enable, and fault detection.

ADW SERIES DRIVES

SANYO DENKI

- Range of operating voltage: 24-75 VDC
- Range of current: 1.9-6 Amp. Easy setting of values by means of a dip-switch
- Wide speed range: 0.8 rpm to 2,000 rpm (continous operation zone up to approx 400 rpm, depending on motor choice)
- 64 internally selectable preset speed
- 0-5Vdc or 0-10Vdc selectable analog command range
- Low & High-speed motion profile
- Adjustable internal acceleration/deceleration ramp
- Voltage source for potentiometer available at connector
- "Auto-stop" function
- All opto-insulated digital inputs
- Sync-out for multi-Axis synchronization
- Over-voltage, short-circuit and thermal protection
- Warranty: 24 months

ADW is the new R.T.A. electronic drive designed for all applications where accurate speed control is needed. The motor velocity can be regulated in 3 ways: analog voltage input, external potentiometer, internal speed settings. The exteded ADW power range (24-75 VDC) and its versatility (4 modes of operation) allow access to a wide variety of application fields.

Mfg. Part No.	Driver Type	Voltage Range (VDC)	Current Range (A)	Dimensions (mm)	Stock No.	Price 1-4

CSD 02/04 SERIES STEPPING MOTOR DRIVES

RoHS Compliant Available

SANYO DENKI

Features
- Range of operation voltages from 24 to 45 VDC
- Operation at 400, 800, 1600, 3200 steps/revolution
- Motor phase current setting by means of a DIP-Switch. Up to eight possible values, between 0.7A and 4.4A
- Pull-up or Pull-down inputs
- Two versions are available: with quick connection, crimp-type, or screw-type connectors
- Automatic current reduction at motor standstill
- Operation with a single external supply voltage
- High efficiency CHOPPER with MOSFET final stage output

Mfg. Part No.	Inf Min. (amp)	Inf Max. (amp)	Dimensions (mm)	Stock No.	Price Each
CSD 02.V	0.7	2.4	92x85x22	20T1449	154.00

(192331)

NDC SERIES STEPPING MOTOR DRIVES

RoHS Compliant Available

SANYO DENKI

Features
- Extended range of operation voltages from 24 to 75 VDC
- Operation at 400, 800, 1600, 3200 and 500, 1000, 2000, 4000 steps/revolution
- Motor phase current setting by means of a DIP-Switch. Up to eight possible equidstant values, between Inf min. and Inf max.
- Optoinsulated inputs compatible with differential control signals
- Two versions are available: with quick connection, crimp-type, or screw-type connectors
- Automatic current reduction at motor standstill
- Possibility to switch off motor current with an external logic signal
- Protection against short circuit at motor outputs, under-voltage and over-voltage
- Overtemperature protection with thermal sensor
- Operation with a single external supply voltage
- High efficiency CHOPPER with MOSFET final stage output
- Electronic resonance damping circuit to ensure acoustic noise and mechanical vibrations reduction at low and medium speed
- Built-in oscillator available, with speed range from 14 to 450 rpm

Mfg. Part No.	Inf Min. (amp)	Inf Max. (amp)	Dimensions (mm)	Stock No.	Price Each
NDC 06.V	1.9	6	101x94x25	20T1451	253.00

(192332)

X-MIND B SERIES STEPPING MOTOR DRIVES

RoHS Compliant Available

SANYO DENKI

Features
- Operation at 400, 800, 1600, 3200 and 500, 1000, 2000, 4000 steps/revolution
- Operation directly from the main AC supply (extended range from 110 to 230 V)
- Motor phase current setting by means of a DIP-Switch. Up to eight possible equidistant values, between Inf min. and Inf max.
- Optically insulated imputs compatible with differential control
- Automatic current reduction at motor standstill
- Possibility to switch off motor current with an external logic signal
- Protection against a short circuit at motor outputs
- Protection against under-voltage and over-voltage
- Overheating protection
- High efficiency CHOPPER with MOSFET final stage output
- Electronic resonance damping circuit to ensure acoustic noise and mechanical vibrations reduction at low and medium speed

X-PLUS B SERIES STEPPING MOTOR DRIVES

RoHS Compliant Available

SANYO DENKI

Features

- Operation directly from the main AC supply (from 110 to 230 VAC). No need of external transformer and rectifier
- High voltage DC bus: direct rectifier from main AC supply
- Easy motor phase current setting by means of DIP-Switch
- Operation at 400, 800, 1600, 3200 and 500, 1000, 2000, 4000 steps/revolution
- Automatic current reduction at motor standstill
- Protection against a short circuit at motor outputs
- Protection against under-voltage and over-voltage
- Overheating protection with thermal sensor
- Optoinsulated inputs compatible with differential control signals
- Possibility to switch off motor current with an external logic signal
- High efficiency CHOPPER with MOSFET final stage output
- Alarm memory by use of yellow blinking LED
- Electronic resonance damping circuit to ensure acoustic noise and mechanical vibrations reduction at low and medium speed

ROUNDLINE PLUS STAINLESS STEEL ACTUATORS DOUBLE ACTING NOSE MOUNT - DAN

RoHS Compliant Available

NORGREN ENGINEERING ADVANTAGE

Features:

- Oil impregnated sintered bronze rod bearing provides exceptional rod support, and optimal cycle life
- Chrome plated carbon steel piston rod for strength, smooth operation
- Stainless steel piston rod on 5/16, 7/16, 9/16
- Lip-Type nitrile rod seal, pressure energized and wear compensating
- Head and cap are solid aluminum alloy for strength and durability
- Solid aluminum piston is strong yet lightweight for low inertia
- Lip-type nitrile piston seals are wear compensating for long life
- 304 stainless steel cylinder body with polished I.D. ensures smooth performance and outstanding life cycle

Specifications:

- Maximum operating pressure: 250 psig (17.2 bar)
- Temperature range, Standard nitrile seals: -20° to 200°F (-29° to 93°C)
- Temperature range, High temp seals: -20° to 400°F (-29° to 205°C)
- Lubrication: Teflon® based grease for non-lube service and long life.
- Cylinder body: 304 Stainless steel
- Head and cap: Aluminum alloy
- Piston rod: Stainless steel or chrome plated steel
- Rod bearing: Oil impregnated sintered bronze
- Piston: Aluminum alloy or stainless steel
- Rod and piston seals: Nitrile
- Pivot bracket, rod clevis, foot bracket, & mounting nut: Zinc plated carbon steel

DFS SERIES SOLID-STATE FLASHERS

100% solid-state circuitry. Flash rates are fixed and available from 1 to 1,000fpm. All types below have flash rates of 60fpm. Duty cycle is 50%. Termination: 0.250″ QC male terminals. Case material: black plastic, epoxy-sealed. Dimensions: 2H x 2W x ¾″D. UL listed, CSA certified. Other flash rates and voltages are available; *go online or call.*

Mfg. Part No.	Input Voltage	Current Rating (A)	Stock No.	Price Each 1-9	Price Each 10-24	Price Each 25-49	Price Each 50-99

DFA SERIES ADJUSTABLE RECYCLING TIMERS (FLASHERS)

Solid-state digital CMOS recycle (flasher) timer circuitry with 8-pin base. Off/on time user adjustable over a 100:1 span. DPDT (2 Form C) isolated 10A relay contacts. Adjustable recycling timers provide a continuously operating off/on cycle as long as power is applied to the input terminals. Two knob operated potentiometers provide user adjustment of both the flash rate and duty cycle. Mfg. part no. prefix denotes input voltage. Other time-delays and voltages available. Spade terminal style available; *go online or call.* UL recognized, CSA certified.

Mfg. Part No.	Delay (Seconds)	Stock No.	Price Each 1-9	Price Each 10-24	Price Each 25-49	Price Each 50-99

(4022)

DFV SERIES ADJUSTABLE FLASHERS

- Solid-state analog flasher circuitry
- DPDT isolated 10A relay contact
- Variable flash rate: standard flash rate range: 10-120 FPM
- Single-knob adjustment on top of unit
- 12V to 120V input voltage available — both AC and DC models

DFV series on/off recycling flashers have a flash rate that is adjustable from 10 - 120 flashes per minute (FPM) by means of a knob potentiometer on top of the unit. Custom rates are available within ranges between a minimum of 1 FPM and maximum of 240 FPM. Contact material: silver cadmium oxide. Termination: 8-pin octal-style plug. 11-pin spade terminals also available; *go online or call.* UL recognized, CSA certified.

Mfg. Part No.	Flash Rate (FPM)	Input Voltage	Stock No.	Price Each 1-9	Price Each 10-24	Price Each 25-49	Price Each 50-99

(55273)

HDFA SERIES ADJUSTABLE RECYCLING TIME-DELAY FLASHER RELAYS

- 10 ampere SPDT contacts circuitry
- CMOS digital timing circuitry
- Off- and on-time user-adjustable
- Timing from milliseconds to hours

HDFA series low cost adjustable recycling timers may be used for alternately switching one or two load circuits with both OFF-Time and ON-Time adjustable by means of two built-in potentiometers. An SPDT 10 ampere contact set alternates continuously as long as power is applied to the relay. Typical applications include OFF/ON cycling for equipment burn-in test, lighting controls, and automatic cycling of electrically operated devices. Other voltages and time delay available; *go online or call.*

ST2 SERIES SOLID-STATE INTERVAL (ONE-SHOT) TIMERS

- 100% solid-state circuitry — no moving parts
- CMOS digital timing circuitry
- Adjustable delays from milliseconds to hours
- 2A continuous load current

Timers have contacts with solid-state switching device SPST, normally-open series connections. Continuous current rating: 2A. Maximum inrush: 20A. Voltage drop: 2.5Vrms or less @ 2A. Timing: fixed or field-adjustable from, 0.1 seconds to 100 hours. Timers have epoxy sealed black plastic enclosures measuring 2 x 2 x ¾". Available in 3 or 5¼" quick-connect male terminals.

438S SERIES TIMERS AND CONTROLLERS

RoHS Compliant Available

Fig. 1

Fig. 2

Fig. 4

Delay-on-make timers: connect in series with any 10mA to 1A load. When the operating voltage is applied, a small amount of current will flow through the load and the timer. At the end of the time delay period, the timer turns ON and full load current is permitted to flow. **Mfg. part no. 438AS-115-1**: Operates from 115VAC, time delay is set by an external resistor across terminals 4 and 5 for the 0.1 to 30 second range. **Mfg. part no. 438UPS**: Operates from 19 to 288VAC/DC. Time delay of 0.1 to 6 minutes adjusted with internal potentiometer. **Mfg. part no. 438US**: Operates from 19 to 288VAC/DC. Time delay of 1 to 1000 seconds set by an external resistor across terminals 4 and 5. **Mfg. part no. 438USAS**: Operates from 19 to 288VAC/DC. Time delay of 1 to 1024 seconds adjusted with internal DIP switch.

INTERVAL/SINGLE-SHOT TIMERS

RoHS Compliant Available

4310 Series

4300 Series

4310 series can perform as an interval or single-shot timer with closure of a momentary or maintained switch. The load remains ON for the full time period upon closure of the switch. Offering zero voltage switching. Controls DC loads to 1 ampere and AC 5 amp units can be extended to 10 amps with additional heatsinking. **4300 series** performs as an interval timer. Upon application of operating voltage the timer turns ON to a 1 amp load circuit for a preset time period. Operating voltage must be present for more than the preset time period. The **4310** and **4300 series** are available in additional AC/DC voltages, output ratings and timing ranges. UL/cUL recognized.

Mounting	DIN Rail	DIN Rail

Signal conditioner offers wide ranging input and output capability for scaling and transmitting analog DC signals. Will accept input voltage spans from 10mV up to 100V, as well as input current spans from 1-100mA. The 4-20mA output signal is a powerful 20VDC. Can be configured to accept bipolar input ranges and offer selectable normal or reverse acting operation. **Mfg. part no. 4380-2001-1** is a 3-port isolator -- the output is optically isolated from its input up to 1500VDC. The ASIC- based I/O channel is independently transformer isolated from the selectable 120/240VAC power supply. UL recognized, CSA certified.

ULTRA SLIMPAK II™ ISOLATOR, SIGNAL CONDITIONER, LIMIT ALARMS

RoHS Compliant Available

invensys EUROTHERM

ACTION INSTRUMENTS™

SPECIFICATIONS

Input Range	Selectable by DIP Switch
Output (Conditioners)	0-10V, 0-20mA or 4-20mA
Output (Limit Alarms)	2 SPDT relays, 5A at 120VAC
Input/Output Accuracy	± 0.01% of FS / ± 0.05% of FS
Supply Voltage	9 to 30V DC
Isolation Voltage	1800VDC or peak AC between input, output and power
Size	Conditioners: 0.5" (12.77mm) wide Limit Alarms: 0.69" (17.5mm) wide Communications Interface and Power Supply: 0.89" (22.5mm) wide
Mounting Type	DIN Rail

Ultra SlimPak II DC powered isolating signal conditioners feature "Smart Power" to reduce power consumption and temperature rise. Units are configured using DIP switches and feature pushbutton calibration. Power jumpers are used to distribute power to multiple units. Each module can be remotely configured using an Ethernet connection to the WVC16 and a remote PC-based web browser. **WV408** and **WV428 series** isolators meet Class I, Div. 2 standards. UL recognized, CE compliant.

Mounting Type	DIN Rail

SELECTION GUIDE

Input Selection	Description	Model
DC Voltage or Current (V, mV, A, mA)	Field configuration DC input isolator	G408
	Field configuration DC input limit alarm	G108
Thermocouple (Types E, J, K, R, S, T, B)	Thermocouple input field configurable isolator	G428
	Thermocouple input field configurable limit alarm	G128
Potentiometer (0-100 ohm to 0-100k ohm)	Potentiometer input field configurable signal conditioner	G438
Strain Gauge (0.5, 1, 3, 5, 10, 20 50mV/V) 1 to 10V adjustable excitation	Bridge input field configurable isolator	G448
AC Voltage or Current (V, mV, A, mA)	AC input field configurable isolator	G468

The Ultra SlimPak **G4X8 Series** of Signal Conditioners accept a variety of process signals: DC voltage and current **(G408)**, thermocouple **(G428)**, potentiometer **(G438)**, strain-gauge **(G448)**, AC current or voltage **(G468)**. Three port isolation — input to output to power — ensures that common ground faults are eliminated from any source.
The Ultra SlimPak **G1X8 Series** of Limit Alarms accept the most popular process signals: DC voltage and current **(G108)**, thermocouples **(G128)**. Their output is a dual contact closure (2 - SPDT relays) which can be used to light hazard beacons, sound audible alarms or alert control systems of abnormalities. The Ultra SlimPak Series is a result of this effort and investment. It utilizes the latest ASIC and microprocessor based technologies to provide 1800VDC isolation and wide ranging adjustments for easy, accurate, discrete signal conditioning. The power supply of the Ultra SlimPak will accept source between 9 and 30VDC, typically a 12 or 24VDC supply is used.

DC ACTION I/Q SELECTION GUIDE

Input Selection	Description	Model
DC Voltage or Current (V, mV, A, mA)	DC input isolator (fast response time)	Q404
	Field configuration DC isolator, optional excitation supply and dual output	Q408
RTD (Pt100 Ohm, NI110 Ohm, Cu 10 ohm) Thermocouple (Types B, C, E, J, K, N, R, S, T)	Thermocouple input field configurable isolator	Q488
DC Voltage or Current (V, mV, A, mA)	Field configuration DC isolator, math functions	Q498
AC ACTIONI/Q SELECTION GUIDE		
DC Voltage or Current (V, mV, A, mA)	DC limit alarm	Q106
	Field configuration DC isolator, optional excitation supply and dual outputs	Q406
Potentiometer (0-100 ohm up to 0-100k ohm)	Potentiometer input field configurable signal conditioner	Q436
AC Voltage or Current (V, mV, A, mA)	AC input field configurable isolator	Q466
Frequency (0-2Hz to 0-10kHz)	Field configuration frequency to DC isolator	Q476
RTD (Pt100 Ohm, NI110 Ohm, Cu 10 ohm) Thermocouple (Types B, C, E, J, K, N, R, S, T)	Instand accuracy temperature to DC isolator, field configurable via DIP switch or PC	Q486

The **DC Action I/Q Series** is very similar to the AC ActionI/Q product line. The main difference is that the DC ActionI/Q line is DC powered, accepting 9 to 30V. The DC powered I/QRail is optional since the DC Action I/Qs have both DC power terminals as well as the power rail connector, unlike the AC ActionI/Q. The **AC powered ActionI/Q Series** of four-wire transmitters offers many of the most advanced microprocessor and ASIC based signal conditioning solutions available, requires the **IQRL-200X**. Field configurable and wide ranging, these modules are an off the shelf solution for most isolation, signal conditioning and limit alarm applications. The **Original ActionI/Q Series Loop Powered**, two-wire and three wire transmitters for sensor signal inputs including DC Voltage, DC Current, Platinum 100 Ohm RTD and thermocouples. These DC powered, fixed ranged, multi channel signal conditioners and isolators offer stable 0.1% accuracy over operating ambient temperature range of 20° to 80°C. Their multi channel design ensures high density and low material cost. Plug in terminal sockets makes wiring quick and easy.

TRANSPAK™ PROGRAMMABLE TRANSMITTER

invensys EUROTHERM

ACTION INSTRUMENTS™

CE

SPECIFICATIONS

Input Type	Thermocouples, RTD (2-, 3- & 4-wire, Pt-100, Ni-110, Ni-120), DCmV, Potentiometers (0-20kΩ), Resistance (0-400Ω)
Output	4-20 mA
Accuracy	± 0.1% of span over 12 months
Supply Voltage	9-40VDC @ no load, reverse polarity protected
Isolation Voltage	2000VDC, input to output
Mounting Type	DIN Rail

➤CONTINUED➤

TRANSPAK™ PROGRAMMABLE TRANSMITTER (CONT.)

Programmable two-wire transmitter that is configured to provide an isolated 4-20mA signal in proportion to the input signal. Supports either single or dual outputs. In the dual output mode, either input can be selected to control the output, or math functions can be applied in which both inputs have an effect on the output. Functions available are sum, difference, average, higher or lower of the two inputs. Typical applications include providing accurate, stable signals to distributed control systems (DCS), supervisory control and data acquisition systems (SCADA, environmental monitoring and control systems (EMCS), data acquisition and control systems (DACS) and custody transfer/pipeline systems. CE certified.

Mfg. Part No.	Signal Input	Stock No.	Price Each
T287-0000	2-wire Programmable	85K9210	281.00

ACCESSORIES

Communications kit includes: Isolated communications adapter, configuration and calibration software, and user's guide.

ISOLATING SIGNAL CONVERTER 2 OUPUTS DUALCON

RoHS Compliant Available

IMO

Features

- Universal configurable input - user selectable
- 2 configurable Outputs - user selectable
- Full 3-Port Isolation
- Wide range AC or DC Supply
- Supply voltage: 12-32 VAC and 12-36 VDC
- Isolated Transmitter Supply
- Very High Accuracy, Low Cost
- Only 17.5mm Wide on DIN rail

The new DUALCON Isolating Signal Converter can accept a wide range of inputs including 4-20mA, thermocouple, RTD and voltage signals. The units produce two high level DC outputs of either voltage or current.

Mfg. Part No.	Stock No.	Price Each 1-9
● DUALCON-6	74R5362	434.58

iDRN AND iDRX SERIES DIN RAIL MOUNT SIGNAL CONDITIONERS

CE NEWPORT

Specifications:

- 10-32VDC Input Power Supply
- iDRN Output: 0-10VDC at 10mA Max.: 0-20mA or 4-20mA, 10V Compliance
- Isolation: Up to 1800VDC Peak
- Typical Response to 99%: 1 Second
- Operating Temperature: –5°C to +55°C (+23°F to +131°F)
- Storage Temperature: –40°C to +85°C (–40°F to +185°F)
- Mountable on a 35mm DIN Rail
- Dimensions: 3.55H x 0.99W x 4.88"D (91.2 x 25.1 x 124)

The new **iD series** signal conditioners combine the accuracy of laboratory instrumentation with the performance required by demanding industrial applications. Ideal for those applications in data acquisition, test and measurement, process control, and industrial automation where accuracy, performance and reliability are critically important. The **iDRN series** features 0-10VDC or 0-20mA (including 4-20mA) analog output signal that is typically scaled to be directly proportional to input signal.

DIN-RAIL SIGNAL CONDITIONERS

RoHS Compliant Available

red lion®

Model IAMA Model IFMA Model IFMR

MODEL IAMA - UNIVERSAL SIGNAL CONDITIONING MODULE
3-way isolation of analog signals. Universal conversion module, inputs and outputs selected via DIP switch settings. Over 100 input and output analog conversions combinations. Linear or square root extraction model available; *go online or call.*

Mfg. Part No.	Supply Voltage	Signal Input	Alarm Type	Stock No.	Price Each
IAMA3535	24VAC/11-36VDC	Selectable Current or Voltage	...	84K7451	205.00

MODEL IFMA - DIN-RAIL FREQUENCY TO ANALOG CONVERTERS
On-line rating setting (using actual input signal or signal generator). User settable full scale frequency from 1Hz to 25KHz. Four output operating ranges (0-5V, 0-10V, 0-20mA and 4-20mA). Programmable input circuit accepts outputs from a variety of sensors. 3-way electrical isolation.

IFMA0035	9-32VDC	Selectable Current or Voltage	...	84K7452	202.00
IFMA0065	85-250VAC	Selectable Current or Voltage	...	84K7453	202.00

MODEL IFMR - DIN-RAIL SPEED SWITCHES
On-line trip frequency setting using actual input signal or frequency generator. User settable trip frequency from 0.1Hz to 25KHz. Over-speed, under-speed and zero-speed detection. Relay latching, alarm override and alarm reset functions. Programmable input circuit accepts outputs from a variety of sensors.

857 SERIES JUMPFLEX SIGNAL CONDITIONERS

RoHS Compliant Available

WAGO®

Features:
- 6mm wide housing to reduce panel space
- Flexible jumpering system elminates redundant wiring
- Safe Opration with three-way isolation (2.5kV)
- Maintenance free wiring with CAGE CLAMP S
- Designed for extreme applications, with -25°C to +70°C temperature range

JUMPFLEX Signal Conditioning modules provide signal conversion, isolation, and amplification in a compact, DIN-rail mount package that features the Cage Clamp S spring pressure wiring technology. Additional module are available.

LUMATONE® AND VISUAL/AUDIO ELECTRONIC SIGNALS

Edwards Signaling™

E102A

Non-irritating harmonic tone that demands attention in both quiet and noisy environments. Panel mounts in a 1 5/32″ dia. hole, panel thickness up to 3/16″. Solid-state construction gives a rated life of 5,000 hours. No arcing, sparking or noise. Sound output level can be varied by applied voltage (80dB @ 1ft. with 12VDC).

ADAPTABEL® VIBRATING BELLS

Edwards Signaling™

Easy installation wire attach to base, bell plugs into adaptaplate. Universal adaptable mounting plate mounts directly on surface or fits any single-gang opening or any 3 1/4″, 3 1/2″ or 4″ octagon box or any plaster cover with mounting holes on 2 3/4″ centers. 6″ bells also mount on 4″ square box. 120VAC units are PLC compatible with off-state current less than 25mA. Available in 4″, 6″, 10″ gong size AC., 4″, 6″, 8″ and 10″ gong size DC. Easy installation wires attach to base, bell plugs into adapt plate. Dustproof, shockproof, and corrosion resistant. UL listed, CSA certified.

ADAPTAHORN® VIBRATING HORNS

Edwards Signaling™

- Adjustable Output: 78 to 103dB
- Durable Die Cast Housing
- DC versions in 6, 12, 24, 32 125, 250VDC
- AC versions in 12, 24, 120, 240VAC

Series 870P & 874

Series 876 & 877

Horns provide a low current, high decibel audio signal. Durable die-cast housing for heavy-duty use. All units are PLC compatible and have adjustable output from 78 to 103dB. Face dimensions are approximately 5″ x 5″. **Series 870** semi-flush, panel-mounting installation on 4″ square box, weatherproof when installed with supplied gasket. **Series 874** grille type, adaptable for mounting on signal gang, 3 1/4, 3 1/2 or 4″ octagon or square box. **Series 876** weatherproof grille type comes completely assembled in die-cast. Mounts on conduit flat surface. Top hole drilled and tapped for 3/4″ 14NPT.

CONTINUOUS TONE PANEL MOUNT & LARGE BOARD MOUNT ELECTRONIC ALARMS

RoHS Compliant Available

MALLORY Sonalert® Products

Signals produce an audible tone when voltage from 1 to 250V is applied (depending on model). A piezoelectric transducer, operating substantially at resonance in a solid-state oscillator, converts electrical power to sound. Can be powered by many electrical sources, ranging from single-cell battery to industrial power lines. Because of low power requirements, they can be turned on or off with a transistor, SCR, or integrated circuit. No mechanical wear. Salt spray resistant. Operating temperature: –30°C to +65°C. Some units sound at voltages lower than minimum specified. Continuous tone. The **LSC series** combines a flashing LED with continuous audible signal for quick recognition. Frequencies in table below are ±500Hz except **SC628NDR** ±300Hz.

LSC616N

PANEL MOUNT - CONTINUOUS TONE

Mfg. Part No.	Voltage Range	Current (mA)	Freq.	Min. Volume @ 2ft (dB)	Stock No.	Price Each 1-4

EXPLOSION-SAFE VOICE ANNUNCIATOR - PVW-EXN SERIES

RoHS Compliant Available

PATLITE

- 166mm in height
- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE Compliance according to ATEX 94/9/EC & EMC 2004/108/EC
- Rated Voltage: 12/24 VAC / VDC
- Up to 63 sec. recording time @ 64kbps (ADPCM)
- Adjustable volume from 0dB to 105 dB at 1m
- Protection: IP65
- Indoor (any orientation) or outdoor (upright only)
- 4 pre-recorded messages on EPROM

EXPLOSION-SAFE MULTI SOUND ALARM - EWH-EXN SERIES

RoHS Compliant Available

PATLITE

- Explosion-safe for gas and dust
- 166mm in height
- CE Compliance according to ATEX 94/9/EC
- 32 built-in sounds
- Adjustable volume from 0dB to 105 dB at 1m
- Indoor (any orientation) or outdoor (upright only)
- Suitable for Zone 2 and Zone 22
- Rated Voltage: 24 VDC
- 8 channel in bit mode or 32 channel in binary mode
- IP-65 rated

86MM LED AND XENON STROBE SIGNAL LIGHTS WITH BUZZER

RoHS Compliant Available

MENICS SIGNALTECHNOLOGY

Features
- Ultra bright LED or Xenon lights
- Wide light distribution with prism-cut dome-shaped lens
- Outstanding visibility at distance
- Selectable steady or flashing modes for LED lights
- PCB module style Xenon lamp
- Fast and easy replacement of lamp
- Ip65 rated

Specifications
- **MS86L/LED Steady/Flashing**
- Flash (strobe pulse) rate: 80 time/minute +/- 3%
- Sound level: 85dB max.
- Ambient temperature: -30°C to +40°C
- **MS86S/Xenon stobe**
- Flash (strobe pulse) rate: 60 time/minute +/- 3%
- Ambient temperature: -30°C to +40°C

ADAPTABEACON® FLASHING OR SINGLE SIGNAL INDICATORS

Edwards Signaling

50 and 51 series direct or ½" NPT conduit mounted. Flashing visual signal for indoor use (when used outdoor, base must be mounted below the dome). Features halogen bulb. Available with audible horn that is rated at 85dB @ 10 ft. Flasher is 6"dia. x 6" high.; flasher with horn is 6"dia. x 7⅜" high. UL listed. Strobes for light duty industrial applications. Single flashing strobes are available as strobe only and strobe with audible horn. Units with audible horn are rated at 85dB @ 10 ft. Can be mounted directly on a 4" octagonal box or ½" NPT conduit. For indoor and outdoor use, when used outdoors, units should be mounted vertically with dome up. 120VAC. UL listed and CSA certified.

48XBRM SERIES XTRA-BRITE LED DUAL-MODE INDICATORS

Edwards Signaling

- Voltage rating: 24V DC or 120V AC
- Shatter resistant polycarbonate lens
- Available with gray base
- Len colors: amber, blue, green, red or clear lens
- Option for panel or conduit mounting
- Operating temperature: -31°F to 150°F (-35° to 66°C) operating temperature
- Dual-mode beacons: Steady-On or Flashing LED

The 48XBRM Series XTRA-BRITE™ LED beacons are well suited for areas with high ambient noise levels, especially where ear protection must be worn. These LED beacons are also ideal for high-vibration applications and areas where long lamp life is a must. 48XBRM LED beacons are "dual-mode" devices that ship from the factory in steady-on mode and can be readily transformed by changing the dipswitch setting to 65 FPM "flashing" mode.

125 CLASS BEACONS SIGNALING LIGHTS

Edwards Signaling

- Voltage rating: 24VDC, 120VAC
- Operating temperature: -35°C to 66°C
- Gray or black base
- Flashing or steady-on modes
- Len colors: amber, blue, green, red and white

The **125 Class** beacons can be mounted on ½" or ¾" NPT conduit using a ½" internal or ¾" external conduit hub that comes with the unit. It can also be panel-mounted using the mounting gasket provided with the unit. When panel-mounting the 125 class, the surface and construction details of the panel must be taken into consideration to ensure the integrity of the outdoor, NEMA 4X rating is fully maintained.

MACHINE RATED FOR ADVERSE LOCATION ADAPTABEACON® LIGHTS

Edwards Signaling

Light With Mounting Bracket

Light With Outlet Box Base

Light With Pipe Mount Base

Feature NEMA 4X and marine-rated enclosure when asembled in accordance with installation instructions. Mounting options include pipe mount, outlet box and mounting bracket. Steady-On and Flashing models are available with either a high intensity halogen bulb or a long life LED. Strobes are available with 300,000 peak candela or high intensity 800,000 peak candela output. Order light module and mounting base separately. UL listed for use in Class 1, Division 2, Groups A, B, C, and D, Class 2, Division 2, Groups F and G and Class 3 Hazardous Locations, CSA certified, CE marked. All types and voltages available in red and amber; *go online or call.*

ADAPTABEACON® ROTATING LIGHT

Edwards Signaling

- Weatherproof
- 75 Revolutions Per Minute

Applications include: outdoor security areas - to alert passersby of a change of conditions inside. Noisy areas indoors - to warn or communicate. Direct or ½" NPT conduit mounted. Bayonet socket for easy lamp replacement. Feature long-life halogen bulb. For indoor and outdoor use. Lens must face up when mounted in outdoor application. Dia. 6", height 8.5". UL listed to 120VAC, 60Hz. 240VAC also available.

LED SIGNALIGHT TOWERS — LD6A

CE c UL us RoHS Compliant Available IDEC

Frame Mount | Wall Mount | Direct Mount | Pole Mount | L-Shaped Bracket | Clear Lens

Unique Striped Design Improves Visibility

- The striped design with non-illuminated area between the lenses, along with built-in super bright LEDs, reduce light disturbance to make the illuminated color really stand out.
- Unique oval lens shape enables high-visibility from different directions.
- Five different mounting styles available; frame mount, wall mount, direct mount and pole mount (round or L-shaped bracket). Facilitates mounting in unusual or difficult locations.
- Clear lens models available to clearly distinguish between illuminated and non-illuminated lenses.
- Custom configuration is possible.
- Flashing cycle: 1.75 Hz (approx. 105 flashes per second). Conforms to international standard IEC 60073.
- Ergonomically designed alarm sound (3.3 kHz, 2 different sounds) spreads 360 degrees. Adjustable volume (70 to 90 dB).
- Degree of protection: IP65 Steady units and IP54 Flashing units (using frame, wall, direct and pole mount with round base), IP23 Steady and Flashing units using pole mount with L-shaped bracket.

- Vibration-resistant bulbs, up to 10W, provide 2,000 hours of life
- Vibration and shock damping base
- Bases are available in metal or plastic
- Color-coded wires make assembly and wiring easy
- Heat and shock-resistant polycarbonate lenses

Pole Mount Unit | Pole Unit | Pole/Mounting Base | Lamps | Lens Covers | LEDs

SignaLight™ towers offer 360° of indication illumination for reporting the status of automated machinery. Easy to assemble and disassemble. Available in 120VAC or 24VAC/DC. Build up to five tiers in five different color heat-and shock-resistant polycarbonate lenses (red, green, blue, yellow, and white). Choose from either steady or flashing lights and metallic or plastic bases. Lamp type: T-20; lamp base: BA15D. Prism-cut globe increases signal visibility. Built-in vibration/shock absorber, color-coded wires. Dimensions: each tier = 2.75H x 2.20″W (70 x 56). UL and cUL listed.

To build a complete SignaLight unit, pick: 1) Base unit + 2) Top cap + 3) Lenses + 4) Lamps + 5) Optional Pole unit for pole mounting and optional pole mounting base

1 tier = 6.7″ (170), 2 = 9.4″ (240), 3 = 12.2″ (310), 4 = 14.9″ (380), 5 = 17.7″ (450).

STACKABLE LIGHT TOWERS

RoHS Compliant Available

IDEC

Base Unit w/Caps

5 Stack Lights

Removable LED Lens Modules

Color-Coded Wiring Terminals

- Lead-free design
- IP65 environment protection, NEMA, 4, 4X, 13
- 70mm diameter
- Ultra bright LEDs
- Unique contact design ensures longer life
- Fast and easy assembly
- Optional adjustable audible alarm
- Color-coded wiring terminals
- Ten modular components with 5 lens colors and 5 base units
- LED strobe modules available (pulses 77 times per minute)

Mounting Bracket Dimensions

Base Dimensions

The **LT7** light tower combines LED technology with modular-style assembly. This enables the towers to meet extensive requirements seen in most status-indicating applications. The design uses 6 modular components to make a five color tower, complete with alarm and flashing functions. Using the brightest LEDs in the **LT7** product range provides brilliant illumination for all lens colors. The prism cut design enhances the brightness and ensures outstanding levels of visibility from any direction or distance. Height (mm): 1 light 211, 2 lights 252, 3 lights 293, 4 lights 334, 5 lights 375. Strobe LED lens modules work with 24VAC/DC base units and pulse at 77 times per minute.

EXPLOSION SAFE LED SIGNAL TOWERS - AR70 SERIES

RoHS Compliant Available

PATLITE

- 40mm diameter
- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE Compliance according to ATEX 94/9/EC & EMC 2004/108/EC
- Rated Voltage: 24VDC & 24VAC
- Available with continuous only or flashing and 2-alarm versions
- Protection: IP65 (IP54 with buzzer)
- Wall or direct mount

Explosion-safe signal lights feature an LED light that is versatile and energy-efficient. The vertical and horizontal cut lenses in combination with a double-reflection system enhances the LED light diffusion to create a unique, full and brilliant light. The lenses and main body are made of strong synthetic materials with characteristics to withstand harsh environments. The Signal Light can be ordered in any combination from 1 to 5 LED units with any color combination. In addition to its "continuous lighting" condition, the Signal Light can also be ordered with flashing / non-flashing functions, as well as with two super-loud alarm sounds with an 85dB (at 1m) output.

CONTINUOUS LIGHTING ONLY

EXPLOSION-SAFE ALARM/ MELODY & VOICE HYBRID ANNUNCIATOR - LKEH-EXN SERIES

RoHS Compliant Available

PATLITE

- 40mm diameter
- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE Compliance according to ATEX 94/9/EC & EMC 2004/108/EC
- Rated Voltage: 24VDC
- CE Compliance according to ATEX
- LKEH-FE: 32 built-in sounds; LKEH-FV: Field programmable w/MP3 files with SD card (sold separately)
- Up to 63 sec. @ 64kbps
- Adjustable volume from 0dB to 104 dB
- Protection: IP65
- Wall or FLUSH mount

SOUND SELECTION CHART

32 sounds are pre-recorded in one unit. 4 sound types are available.
8 sounds can be played back by a bit input and 32 sounds by binary input.

Beep	Stutter + Bell	Inverted Revelle	Annie Laurie
Stutter	Synthesized Melody	Galactic Motor	London Bridge
Bell	Chime	Ringing Phone	Mary's Lamb
Yelp	Call Sign	Two Tone	Camptown Races
Rapid Hi Lo	Train Ride	Alarm Clock	Amaryllis

LKEH MP3 COMPATIBLE ANNUNCIATOR LED SIGNAL LIGHTS

RoHS Compliant Available

PATLITE

- 100mm-Diameter
- Field Programmable with SD Card (not included) & MP3 files
- Message capacity is up to 64 seconds (64kbit/s) with 4 channels
- Adjust the volume from 0db (at 1m) to 105db (at 1m) to fit various environments
- Smooth LED Lens Surface to make it more difficult for debris to collect
- LKEH-FE series has 32 pre-recorded sounds with 8 channels in one unit
- LKEH-FV series record up to 64 seconds (64kbit/s) with 4 channels
- CE, RoHS, IP53, (UL, c-UL pending)

LU7 SERIES MODULAR SYSTEM INDICATING LIGHT

RoHS Compliant Available

PATLITE

- Easy to assemble, no tools required
- LED's for longer life
- Size: 70mm diameter
- NPN or PNP open collector compatible
- Meets IP-65

FB type, two selectable single-tone alarms, one intermittent and one continuous, with adjustable volume to 90dB (at 1 m), and light has 60 flashes per minute. Unique contact in each color segment connects with a single twisting motion. Easy, hand-free assembly. Easy power/control wiring with spring-loaded terminal block. Pole mount options available, SZ-50L, SZ-50T. NEMA type 4, 4x, 13.

LME SERIES INDICATING LIGHTS

RoHS Compliant Available

PATLITE

The **LME series** is 60mm in diameter and used a patented LED reflection system which increases the intensity of the light. Available in a continuous version (**LME**) and a continuous with flashing and buzzer (2) (**LME-FB**). The LME signal tower meets IP-65 and **LME-FB** meets IP-54. It comes with a 300mm aluminum pole with a flange type mounting bracket. Mounting brackets available on this page. UL listed. CE certified. Canadian UL listed. Other mounting option available, go online or call. Available in other color combinations.

SIGNALING – STACKLIGHTS

MP/MPS SERIES 30MM LED TOWER

RoHS Compliant Available

PATLITE

Slim LED tower with silver-colored body and a compact design at 30mm (1¼-inch) diameter. Direct mount only: includes M22 mounting nut and sealing gasket. Pre-assembled, pre-wired, interchangeable and stackable after purchase, 1-5 modules can be stacked. Control options include Dry contact closure such as switches or relay contacts, open-collector transistor (NPN or PNP) for DC24V, or direct voltage control. Input voltage 24 V AC/DC, IP65 protection rating. Two body lengths, 400mm (MP) and 220mm (MPS)

LCE SERIES INDICATING LIGHTS

RoHS Compliant Available

PATLITE

LCE series LED signal towers are 40mm in diameter, operate in a continuous light mode. **LCE-FB series** have continuous and flashing lights plus audible alarm. Super-bright LEDs provide an average of 100,000 hours of reliable, maintenance-free operation. Meets IP-65 for **LCE series** and IP-54 for **LCE-FB series.** Includes 300mm chrome-plated steel pole and side mounting bracket. Available in pole mount and direct mount styles. Mounting brackets available *on this page.* Other mounting options available, *go online or call.*

HARMONY® XVC PREASSEMBLED TOWER LIGHTS

RoHS Compliant Available

Schneider Electric

- Available in 40, 60 and 100mm sizes
- IP 54 degree of protection
- Supply voltage: 100-240VAC/DC
- Rated impulse withstand voltage: 4kV
- Light source: LED
- Sound level (continuous or intermittent tone) at 1m: 70..85dB
- Fundamental frequency: 2.23kHz
- Flashing frequency of illuminated units: 1Hz

XVC1M1SK

XVC4M25S

XVC1M3SK

Designed for long-distance indication of the operating states or sequences of a machine with illuminated signalling units or adjustable audible buzzer. **XVC series** tower lights are supplied with 1, 2, 3, 4 or 5 illuminated signalling units, with our without buzzer, preassembled and pre-wired and with a support tube and bracket for mounting on vertical support or 3 screws for direct mounting on a horizontal surface. Available with five lens colors (red, orange, green, blue and clear) and lens colors are always placed in that order from top to botton. The light source consists of super-bright LEDs for optimum luminosity. For 60mm and 100mm tower lights equipped with a buzzer, the type of signal (continuous or intermittent) can be reversed by modifying the cable connections. Include a color coded, pre-wiring harness with a diagram label. Tower lights are preassemble and pre-wired at the factory and cannot be modified because the wires are soldered.

XVB SERIES INDICATING BANKS

Schneider Electric

- Start With **XVBC21** Base
- Choose up to 5 Lens Modules or a Sounder Module
- Order Appropriate Color, Type and Voltage Lamps Seperately

XVBC21

Indicating banks give facility managers instant notification of the status of production machines. XVB series allows maximum user flexibility with simple installation and maintenance. No tools are required to assemble a bank; modules simply twist and click together. Maintenance-free LED lamps have an average life of 100,000 hours. 70mm diameter. Meets IP65, Nema 4X. UL listed, CSA recognized, CE compliant.

XVP SERIES 50mm SLIMLINE INDICATING BANKS

Schneider Electric

- 50mm Slimline Modular Design
- Long-Life Protected LED Lamp with 100,000 Hour Average Life
- NEMA, UL Type 12 and IEG IP65 Compatible

Simple twist-and-click assembly allows OEM, user or distributor to assemble complete stack. Small footprint and sleek high-tech look for applications where aesthetics are important. Ring and base trim available in black or off-white to match application. Mounting options include direct, stand with tulip Base, wall bracket with hood, or tube bracket. Built-in electronic circuitry to protect against spikes, surges, EMI and PLC leakage currents. Available in 6 lens colors and 4 tone sound modules. *Order LED clusters and bulbs separately, go online or call.*

XPS MC SERIES PREVENTA™ CONFIGURABLE SAFTEY CONTROLLERS

RoHS Compliant Available

Schneider Electric

- Simple to use drag and drop software for configuration of XPSMC
- Narrow enclosure reduces panel space and DIN rail space requirements
- Multiple communication networks available
- Cost effective alternative to using safety relays
- Reduces installation and troubleshooting time
- Rated for Category 4, PL "e", and SIL 3

XPSMC safety controllers provide the logic for safety related systems and monitor the various inputs such as emergency stops or safety interlocks, and determine if the machine should be allowed to run or if the machine needs to stop, in accordance to US, European, and international safety standards. The easy use drag and drop software simplified the development of safety related systems.

ES5R SAFETY RELAYS

RoHS Compliant Available

EATON

- UL, cUL certifications and TÜV Rhineland functional safety certifications
- Applicable for EN 60204 stop categories 0 or 1
- Plug-in screw terminals for fast and fault-free replacement
- Multi-voltage versions (24–230 Vac/Vdc) for flexibility
- Delayed and non-delayed contact expansions accommodate a wide variety of applications

Eaton's ESR5 safety relays provide optimal safety and a high degree of reliability on plant machinery. Applications that meet the highest safety requirements in accordance with EN 954-1, EN ISO 13849-1 up to PL e and accordance with IEC 62061 up to SILCL 3 can be realized with the ESR5 safety relay. Compatible with a wide variety of safety devices such as emergency stops, rope pulls, two-hand control stations, light curtain (OSSD), gate enable devices, and safety switches.

SINGLE/DUAL CHANNEL MAIN UNITS

LS-TITAN™ SAFETY INTERLOCK SWITCHES

RoHS Compliant Available

EATON

Features

- Miniature DIN; full-size, solenoid key interlocks providing highest degree of personnel and process protection
- Large selection of actuators
- Miniature DIN models have a five-way adjustable head, while full-size DIN models have four-way adjustable heads
- Safety-rated as interlocking devices per EN 1088, with safety function by positive opening contacts per IEC/EN 60947-5-1
- Door-flap and door-hinge safety switches provide a unique solution when actuators (keys) cannot be used
- IP65 degree of protection

FF5 SERIES MAGNETICALLY ACTUATED NON-CONTACT SAFETY SWITCHES

RoHS Compliant Available

Honeywell Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

Specifications:

- Contact rating: 0.3A at 24VDC
- Auxiliary contact power: 15W
- Operating distance: 6mm ON; 17mm OFF
- Body material: Red ABS resin fill (stainless steel option)

Features:

- Totally contact-less door detection is more flexible and less prone to misalignment
- Protects against misalignment as non-contacting hard guarding solutions have a large actuation window to reduce alignment issues with the switch and magnet actuator
- Ideal for use in many machine-guarding applications
- Switches can be magnetically actuated from almost any angle
- Sealed to IP67 standards

MICRO SWITCH™ SAFETY INTERLOCK SWITCHES GKM SERIES MINIATURE

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Specifications:
- 1NC/1NO and 2NC (Positive break on NC contacts)
- Cable and connector styles (Microchange DC style M12, 4-pin with external threads/male) *on page 1176*
- -25°C to 85°C [-13°F to 185°F]
- IP66; NEMA/UL 1, 12, 13
- IEC 947-5-1, EN60947-5-1

GKMD GKME

Features:
- Designed to detect if key is inserted or removed
- Glass filled polyester body
- Top and front key entry
- Straight and 90° keys sold separately *on this page*
- Miniature footprint: 2.730″ x 1.375″ x 0.630″
- GKME series is the first pre-assembled dual connection safety switch
- GKME integrated cable or connector(s) reduce installation time and cost
- GKME construction allows side by side mounting and daisy-chaining
- GKME small door swing radius allows use down to 160mm (6.3″)
- Ideal for: Multiple door modular machinery, textile, packaging, and wrapping

Mfg. Part No.	Current (A)	Circuitry	Termination	Stock No.	Price Each Each	Price Each 1-

MICRO SWITCH™ SAFETY INTERLOCK SWITCHES GKS SERIES TRAPPED KEY

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features:
- Medium duty-trapped key
- 4 head key positions
- Glass filled polyester body
- Manual over-ride mechanism in case of power failure
- 3 conduits for simplicity of cabling
- Key not included; *order separately below*

Specifications:
- 3NC/1NO (Positive break on NC contacts)
- 100Kg (220lbs) max hold force
- Locking Pricipal: Power to Unlock
- Head orientation: Front
- -25°C to 50°C [-13°F to 122°F]
- IP67; NEMA 1, 4, 12, 13, EN60529
- CCC, IEC 947-5-1, EN60947-5-1

HS6B AND HS6E SERIES SAFETY DOOR INTERLOCKING SWITCHES

RoHS Compliant Available

IDEC

HS6E DOOR INTERLOCK SAFETY WITH SOLENOID LOCKING
- Subminiature body: 15 x 75 x 75 mm
- 500N retention force
- Allows four actuator insertion directions
- Manual unlocking possible on three sides
- Solenoid power LED indicator

HS6B SERIES
- Subminiature body: 15 x 30 x 78 mm
- Two actuator entrance for mounting flexibility
- Complies with ISO14119 and EN 1088
- IP67 degree of protection

HS7A-DMC SERIES NON-CONTACT INTERLOCK SWITCHES

RoHS Compliant Available

IDEC

- Voltage rating: 24V DC
- Current rating: 100mA
- Operating temperature: -25°C to 85°C
- Compact size (7 × 16 × 51mm)
- Positioning for installation is easy
- Up to 36 sets can be connected. (safety relay module: HR1S-DME)
- Combination with proprietary relay modules achieves safety category 4 (EN954-1)
- Degree of protection: IP67

HS7A-DMP SERIES NON-CONTACT INTERLOCK SWITCHES

RoHS Compliant Available

IDEC

- Voltage rating: 24V DC
- Current rating: 100mA
- Operating temperature: -25°C to 85°C
- Operation signals from auxiliary contacts can be read directly by controllers such as PLCs, allowing for monitoring HS7A-DMP non-contact interlock switches.
- Ideal for installation on guard doors where positioning is difficult.
- Conformable up to safety category 4 (EN954-1) (Combining with proprietary safety relay module achieves safety category 4.)
- A maximum of 36 sets can be connected (safety relay module: HR1S-DME)
- Degree of protection: IP67

D4SL SERIES SAFETY INTERLOCK SWITCHES

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Features

- Two types are available: a connector type that reduces wiring time and a detachable terminal block type
- Robust and durable metal head
- Key holding force of 1,300 N
- The wider key slot is less susceptible to movement from doors, and can handle doors with a small radius
- By rotating the mounting part, it is possible, both to change the key insertion point and to enable mounting on various devices
- Easy view LED indicators can be checked from any direction
- By utilizing the 6-contact type, both the door open/closed status and the solenoid ON/OFF status can be monitored independently
- A cost-effective 5-contact model is also available

Connector Type / Terminal Block Type

GENERAL-PURPOSE SAFETY LIMIT SWITCHES

OMRON AUTOMATION & SAFETY

- Miniature Safety Limit Switch

Compact, economical, plastic-body switch features direct-opening action mechanism that forcibly opens contacts to assure accurate switching. 1 set of DPDT contacts: NC for safety circuit and NO for control circuit. Meets NEMA enclosure types 3,4,6P and IEC enclosure IP65(EN60529 and EN50047) classification. 4-position turret head for flexibility to fit special applications. Rated load: 10A, 125/250VAC. For ½-14NPT conduit. Operating temperature: -30°C to +70°C. UL listed, CSA certified, CE compliant, TÜV approved.

PREVENTA XCSLE AND XCSLF SOLENOID LOCKING SAFETY INTERLOCK SWITCHES

Schneider Electric

- Metallic and plastic housing
- User rotatable head
- Up to 6 contacts (up to 3 safety contacts + up to 3 electromagnet contacts) – all positive opening
- Better resistance to forcible opening of actuating key 314.7 lbs (1400N) plastic range, and 674.4 lbs (3000N) for metallic range
- Cage clamps for easy and quick wiring
- Conduit entries ½" NPT and M20 x 1.5
- 3 conduit openings
- Mini connectors available
- Voltages available: 24 Vac/dc, 120 Vac or 230 Vdc
- Rear emergency release – allows opening of door or interlock to escape from inside machinery or work cells
- Uses same actuating keys as our other XCS metal body safety interlocks
- All wiring enters switch through one conduit opening
- 2 LEDs standard

XCS SAFETY INTERLOCK SWITCH AND KEYS

RoHS Compliant Available

Schneider Electric

XCSPA593 XCSZ11 XCSZ12 XCSZ13

Features
- Multiple actuator types to fit a wide variety of application requirements
- Metal enclosures for rugged and demanding applications
- Small enclosure styles for mounting in tight spaces
- Locking devices keep personnel out of machine when hazards are present
- Multiple actuating keys and shaft or lever operators provide multiple solutions for guarding applications

Specifications
- Metal and plastic body
- Storage temperature: -40 to +158 °F (-40 to +70°C)
- Operating temperature: -13 to +158 °F (-25 to +70 °C)
- Vibration resistance: 5 gn - 10 to 50 Hz
- Enclosure rating: IP67

NON CONTACT SAFETY INTERLOCK SWITCHES XCSDM SERIES

RoHS Compliant Available

Schneider Electric

Features

- Non-Contact Safety interlock switches do not require contact between the switch and actuating key for operation, making them ideal for use where there are guard alignment or vibration issues. They are also suitable for wet and wash down areas.
- Designed for use in wet and washdown areas, making them ideal for food and beverage applications
- Small size allows installation in tight spaces or where there are issues with mounting standard safety interlocks
- XCSDM4 and XCSDM4 devices are SIL rated for use in safety related systems without the need for a safety relay or safety controller, eliminating panel space, reducing wiring, and reducing installation time and cost.
- Multiple approach directions of the actuating key provides greater flexibility for mounting switches, making potentially difficult solutions much simpler to solve
- Small size and flexibility in mounting allows placement of the switch and actuating key in a manner to minimize damage or tampering.

Non-Contact

Specifications

- Storage temperature: -40 to + 185 ° F (-40 to + 85 °C)
- Operating temperature: -13 to + 158 ° F (-25 to + 70 °C)
- Vibration resistance: 10 gn - 10 to 500 Hz
- Electrical shock resistance: 30 gn, duration 11 ms
- Connection method: cable
- Housing material: PBT
- Cable material: PVC
- Enclosure ratings: IP 66, IP 67

MICRO SWITCH™ CPS SERIES CABLE PULL SAFETY SWITCHES

RoHS Compliant Available

Honeywell

Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

Features:

- Rugged zinc die-cast housing
- Longest span available from single device
- Can detect both cable pulled and broken/slack
- Large terminal cavity can be used to marshal cable
- High visibility lamp versions assist operations in locating tripped switch

1CPS

2CPS

Specifications:

- Normally closed contacts direct opening
- 1/2" NPT conduit termination
- Agency approvals EN60947-1, EN-60947-5-1, EN-60947-5-5
- Operating temperature: -25°C to +85°C [-13°F to 185°F]

(77679)

XY2 SERIES CABLE PULL SWITCHES

RoHS Compliant Available

Schneider Electric

Features

- Emergency cable pull versions provide for contact latching requiring the reset button to be pressed to resume operation
- Momentary operation uses snap acting contacts and do not latch, allowing operation to resume when cable is released
- Cable pull switches are ideal around conveyors where the cable can be pulled anywhere along the length of the cable
- More economical over a long distance than installing multiple individual emergency stop buttons
- Tension required can be adjusted to the requirements of the application

XY2CE

XY2CH

Specifications

- Storage Temperature: -40°C to + 70°C
- Operating Temperature: -25°C to + 70°C
- Vibration Resistance: 10G, F = 10 to 300 Hz
- Shock Resistance: 50G, Duration 11 ms
- Housing Material: Housing: Zamak
- Cover: Steel
- Enclosure Rating: 1, 4, 12, IP65 (IP667 with booted reset button)

Cable Pull Switches are used for emergency stops or for momentary stops at any point along the cable. XY2CE devices have a range of 230 feet, XY2CH switches have a range of 98 feet. The taut cable principle provides for contacts to open when the cable is pulled or if the cable is loose or broken.

BVX-200 FUME EXTRACTION SYSTEM

RoHS Compliant Available

METCAL

BVX-200 series compact, portable two-arm fume extraction system combines strong fan performance with efficient filtration and quiet, flexible operation. It is compact enough to go under a workbench, but still provide multi-user power in a truly portable system. Easily transported by one person without the strain induced by a larger unit. Features an innovative one-stage impeller design that provides more than double the total free-blowing airflow. Maximum free-blowing airflow is rated @ 250m^3/h, with maximum suction force @ 850Pa. The stand-alone unit does not require a separate compressor or external ducting; it only needs to be plugged into a power source to be ready to use.

BVX-201-KIT

Mfg. part no. BVX-201 fume extraction system is designed mainly for solder fumes and incorporates both pre- and main filters which can be changed independently to maximize the working life of each filter and lower the total cost of ownership. The main filter has a HEPA efficiency of 99.97% at 0.3 micron, plus an activated carbon filter to remove additional gases. For applications that require a high-capacity of gas filtration, such as cleaning with solvents or conformal coatings, **mfg. part no. BVX-203** fume extraction system features a deep-bed gas filter. **Mfg. part no. BVX-201KIT** fume extraction system kit includes filter unit, pre-HEPA-gas, with two flexible arms (1.2m long). *Order replacement accessories separately below.*

Mfg. Part No.	Description	Stock No.	Price Each
BVX-201	Two-Arm Fume Extraction Filter Unit, Pre-HEPA-Gas	97H5992	665.00
BVX-201-KIT	Two Arm Fume Extraction System Kit, Pre-HEPA-Gas	29M6877	806.00
BVX-201-KIT1	Two Arm Fume Extraction System Kit, Pre-HEPA-Gas	51R0322	965.00

(79281)

FUME EXTRACTION SYSTEMS MFX-2200 SERIES

RoHS Compliant Available

METCAL

Pre / HEPA / Gas filtration models feature:
- Excellent air flow performance
- HEPA filter rating of 99.97% at 0.3 micron
- Dust filter seal keeps filter housing clean

Pre / Gas filtration models feature:
- High capacity gas filter cartridge ensures a long dwell-time of the gases inside the filter media
- Provides air flow for two exhaust cabinets

All models feature:
- Large, pleated pre-filter
- Casters as standard
- Minimum operating noise

The multi-user Fume Extraction models Pre / HEPA / Gas filtration provide the ultimate performance in a compact size that easily fits under most workbenches. It is ideal for removing solder fumes and filtering laser fumes. Models with Pre / Gas filtration are designed for the removal of gases and vapors from a range of heavy duty bench-top applications, including solvent cleaning, gluing/bonding and conformal coatings. Product is comprised of 1- filter unit with filters installed, 1 - power cord (110VAC or 230VAC) and user guide.

BENCHTOP SOLDER FUME AND SMOKE ABSORBER

Weller®

- Fan air flow rate: 87-107cfm
- Replaceable carbon-activated filter system
- Stand adjusts to varying angles
- Quiet fan operation, 45-50dB
- ESD safe housing
- Convenient carry handle
- 62" Power cord with 3-wire plug

Ideal for removing flux fumes from soldering workbench. Great for workspaces using more active fluxes being used with lead-free solder. Fumes are absorbed by a replaceable carbon-activated filter. Electric fan motor rated 120VAC, 20W, 50/60Hz, 61.47322 BTU/Hr. Includes one replacement filter, users guide and one year manufacturer's warranty. **Mfg. part no. WAS350F** replacement filters can be ordered separately; *go online or call.*

ZERO-SMOG® VOLUME FUME EXTRACTION SYSTEMS

RoHS Compliant Available

Weller®

- Purifies air at up to eight workstations
- Large built-in pre-filter
- The adjustable pressure control guarantees optimal air flow regulation for each workstation – independent of the number of connected workstations
- Electronic filter control and easy filter exchange
- Four wheels to allow easy movement of the unit
- Noise-dampened metal housing

Suitable to use as a small central system in applications such as soldering, adhesives, clean-room work, and laser work. It is also capable for connection to small, selective reflow and soldering ovens. The large integrated pre-filter makes it suitable for lead-free soldering as it is able to catch a large quantity of particles. The **WFE 8S** can be connected so that it exhausts air. This is an advantage in applications where re-circulation is not allowed. Includes WFE 8S fume extraction unit with built-in pre-filter and compact filter consisting of HEPA filter H13 and wide band gas filter (50% active carbon, 50% Puratex).

FUME EXTRACTION • SOLDERING STATIONS

ZERO-SMOG® VOLUME FUME EXTRACTION SYSTEMS

RoHS Compliant Available

Weller®

- Purifies air at up to eight workstations
- The adjustable pressure control guarantees optimal air flow regulation for each workstation independent of the number of connected workstations
- Electronic filter control and easy filter exchange
- Four wheels to allow easy movement of the unit
- Remote control with alarm function
- Noise-dampened metal housing

WFE 4S has a low noise emission level and is small and convenient to locate within the work area. To increase filter lifetime and save on energy, the **WFE 4S** is fitted with an automatic airflow speed control – depending on the number of connected workstations. To extend the capacity an external pre-filter can be fixed directly to the **WFE 4S**. The powerful maintenance-free variable speed turbine is electronically controlled. It has 3 operating modes: Standard speed control – selected by the user irrespective of the load on the system; Speed limiting control – the pump speed is automatically varied to match the load on the system; Economy control – the rate of fume absorption is maintained at a constant value. The operating hours and the filter condition are recorded for maintenance purposes.

WFE2ESKIT1

WFE2SKIT1

WFE2XKIT1S

WFE2XKIT1

- Purifies air at lead-free workbench for up to two operators
- Portable — conveniently transported for simple set-up or relocation
- 99.5% filtration efficiency — uses F5-Grade fine dust and H12-Grade HEPA filters
- Powerful turbine vacuum for fast, effective removal of air-born pollutants
- Quiet operation — less than 55dBA
- Easy filter exchange and electronic filter control (optional on **WFE2ES**)

Zero-Smog® portable volume extraction systems provides a comfortable, clean and safe working environment by capturing particles and pollutants produced during the soldering process. Ideal for use in applications such as hot air soldering, soldering machines, robots, solder baths, laser processing, adhesive dispensing, clean room applications (on request), microscope workstations and other fume emitting processes. Wide range of accessories, *ordered separately below*, provides users with a high-degree of operational flexibility. Extraction systems include Zero-Smog® mobile fume extraction unit with spare filter set consisting of fine dust pre-filter (except **WFE2X**) HEPA filter with wide band gas filter. Kits include the same contents as extraction systems plus funnel nozzle extraction arm accessory kits (contents listed below).

PCT-100 FOCUSED CONVECTION PREHEATER SYSTEM

RoHS Compliant Available

METCAL

CE TÜV Rheinland

- Accelerates and enhances rework process including lead-free, SMT and thru-hole
- Temperature ramps up quickly, maximizing productivity
- Adjustable temperature control up to 300°C
- Controlled cool-down eliminates thermal shock to PCB and components
- Automatically shut-off for added safety
- ESD safe
- TUV approved, CE compliant

PCT-100 focused convection preheater targets heat for improved speed and efficiency needed in high thermal demand applications. The hot convection air heats a PCB for better soldering, improved process control and increased productivity. Ideal for thick boards and smaller boards, such as cell phone and PDAs. Easy-to-use, just plug in, turn on, adjust the heat and it's ready to deliver hot air where needed. Small boards can be reworked directly on the preheater or use with free-standing PCB holder for larger size boards. The complete system includes choice of 115V or 230V convection preheater, a free-standing PC board holder and adjustable angle arm rest. All system components can also be *ordered separately below.*

Mfg. Part No.	Description	Stock No.	Price Each
● PCT-101-11	Focused Convection Preheater System — 115VAC	**51M8590**	420.00
● PCT-101-21	Focused Convection Preheater System — 230VAC	**51M8588**	420.00

● PCT-103-21	Focused Convection Preheater System — 230VAC	**73M3920**	510.00

PREHEATERS AND ACCESSORIES

Accessories add to ease-of-use. Free-standing board holder holds PCBs from 2.5" to 12" wide. Adjustable angle arm rest stabilizes hand and arm to help prevent operator fatigue.

● PCT-100-11	115V Focused Convection Preheater Only	**51M4853**	369.00
● BH-100	Free-Standing PC Board Holder	**88M2814**	319.00

(113241)

PS-900 SERIES PRODUCTION SOLDERING SYSTEM

RoHS Compliant Available

METCAL

- Compact benchtop system offers exceptional performance and superior control
- High power to deliver lead-free soldering at 600°F
- SmartHeat® temperature control
- Ergonomic, lightweight soldering handpiece
- Rugged, cast aluminum power supply housing
- Auto-Sleep workstand reduces tip oxidation
- Soldering tips are easily removed and replaced

PS-900 production soldering system packs power and provides exceptional thermal control in a compact power supply that fits on or under the bench. Suitable for lead-free soldering processes, multilayer boards and thermally demanding components. Features a variable power/fixed temperature control with no thermal over shoot. SmartHeat technology enables soldering at lower temperatures and requires no calibration.The complete **PS-900** soldering system includes 100 to 240VAC, 90W power supply with power cord, soldering iron handpiece with cord and coil assembly, Auto-Sleep workstand with sponge and brass pad, cartridge removal pad and user's guide. *Order accessories and* **SFV series** *power heater soldering tips separately below.*

SFV SERIES POWER HEATER SOLDERING TIPS FOR PS-900 SYSTEM

SFV series replaceable soldering tips are quick and easy to change. The power heater is built into the tip, delivering heat quickly and precisely. Thermally-optimized large diameter tips include additional iron plating for longer life. Ideal for use with **mfg. part no. PS-900** production soldering system; *ordered separately above.* For easy identification of soldering tips used for lead-free processes, *order* **mfg. part no. AC-CK1** *lead-free ID soldering tip rings separately above.* These green-colored ID rings slip easily onto tip.

HCT2 SERIES DIGITAL HOT-AIR PENCIL

RoHS Compliant Available

METCAL

NEW

- 120 watt ceramic heater and dual stage air pump
- Digital airflow and temperature controls
- Fast response and performance
- Standby mode
- Universal power supply
- Ergonomic and lightweight hand-piece
- Nozzles
- Easily change heaters and nozzles

HCT2-120 Hot Air Pencil is the latest addition to Metcal's offering of convection rework tools. This digital handheld convection tool is ideally suited for applications, which use smaller components and integrated circuits. As component miniaturization continues, the ergonomics of a pencil allow a user more freedom to access and rework components on the board without affecting adjacent parts. Digital Hot Air Pencil includes: power system with hand-piece and heater, pack of 6 nozzles, workstand with nozzle plate holder and a nozzle removal pad.

Mfg Part No.	Description	Stock No.	Price Each
HCT2-120	Power System with Hand-Piece and Heater	18X2331	499.00

HCT-900 HAND-HELD CONVECTION HOT-AIR TOOL

RoHS Compliant Available

METCAL

CE TÜV Rheinland

- Low-noise, diaphragm air pump (less than 45db) provides quiet operation
- Air flow: 6-25 l/min
- Control temperature: 100°C -500°C (212°F -932°F)
- Fully ESD compliant
- CE complaint, TUV approved

Mfg. part no. HCT-900-11 hot air tool offers a low-cost, versatile rework solution for a wide variety of soldering and desoldering applications. It has a compact, robust design comprising of analog controls for both airflow and heat. A closed loop feedback circuit controls the temperature allowing the desired temperature to be achieved and maintained regardless of changes in the volume of airflow. Used for the removal and replacement of electronic components, including lead-free, from 0201 up to 304 pin QFP. It is also effective at reworking pin in-hole devices such as sockets and connectors. And, using it with solder braid and flux is a fast and efficient way to remove solder shorts and splashes. It can also be used in plastic applications such as applying shrink wrap to components or the formation of plastic rivets. "Power off" cool down function retains airflow through the hand piece while the unit powers down, providing efficient heater cooling and reducing thermal stress. Hot air tool is supplied with **mfg. part no. H-D50** standard single-jet nozzle (0.2", 5.0mm). For specific applications, select from a wide selection of nozzles and two rework nozzle kits; *order separately below.*

MFR-1300 SERIES DESOLDERING AND REWORK SYSTEMS

RoHS Compliant Available

METCAL

CE

- Dual switchable output
- Powered by Smartheat® Technology
- Self-contained powerful pump
- 2-in-1 ergonomic and flexible handpiece: pencil or pistol
- Collection chamber with 40% increased capacity
- Innovative collection chamber for quick and easy change
- Compatible with previous MFR series desolder range

MFR-1351

MFR-1300 series desoldering and rework systems are the next generation of stand-alone desoldering equipment from OK International. **Mfg. part no. MFR-PS1300** dual switchable output power supply features an internal pump providing 0.7 bar of vacuum suction force combined with Smartheat® technology that makes through-hole desoldering easy and keeps products safe from board damage. **Mfg part no. MFR-H5-DS** desoldering handpiece has been designed to be used in two configurations — as a pencil or as a pistol by simply adding a clip-on grip supplied with the handpiece. Solder collection capabilities have been increased by 40% compared to the previous **mfg. part no. MFR-HDS** desoldering handpiece and the innovative replaceable collection chamber enables reduced downtime and quicker changeover. Ambient operating temperature: 10°C to 40°C (50°C to 104°F). Enclosure temperature: 55°C (131°F) max. Input line voltage: 100-240VAC. Input line frequency: 50/60Hz. Power supply consumption: 110W max. Output power: 60W max. Output frequency: 450Khz. Power supply dimensions (approx.): 7"W x 8"D x 6"H (170mm x 200mm x 152.5mm). CE compliant, cTUVus approved.

SELECT FROM TWO DESOLDERING AND REWORK SYSTEMS

Mfg. part no. MFR-1350 desoldering system includes one **mfg. part no. MFR-PS1300** power supply with internal pump, one **mfg. part no. MFR-H5-DS** desoldering handpiece with selectable grip and one **mfg. part no. MFR-WSDSU** universal workstand for desoldering handpiece. **Mfg. part no. MFR-1351** desoldering/soldering system comes complete with all the same components as the **mfg. part. MFR-1350** system plus one **mfg. part no. MFR-H1-SC** soldering handpiece and one **mfg. part no. MFR-WS1** universal workstand for soldering handpiece. *Order replacement components and accessories separately below. Order* **DFP series** desoldering tip cartridges separately online or call; *order* **SFP series** soldering and **RFP series** rework tip cartridges separately *on page 1999.*

SOLDERING STATIONS

MFR-1100 SERIES SINGLE-OUTPUT SOLDERING AND REWORK SYSTEMS

RoHS Compliant Available

METCAL

MFR-1110

MFR-1100 Series Handpieces Tweezers, SSC Soldering Cartridge, ST Soldering Tip, SC Soldering Cartridge

Configurable System Provides Versatility with SmartHeat® Power and Control

- SmartHeat® Technology provides exceptional power for high thermal demand applications
- High-power output at a fixed temperature provides high throughput with excellent yields
- Four handpieces available for increased application solutions for soldering and rework on one system
- Each handpiece has a comprehensive range of soldering cartridges or tips for maximum flexibility
- Handpieces are ergonomic for operator safety and comfort
- Input line voltage: 100- 240VAC
- Input line frequency: 50/60Hz grounded circuit
- Power consumption: 65W max.
- Output power: 60W max. at 22°C
- Output frequency: 450KHz
- Ambient operating temperature: 10° to 40°C (50° to 104°F)
- Maximum enclosure temperature: 55°C (131°F)

MFR-1100 series single-output soldering and rework systems provide high-power solutions for production soldering, touch-up soldering and SMD rework. Features a choice of three handpieces to support today's PCB and component technologies, providing maximum application solutions and increased productivity. These tools incorporates Smart-Heat® Technology that dynamically responds to the load, delivers highly responsive and controlled heating, while protecting sensitive components and substrates from damage. These high-powered systems can perform lead-free soldering, as low as 600°F, resulting in longer tip life.

SELECT FROM FIVE SYSTEM CONFIGURATIONS

Mfg. part no. MFR-1110 system includes one **mfg. part no. MFR-PS1100** power supply unit, one **mfg. part no. MFR-H1-SC** soldering cartridge handpiece and one **mfg. part no. WS1** auto-sleep workstand with sponge and lead-free brass pad. *Order* **SxP series** *standard soldering tip cartridges and* **RxP series** *rework tip cartridges separately on page 1999.*

Mfg. Part No.	Description	Stock No.	Price Each
● MFR-1110	Single-Output Soldering & Rework System with Soldering Cartridge Handpiece and Workstand	47P0232	368.00

Mfg. part no. MFR-1120 system includes one **mfg. part no. MFR-PS1100** power supply unit, one **mfg. part no. MFR-H2-ST** production soldering tip handpiece and one **mfg. part no. WS1** auto-sleep workstand with sponge and lead-free brass pad. *Order* **SxV series** *production soldering tips separately on pages 1999-2000.*

● MFR-1120	Single-Output Soldering & Rework System with Soldering Tip Handpiece and Workstand	45P6317	352.00

Mfg. part no. MFR-1140 system includes **mfg. part no. MFR-PS1100** power supply unit, one **mfg. part no. MFR-H4-TW** precision tweezers cartridge handpiece, for SMD removal of 0201 resistors to 28mm long SOIC, and **mfg. part no. MFR-WSPT** tweezers workstand with sponge and lead-free brass pad. *Order* **TxP series** *precision tweezer cartridges separately on [85799].*

● MFR-1140	Single-Output Soldering & Rework System with Tweezers Cartridge Handpiece and Workstand	46P4043	476.00

Mfg. part no. MFR-1150 is a complete shop air desoldering system, **mfg. part no. MFR-UK5** upgrade kit can turn existing MFR-1100 or MFR-2200 series systems into a state-of-the-art desoldering system. The built in venturi provides 25 inHg (inch of mercury), which substantially increases desolder capability. *Order* **DxP series** *precision desoldering cartridges separately online or call.*

● MFR-1150	Single Output Desolder System with External Air (Venturi Box)	41T5441	599.00

Mfg. part no. MFR-1160 system includes one **mfg. part no. MFR-PS1100** power supply unit, one **mfg. part no. MFR-H6-SSC** soldering cartridge handpiece and one **mfg. part no. WS1** auto-sleep workstand with sponge and lead-free brass pad. *Order* **SSC series** *soldering tip cartridges separately; go online or call.* **NOTE:** Factory recommended replacement for the Metcal SP200 soldering station system.

● MFR-1160	Single-Output Soldering & Rework System with Soldering Cartridge Handpiece and Workstand	26R1719	340.00

Mfg. part no. MFR-1161 system includes one **mfg. part no. MFR-PS1100** power supply unit, one **mfg. part no. MFR-H1-SC** soldering cartridge handpiece, one **mfg. part no. MFR-H6-SSC** soldering cartridge handpiece and two **mfg. part no. WS1** auto-sleep workstands with sponge and lead-free brass pad. *For* **mfg. part no. MFR-H1-SC** *handpiece order* **SxP series** *standard soldering tip cartridges and* **RxP series** *rework tip cartridges separately on page 1999.* For **mfg. part no. MFR-H6-SSC** *handpiece order* **SSC series** *soldering tip cartridges separately.* **NOTE:** Factory recommended replacement for the Metcal SP200 soldering station system.

MX-5211 Soldering and Rework System

MX-5241 Precision Tweezers, Soldering and Rework System

MX-5250 Plated-Through-Hole Component Desoldering System

MX-5251 Soldering, Desoldering and Rework System

Power...Precision...Performance

- More power — recovery time increases production rates and throughput
- Improved precision — Metcal's Advanced™ and UltraFine™ handpieces ergonomically designed to decrease user fatigue and enhance dexterity
- Greater process control — SmartHeat® technology enables soldering and rework at safe, controlled temperatures
- Input line voltage: 100 - 240VAC, grounded circuit
- Input line frequency: 50/60Hz
- Power consumption: 125W max.
- Output power: 80W max. per channel at 22°C ambient temperature
- Output frequency: 13.56 MHz
- Ambient operating temperature: 10° to 40°C (50° to 104°F)
- Maximum enclosure temperature: 55°C (131°F)
- TUV approved, CE compliant

MX-5200 series soldering and rework system is composed of five configurations, each featuring different handpieces to fit specific application needs. The handpiece choices include **MX-H1-AV** Advanced™ soldering and rework handpiece, **MX-H2-UF** Metcal UltraFine™ soldering handpiece for micro-soldering applications, **MX-PTZ** precision tweezers handpiece for SMD rework, and **MX-DS1** through-hole desoldering handpiece. These high-powered systems can perform lead-free soldering, as low as 600°F, resulting in longer tip life. At the core of the system is a microprocessor-controlled power supply that provides more power, the highest level of precision and advanced user features for greater process control. This power supply has a built-in power indication meter with digital display and bar graph that dynamically provides the operator with feedback on the status of the soldering operation. It has four mode indications: "Ready", "Power", "Sleep" and "Powersave" to program the power to the handpiece. The system also features the TipSaver™ workstand with auto-sleep function. When the user places the handpiece in the workstand, power is automatically reduced saving energy and substantially increasing tip life.

SELECT THE SYSTEM THAT MEETS YOUR APPLICATION NEEDS...

All **MX-5200 series** systems include: 100 to 240VAC power supply with dual switch port and LCD display, appropriate handpieces and workstands (indicated in table below), power cord, cartridge removal pad, brass tip cleaning pad, and user guide. *Order tip cartridges separately.*

Mfg. part no. MX-5210 soldering and rework system offers users the ergonomic Metcal Advanced™ handpiece for soldering and rework. This system is highly effective for soldering applications including: lead-free, high mass components or boards, thermally sensitive components requiring low operating temperature, high volume production soldering and touch-up soldering operations. For these types of applications, *order the* **STTC series** soldering tip *cartridges separately online or call.* In addition, this system can be used for conduction rework of SMDs when using **SMTC series** soldering tip cartridges; *ordered separately.*

MFR-2210 AND MFR-2211 DUAL-OUTPUT SOLDERING AND REWORK SYSTEMS (CONT.)

MFR-2200 series soldering and rework systems provide a high power, flexible solution for production soldering, touch-up soldering and SMD rework. Features dual output capability which allows the user to select operation of one handpiece or two handpieces simultaneously. One or two handpiece operation is easily chosen via a front panel three-position switch. It dual-output power unit contains two separate power supplies providing full power for each handpiece that is in use. These high-powered systems can perform lead-free soldering, as low as 600°F, resulting in longer tip life.

Dual-output systems **mfg. part no. MFR-2210** includes one each and **MFR-2211** includes two each of the following components: **mfg. part no. MFR-H1-SC2** soldering cartridge handpiece and **mfg. part no. WS1** auto-sleep workstand with sponge and lead-free brass pad. This handpiece uses small diameter **SFP series** standard soldering tip cartridges for easy access and **RFP series** rework tip cartridges for SMD components; *ordered separately below.*

For increased flexibility two other handpieces, *ordered separately below*, can be used with these systems: **mfg. part no. MFR-H2-ST** soldering tip handpiece for high-power production soldering environments and **mfg. part no. MFR-H4-TW** precision tweezers handpiece for rework of SMD components. A wide assortment of **SFV series** soldering tips and **TFP series** tweezer tip cartridges are available; order separately online or call.

SFP SERIES STANDARD SOLDERING TIP CARTRIDGES

SFP series replaceable standard soldering tip cartridges, for use with **mfg. part no. MFR-H1-SC2** handpiece, have been designed to deliver outstanding performance for the majority of point-to-point soldering and basic rework applications. The geometries within the range have been optimized to deliver maximum accessibility combined with optimal thermal efficiency within a narrow cartridge diameter. For easy identification of soldering tips used for lead-free processes, *order* **mfg. part no. AC-CK1** *lead-free ID soldering tip rings separately above.* These green-colored ID rings slip easily onto tip.

MRS-1000A SERIES MODULAR REWORK SYSTEM

RoHS Compliant Available

METCAL

Convection Rework System

- Digital display for repeatable temperature settings and profile control
- Automatic control of the preheater for simple operation
- Easy profile creation for operator repeatability
- Integrated vacuum pickup for easy component removal
- Hand held or tool holder mounted for operator comfort
- Manual mode for quick setup
- External thermocouple for process setup and verification
- Digital controlled airflow for repeatable results
- X, Y, Z and Theta controls for component alignment
- Adjustable PCB holder for easy change outs
- Automatic vacuum lift off at the end of the cycle
- Password lockout of programmed profiles

MRS-1000A

Mfg. part no. MRS-1100A is comprised of a hand held convection tool **HCT-1000**, preheater **PCT-1000**, adjustable tool holder **ATH-1100A**, and free-standing board holder **BH-2000** to create a manually assisted rework system. A series of nozzles, targeting a variety of applications, and optional light Magnifier **LM-1000A** round out the product offering for this system; *ordered separately below.*

With standard features such as programmability, a digital display, program storage of up to 50 profiles, this system is not only versatile, but also easy and efficient to work with. A choice of board holders and accessories are available that make the system capable of handling multiple sizes of PCBs.

Mfg. part no. MRS-1100A allows you the choice of using either the embedded profiling capability that can be

● HN-J0005	Discrete	5mm Diameter	**52R7685**	162.18

PCT-1000 PROGRAMMABLE PREHEATER AND ACCESSORIES

Mfg. part no. PCT-1000 programmable preheater is included in both **MRS-1100A series** modular rework systems; *ordered separately above.* The **PCT-1000** preheater is ideal for aiding high-thermal demand applications including lead-free, multi-layer boards and large ground planes. It can be used in a variety of processes including soldering, desoldering, and SMD rework operations. Equipped with a highly-advanced convection heating system that creates a vortex effect to efficiently direct and concentrate heat. Easy-to-use with LCD display and clearly marked controls. Its step-by-step programming makes creating and storing up to 50 user defined profiles simple. Power rating: 1200W. Input voltage: 100-240VAC. Temperature: up to 622°F. Air flow: 19cfm. Size: 13L x 8W x 3"H. The **PCT-1000** preheater includes **PCT-FS1** foot switch. To easily position PCBs up to 12x12" or above over the **PCT-1000** preheater, *order* **mfg. part no. BH-1000** *post-rail PCB holder system or* **mfg. part no. BH-PK1000** *board holder pin kit separately below.*

Mfg. Part No.	Description	Stock No.	Price Each
● PCT-1000	Programmable Preheater	**08N1977**	1350.00
● PCT-FS1	Foot Switch — for use with PCT-1000	**46P6974**	37.84
● BH-2000	Free-Standing Board Holder	**90T4142**	539.00
● BH-PK1000	PCB Holder Pin Kit	**46P7489**	27.03

LM-1000 LIGHT MAGNIFIER AND ACCESSORIES

Mfg. part no. LM-1000A light magnifier is sold separately. It features a 4x magnification lens, an integrated 8 LED lighting system for shadow-free illumination and includes **LM-PS** 24V plug-in power supply. **Mfg. part no. LM-1000A** includes light and base plate assembly. **Mfg. part no. LM-1000A** light magnifier with base plate **LM-PS** 24V plug-in power supply - for use with **LM-1000.**

Mfg. Part No.	Description	Stock No.	Price Each
● LM-1000	Light Magnifier	**47R5000**	307.40
● LM-PS	24V Plug-In Power Supply — for use with LM-1000	**52R7688**	85.86

MX-500 SERIES SMARTHEAT® SOLDERING & REWORK SYSTEMS

RoHS Compliant Available

METCAL

- Integrated power indication meter
- User programmable powersave mode
- Ground fault interrupt
- Universal power supply work on 50hz or 60hz
- Compatibility with all MX products
- Greater process control with SmartHeat® technology
- Reduced space requirements

The system utilizes SmartHeat® Technology, wherein each cartridge is equipped with a self-regulating heater which 'senses' its own temperature and closely maintains its pre-set idle temperature for the life of the heater-tip. MX-500 retains switchable dual port, 40W operation while introducing numerous new features in a new housing.

MX-500S

Mfg. part no. MX-500S Soldering / Rework System includes power supply, MX-RM3E soldering and rework hand-piece and WS1 sleeper workstand.

Mfg. Part No.	Stock No.	Price Each
MX-500S	23X5007	535.00

Mfg. part no. MX-500SPT Rework System includes power supply, MX-PTZ precision tweezer hand-piece with MX-W4PT TipSaver workstand and MX-RM3E soldering and rework hand-piece and WS1 sleeper workstand.

MX-500SPT	23X5008	875.00

Mfg. part no. MX-500DS Desoldering System includes power supply, MX-DS1 desoldering hand-piece with MX-W5DS TipSaver workstand and MX-RM3E soldering and rework hand-piece and WS1 sleeper workstand.

MX-500DS	23X5005	935.00

ACCESSORIES

Mfg. Part No.	Description	Stock No.	Price Each
MX-TALON-01	TALON Upgrade Kit	50B6148	396.78

WX HIGH POWERED DIGITAL SOLDERING STATIONS AND ACCESSORIES

RoHS Compliant Available

Weller®

WX1010

WX2020

- Capacitive glass touch screen is chemical and temperature resistant
- Turn and click wheel with enter key and finger guide is intuitive to use
- Multi-language menu navigation
- Large graphic LCD display can be viewed from all angles
- Versatile connectivity options - preheaters and fume extraction systems
- Multi-purpose USB port for parameter configuration and data logging
- ESD safe to protect sensitive components
- **WX1010** uses XT series soldering tips, **WX1011** RT series and **WX1012** XNT series

Mfg. part no. WX2 control unit is designed for ease of use with its uniquely responsive touchscreen to its exceptionally intuitive user interface. WX2 control unit features a powerful and easy-to-use two-channel soldering device. A variety of connectivity options, intelligent soldering tools and a number of brand new features are ideal for soldering work on LED backplanes, solar applications and micro soldering joints. **Mfg. part no. WX2020** supports operation of two 120 watt soldering pencils simultaneously and 120 watt pencil can solder large or small parts requiring high power. **Mfg. part no. WX2021** fine, thin WXMP soldering pencil is suited for work under a microscope and WXMT tweezers are ideal for soldering and desoldering small SMD parts. **Mfg. part no. WX2** control unit is optimized by a wide selection of WX tools and accessories; *ordered separately below.*

Mfg. Part No.	Description	Stock No.	Price Each
WX1	High Powered Single Port Digital Power Unit, 200W, 120V	58T1161	393.50

WD1000HPT HIGH-POWER DIGITAL SOLDERING STATION SYSTEM

Weller®

- WD1M high-power 160W microprocessor-controlled digital power unit with programmable advanced software
- WP120 high-power 120W soldering iron with rapid heat transfer into tip for quick, precise control
- WDH10T Stop+Go safety stand cools tip when iron is at rest; restores tip temperature immediately when removed
- Temperature control range: 150° to 850°F (50° to 450°C)
- ESD safe to protect sensitive components

This high-power programmable soldering station is specially designed for soldering operations which need a combination of high energy and maximum precision. Ideal for soldering on high-density circuit boards with heat sinks that cause dissipation in heat transfer. Perfect for high frequency/radio frequency applications and solar panel production. System includes **WD1M** digital, microprocessor-controlled power unit supplied with new advanced software, **WP120** 120W high-power soldering iron pencil with replaceable soldering tip, **WDH10T** Stop+Go iron rest stand, **WDC2** dry tip cleaning system , instruction manual and safety information. *Order **XT series** chisel-type soldering tips for* **mfg. part no. WP120** soldering iron pencil separately below.

WD1000HPT HIGH-POWER DIGITAL SOLDERING STATION SYSTEM (CONT.)

XT SERIES CHISEL-TYPE SOLDERING TIPS FOR WM120 SOLDERING IRON PENCIL
These unique tips feature a wire-wound heater designed for maximum thermal recovery. The tip is shaped to fit snugly over the pyramid-shaped heater slug providing the user maximum surface contact between the tip and the heater. Constructed of solid copper plated with iron all over. Nickel and chromium behind the working surface.

WD1000 SERIES SINGLE-CHANNEL DIGITAL SOLDERING STATIONS AND ACCESSORIES

RoHS Compliant Available

Weller®

WD1001

WTA50

Stations Include Mfg. Part No. WD1 85W Single-Channel Digital Power Unit:
- Voltage: 120V input, 24V output
- 3 "radio buttons" allows user to preset frequently-used temperature settings
- Special function menu allows user to access 6 advanced features: Setback Time, Standby Temp., Temp. Lockout, F°/C° Switching, Temp. Offset, Auto-Off Time
- Large, high-contrast LCD display shows more information at a glance
- Temperature accuracy/stability: ±9°F (±5°C)/±10°F (±6°C)
- Temperature range: 150°F to 850°F (50°C to 450°C)
- ESD-safe to protect sensitive components

Mfg. part no. WD1001 digital soldering station includes **mfg. part no. WD1** 85W single-channel power unit, **mfg. part no. WMP** 65W soldering micro-pencil, **mfg. part no. WDH20** soldering micro-pencil stand and **mfg. part no. NT1** soldering tip. **Mfg. part no. WMP** micro-pencil features a short tip-to-grip (37mm) distance putting user close to the work. Its heating element is built-in to the pencil rather than tip, using low-cost replacement tips. Select from a wide assortment of **NT series** tips for use with mfg. part no. WMP soldering micro-pencil; *ordered separately below.*

Mfg. part no. WD1002 digital soldering station includes **mfg. part no. WD1** 85W single-channel power unit, **mfg. part no. WP80** 80W soldering pencil with short tip-to-grip barrel (52mm), **mfg. part no. WDH10** soldering pencil stand and **mfg. part no. LTB** soldering tip. To work at a standard tip-to-grip length (65 mm), order **mfg. part no. 0058744846** long tip retainer assembly separately; *go online or call.*

Mfg. part no. WD1002T digital soldering station includes **mfg. part no. WD1** 85W single-channel micro power unit, **mfg. part no. 0052918099** 80W soldering pencil with short tip-to-grip barrel (52mm), **mfg. part no. WDH10T** Stop+Go soldering pencil stand that extends tip life by placing station in setback mode when pencil is not in use, **mfg. part no. WDC2** dry cleaner and **mfg. part no. LTB** soldering tip. To work at a standard tip-to-grip length (65 mm), order **mfg. part no. 0058744846** long tip retainer assembly separately; *go online or call.*

WHA900 HOT-AIR REWORK STATION AND ACCESSORIES

Weller®

- Controlled output maintains set temperature regardless of air flow setting
- User-selected temperature and air flow setback
- Temperature offset control fine-tunes the hot air temperature at the tip
- Standby button to power-down to low settings when not in use
- Air from internal pump is infinitely adjustable from 5 L/min. to 50 L/min.
- Adjustable hot-air temperature from 122°F to 1022°F (50°C to 550°C)
- ESD safe

WHA 900

Hot-Air Nozzle Rack

Mfg. part no. WHA 900 hot-air rework station with internal pump is ideal for safe removal of larger, high lead-count SMD components and is capable of handling numerous other hot-air applications. Features closed-loop temperature feedback control that maintains the temperature at the nozzle, independent of the airflow rate. Includes rework station, 7.625"L hot-air pencil hand-piece and a rest support for hand-piece. Current supply: 120V / 24V. Power consumption: 750W. Hot-air pencil hand-piece output: 650W. Compact design maximizes workspace efficiency — station unit size: 8.125L x 6.625W x 4.25"H. *Order hot-air nozzles and hot-air nozzle rack separately below.*

DIGITAL SHOP AIR DESOLDERING STATION

RoHS Compliant Available

Weller®

- 80 watts of power for faster heat up and better performance
- For safely and efficiently removing through hole components from PCBs
- Microprocessor circuitry automatically recognizes other accessories
- Uses fast-response shop air
- Vacuum delay feature prevents clogging

Mfg. part no. WDD81X shop air desoldering station includes 95W power unit, **mfg. part no. DXV80** desoldering pencil with internal disposable solder collection tube, **mfg. part no. DX112** desoldering tip and desoldering pencil stand with sponge. Temperature range: 150° F to 850° F. Air flow volume: 35 liters/minute. Uses **DX series** threadless desoldering tiplets and is programmable using **mfg. part no. WCB1** control module, *all ordered separately; go online or call.*

WHA3000 SERIES 700W DIGITAL HOT-AIR STATIONS WITH BUILT-IN TURBINE

RoHS Compliant Available

Weller®

- Programmable station with a three-step temperature time profile
- Variable speed controlled turbine generates an air volume of up to 50 liters/min.
- Memory space to store up to 10 thermal profiles
- Hot-air pencil has automatic vacuum pickup for easy component removal
- Bright LCD display for easy reading of the parameter settings
- Temperature range: 122°F - 1022°F (50°C - 550°C)
- Control accuracy: +/- 77°F (+/-25°C)
- ESD-safe housing and pencil

WHA3000PS

WHA3000 series 700W hot-air stations perform demanding repair tasks on circuit boards with complex, fine-pitch SMD components. The advanced control technology coupled with user friendly operation, provides process control. Both units features an automatic operation mode for process repeatability to help increase productivity and quality. **Mfg. part no. WHA3000PS** also has a standby mode to reduce the nozzle temperature and air flow rate. Convenient lever lowers or raises head in the "z" direction and the heating plate heats up components to the correct temperature from below. Both units come complete with **mfg. part no. HAP3** hot-air pencil, two-stage foot switch, **mfg. part no. NQ30** hot-air nozzle, **mfg. part no. AKT30** Stop-and-Go stand, nozzle change tool, and **mfg. part no. WHA** control software. **Mfg. part no. WHA3000PS** also includes **mfg. part no. WBHS** PC board holder with slide rail and **mfg. part no. WHP3000** heating plate. A full range of **ND** and **NQ series** hot-air nozzles are available; *go online or call.*

WHP1000 PREHEATER DIGITAL PREHEATING PLATE

Weller®

- Powerful 1000W — four 250W heating elements allow preheating in a variety of ways
- Infrared heater heats-up fast, delivers accurate working temperatures
- Large heating plate (6" x 8.75") distributes heat evenly
- Preheats components, PCBs, contacts from the bottom
- Use under a PCB holder or work directly on heating surface
- Digitally controlled for precise temperature regulation
- "Auto-Off" and "Standby Temperature" special functions
- Set and actual temperature viewed on digital display
- ESD safe

Mfg. part no. WHP1000 is a high-power preheater that is suitable for contact preheating. Use it under **mfg. part no. WBH2** circuit board holder, *ordered separately on page 2022*, or simply work directly on the unit's heating surface. Well suited for use with flat silicon cells as well as ceramic and glass PCBs. Allows the temperature of the board's substrate material to be raised to the correct working temperature, providing perfect soldering operations without the risk of damage from thermal shock to the board. Ideal for rework of digital cameras, cell phones, PDAs, and MP3 players. Features an integrated RS232 interface that allows the preheater to be controlled externally from the **mfg. part no. WHA3000P** hot air station, *ordered separately on this page.* Temperature can be monitored at specific locations on the board using an insulated Type-K thermocouple, *ordered separately; go online or call.* Overall size: 10W x 11L x 2.75"H. Power supply: 120V, 50/60Hz. Temperature range: 150°F to 570°F.

WR3000M DIGITAL SELF-CONTAINED 3-FUNCTION REWORK SYSTEM

RoHS Compliant Available

Weller®

WR3000M

0051515599 SMT Chip Removal Nozzle Kit

Rework on the Highest Level — Innovation Newly Designed

- 400 watts of power over 3 independently-controlled channels with automatic tool detection
- Air and vacuum ports allow use of up to 3 tools simultaneously
- Compatible with all high-speed micro-tools — **WMRP** and **WMRT**
- Powerful **HAP200** 200W hot-air pencil for efficient, lead-free rework
- USB port allows use of included comprehensive PC software for monitoring, parameterizing and datalogging
- **WRK** rework desoldering set allows components removal up to 30 x 30mm
- **WVP** vacuum pen allows easy handling of components
- Large, intuitive LCD display shows critical functions for 3 channels

WR3000M DIGITAL SELF-CONTAINED 3-FUNCTION REWORK SYSTEM — COMPLETE WITH SELECT TOOLS AND ACCESSORIES

Mfg. part no. WR3000M rework system includes **mfg. part no. WR3M** digital, self-contained 3-function 400W rework station control unit, HAP200 200W hot-air pencil with nozzle adapter and WDH30 hot-air pencil stand with sponge, DXV80 80W desoldering pencil and WDH40 desoldering pencil stand with sponge, WP80 80W micro-soldering pencil with WDH10T "Stop-and-Go" soldering pencil stand with sponge, WVP vacuum pick-up pen, WDC2 attachable soldering tip dry cleaner, 1.2mm and 3.0mm hot-air nozzles, 2.3mm and 2.5mm desoldering nozzles, nozzle replacement tool, desoldering cleaning tools, brush and spare filters, color-coded clips for easy tool identification, CD with USB software and USB cable. Rework station features rotary vane pump. Temperature range: 150° F to 850° F (variable in one degree increments). Controllable temperature range is tool-dependent. Air flow volume: 1 liter/minute to 15 liters/minute. Voltage: 120V, 60Hz. All tool handles, cord sets and air flow are static free.

CUSTOMIZE-A-SYSTEM — SELECT ONLY THE COMPONENTS, TOOLS AND ACCESSORIES NEEDED

WR3M DIGITAL, SELF-CONTAINED 3-FUNCTION REWORK STATION — CONTROL UNIT ONLY

Mfg. part no. WR3M digital, self-contained, 3-function rework station is specifically-designed to the needs and requirements of professional repairs to latest-technology electronic sub-assemblies in industrial production engineering and in the repair and laboratory fields. Features three independent tool channels with automatic tool detection for the simultaneous operation of three soldering tools. Station comes with adapter for use with HAP200 200W hot-air pencil, *ordered separate below,* CD with USB software and USB cable. Size: 10.75"L x 9.25"W x 4.02H". Select from a wide array of rework tools and accessories, *ordered separately below,* and create a "made-to-order" rework system.

NEW TENMA®

- **Mfg. part no. 21-10115** temperature range: +392°F to +896°F
- **Mfg. part no. 21-10120** temperature range: +302°F to +842°F (+150°C to +450°C)
- High contrast LCD display
- F or C selectable readout
- Three programmable presets
- ESD safe
- Lightweight iron handle

Compact soldering station **mfg. part no. 21-10115** features a digital display and low profile casing. Its compact design will fit on any tool bench and is small enough for convenient storage. Advanced digital soldering station **mfg. part no. 21-10120** simple controls provide a easy user interface. The thermostat-controlled 60-watt output of these units provides quick heat up with outstanding precision. Long-life ceramic heating element (replacement iron assembly: 21-11435). Both soldering stations include one tip and soldering stand with cleaning sponge.

Mfg. Part No.	Description	Stock No.	Price Each
21-10115	Digital Soldering Station, Comapct	56T2208	75.90
21-10120	Digital Soldering Station, UL Listed	56T2209	83.99
21-11435	Replacement Soldering Iron for 21-10115 and 21-10120	93T9669	17.79
21-10117	3 Pk. Soldering Tips for 21-10115	53W8506	8.39

(212136)

ROTARY DIAL TEMPERATURE CONTROLLED DIGITAL SOLDERING STATION

NEW TENMA®

- Stable and accurate temperature range of +392°F to 896°F
- Power consumption: 50W
- Temperature lockout to prevent accidental adjustments
- Lead free
- ESD safe
- Long life heating element
- Lightweight iron handle

Soldering station offers a space saving design and an easy to use rotary dial temperature control that make this soldering station ideal for professionals, hobbyists and students. Compact, split design makes for an easy fit on any tool bench. Includes one tip, soldering stand and cleaning sponge and replacement iron **mfg. part no. 21-11445** is also available; ***go online or call.***

Mfg. Part No.	Description	Stock No.	Price Each
21-11405	Soldering Station, Rotary Dial Controlled	93T9666	36.69

(212138)

TEMPERATURE CONTROLLED DIGITAL SOLDERING STATIONS

NEW TENMA®

- **Mfg. part no. 21-147** temperature range: +300°F to +790°F
- **Mfg. part no. 21-1590** temperature range: +320°F to +900°F
- 48W

Mfg. part nos. 21-147 and 21-1590 feature adjustable temperature and a variety of available tips, these units are perfect for most soldering applications including SMD. Grounded tip for soldering static sensitive devices. Over-heat protection with closed loop temperature control. Units come with replaceable iron clad conical 3/64" tip.

Mfg. Part No.	Description	Stock No.	Price Each 1-3
21-147	Soldering Station, 12 LED Bargraph Display	39C0869	77.99
21-1590	Soldering Station, Digital Display	52F7963	89.99

(212139)

DUAL CHANNEL SOLDERING STATION

NEW TENMA®

- Temperature range: 392°F to 896°F
- Heating element: 32VAC, 80W
- Power requirements: 100–120VAC, 60Hz

ESD-safe dual channel soldering station is designed to allow for work on SMD chips and lead free soldering without alternating tools. Short distance between the handle and heating element allow for fast heat up time. These features saves both time and money for the user. Great for production and repair work.

Mfg. Part No.	Description	Stock No.	Price Each
21-10570	Dual Channel Soldering Station with Iron & Tweezer	56T2229	149.00
21-10571	Tweezer for 21-10570	52T9319	71.39
21-10575	Replacement Tweezer Tips 2mm, 2 pcs.	56T2231	6.49
21-10585	Replacement Tweezer Tips 5mm, 2 pcs.	56T2235	7.49
21-10590	Replacement Tweezer Tips 10mm, 2 pcs.	56T2237	7.49

21-10600	Replacement Tweezer Tips 20mm, 2 pcs.	56T2241	7.49

(212140)

HIGH POWER SOLDERING STATION

NEW TENMA®

- Fully adjustable temperature control
- On/off switch with power indicator
- Flexible burn resistant lead
- Adjustable temperature from +500°F to +900°F
- Protects components from voltage and current spikes
- Ergonomic rubber grip provides user comfort

80W high power soldering station is ideal for heavy duty lead-free soldering applications like stained glass work, production and repair work. High power heating element heats up fast and provides quick temperature recovery.

Mfg. Part No.	Description	Stock No.	Price Each
21-10565	High Power Solder Station	56T2227	49.99

VACUUM REWORK STATION

NEW TENMA®

Vacuum Desoldering Iron:
- 24VAC, 48W heating element
- Temperature range: +410°F to +900°F

Temperature Controlled Soldering Iron:
- 24VAC, 48W heating element
- Temperature range: +320°F to +900°F

Rework Station:
- Overall dimensions: 5 ½" (H) x 8 ¼" (W) x 7 ½" (D) ½"
- Power requirements: 120VAC, 60Hz, 100W

Rework station is a complete single-piece unit that combines the benefits of a temperature controlled vacuum desoldering station, with a high quality temperature controlled soldering iron.

Mfg. Type No.	Description	Stock No.	Price Each
72-6345	Vacuum Rework Station	12P9809	449.99

INTELLIGENT REWORK STATION

NEW TENMA®

- High flow diaphragm pump for large SMD components
- ESD safe
- Constant temperature and closed-loop control circuit
- Automatic power off
- Control keys integrated into handle
- Control card function to prevent accidental temperature change
- Maintains stable air flow and hot-air temperature
- Temperature range: 302°F–932°F (150°C–500°C
- Total power: 800 Watt

Intelligent rework station provides a broad temperature range of to handle a wide range of soldering and desoldering applications. Features a Dual LED display that shows temperature, air flow and parameter setup.

Mfg. Type No.	Description	Stock No.	Price Each
21-11415	Intelligent Rework Station	93T8992	177.49

(212011)

2-in-1 REWORK STATION

NEW TENMA®

- Space saving design
- Digital display shows current temperature and conditions
- Easy pushbutton temperature adjustment
- Temperature range: soldering station, +392°F to 896°F (+200°C to +480°C); rework station, +212°F to +932°F (+100°C to +500°C)
- ESD safe

Dual function rework station combines the functions of a rework station and soldering station into a single piece of equipment for user convenience. Rework and solder functions are controlled by a central unit to maintain temperature accuracy and stability in both.

Mfg. Type No.	Description	Stock No.	Price Each
21-11420	2-in-1 Rework Station	93T9668	94.49

(212006)

2-in-1 INTELLIGENT SMD REWORK STATION

NEW TENMA®

- ESD safe
- Intelligent cooling system
- Energy saving auto off and sleep functions
- Temperature calibration for iron and hot air rework handpiece
- Low vibration diaphragm air pump
- Temperature range: soldering iron, +392°F to 896°F (+200°C to +480°C); hot-air tool, +212°F to +932°F (+100°C to +500°C)
- Adjustable air flow
- Selectable Fahrenheit/Centigrade temperature

Intelligent rework station combines rework station with soldering station with easy to operate space saving design. A MCU thermostat provides accurate and consistent working temperature. The dual LCD displays show live working states of both the iron and the hot air hand pieces, as well as, provides access to three programmable presets for each unit. Kit includes nozzles, soldering tip, hand pieces, and holders and replacement iron assembly **mfg. part no. 21-11445**.

Mfg. Type No.	Description	Stock No.	Price Each
21-10130	2-in-1 Intelligent SMD Rework Station	32T0390	178.49
21-11445	Soldering Iron for 21-10130 and 21-11405 Soldering Stations	93T9670	14.99

(212005)

HOT AIR SMD REWORK STATION

NEW TENMA®

- Hot air temperature adjustable from 212°F to 754°F
- Dimensions: 7 ½"W x 5 ⅜"H x 9 ¾"D

Hot air SMD rework station ideal for soldering and desoldering of most surface mount devices including QFP, SOP and PLCC packages.

Mfg. Type No.	Description	Stock No.	Price Each
72-6710	Hot Air SMD Rework Station	39C0897	529.00

(212009)

HOT AIR SMD DESOLDERING AND REWORK STATIONS

NEW TENMA®

- ESD safe
- Temperature range: +210°F to 896°F (+100°C to +480°C)
- 280 watt

Mfg. part no. 21-11410 hot air desoldering station offers plenty of features and temperature settings for a wide range of soldering and desoldering applications. Provides quick heating up to 662°F in only 10 seconds, while the temperature sensor keeps output temperature accurate and consistent. **Mfg. part no. 21-10125** hot air rework station provides a wide range of temperature and temperature settings for flexibility in soldering and desoldering work of sensitive components. A closed-loop heat sensor provides accurate and consistent working temperature.

Mfg. Type No.	Description	Stock No.	Price Each
21-11410	Hot Air Desoldering Station	93T9667	104.99
21-10125	Hot Air Rework Station	32T0389	149.99
ACCESSORIES

SMD SOLDERING/DESOLDERING TWEEZERS

NEW TENMA®

SMD Soldering/Desoldering Tweezers

Temperature Control Unit

SMD Soldering/Desoldering Tweezers provide a fast, efficient method to solder and desolder surface mount devices such as chip resistors, chip capacitors, SOTs, flat pack and DIP ICs. Dual highly insulated 40W ceramic heating elements insure rapid heat up and recovery. Heat resistant silicon cord is terminated with three pin grounded AC plug. A wide variety of interchangeable tips available in 2mm to 30mm widths. Soldering iron temperature control unit is perfect for adding wattage adjustability to any soldering device, up to 100W.

MINI SMD PREHEATER

NEW

TENMA®

- Lead free
- ESD safe
- Air flow volume: 6.35 cubic ft/minute
- Temperature range: 212°F to 662°F (100°C to 350°C)
- Dimensions: 6.7 x 5.5 x 2.2"

Mini SMD Preheater packs big preheating power into a miniature package for work or rework of small PCB's. The 540 watt heater can reach up to 662°F in 10 seconds. Automatic and intelligent temperature control maintains accurate heat levels for any period of time. The unit can also help cool boards after rework.

Mfg. Part No.	Description	Stock No.	Price Each
21-10135	Mini SMD Preheater	32T0391	52.49

HIGH-PERFORMANCE LED SOLDERING IRONS

NEW

Weller®

- Three LED lights for superior soldering accuracy and application illumination
- Round co-molded soft grip ribbed handle for maximum comfort and reduced slippage
- Triangular handle area for maximum tip control
- Stainless steel heater technology with heat up to 750°F
- Excellent quality consumer iron 8 ¼″ (210mm) long
- UL listed - cUL available

Ideal for use on printed circuit boards, radio controlled, indoor lighting wire connection, <12 AWG (0.08″ diameter).

SOLDERING IRONS AND SPECIALTY TOOLS

ISO-TIP

- 7904/7944 Kits include: Power Pro Iron, charging stand, type 7933 battery, types 7577 and 7545 high-efficiency tips
- High-capacity battery provides up to 30 minutes of continuous soldering
- Full recharge in 4 hours
- LED charging indicator light
- Solders more than 200 electronic joints per recharge

7904 Power Pro — 7700 Quick Charge — 7800 "60" Pro-Charge

- 7700 Kit includes: Quick Charge Iron, charging stand, type 7733 battery, types 7545 and 7546 tips
- Recharges completely in 3 to 4½ hours
- Solders up to 125 electronic joints per recharge
- Withstands high-rate charging without damage
- 7800 Kit includes: "60" Pro-Charge Iron, charging stand, type 7833 battery, types 7577 and 7545 tips
- Fully recharges In 1 hour
- Energy-saving trickle-charging rate when battery is full
- Solders up to 125 electronic joints per charge

Iso-Tip rechargeable soldering irons are the preferred irons of professionals, craftsmen and hobbyists. The cordless iron design makes soldering work much easier without the limitations of a cord. Choose from a full line of lightweight, rechargeable irons offering options for charging, heating time and interchangeable tips. Units operate on direct current and when used with "isolated" tips, there is no chance of damage or leaks due to electrical current. These 25W irons reach a tip temperature of 900°F in less than 10 seconds. Replaceable NiCad batteries are included. All models feature a convenient work light.

STTC SERIES SOLDERING/SMT TIP CARTRIDGES

RoHS Compliant Available

METCAL

STTC series tip cartridges designed for soldering and reworking SMT components. These popular tips are ideal for a wide variety of soldering tasks. Available in three temperature ranges (500, 600 and 700 series). **STTC series** tip cartridges are for use in soldering/rework handpieces for **STSS** and **MX series** soldering and rework systems. Other geometrics are available; *go online or call*. **NOTE:** Mfg. part nos. with **P suffix** are a new lead-free soldering range of **STTC series** Power Tips™ for use with the **MX-500 series** soldering and rework systems. These Power Tips™ are specially designed to deliver heat more efficiently for common hand soldering applications.

SOLDERING TIPS

SSC SERIES SOLDERING TIP CARTRIDGES COMPATIBLE WITH MFR-1160, MFR-1161 AND SP-200 SOLDERING SYSTEMS (CONT.)

SCC series tip cartridges are designed for use with **MFR-1160, MFR-1161** and **SP200-11 series** soldering systems; *ordered separately on page 1998*. Developed for high-power delivery, these tips permit soldering 100°F or more below conventional irons. Other geometrics are available; *go online or call*. For easy identification of soldering tips used for lead-free processes, *order* **mfg. part no. AC-CK** *3 lead-free ID soldering tip rings separately on page 1998*.

CIRCUITWORKS® CONDUCTIVE PEN

RoHS Compliant Available

ITW Chemtronics®

- Quickly Creates Conductive Silver Traces on Most Surfaces
- Valved Pen Tip for Easy Application
- Can Be Soldered at Low Temperatures
- Dries in Minutes at Room Temperature
- Choice of Microtip for Fine Lines or Standard Tip for Wider Lines

Pen dispenser draws highly conductive silver traces, jumpers, and shielding with precision and control.

Mfg. Part No.	Description	Stock No.	Price Each

ROSIN-ACTIVATED SOLDER

DURATOOL

Rosin-activated solder offers the most effective form where wetting action is completely non-corrosive and electrically nonconductive. Water-soluble is more effective and heat-stable than rosin fluxes. Residue can be completely removed with water. Mildly active solder has high mobility, fast spreading action that meets military specification QQ-S-571. No-clean solder is environmentally safe. Leaves low amounts of residue which doesn't require cleaning.

275 NO-CLEAN LEAD FREE STANDARD CORE WIRE SOLDER

RoHS Compliant Available

kester® CONNECTING INNOVATION™

- Colorless translucent residues
- Improves wetting performance
- Excellent solderability and fast wetting to a variety of surface finishes
- Eliminates the need and expense of cleaning
- Low smoke and odor
- Low spattering
- Classified as ROL0 per J-STD-004
- Compliant to Bellcore GR-78

275 no-clean flux for cored solder was developed to provide superior wetting performance for hand soldering in the electronics industry. The chemistry is based on some of the same principles that have been safely used for years in mildly activated rosin fluxes. Results in an extremely clear post-soldering residue without cleaning. The unique chemistry was also designed to reduce spattering common to most core fluxes. Flux core size: 58.

SOLDER

48 ROSIN ACTIVATED LEAD FREE STANDARD CORE WIRE SOLDER

RoHS Compliant Available

kester CONNECTING INNOVATION™

- Unparalleled wetting performance
- Excellent solderability and fast wetting to a variety of surface finishes
- Eliminates the need and expense and cleaning
- Low smoke and odor
- Low spattering
- Classified as ROL1 per J-STD-004

48 activated rosin flux for cored solder wire was developed for lead-free applications to enable solder of most common metals. The performance characteristics exceed those of standard RA fluxes. "Instant-action" wetting to provide fast and reliable solder joints. Flux core size: 66.

- Easy residue removal in DI water
- Classified as ORH1 per J-STD-004

331 organic flux is a water soluble formula for use in flux-cored solder wire and is more effective than rosin fluxes in solder difficult metals. The flux is more heat stable than most organic fluxes, resulting in minimal smoke and odor. The residue can be completely removed with a simple water rinse.

Mfg. Part No.	Alloy	Diameter (in.)	Gauge	Weight (lbs.)	Stock No.	Price Each 1-4

44 SERIES RA ROSIN CORE SOLDER

kester CONNECTING INNOVATION™

High-activity **RA** core flux designed for excellent instant wetting action, even on nickel surfaces. The residues are noncorrosive if not cleaned. Classified as ROM1 flux per J-STD-004. All **RA series** are 3% flux.

Mfg. Part No.	Alloy	Diameter (in)	Gauge	Spool Weight	Stock No.	Price Each 1-9

"331" ORGANIC AND LEAD-FREE WATER-SOLUBLE CORE SOLDER

kester CONNECTING INNOVATION™

331 is designed for optimal cleanability with water. Highly active water-soluble flux for soldering difficult metals. Classified as ORH1 per J-STD-004. All organic water soluable core solder are 3% flux. *Order the lead-free water-soluble version separately below.*

"331" ORGANIC WATER-SOLUBLE

285 RMA FLUX-CORE SOLDER

kester CONNECTING INNOVATION™

RMA flux-core solder is RMA-based flux that provides wetting action comparable to that of a typical **RA** flux. The residues are noncorrosive if not cleaned. Catagorized as ROL1 per J-STD-004. Spool weight: 1lb.

Mfg. Part No.	Alloy	Diameter (in.)	Gauge	Flux (%)	Stock No.	Price Each 1-9

LEAD-FREE CORED WIRE SOLDER

RoHS Compliant Available

Multicore

Cored wire features ground-breaking, new lead-free flux core formulations to give users an easy transition to lead-free operations. Features a consistent distribution of lead-free flux throughout the solder wire making it ideal for automated wire soldering processes.

511™

511™ LEAD-FREE, NO-CLEAN CORED WIRE SOLDER

C511™ no-clean, clear-residue, cored wire solder features lead-free alloy of Sn96.5/Ag3/Cu0.5 with a melting point of 217°C.

Mfg. Part No.	Description	Diameter (mm)	Reel Quantity	Stock No.	Price Each
MM02104	SAC305 C511 3C	0.38	0.55 lb.	32M7029	56.27

HYDRO-X™ LEAD-FREE, WATER SOLUBLE CORED WIRE SOLDER

HYDRO-X™ water-soluble cored wire solder features lead-free alloy of Sn96.5/Ag3/Cu0.5 with a melting point of 217°C.

MM01950	SAC305 HX 3C	0.81	1 lb.	70K9447	120.37

(90466)

TIN-LEAD CORED WIRE SOLDER

Multicore

Tin-lead cored wire features multiple flux cores technology to provide even and consistent distribution of flux throughout the solder wire. This reliability makes this solder wire ideal for automated wire soldering processes. Additional sizes available; *go online or call.*

HYDRO-X™

400™ HALIDE-FREE, NO-CLEAN, CLEAR RESIDUE CORED WIRE SOLDER

400™ Sn63/Pb37-cored wire flux offers increased flux content for improved wetting. IPC Class: ROL0.

Mfg. Part No.	Description	Diameter (mm)	Reel Quantity	Stock No.	Price Each 1-4
MM01001	Sn63Pb/37 C400 5C 0.032″	0.81	1 lb.	72C1198	48.66

502™ NO-CLEAN, CLEAR RESIDUE, MEDIUM-ACTIVITY 3-CORE WIRE SOLDER

502™ Sn63/Pb37-cored wire flux offers good wetting on difficult substrates. IPC Class: ROM1.

MM00973	Sn63Pb/37 C502 3C 0.032″	0.81	1 lb.	67C1221	47.61

HYDRO-X™ HIGH-ACTIVITY, WATER SOLUBLE 3-CORE WIRE SOLDER

HYDRO-X™ Sn63/Pb37 3-core water wash wire flux offers excellent wetting on difficult substrates. IPC Class: ORH1.

MM00989	Sn63Pb/37 HX 3C 0.81mm	0.81	1 lb.	72C1196	46.88

HMP HIGH-MELTING POINT SOLDER (574°F) W/366

5% tin, 93.5% lead, 1.5% silver with activated rosin.

ROSIN CORE SOLDER WIRE

NEW

TENMA®

- Rosin flux core
- Diameter: 1mm (0.04″)

Ideal for general purpose electronic repair and assembly use.

ROSIN CORE SOLDER 60/40 TIN/LEAD

Tin/lead formulation provides the lowest possible melting point. Melting point: 188°C (370°F).

Mfg. Part No.	Description	Wt. (oz./lbs.)	Stock No.	Price Each 1-9
21-1045	Rosin Core Solder, 60/40 Tin/Lead	6 oz.	38C9096	8.59
21-1040	Rosin Core Solder, 60/40 Tin/Lead	1 lb.	93B9303	23.09

LEAD FREE ROSIN CORE SOLDER, 99.3/0.7 TIN/COPPER

Tin/copper formulation meets current requirements for lead free solder use. Melting point: 227°C (441°F).

21-1046	Lead Free Rosin Core Solder, Tin/Copper	6 oz.	64M0943	13.99
21-1041	Lead Free Rosin Core Solder, Tin/Copper	1 lb.	64M0941	38.49

LEAD FREE ROSIN CORE SOLDER, 96.5/3/0.5 TIN/SILVER/COPPER

Silver formulation provides improved conductivity performance, lower melting point while continuing to meet requirements for lead free solder use. Melting point: 217°C (423°F)

21-1047	Lead Free Rosin Core Solder, Tin/ Silver/Copper	6 oz.	64M0944	27.49
21-1042	Lead Free Rosin Core Solder, Tin/ Silver/Copper	1 lb.	64M0942	71.49

GENERAL-PURPOSE, HI-TEMP. AND PRECISION SOLDER POTS

RoHS Compliant Available

PLATO®

General-Purpose and High-Temperature Solder Pot Features:

- Three-position control switch with infinitely variable temperature control (11°F)
- Safety heat shield
- Removable dross tray for easy cleaning
- Three-wire grounded UL listed cord
- Input: 120VAC
- 2.5″ (64mm) diameter by 1.5″ (38mm) deep crucible
- Capacity: 2 lbs. (1 kg)
- Adjustable leveling feet
- All parts easily replaceable including heating element and control switch
- Shipping weight: 11 lbs. (5 kg)

Precision Solder Pot Features:

- Exceeds military specifications ANSI (J-STD-001B) and Navy WS-6536E
- Controls temperature to ±5°F of a pre-selected setting from ambient to 925°F
- Solid state controller limits transient voltage spiking to 2mV peak-to-peak
- Temperature preset switch
- LCD displays present temperature and operating temperature
- Internal circuitry compensates for incoming power fluctuations
- Power line circuit breaker for ESD protection
- All metal construction
- Safety heat shield
- Removable dross tray for easy cleaning
- Three-wire, grounded UL listed cord
- Input: 120VAC
- 2.5″ (64mm) diameter by 1.5″ (38mm) deep crucible
- Capacity: 2 lbs. (1kg)
- Adjustable leveling feet
- Shipping weight: 12 lbs. (5.4kg)

SP-500T

Solder pots with porcelainized crucibles resists corrosion, wipes clean, and are ideal for lead free processes. Additional precision solder pots available; *go online or call.*

Mfg. Part No.	Description	Output Power (W)	Temperature Range	Stock No.	Price Each
SP-101	General-Purpose Solder Pot	350	500°F to 975°F	98H2906	393.94

SOLDERING POTS

NEW

TENMA®

150W Solder Pot:

- Bowl Diameter: 1.5″

400W Solder Pot:

- Bowl Diameter: 3.1″
- Bowl depth: 1.5″

Both:

- 110V 60Hz

Compact soldering pots are ideal for small scale production, prototyping and chassis wiring. They are especially useful when tinning large quantities of stranded wire. Recommended for use with the Tenma #72-6309 bar solder

Mfg. Part No.	Description	Stock No.	Price Each 1-9
21-3511	150W Soldering Pot	63J8341	29.99
21-3515	400W Soldering Pot	96B2862	82.99

DESOLDERING BRAID

SODER-WICK® DESOLDERING BRAID

RoHS Compliant Available

ITW Chemtronics®

- Effective, economical way to safely and completely remove solder from BGA pads and chips
- Sized and designed specifically for BGA pad and chip rework/repair
- Entire BGA pads cleaned in 3 to 4 Passes
- Available in Rosin (80) and No-Clean (60) Fluxes
- Packaged in ESD-safe static-dissipative bobbins
- Meets MIL-F-14256, NASA-STD-8739.3, DOD-STD-883E, Anai/ipc J STD 004 Type ROL0, MIL-STD-1686C, MIL-HDBK-263B, MIL-B-81705C, and MIL-STD-2000A

SODER-WICK® BGA

Soder-Wick®, the world's leading brand of desoldering braid, is the fastest, cleanest and safest braid in the industry. It significantly reduces rework/repair time and minimizes the risk of heat damage to the board. Its geometrically precise weave design allows for maximum capillary action and solder capacity. Soder-Wick® desoldering braid optimizes heat transfer through the braid and into the solder joint, resulting in faster wicking action than any other competitive braid. Minimal flux residue on the board speeds up the cleaning process, or eliminates it entirely.

Soder-Wick® desoldering braid is available in the most comprehensive variety of widths, lengths and flux types. Application-specific sizes allow for precision solder removal in a flash. Wicking speed and board safety are maximized by matching the size of the braid to the soldering iron tip and the area to be desoldered.

Mfg. Part No.	Size	Color	Length (ft.)	Stock No.	Price Each
● 80-BGA-5	BGA	Purple	5	01F195	5.94
● 60-BGA-5	BGA	Purple	5	01F196	6.58

SODER-WICK® ROSIN 80 SD

- Non-corrosive type R Rosin flux
- Leaves no ionic contamination on boards
- Packaged in ESD-safe static-dissipative bobbins
- Minimizes risk of damage associated with static electricity
- Meets MIL-F-14256EF, NASA-STD-8739.3, DOD-STD-883E, Anai/ipc J STD 004 Type ROL0, MIL-STD-1686C, MIL-HDBK-263B, MIL-B-81705C, and MIL-STD-2000A

Mfg. Part No.	Size	Width (in.)	Color	Length (ft.)	Stock No.	Price Each
● 80-1-5	#1	0.8	White	5	95F6234	3.85

SODER-WICK® NO-CLEAN SD

- Fast, clean no-clean flux desoldering braid packaged in ESD-safe static-dissipative bobbins
- Patented non-corrosive, halide-free, organic no-clean flux system
- Desolders up to 40% faster than competitive no-clean braids and leaves boards cleaner
- Meets MIL-F-14256EF, Bellcore TR-NWT-000078,ANSI / IPC J SF-818, NASA-STD-8739.3, DOD-STD-883E, Anai/ipc J STD 004 Type ROL0, MIL-STD-1686C, MIL-HDBK-263B, MIL-B-81705C, and MIL-STD-2000A

Mfg. Part No.	Size	Width (in.)	Color	Length (ft.)	Stock No.	Price Each
● 60-1-5	#1	0.8	White	5	95F6245	4.13

SODER-WICK® LEAD FREE DESOLDERING BRAID

RoHS Compliant Available

ITW Chemtronics®

- Engineered specifically for high temperature, lead-free solders
- Transfers heat to the solder joint more quickly and efficiently
- Specifically designed for all lead-free solders
- Can also be used with Tin/Lead solders
- Soder-Wick® Lead-Free packaged in ESD-safe static dissipative bobbins
- Minimizes the risk of damage associated with static electricity
- Noncorrosive ultra high purity no-clean flux
- Will not leave ionic contamination on the boards
- Especially effective at removing residual solder from SMT pads
- RoHS Compliant
- Patent Pending

Mfg. Part No.	Size	Length (Feet)	Color	Stock No.	Price Each

CHEM-WIK® ROSIN DESOLDERING BRAID

RoHS Compliant Available

ITW Chemtronics®

- The fast, safe rosin flux desoldering braid for removing solder from leads and components.
- Coated with ultra high purity rosin
- Non-corrosive Type R rosin flux
- Meets DOD-STD-1686C, DOD-HDK-263B, MIL-F-14256F, MIL-B-81705C and MIL-STD-2000A

As the industry standard desoldering braid for service and repair, Chem-Wik® desoldering braid ensures fast and safe desoldering. The ultra-pure, oxygen free copper braid quickly and completely removes solder from circuit boards and components. Its fast wicking action protects components from harmful heat damage.

TECHSPRAY DESOLDERING BRAID / WICK

RoHS Compliant Available

TECHSPRAY®

- Strong capillary action instantly pulls solder
- Fast, reliable wicking action
- No-Clean braid is ideal for lead-free applications
- Pro-Wick® braid is ideal for high-volume PCB rework
- Unfluxed braid is ideal for use with water-soluble flux
- All meet or exceed MIL-F-14256, Type R specifications
- On antistatic, ESD-safe bobbins for static-sensitive environments

No-Clean Desoldering Braid

No-Clean desoldering braid is the cleanest no-clean braid in the industry and is approved for lead-free processes. Its proprietary flux formula is specially designed to avoid catastrophic and latent PCB failures caused by ionic flux residue. Pro Wick® desoldering braid is rosin flux coated for the fastest wicking action. Ideal for high-volume PCB production/repair environments. Unfluxed desoldering braid is perfect for use with water-soluble flux and in aqueous processes.

ROSIN FLUX DESOLDERING BRAID

NEW TENMA®

- Manufactured in the USA

The copper braid utilizes only the best fine gauge oxygen-free strands, which are fully coated with specially formulated Type R rosin flux. The flux greatly enhances wick action ensuring fast reliable solder removal. Additionally, it cleans the connection, ensuring ease of re-soldering, while providing a protective coating to the wick to prevent oxidation, prolonging shelf life of the wick.

CIRCUITWORKS® FLUX-DISPENSING PENS

RoHS Compliant Available — ITW Chemtronics®

Common Features:
- Chisel-Tip Marker Provides Exact Delivery of Flux to Surface
- Easily removed with appropriate CircuitWorks® Flux Remover Pen

No-Clean Flux Dispensing Pen:
- Applies a Patented Noncorrosive, Halide Free, Organic No-Clean Flux
- Flux Meets Bellcore TR-N-WT-000078 and IPC SF-818 for Surface Insulation Resistance
- Flux Meets ANSI/IPC J-STD-004, Type ROL0

Water Soluble Flux Dispensing Pen::
- Applies a neutral pH organic water soluble flux for rapid soldering
- Flux meets ANSI/IPC J-STD-004, ORH1 Classification
- Easily removed with water

Rosin Flux Dispensing Pen:
- Applies a Noncorrosive Type R Flux
- Flux Meets MIL-F-14256 F Type R and ANSI/IPC J-STD-004, Type ROL0

Pen applies flux with precision and control.

(84879)

LIQUID FLUX FOR LEAD-FREE SOLDERING

RoHS Compliant Available — kester® CONNECTING INNOVATION™

979 series is a VOC-free, no-clean flux formulation for high quality, low-defect soldering of electronic circuit board assemblies. This flux's finely tuned activation system offers the best wetting available in VOC-Free liquid flux technology and the shiniest solder joints. **979 series** also reduces micro-solderballing on glossy laminates and between connector pins. **979 series** will not attack properly cured solder masks or FR-4 Epoxy-Glass laminate and leaves no haze or visible residue behind, including the white powdery residue associated with use of earlier no-clean formulas. The miniscule amount of non-visible residue that remains after soldering is non-conductive, non-corrosive and does not have to be removed.

Mfg. Part No.	Description	Container Size (gallon)	Stock No.	Price 1-9
63-0000-0979	979 VOC-Free No-Clean Liquid Flux	1	96H7581	68.18

(85783)

LIQUID FLUXES

RoHS Compliant Available — kester® CONNECTING INNOVATION™

63-0097-2331

1544 SERIES ROSIN-BASED FLUXES
1544 series rosin-based fluxes are highly active and noncorrosive. Ideal for surfaces that are difficulty to solder. Residue is noncorrosive. Classified as ROM1 per J-STD-004.

Mfg. Part No.	Description	Size (gallon)	Stock No.	Price Each 1-9
63-0000-1544	1544 RA	1	34C5674	89.24
63-0000-0104	104 Flux Thinner	1	34C5670	84.79

WATER SOLUBLE FLUXES
2331-ZX series pH neutral organic flux is for automated and drag soldering process. Residue removal is required. Use soft or de-ionized water for flux removal. Classified as ORH1 per J-STD-004. **2235 series** organic flux is a high-activity flux for surface mount assemblies. Helps reduce skips on bottom side of surface mount pads. Residue removal is required. Use soft or de-ionized water for removal. Classified as ORH1 per J-STD-004.

Mfg. Part No.	Description	Size (gallon)	Stock No.	Price Each 1-9
63-0097-2331	2331-ZX Water Soluable	1	00Z1111	83.05
63-0000-2235	2235 Water Soluable	1	34C5675	90.18

959 series no-clean flux is designed for the wave soldering of conventional and surface mount assemblies. Developed to minimize the formation of micro-solderballs during wave soldering operations. Spray or foam flux application. Bellcore compliant, flux classified as ORL0, per J-STD-004. **977 series** flux is designed for wave soldering of circuit boards, and developed to reduce bottom side micro-solderballing and bridging. The wetting system is designed to allow for a larger process window and can survive longer dwell times in turbulent ship waves. Spray flux application. Bellcore compliant, flux classified as ORL0, per J-STD-004.

Mfg. Part No.	Description	Size (gallon)	Stock No.	Price Each 1-9
63-0000-0959	959 No-Clean	1	34C5672	77.73
63-0000-0977	977 VOC-Free No-Clean	1	34C5673	65.57

FLUX AND LIQUID DISPENSER BOTTLES (CONT.)

Mfg. part no. BC-250 translucent polyethylene dispensing bottle with screw cap and angled spout provides an inexpensive way to wet sponges and dispense liquids at the work bench without waste. **Mfg. part no. SF-250** is a static dissipative version of **mfg. part no. BC-250** and provides electrostatic discharge protection to meet DOD-STD-1686 and MIL-B-81705, Type 2. **Mfg. part no. SF-1601** is the same as **mfg. part no. SF-250** except with a straight spout.

Mfg. Part No.	Description	Capacity (Oz.)	Stock No.	Price Each
● BC-250	Liquid Dispensing Bottle with Angled Spout	8	72K7274	7.25
● SF-250	ESD-Safe Liquid Dispensing Bottle with Angled Spout	8	98H2891	13.50

Mfg. part no. SF-B2HH with natural medium-to-stiff hog bristles that work well for removing difficult, sticky, crusty or viscous materials. Combination of static dissipative jacket and natural material meets ANSI (J-STD-001B).

● SF-B2HH	ESD-Safe Brush Scrub Solvent Dispensing Bottle with Medium Hog Bristle Brush	2	98H2886	17.12

CHEMASK® SOLDER MASKING AGENTS

RoHS Compliant Available

ITW Chemtronics®

- Plastic safe
- Nonflammable
- Ozone safe

Chemask® solder masking agents protect PC boards, plated thru-holes, contacts, pins, posts, terminals and gold fingers during wave soldering. They provide short-term high-temperature protection from molten solder to 515°F/268°C. All Chemask® masks are nonflammable, non-contaminating and will not leave ionic or corrosive residue. Available in convenient squeeze bottles for precision application or in gallons for automated applications.

Mfg. part nos. CM8 and **CM1** Chemask® peelable temporary masking agent is fast-curing and dries tack-free in 30 minutes. Easy-to-use, just peel off when dry. Latex material is compatible with flux systems and stable with cleaning solvents.

CM8 CHV8 CWF8

Mfg. Part No.	Description	Size	Stock No.	Price Each
● CM8	Chemask®	8 oz.	00Z1101	17.04

PLATO® SOLDER TIP CLEANING SPONGES

RoHS Compliant Available

PLATO®

All natural, premium sponges aid in keeping solder tips well tinned and help extend tip life. Removes surface oxides and excess solder from tip while exposing tip point definition. Manufactured from natural cellulose that holds many times its weight in water (expands to 1") and resists abrasion and tearing forces which occur during the tip wiping process. Meets ANSI (J-STD-001B) requirements for low sulphur content and fine porosity. Other sizes available; *go online or call.* **Sold in packages of 10.**

ESD-SAFE CIRCUIT BOARD HOLDERS

Weller®

ESF-120ESD

WBH2

Mfg. part no. ESF120ESD circuit board holding vise is antistatic/ESD-safe making it ideal for soldering, desoldering and reworking. Boards and components are held in place by a cushioned arm. Allows 360° rotation in 15° increments. Adjusts for holding circuit boards up to 6¼″ x 9⅛″ (160 x 235mm).

Mfg. Part No.	Description	Stock No.	Price Each
ESF120ESD	Circuit Board Holding Vise	66F7803	59.20

Mfg. part no. WBH2 circuit board holder is an open-frame, antistatic/ESD-safe design made to work with all Weller's preheaters, including **mfg. part no. WHP1000**, *ordered separately on page 2003*. Lightweight yet stable, it's portable to easily adapt to any application. Ideal for R&D prototyping, production, or component rework. Holds circuit boards up to 10.24″ (260mm) wide x unlimited length. Fitted with a stop pin so x-y positioning can be repeated. Spring loaded arm simplifies board placement and removal.

MAGNA-LITE BUTANE-POWERED TABLETOP TORCH

Weller®

- Fast, reliable Piezo electronic ignition system
- Wind-resistant 2400°F flame
- Adjustable flame length and level of heat output
- Up to 60 minutes continuous use
- Built-in stands holds torch upright for tabletop use
- Flame lock-on allows hands-free operation
- Ergonomic textured rubber grip for comfortable control

Powerful, compact and portable Magna-Lite™ butane-powered tabletop torch is perfectly suited for heat-shrink tubing, fusing rope ends, frozen or rusted locks, nuts and bolts, soldering and brazing, heating and bending thin metal, and many other uses around the home, shop, boat or campsite. Refillable in just 20 seconds using premium butane fuel; *ordered separately below.* Child-resistant safety trigger lock meets Consumer Products Safety Commission (CPSC) guidelines.

MICROTORCH™ MT-51 SERIES

MASTER APPLIANCE

- Produces a Broad Yellow or Blue Pinpoint Adjustable, Wind-Resistant Flame with Temperatures Up to 2500F
- Built-In Self-Igniting Switch
- Meets Consumer Products Safety Commission (CPSC) Child Safety Requirements
- Runs Approximately 2 Hours on a Full Charge (Unit is Shipped Without Fuel)

MT-51 MT-51B MT-51H

MT-51 is a hand held or table top butane-powered Microtorch™. Wide stable base makes it perfect for hands-free use. **Mfg. part no. MT-51** is an open flame torch only. **Mfg. part no. MT-51B** includes 15/16 oz. can of Ultratane butane. Butane under 1 oz.ships without hazardous material charges. **Mfg. part no. MT-51H** is a "2 in 1" open flame torch and flameless heat tool with heat shrink attachment.

BUTANE-POWERED, TABLE-TOP MICROTORCH WITH STABLE BASE

MASTER APPLIANCE

- Built-in self-igniting system includes a safety lock that prevents unintentional ignition, locks for storage
- Stable 3" dia. circular base is perfect for bench-top use
- Butane-powered, eliminates the need for external fuel tanks, costly piping or unsightly hoses
- Large capacity, self-contained, refillable metal fuel tank
- 60 minutes continuous run time with a full charge
- Adjustable broad or pinpoint flame with temperatures up to 2500°F/1300°C

Mfg. part no. MT-30 Microtorch™ is ideal for industrial, institutional, scientific and dental laboratory applications, including shrinking tubing and specialty connectors, soldering, heating and spot drying materials, heating wax and jewelry repairs. Compact, low-profile design is easily moved to any location or conveniently stored in a small space. Size: 5.1" L x 3" W x 3.5" D. Use only Master Appliance® Ultratane® butane fuel; *ordered separately below.*

PRO SERIES COMPOUND-ACTION PLIERS

CRESCENT

Diagonal

Long Nose

Linesman

- Ergonomic co-molded, non-slip grips for added comfort and control
- Patented compound high-leverage design that increases cutting power by 50%
- Chrome vanadium alloy steel for superior strength and durability
- Heat-treated joint rivet for smooth and consistent operation
- Steel spring holds jaws comfortably open
- Induction hardened cutting edges for long life
- ⅓ lighter than standard pliers to help reduce fatigue
- Safety lock keeps pliers securely closed when not in use

Pro series compound-action pliers offer a winning combination of increased power and unparalleled comfort for exceptional ease of use. Advanced compound-action design provides up to 50% more cutting or holding power with the same effort compared to standard pliers. Ergonomically designed grips are 30% wider than those on standard pliers, therby spreading out the load of the grip against the fingers and palm for much improved comfort and added control. Cut capacity: 11 AWG.

Mfg. Part No.	Description	Stock No.	Price Each

COMBINATION SLIP-JOINT PLIERS

CRESCENT

H28N

G210CV

- Sharp bias-cut gripping teeth bite in to hold better for more turning power
- Low-profile riveted joint maintains close tolerances for superior cutting and gripping
- Deeper wire cutter is repositioned closer to joint reducing cutting effort
- Forged alloy steel, accurately machined and spring tempered for strength and durability with less weight
- Bright, polished nickel-chrome plating for improved corrosion resistance
- Knurled handles or non-slip cushion grips for added comfort and control

Refined and improved for maxium strength, durability and performance these combination slip-joint pliers are designed for gripping and turning round objects such as pipes, rods, pins. All feature 2-position curved-style nose.

6-PIECE MINI PLIER SET
Ideal for precision electronic work. Lightweight, ergonomic grip. All pliers are approximately 5" long. Set includes: Micro cutter, Long nose, Bent nose, Flat nose, Fine tip needle nose, Long nose with side cutter. Convenient padded zipper case for tool storage.

5-PIECE MINI PLIER SET
Five-piece set comes organized in a zippered carry case and features soft finish, ergonomic handles for a comfortable grip. Includes: 5" round nose pliers, 4" top cutter pliers, 5" flat nose pliers, 4xxx" diagonal cutting pliers, 4xxx" combination pliers.

5-PIECE FULL-SIZE PLIER SET
The handy pliers in this set are drop forged carbon steel, hardened and tempered for outstanding durability. Precision machine jaws for rigid use. Ergonomically designed double injected handles for a better grip that reduces user fatigue. Set includes: 7" diagonal cutting pliers, 7" combination pliers, 8" long nose pliers, 8" slip joint pliers, 10" water pump pliers.

3-PIECE FULL-SIZE PLIER SET
A set of 3 of the most regularly used pliers. Bi-material cushion grip handles. Drop forged, heat treated steel. Fully polished heads. Contents: 7" Diagonal pliers, 8" Combination pliers, 8" Long nose pliers.

3-PIECE VDE PLIER SET
Chrome vanadium steel pliers feature 2-color handles with slip guard. Individually tested to 10,000V. Meet VDE 0682-0201, IEC 60900. Set includes 160mm (6¼") diagonal pliers, 180mm (7") combination pliers, and 200mm (8") long nose pliers.

PROFESSIONAL INSULATED PLIERS AND CUTTERS

wiha Premium Tools

32838

32806

- Meet 10,000V test standards — Certified to 1000VAC or 1500VDC
- Meets EN/IEC 60900, ASTM F-1505-01 and according to VDE 0682/part 201, NFPA70E insulation standards
- Drop-forged from special tool steel
- Chrome finish for long lasting corrosion protection
- Cutting edges additionally induction hardened
- Soft grip ergonomically designed handle body
- Safety slip guard

Mfg. part no. 32838 insulated 8" high-leverage diagonal cutter. Semi-circular; low wear lap joint, riveted and able to withstand high levels of load. Lightweight, clean cutting action, lay-on joint, and optimized power transmission. Ideal for soft, hard and piano wire. Copper cutting capacity: #4 AWG.

2400 SERIES MAGICSENSE® PRECISION PLIERS

Erem®

Needle-Nose

Flat-Nose

- Ergonomic, non-slip grips for added comfort and control — ESD safe
- Shatterproof, extruded 100% machined Eremadium® tool steel for strength and durability
- Induction hardening process provides cutting edge Rockwell-hardness of 64-65 HRc
- Patented, unbreakable internal Magic® spring maintains constant opening/closing force operation
- Erem Maximum Opening Stop (EMOS) limits handles from opening to help eliminate user fatigue
- Interlock screw joint system delivers wobble-free operation and avoids blades overlapping

2400 series MagicSense® precision pliers deliver the ultimate in comfort, control and performance. These ergonomically designed pliers feature a new co-molded grip material that furnishes a soft yet solid feel of control for more comfort and less fatigue. The heat-treated hardened blades provide very high-strength, perfect alignment and long tool life. Select from fine-point needle-nose pliers in choice of smooth or serrated jaws and flat-nose pliers with smooth jaws.

ULTRATECH POWER PRECISION SCREWDRIVER

GENERAL

- Quick-change chuck for effortless bit changes
- 10+ hours of power for long run-time
- 100+ RPM motor with forward and reverse controls
- Super-torque drive — delivers ~2.43 in.-lb. of torque
- Ergonomic design for comfort
- Includes 6-pc.1/8" precision bit assortment
- 1-year manufacturer's warranty

Mfg. part no. 500 UltraTECH™ power precision screwdriver is ideal for ultra-delicate applications such as computer and electronics repair, industrial applications, hobbies and crafts. Its ergonomic handle design provides multiple grip positions to accommodate a variety of working situations. Comes complete with 6-pc. 1/8" drive precision bit assortment: 1/16", 1/8" slotted, #00, #0 Phillips, and T5, T6 Torx. Operating voltage range: 1.5 ~ 3.0 VDC (two "AAA" alkaline batteries included).

WIRE STRIPPERS

WIRE STRIPPERS AND CUTTERS

JONARD INDUSTRIES CORP.

Mfg. part no. JIC-1022 wire stripper and cutter is designed to strip and cut the most commonly used stranded and single wire gauges 10 to 22 AWG and 2-3 mm fiber jackets. **Mfg. part no. JIC-1626** is designed for 16-26 AWG wire and **mfg. part no. JIC-2030** for 20-30 AWG wire. Other features include a coil spring opening to reduce fatigue, wire looping, bending holes conveniently located, black oxide finish, locking mechanism, and cutting surfaces that are hardened, tempered and ground for superior performance. Length: 6 3/4". Wt.: 4.5 oz.

MULTI-PURPOSE COMBINATION WIRE STRIPPING AND CUTTING TOOLS

KLEIN TOOLS®

1010

1011

Mfg. part no. 1010 long-nose multi-purpose tool strips, cuts and crimps. Easily strips and cuts 10 – 22 AWG (4mm² – 0.34 mm²) wire. Crimps 10 – 22 gauge insulated and non-insulated terminals and 7 to 8mm ignition terminals. Cleanly shears bolts in sizes 4-40, 5-40, 6-32, 8-32, 10-32, 10-24. Designed with cutters and strippers in front of the pivot for maximum ease-of-use in reaching into tight places. Narrow, serrated plier nose to pull, loop, and bend wire. Long, curved cutting blade. Blue, plastic-covered cushioned handles for comfort.

Mfg. Part No.	Description	Stock No.	Price Each
1010	8¼"L Multi-Purpose Stripper/Cutter/Crimper	94F5755	38.03

Mfg. part no. 1011 multi-purpose wire stripper/cutter strips and cuts 10 – 20 AWG (4mm² – 0.5mm²) solid and stranded wire. Easily strips six standard wire sizes without nicking wire. Its smooth scissors action of ½" (13mm) wide cutter makes clean cuts with little effort. Serrated nose jaws for bending, shaping or pulling wire and holes for looping wire ends. Tool is spring-loaded for self-opening action. Blue plastic-coated handles for maximum comfort.

1011	6⅛"L Multi-Purpose Wire Stripper/Cutter	50B4624	22.26

KNIPEX®

11 02 160

12 12 02

12 21 180

12 40 200

12 42 195

12 62 180

Mfg. Part No. 11 02 160 WIRE STRIPPER
Two-colour dual component handles. Special tool steel, oil-hardened and tempered. For single, multiple and fine stranded conductors with plastic or rubber insulation max. 5.0 mm dia. or resp. 10.0 mm² cable cross section. Easy adjustment to the required diameter of solid or stranded wire with knurled screw and lock nut.

Mfg. Part No. 12 12 02 UNIVERSAL INSULATION STRIPPER
Comfortable two color dual component handles, lightweight construction and smooth operating mechanism for repetitive work. Easily strips difficult insulating materials such as Teflon®, silicone, Radox®, Kapton® and rubber, as well as, multilayered insulations. Positive stripping due to precise shape of blades. Includes cable guide.

Mfg. Part No. 12 21 180 AUTOMATIC INSULATION STRIPPERS
Strong light-metal construction. Replaceable blades of special steel with 4 and 6 positions responsible for different wire cross sections. Positive stripping due to precise shape of blades and length stop. Clamping jaws hold wire firmly and a spring leads the the stripper back to the starting position.

➤ CONTINUED ➤

WIRE STRIPPERS (CONT.)

Mfg. Part No. 12 40 200 SELF-ADJUSTING INSULATION STRIPPER
Light, fibreglass reinforced plastic. Smooth operating mechanism with easily interchangeable blades and plastic jaws. For single, multiple and fine stranded conductors with plastic or rubber insulation adjusts automatically to the respective cable cross-section which prevents damage to the conductor. Cutting depth can be adjusted for different insulation materials with wire cutter for copper and aluminium wires, multiple stranded up to 10 mm² and single stranded up to 6 mm².

Mfg. Part No.12 42 195 KNIPEX MULTISTRIP 10, SELF-ADAPTING UNIVERSAL INSULATION STRIPPER
Tough, fiberglass reinforced plastic with ergonomic handle. Fully automated adjustment to the respective cross-section-depending insulation thicknesses in a range from 0.03 - 10.0 mm².
Unique self-infeeding of the cutting depth preventing damage to the conductor. Strips cables with insulating materials like Teflon® and Radox®. Wire cutter for copper and aluminum wires, multiple stranded up to 10 mm² and single stranded up to 6 mm². Interchangeable blades block and length stop.

Mfg. Part No. 12 62 180 SELF-ADJUSTING INSULATION STRIPPER
Tough, fiberglass reinforced plastic with ergonomic handle. Compact tool for single, multiple and fine stranded cables of 0.2 up to 6.0 mm² with standard insulation adjusts automatically to the respective cable cross-section. With wire cutter for copper and aluminum wires up to 2.5 mm² with adjustable length stop from 6.0 - 18.0 mm for constant stripping length. Easily exchangeable blades.

GripP 10 AND 20 AWG WIRE/CABLE STRIPPERS

GREENLEE. COMMUNICATIONS A Textron Company

- Non-scoring stripping
- Smooth wire cutting
- Ergonomic design
- Rubber-embedded, non-slip handles

PA1123 Combo Pack

PA1117

GripP 10 and 20 wire/cable strippers combine ergonomics and versatility. Strips the most common types of electrical and hook-up wire, and multiconductor and flat cable. Works on Romex household cable too, but not for use on steel or armored wire and cable. Head of tool and handles are designed at an optimum 22 degree angle to prevent awkward wrist bends. Contoured wire stripping areas are precision ground for accuracy. Features spring-loaded closure, gripping jaws on front of tool, screw cutter and wire loops embedded in frame. *Order* **mfg. part no. PA1123** *economical combo pack separately below to get both GripP strippers.* ProGrip fiber optic stripper **mfg. part no. PA1171** has cavities for 2.0 - 2.4 mm outer jacket, 2.0 - 3.0 mm loose tube, 2.8 - 3.0 mm outer jacket, 900 µm buffer insulation, and 900/125 µm and 250/125 µm buffer/acrylate. **Mfg. part no. PA1177** has cavities for 2.0 mm outer jacket, 900 µm buffer insulation, and 250 µm buffer/acrylate.

INDUSTRIAL WIRE STRIPPER/CUTTERS

Xcelite®

104CG

105SCGV

- Cuts and strips solid and stranded wire
- Red plastic-coated cushion grips for comfort and maximum leverage

103SV

Mfg. part no. 104CG wire stripper/cutter features wide size-range bolt cutter, fast scissors-action, up-front wire cutting/stripping, pliers nose for wire pulling and bending capabilities, hardened pivot joint bushing and crimp stations.

Mfg. Part No.	Description	Stripping Range (AWG)	Stock No.	Price Each
104CG	8¼" Wire Stripper/Cutter with Scissors-Action	22-10	70B1218	33.20

Mfg. part no. 101SV cuts and strips both solid and stranded wire cleanly, neatly. Adjustable screw stop for different wire sizes. Spring-equipped self-opening handles.

105SCGV	6 " Wire Stripper/Cutter with Scissors-Action, Spring and Lock	22-10	10B1285	19.40

(5698)

SELF-ADJUSTING COMBINATION WIRE STRIPPER

Xcelite®

- Capable of stripping wires from 34 to 8 AWG without adjustment
- Cuts conductors: 16 AWG Solid, 8 AWG Stranded
- Easily interchangeable stripping blades enable precision stripping
- Strips a wide range of insulation types , PVC to PTFE
- Suitable for production of field service work
- Fine insulation can be stripped without damage to the conductor
- Ergonomic design is lightweight, strong and comfortable — features a sculpted shape, soft grip main handle
- Low-friction moving handle, optimized grip span, and angled head
- Made tough — tested to over 150,000 cycles

Mfg. part no. SAS3210 self-adjusting combination wire stripper is ideal for cutting and stripping a wide variety of jacketed wire and cable including PVC, conduit wire, mains cable, equipment wire and communications cable. Standard straight blade supplied with tool. **Mfg. part no. SAS3210TRB** V-blade for stripping Teflon®, PTFE and other hard insulation materials from 32 AWG to 10 AWG.

CABLE STRIPPERS

SWIVEL-BLADE® CABLE STRIPPERS

45-128 45-129 45-144

For both end or center stripping of coaxial and power cable. Strips insulation up to 0.156″ thick including PVC, rubber, Neoprene, Teflon®, polyethylene, nylon, Kapton, and fiberglass. Cuts circumferentially and transversely.

Mfg. Part No.	Description	Stock No.	Price Each
45-128	0.25-0.75″ O.D.	35F2461	46.65
45-129	0.75-1.50″ O.D.	59F1117	58.03
45-144	0.125-1.75″ O.D.	01F2586	74.61

(5692)

COAX CABLE STRIPPERS

45-526

Adjustable coax strippers for 2- or 3-step stripping. Each blade is individually adjustable for precision stripping. High quality blades provide a long stripping life. All models strip RG-6, RG-59 and RG-58 coax. Also works on RG-6 Quad cable in removing the outer shield. Replacement blade cartridges are available; *go online or call.*

Mfg. Part No.	Strip Capability	Stock No.	Price Each
45-520	3-Step, 0.24″ and 0.24″ Strip	93F6621	28.31
45-526	2-Step, 0.24″ Strip — Perfect for Most Compression Connectors	52F9338	28.61
45-528	3-Step, 0.24″ and 0.24″ Strip	52F9340	52.18

(7852)

COAX/UTP CABLE STRIPPERS

45-165

These coax/UTP cable strippers perform nick-free 2-level stripping via adjustable blades, 0.24″ step strip. Also includes a slitting blade and notch — three blades in total. *Order replacement blade sets separately below.*

THERMAL STRIPPERS FOR OPTICAL FIBER

- Compact bench-top design
- Adjustable and fixed blade versions
- Accommodates different fiber coatings and cladding sizes
- Adjustable temperature range: 60-200° C, or ambient
- Adjustable heat time settings: 0-30 seconds (2 sec. increments)

TSAB-40

Ericsson Style Platform

Fitel/Fujikura Style Platform

Universal Clamp

Thermal strippers are compact, easy-to-use optical fiber stripping units designed to thermo-mechanically remove coatings from optical fibers. The heater is adjustable up to 200°C. The higher temperature helps facilitate stripping extremely difficult and baked-on coatings and in some cases can even remove fluoroacrylate undercoatings. **Mfg. part no. TSAB-40** adjustable blade thermal stripper supports optical fibers with cladding diameters from 40μm to 1000μm,

➤CONTINUED➤

THERMAL STRIPPERS FOR OPTICAL FIBER (CONT.)

and with buffer diameters up to 1200μm. **Mfg. part no. TSFB-125** fixed blade thermal stripper supports optical fibers with 125μm cladding and buffer diameters from 250μm to 900μm. External power supply: 100-240VAC, 47-63Hz. Dimensions: 5.1″W x 2.9″D x 2.8″H (129.5 x 73.5 x 71mm).

Mfg. Part No.	Description	Stock No.	Price Each
TSAB-40	Thermal Optical Fiber Stripper with Adjustable Blade	34R2404	2769.00
TSFB-125	Thermal Optical Fiber Stripper with Fixed Blade	34R2405	2535.00

ACCESSORIES

For a more efficient stripping and splicing process, order the corresponding platforms for use with Ericsson®, Fitel® or Fujikura® fusion splicers with fiber holder. For large diameter fibers (LDF) and all others without fiber holders, order **mfg. part no. TSUC-40** universal clamp for stripping applications where a connector is attached to the fiber.

ROUND CABLE STRIPPER

- Fast and precise jacket removal
- Triple action cutting tool
- Simple, versatile, easy-to-use

CST-1900

CST-7915

Mfg. part no. CST-1900 is designed for fast and precise jacket removal of PVC, rubber, PE and other jacket materials, and works well on round cable with diameters ranging from 3/16″ to 1 1/8″ (4.5-29 mm). This triple action tool cuts longitudinally for end stripping, spiral for end stripping and mid-span cuts, and circular for jacket removal. **Mfg. part no. CST-7915** replaceable cutting blade, *ordered separately below*, is spring-loaded, adjustable for various cable diameters, provides a 90° blade rotation and is designed for long life.

Mfg. Part No.	Description	Stock No.	Price Each
CST-1900	Round Cable Stripper	75R7645	65.15
CST-7915	Replaceable Cutting Blade	75R7646	16.24

FIBER OPTIC TOOLS

RoHS Compliant Available

Cable Seath Stripper and Ring Tool

Fiber Optic Stripper

Fiber Optic Stripper Three Hole

Electrician Scissor

Cable sheath stripper and ring tool slits the cable jacket lengthwise and around the circumference of the cable. Good for copper cable and tight-buffer optical fiber cable. Adjustable for 0.018″ or 0.31″ thick insulation. Stripper. **Mfg. part no JIC-125** is used for stripping the 250 micron coating from the cable down to the 125 micron glass fiber. **Mfg. part no JIC-375** strips the 2-3 mm fiber jacket down to the 900 micron buffer coating. The second hole strips the 900 micron buffer coating down to the 250 micron coating and the third hole is used to strip the 250 micron cable down to the glass fiber without nicks or scratches.

Mfg. Part No.	Description	Stock No.	Price Each
JIC-4366	Cable Sheath Stripper and Ring Tool	85C2633	70.72

ELECTRICIAN'S SCISSORS

Electrician scissor is made of high carbon steel with a special hardening process for greater durability and double plated chrome over nickel for that professional look. Scissor is notched (for 19 & 23 gauge wire) and one blade is serrated. These scissors are the perfect tool for telephone and electrical work, holding their edge longer when used on fiber cables and Kevlar based cables.

● ES-1964	Electrician Scissor	71K3589	12.97
● ES-1964ERG	Ergonomic Electricians Scissor	77R1923	11.85

CST PRO COAXIAL CABLE STRIPPER AND ACCESSORIES

RoHS Compliant Available

GREENLEE. COMMUNICATIONS A Textron Company

PA1283

CST Pro coaxial cable stripper can be used in the professional broadcast industry as well as home integration applications. **Mfg. part no. PA1283** CST Pro 2-level-cut cable stripper is ideal for stripping coaxial cable including RG6, RG6QS, RG59, as well as CATV "F" connectors and mini's. Cam adjustment provides a precise hold on cable. The dual roller mechanism centers cable perfectly and applies equal pressure against blades to eliminate distortion of cable jacket during stripping process. Patent-pending reversible rollers easily adjust for various sizes of cable, including mini's. **Mfg. part no. PA2282** quick-change die/blade cassette helps reduce set-up time. Cassette securely holds a fixed blade for 0.25″ pre-strip lengths (braid); blade depth is individually adjustable. Manufacturer's lifetime warranty on tool frame, one-year manufacturer's warranty on die/blade cassette. *Order replacement die/blade cassette and roller sets separately below.* Other CST Pro coaxial cable strippers and accessories are available; *go online or call.*

CJS100

CJS200

Mfg. part no. CJS100 cable jacket stripper is a precision stripping tool for removing the sheath from signal, telephone, audio-visual, instrumentation and data transmission copper and fiber optic cable. Adjustable 10-position indexed blade height adjustment wheel provides accurate and repeatable stripping results. Simply squeeze to open the stripping cavity, insert cable, rotate once, remove from cable and pull off the scrap insulation sheath. Stripping range: 0.10″ to 0.43″ diameter; 1.0mm thick insulation. Made tough from impact-resistant nylon. Tested to over 50,000 cycles. Safe, rounded, pocketable and lightweight design. Size: 3.6L x 1.6″H.

Mfg. Part No.	Description	Stock No.	Price Each
CJS100	Cable Jacket Stripper	30H6104	28.00

Mfg. part no. CJS200 professional stripping tool for round cable of all insulation types. Features two interchangeable cable retention guides giving it an incomparable stripping capacity of 0.18" to 1.57" in one tool. Both cable guides are included. Positive locking positions for circular, lengthways, and spiral cuts. No special tools required to interchange cable guides. Safety strap (not included) can be attached to the eyelet at the base of the tool to prevent accidental dropping. Ergonomic design. Tested to over 100,000 cycles. **Mfg. part no. CJS200B** replacement blade available; go online or call.

CSK SERIES COAXIAL WIRE STRIPPERS

Xcelite®

2CSKR Two-Step Wire Stripper Kit

2CSKCATV

CSK series two-step and three-step coaxial wire stripper kits are ideal for users of many different cable sizes. These fast, accurate coax-stripping systems strip cable from 0.10" to 0.30" in thickness (RG178 to RG6) in seconds. Also removes dielectric, braid and outside insulation simultaneously or separately. Kits available with different color-coded cassettes designed to meet exact stripping specifications. Kits include four V-blocks, cassette (type indicated in table below), hex wrench to adjust cable size and instructions for most applications. **Note:** three-step kit is not recommended for cable with hollow (RG 62) or foam dielectrics; two-step kits should be used instead. Replacement blade cassettes are available; *go online or call.*

TWO-STEP COAXIAL WIRE STRIPPER KITS — STRIPPING RANGE 0.1" TO 0.3"

Mfg. Part No.	Cassette Type/Color	Blade Spacing in. (mm)	Stock No.	Price Each
2CSKR	2C-R/Red	0.24 (6.1)	46F4184	55.20

CRIMPING PLIERS

KNIPEX®

97 43 200

97 51 10

97 52 36

97 53 04

CRIMP SYSTEM PLIERS
- Includes service tools (hexagonal key, open end wrench, screws and nuts) in a plastic case
- Almost parallel crimping performance
- Repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- Ergonomically designed handles and factory calibrated
- Wide range of different crimp profiles for nearly all common crimp connections
- Crimp dies not included

CRIMP PLIERS FOR WESTERN PLUGS
- Professional tool for cutting and stripping unshielded ribbon telephone cables
- For crimping 6- and 8-pole Western plugs type
- Exact crimping process due to parallel crimping
- Repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- With length cutter and dismantling knife for ribbon cables 6 and 12 mm length

PRECIFORCE®, CRIMP PLIERS
- Repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- Factory calibrated
- Lightweight, short design and ergonomically shaped handles

SELF-ADJUSTING CRIMP PLIERS
- For crimping end sleeves (ferrules) according to DIN 46228 parts 1 + 4
- Lateral loading of the end sleeves (ferrules) into the tool
- Simple handling as a result of self-adjustment to the size of the end sleeve (ferrule)
- Square crimping for optimum contact areas in the clamp connection
- Repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- Factory calibrated
- **Mfg. part no. 97 53 08** crimping from 0.08 - 10.0 mm² in one profile, parallel loading up to 2.5 mm²
- **Mfg. part no. 97 53 14** heaxagonal crimping for optimum positioning in confined areas

CRIMP PLIERS FOR END SLEEVE FERRULES
- For crimping end sleeves (ferrules) according DIN 46228 parts 1 + 4 from 0.25 to 16 mm²
- Crimping in marked half-round dies for secure connections between the sleeve and the conductor 9 Deep troughs with conical side faces

All pliers have high or optimum transmission force for reduced user fatigue.

ERGOCRIMP PLUS CRIMPING TOOL FRAME AND INTERCHANGEABLE DIE SETS

Xcelite®

- Patented ergonomic design makes this tool easy and comfortable to use
- Lowest possible handle forces required
- High-quality construction with tight tolerances
- Superior crimp die design provides the highest quality crimp results
- High-strength, through-hardened alloy steel
- Guaranteed for 50,000 cycles
- Precise eccentric adjustment for consistent performance for life of tool

Tool Frame with Die Set Installed

ErgoCrimp Plus® crimping tool frame and interchangeable die sets can handle the widest range of crimping applications. Tool frame features a patented design that provides up to 50% better mechanical gain than most other crimpers, resulting in the lowest handle forces possible. Lower handle force results in elevated productivity and fewer work-related injuries. Frame length: 10″. *Order crimping tool frame and die sets separately below.*

63050	High-Leverage Cable Cutter	94F5796	52.99
J63050	Journeyman™ High-Leverage Cable Cutter	83H2074	64.16

Mfg. part no. 63020 Klein-Kurve® multi-cable cutter features hardened steel precision cutting blades for long life. Copper curved cutter cleanly cuts round copper cable without compression or frayed ends. Anvil cutter for solid and stranded copper wire up to 12 AWG and stainless steel up to 0.032″ diameter. Mild steel cutter for conductors up to 0.08″ diameter. Curved cutter for solid and stranded copper wire up to 8 AWG, multi-conductor cable up to ½″ diameter and coaxial cable RG-6 Quad, RG-59, and RG-62. Red double-dipped grips for comfort. Coil spring provides fast self-opening action. Holes for looping and bending wire. Handy closure lock for convenient storage. Shearing size: 6-32 and 8-32. Overall length: 7″.

63020	Klein-Kurve® Multi-Cable Cutter	06J9577	40.19

(5799)

RATCHETING CABLE CUTTER

KLEIN TOOLS®

- Unique ratchet action holds cable tight, allows rapid, straight cuts
- Hold-open spring speeds cutting action
- Quick-release lever opens blade during operation
- Finger-formed, plastic-covered handles for comfort and gripping power
- Compact, lightweight design
- Locks in closed position for safe pouch carrying

Cleanly cuts copper up to 400 MCM, as well as aluminum and multiconductor cable up to 600 MCM. Not designed for cutting steel or ACSR. Handle color: red. Overall length: 10″.

Mfg. Part No.	Description	Stock No.	Price Each

CABLE AND WIRE ROPE SHEARS

KNIPEX

***Mfg. Part No. 95 05 165 CABLE SHEARS**
- For universal use; cuts cables up to 10 mm dia. / 24 mm²
- With opening spring and locking lever
- Blades made of stainless steel oil-hardened and tempered

***Mfg. Part No. 95 11 165 CABLE SHEARS**
- For cutting copper and aluminum cables, single and multiple wire up to 1/0AWG
- Universal use for dismantling and stripping
- Precision ground, hardened blades
- Clean and smooth cut without crushing and deformation

****Mfg. Part No. 95 05 190 COMBINATION SHEARS**
- For cutting cardboard, plastics, aluminum, brass and copper foils
- With opening spring and locking lever
- With guard and adjustable screw joint
- Blades made of stainless steel oil-hardened and tempered

Mfg. Part No. 95 32 038 CABLE SHEARS (RACHET ACTION)
- For cable diameters up to 38mm, handles can be positioned at an angle or 550 mcm
- Heavy duty telescopic handles made of oval aluminum tubing; extendable up to 770 mm; retractable down to 570 mm
- Replaceable cutting head
- Adjustable bolted joint

Mfg. Part No. 95 61 190 WIRE ROPE CUTTER
- For medium hard wire up to 6 mm dia.
- With opening spring and locking lever
- Cutting edges additionally induction hardened
- Special blade geometry prevents the wire rope fanning out

MAGICSENSE® PRECISION CUTTERS

Erem®

- Ergonomic, non-slip grips for added comfort and control — ESD safe
- Shatterproof, extruded 100% machined Eremadium® tool steel for strength and durability
- Induction hardening process provides cutting edge Rockwell-hardness of 64-65 HRc
- Patented, unbreakable internal Magic® spring maintains constant opening/closing force operation
- Erem Maximum Opening Stop (EMOS) limits handles from opening to help eliminate user fatigue
- Interlock screw joint system delivers wobble-free operation and avoids blades overlapping

MagicSense® precision cutters deliver the ultimate in comfort, control and performance. These ergonomically-designed cutters feature a new co-molded grip material that furnishes a soft yet solid feel of control for more comfort and less fatigue. The heat-treated hardened blades provide very high-strength, perfect alignment and long tool life.

PRECISION CARBIDE TIP CUTTERS

Erem®

576TX

503ETST

- Precision cutter blades fitted with carbide inserts to cut MP35M stainless wire (0.004″/0.10mm to 0.020″/0.50mm dia.) found in stents, catheters and guide wires
- Super-full-flush cut for critical medical applications
- Extruded 100% machined Eremadium® tool steel for strength and durability
- Patented internal Magic® spring maintains constant opening/closing fatigue-free operation
- Erem® Maximum Opening Stop (EMOS) limits handles from opening to prevent excessive hand spread
- ESD safe, ergonomic cushion grips for more comfort and protection
- Interlock screw joint system delivers wobble-free operation and avoids blades overlapping

Carbide tip precision cutters deliver the ultimate in comfort, control and performance necessary for demanding medical applications. Swiss-made for superior quality, precision and reliability. **Mfg. part no. 576TX** diagonal tip carbide cutter features a tapered relieved head that reaches into tight places. Also cuts other malleable wire up to 0.008″ (0.20mm) diameter. **Mfg. part no. 503ETST** angled tip oblique head carbide cutter is angled at 30° to ease stress on user's wrist.

CUTTERS – WIRE • CUTTERS – KNIFE

DIAGONAL CUTTING PLIERS

KNIPEX®

DIAGONAL CUTTERS
- High quality diagonal cutter for all-round use and precise workmanship for long service life
- Precision cutting edges for soft and hard wire
- Clean cutting at cutting edge tips; also in case of thin copper wires
- Cutting edges additionally induction hardened, cutting edge hardness approx. 62 HRC
- Narrow head style for use in confined areas
- Vanadium electric steel, oil-hardened and tempered
- DIN ISO 5749

HIGH LEVERAGE DIAGONAL CUTTERS
- With forged-on axle for heaviest duty
- Suitable for all types of wire including piano wire
- High cutting performance with minimum effort due to optimum co-ordination of the cutting edge angle, Transmission ratio and ergonomic handle shape
- Precision cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC
- High performance chrome vanadium steel, oil-hardened and tempered
- Length 250 mm: long diagonal cutter is suitable for copper conductors up to 16 mm² and aluminium conductors up to 35 mm²
- DIN ISO 5749

ELECTRONICS DIAGONAL CUTTERS
- Precision pliers for ultra fine cutting work with precision box joint
- Low-friction double spring for gentle and even opening
- Polish or mirror polish finish with a fine film of oil offer rust protection - no peeling chrome
- Cutting edges additionally induction hardened, cutting edge hardness approx. 62 HRC
- Special tool steel, oil-hardened and tempered
- DIN ISO 9654

FASTBACK FLIP POCKET AND SLIDING UTILITY KNIVES

Milwaukee

- Tool free blade change
- Wire stripper up to 10 ga.
- Integrated gut hook

Fastback™ utility knife is designed to activate the blade 3X faster than a 2-handed opening for easy activation. Sliding utility knife features a side activated slide switch to reduce the risk of exposing the blade accidentally. Complete with rubber overmold to increase comfort and reduce hand slippage. Both include a tool free blade change for fast efficient adjustments. The integrated gut hook and wire stripper also increase utility.

UTILITY SHEARS

Wiss®

WEZSNIP W8TA W912 W812

Mfg. part no. WEZSNIP Easy Snip utility shear features strong, corrosion-resistant 4″ long stainless steel blades with rounded points. Textured, molded handles for secure, comfortable grip. Spring assist action minimizes fatigue. Wire cutting notch in lower blade. Thumb latch secures blades closed for storage.

Mfg. part no. W8TA utility shear features take-apart blades for easy cleaning. Strong, corrosion-resistant stainless steel 4″ long blades with rounded points. Black plastic handles are dishwasher safe.

Mfg. part no. W912 shop shear features serrated lower blade for better grip on materials being cut. Cutting notch on lower blade for rope and twine. Safety point on 4¼″ long blades. Adjustable pivot to change cutting tension for best feel. Black, hard plastic handles clean easily.

Mfg. part no. W812 8½″ home and craft scissor features corrosion-resistant, stainless steel 3½″ long blades with sharp points. Straight blades can be sharpened. Adjustable pivot to change cutting tension for best feel. Red, hard plastic handles with Soft-Touch finish offer high leverage.

Mfg. Part No.	Description	Stock No.	Price Each
WEZSNIP	8¾″ Easy Snip Utility Shear	84K0499	14.82
W8TA	8″ Take-Apart Utility Shear	84K0500	18.56
W912	10″ Shop Shear	84K0502	18.51
W812	8½″ Home and Craft Scissor	84K0501	11.04

ELECTRONIC SHEARCUTTERS

Xcelite®

170M 1178M

Carbon steel electronic shearcutters with easy-grip molded red handles. Superior blade by-pass shear cutting action is designed to cut with less effort. 5″ shears flush-cut soft wire up to 20 AWG. 6″ shears flush-cut wire up to 14 AWG. Heavy-duty shears offer maximum durability for IC pins, cable and harnesses. **Mfg. part nos. 175M, 175D, 2178M** and **2178D** feature safety clips to help prevent flying leads.

Mfg. Part No.	Description	Stock No.	Price Each
170M	5″ General-Purpose, Low-Profile Shearcutters	50F172	7.10
175M	5″ General-Purpose, Low-Profile Shearcutters with Safety Clips	50F4002	8.10
1178M	6″ Heavy-Duty Shearcutters	96F8902	12.10
2178M	6″ Heavy-Duty Shearcutters with Safety Clips	50F4003	14.50
ELECTROSTATIC DISSIPATIVE (ESD) MODELS Feature static-dissapative black grips to help reduced mechanical shock delivered to the work.			
170D	5″ General-Purpose, Low-Profile Shearcutters with ESD Grips	92F6157	7.50
175D	5″ General-Purpose, Low-Profile Shearcutters with Safety Clips, ESD Grips	52F5705	9.10
1178D	6″ Heavy-Duty Shearcutters with ESD Grips	96F8900	14.60
2178D	6″ Heavy-Duty Shearcutters with Safety Clips, ESD Grips	66F2965	16.00

DX-250 AND DX-350 SERIES PROGRAMMABLE, DIGITAL FLUID DISPENSER/CONTROLLERS

RoHS Compliant Available

METCAL

TÜV Rheinland

DX-250, DX-255

DX-350, DX-355

- Dispenses low, medium and high-viscosity fluids accurately and consistently
- Adjustable vacuum-driven "suck-back" to control material "tailing" and waste
- Large, clearly marked air pressure and vacuum control knobs
- High-visibility LCD display panel with back lighting
- Universal power supply with snap-on plug for worldwide use
- Multiple units can be stacked and fastened on top of each other to conserve workspace
- One year manufacturer's warranty
- CE complaint, TUV approved

Productivity-focused **DX-250/255** and **-350/355 series** digital dispenser/controllers are highly-responsive air pressure and vacuum management system, coupled with a digital timing circuit, to provide consistent and repeatable fluid dispensing and material waste control. **DX-250/255 series** units feature user-friendly firmware for easy task set-up. **DX-350/355 series** units feature user programmable manual purge and automatic dispense cycle settings, 10 programmable memories for storing and recalling most frequently used dispensing cycle timing, "Teach" mode for determining the dispensing time required when dispensing output is unknown, tactile-responsive user programming buttons and a digital pressure/vacuum readout. All units come complete with syringe holder, foot switch, air-line holder, 10cc receiver head assembly, sample dispensing needles, fitting and air inlet tubing kit, 100-240VAC universal power adapter and user guide. *Order additional receiver head assemblies separately below. Order additional syringes separately online or call.*

Specifications	DX-250 Series	DX-350 Series
Cycle Rate	600 cycles/minute	1200 cycles/minute
Digital Timing Range	0.020 - 60.00 seconds	0.008 - 60.000 seconds
Cycle Modes	Timed, Purge (Manual)	Timed, Interrupt, Teach, Purge
LCD Display Panel	16"W x 2"H	20"W x 4"H
Vacuum Force	16" (406mm) of Hg	
Timing Repeat Tolerance	+/- 0.001%	
Input Voltage	100-220VAC	
Input Frerquency	50-60Hz	
Dimensions and Weight	7"H x 6"W x 6.5"D; 2.6 lbs.

HEAT-RESISTANT, PRECISION POINTED TIP TWEEZERS

- Anti-glare finish
- Synthetic heat-resistant pointed tips to 480° F (250° C)
- Acid-, solder-, and rust-resistant
- Non-magnetic
- Waterproof
- ESD safe

249SA Fine Pointed Tips, Straight

258SA Very-Fine Pointed Tips, Straight-Relieved

Professional-quality, Swiss-made, "special" stainless steel/PPS tweezers are perfect for conventional and precision handling of small components, fiber optics and wires. Ideal for tasks in microelectronics industry, labs, medicine and other applications where high precision is required. Choice of straight fine or straight-relieved very-fine pointed tips. Serrated grips provide more control.

FIVE STAR COBALTIMA® EXTREME PRECISION MINIATURE TWEEZERS

COBALTIMA® tweezers are made from a patented alloy containing Cobalt for added strength and corrosion resistance to acids. COBALTIMA® is harder than stainless steel and is anti magnetic. Resistant to temperatures up to 500°C (932°F). Highly recommended for autoclave sterilization. All tweezers have radiused inside edges and outside finger serrations for positive gripping.

REPLACEABLE TIP TWEEZERS

EXCELTA CORPORATION

Carbofib is a teflon base material with carbon fibers added. Carbofib is conductive with a surface resistivity of 103 Ω-cm, and temperature resistant up to 121°C (249°F). Stainless steel antimagnetic body with screw on replaceable tips. **Delrin** tips have outstanding resistant to chemicals and solvents. They are electrically insulative and resistant to temperatures up to 85°C (185°F). Stainless steel antimagnetic body with screw on replaceable tips. Excellent for clean room use. **PEEK (Polyetheretherketon)** is a high temperature thermoplastic with excellent chemical resistance. Inert to all common solvents, it resists a wide range of inorganic liquids, and is widely used with semi-conductors. It has a working temperature of 249°C (480°F). Lightweight, non-magnetic aluminum body. **Copolymer** tips are a special blend of static dissipative plastics without the use of carbon fibers. Surface resistivity of 1010 Ω-cm, temperature resistant to 90°C (195°F) and are silicon and chloride free. Stainless steel antimagnetic body with screw on replaceable tips. ESD and clean room safe.

TM-500 INTELLITWEEZE® RECHARGEABLE R-C-L TWEEZERMETER™

EXCELTA CORPORATION

- Operating temperature: 0 °C to +55 °C
- Battery type: 3.7V LiPO rechargeable 150mAH
- Battery life (continuous): 80 Hours typical, 2 hrs. charging cycle
- Electromagnetic compatibility (EMC): FCC 15 part B, SE
- Size: 3.94 x 0.9 x 1.5"
- Weight: 1.9 oz.
- Manufacturer's warranty: 1 yr.

IntelliTweeze® Rechargeable R-C-L TweezerMeter™ is a quick and easy way of testing and troubleshooting many types of components. With the use of only one hand, this lightweight unit will quickly measure resistance, capacitance, inductance, continuity and polarity. Includes USB/Wall adaptor and carrying case.

ULTRATECH LIGHTED TWEEZERS AND TWEEZER SET

GENERAL

70401 70403 70408

Working In Dark, Confined Spaces Just Got Easier!

- Great for retrieving or positioning parts in dimly lit areas
- Push On/Off powerful LED light
- Non-slip cushion grip for added comfort
- Batteries included

70400

UltraTECH™ lighted tweezers offer a built-in, bright white LED light to directly illuminate the working area. Manufactured from heat-treated steel with a corrosion-resistant, non-glare black finish, these cutting-edge tweezers are built to withstand tough jobs and working environments. Includes three "LR41" batteries. Length: 6.25" (165mm). Available in three popular tip styles and a convenient 3-pc. set.

MAGNETIC TAPE MEASURES

NEW

Milwaukee

- Finger stop
- Dual magnets
- Blueprint scale
- Wire form belt clip
- 2-Sided Printing
- Up to 9′ standout
- 360° hook attachment

Magnetic tape measures use nylon blade protection and a 5-point reinforced frame offers up to 10X longer blade life, by resisting contamination wear and increasing protection when dropped.

CAN WRENCH WITH WIRE STRIPPER AND SECURITY KEY INSERT KIT

JONARD INDUSTRIES CORP.

- Six tools in one
- Multiple opening, tightening, stripping and security key functions

M-216CKIT

Mfg. part no. M-216CS22 double end can socket 1½" deep wrench, ⅜" and 7/16" hex, orange plastic handle with 22AWG stripper blade. Used in placing fuses in cable terminals and connecting wires to fuses and binding posts. The walls on both sockets are thin enough so they can be used to work locking devices on most terminals and cabinets. Overall length: 7". **Mfg. part no. SK-51632** security key insert is designed with a double-ended hex adapter for two sizes of pin-in-head security fasteners. Key slips into the ⅜" side of a can wrench and user is ready for either a 5/16" or 5/32" hex security screw. The 5/16" side is used on tamperproof cross-connect cabinets, MESA, CATV closures and any other closure that requires a 5/16" tamperproof hex tool to gain access. Reversible — one end is for SLC cabinets and the other is for most network interface boxes. **Mfg. part no. M-216CKIT** includes **mfg. part no. M-216CS22** can wrench and **mfg. part no. SK-51632** security key insert. *Order complete kit or individual tools separately below.*

ADJUSTABLE WRENCHES

KLEIN TOOLS®

D507-6

Precision-machined jaws and smooth turning knurl for easy operation. Forged heat-treated alloy steel for maximum strength and light weight. High polish chrome-plated finish is corrosion resistant. Contoured handles for comfortable use. **Mfg. part no. D506-4** standard-capacity adjustable wrench features plastic-dipped dovetail handle. **Mfg. part nos. D507-6** and **D507-8** extra-capacity adjustable wrenches feature plastic-dipped handle. Extra capacity allows use of a smaller size wrench to handle bigger jobs, especially in confined spaces.

AC SERIES ADJUSTABLE WRENCHES

CRESCENT

All AC series Adjustable Wrenches Feature:

- Industrial professional or home use
- Heat-Treated, Drop-Forged Alloy Steel
- Chrome finish resists rust and corrosion
- Wide handle for increased leverage
- Polished Jaw
- SAE/Metric size indicator on jaw

RapidSlide™ Adjustable Wrench Only:

- Slide button mechanism in handle for quick, fast adjustment
- Debris shield protects slide mechanism, and maintains a smooth operation

CONTROL CABINET KEYS

KNIPEX®

00 11 01

00 11 02

00 11 04

00 11 07

Mfg. Part No. 0011 01 TWIN KEY
Multifunctional key for the actuation of locking systems from the areas of facilities engineering (heating and sanitation, air conditioning, electro technology), gas and water supply and shut-off-systems. **Mfg. part no. 00 11 01** TwinKey® has eight arms and consists of two cross keys that are held inside each other with a magnet. Includes square 5. 6, 7, 8, 9, 10, 11 mm; triangle 7, 8, 9, 10, 11, 12 mm; 2-way key 3-5 mm; half moon 6 mm; male square in steps 6-9 mm; 1/4″ insert bit slotted 1.0 x 7 mm and PH2.

Mfg. Part Nos. 00 11 02, 00 11 03, 00 11 04 CONTROL CABINET KEYS
With 1/4″ insert bit: slotted 1.0 x 7 mm and cross recess PH 2; **mfg. part nos. 00 11 02** and **00 11 03** incl. square 5, 6, 8 mm; triangle 9 mm; 2-way key 3-5 mm. **Mfg. part no. 00 11 04** is for door and window handles or air bleeding. Includes square 5, 7, 8 mm; triangle 6, 9, 10 mm; male square in steps 6, 7, 8, 9 mm; 1/4″ insert bits.

Mfg. Part Nos. 00 11 07, 00 11 08 PEN-STYLE-CONTROL CABINET KEYS
Portable pen-style control cabinet keys with fastening clip. Three/four different key profiles can be utilized by swiveling the key holder for control cabinets and shut-off systems in the supply of gas, water and electricity. Universal 1/4″ bit adapter for standard bits (permanent magnet for retaining). Additional bit adapter for 1/4″ bits inside one key profile. With bit insert: cross recess PH 2 and possibility of safekeeping a second bit. **Mfg. part nos. 00 11 07** is for control cabinets and shut-off systems in the supply of gas, water and electricity. Includes square 5, 6, 8 mm; triangle 9 mm and 2-way key 3-5 mm. **Mfg. part no. 00 11 08** is a multi-purpose key used for heating, air conditioning, plumbing and building maintenance. Includes square 5, 8 mm; triangle 9 mm; male square in steps 6, 7, 8, 9 mm.

MICRO-ADJUSTABLE METAL HANDLE TORQUE SCREWDRIVERS

CDI TORQUE PRODUCTS A Snap-on® Company

- Positive locking pull down adjustment knob
- Trilobular comfort grip
- Universal ¼″ hex bit holder with strong rare earth magnet
- Cam-over torque limiting clutch
- Easy-to-read window scale
- Light weight ease-of-use
- Automatic lock in counterclockwise direction
- Accuracy: ± 6% of indicated value, CW, from 20% to 100% of full scale
- Individually serialized with matching certificate of calibration traceable to N.I.S.T.

401SM, 151SM, 61SM

Adjustable models offer versatility for applications that require more than one torque value. These torque screwdrivers are particularly suited for the electronics industry and for instrument assembly work. A simple, cam-over design prevents over-tightening and possible damage to components. Torque settings are easily and accurately changed with a unique adjusting knob and easy-to-read window scale. Positive locking knob makes accidental setting changes impossible. Automatic lock in counterclockwise direction makes fastener removal a snap.

Mfg. Part No.	Torque Range	W x L (In.)	Weight (Lbs.)	Stock No.	Price Each

COMPUTORQ3 ELECTRONIC TORQUE WRENCH

CDI TORQUE PRODUCTS A Snap-on® Company

- Sleek new design
- 15-Degree flex ratcheting head
- Push button socket release head
- Large, easy to read digital display
- Long battery life, uses 2 each CR123 lithium batteries
- Ergonomically designed molded non-slip rubber grip
- Torques in both clockwise and counterclockwise directions
- Battery saving auto-shutoff after two minutes
- Audible tone sounds when set torque value is reached
- Display will hold value and flash for ten seconds when desired torque value is reached
- 3 Color LED light bar
- ACCURACY: ± 2% CW of readings from 20% to 100% of full scale ± 3% CCW of readings from 20% to 100% of full scale
- N.I.S.T. Traceable certificate of calibration included

COMPUTORQ3 series electronic torque wrench is a simple to use digital readout wrench that displays real time torque values in any of four torque units, ft.lbs., in.lbs., Nm, kg.cm. Simply set the desired torque value and apply force until the green LED illuminates. Great for light industrial, automotive, motorcycle, watercraft and aircraft applications.

MICRO-ADJUSTABLE METAL HANDLE TORQUE WRENCHES

CDI TORQUE PRODUCTS A Snap-on® Company

- Dual scale, calibrated dual direction
- Positive Lock with spring loaded pull down lock ring
- Fast, accurate and easy to set
- Easy-to-read Laser marked scales
- Individually serialized with matching certificate of calibration traceable to N.I.S.T.
- Most feature Quick Release buttons which provide good socket retention as well as easy socket removal
- Accuracy: ± 4% clockwise ± 6% CCW of indicated value, CW, from 20% to 100% of full scale
- Meets or exceeds ASME B107.14M-1994, ISO 6789 Standards

Micrometer adjustable "click" torque wrenches are easy-to-operate, and have many industrial, automotive, and aircraft uses. All wrenches have easy-to-read, precision laser marked dual scales in English units. To set the desired torque, simply pull down the lock ring and turn the handle to the desired torque setting. Once set, the positive locking device locks in the torque setting. When the desired torque is reached, an impulse can be felt through the handle along with an audible "click". Most ratchets feature a "Quick Release" push button that both locks the socket in place and makes socket changes quick and easy. A wide variety of torque ranges are available from 10 in.-lbs. to 2000 ft.-lbs. and in Newton meter units; *go online or call.*

¼″ FEMALE DRIVE TORQUE SCREWDRIVER AND BITS SET

KLEIN TOOLS®

- "Torque by feel" — just turn, click, and it's torqued to micrometer accuracy
- Range: 2 - 36 in.-lb.
- Graduated in 2 in.-lbs. (0.2 NM) increments
- Torques either clockwise or counter-clockwise
- Can be preset and sealed for production use
- Meets MIL-H-26497 specifications
- Easy-release bit holder
- Aluminum outside construction for light weight and non-magnetic characteristics
- Non-slip grip
- Overall length: 8″

57034

Mfg. part no. 57034 torque screwdriver set contains **mfg. part no. 57035** ¼″ female drive adjustable, torque-limiting screwdriver with calibrated micrometer scale and **mfg. part no. 57036** 8-pc. torque screwdriver bits set which includes bits in sizes: Phillips: nos.1 and 2, slotted: no. 4 (3/16″ x 0.034″), no. 5 (7/32″ x 0.036″), no. 6 (¼″ x 0.038″), no. 10 (5/16″ x 0.046″), no. 12 (3/8″ x 0.05″) and ¼″ hex-to-square male adapter. All neatly organized in a form-fitted storage box. **Mfg. part no. 57035** ¼″ female adjustable, torque-limiting screwdriver only; bits not included; *order* **mfg. part no. 57036** *8-pc. torque screwdriver bits set separately below.*

MICRO TORQUE-LIMITING SCREWDRIVERS

mountz the torque tool specialists®

- Precision radial ball clutch "slips-free" when the preset torque is reached preventing over-torquing.
- Thrust bearings insure that the torque setting is independent of any end load applied by the operator.
- Bi-directional operation.
- ESD compliant IEC 61340-5-1:1998
- Tamper-proof internal adjustment. No external adjustment scale - must be preset using a torque analyzer.

TITAN 100i TORQUE-LIMITING CLICK WRENCH

mountz the torque tool specialists®

- Bi-directional ratchet head
- Easy-to-read dual scale (American & S.I.) protected by a display window
- Graduation collar on the torque handle
- Strong steel shaft with firm, ergonomic grip
- "Push-Button Locking Device" securely locks the preset torque and prevents inadvertent adjustment
- Certificate of calibration
- Positive "click" can be heard and felt when torque is reached

Click-type torque-sensing wrench provides audible "click" to provide fast, simple indication of micrometer-accurate torque settings.

Mfg. Part No.	Description	Range (lbf.in.)	Stock No.	Price Each
280010	Titan 100i Click Wrench	20-100	**49M4822**	302.00

(113767)

TORQUE-LIMITING SCREWDRIVERS

mountz the torque tool specialists®

Ergo Micro Torque screwdriver, **Mfg. Part No. 020440,** features a "positive" locking system that prevents incidental torque adjustment. Bi-directional cam "slips free" once the set torque has been reached, making over-tightening impossible. ¼″ F/Hex drive and 2-12 lbf.in torque range. Externally adjustable torque range. **Mfg. Part No. 020452** is similar to **020440**, but with 10 - 50 lbf.in torque range.

Mfg. Part No.	Description	Stock No.	Price Each
020440	EMT12 Torque Screwdriver	**49M1951**	395.00
020452	EMT50 Torque Screwdriver	**49M1971**	409.00

(113765)

TORQUE-LIMITING BREAK-OVER WRENCH

mountz the torque tool specialists®

- Break-over mechanism minimizes shock to assemblies
- Tamper-proof internal adjustment
- "Breaks-over" when preset torque is reached, eliminating overtorquing
- Small and lightweight. Ideal for restricted spaces.
- Handle: L 5" L x 9/16" Diameter.

Mfg. Part No.	Size	Torque Range (lbf.in)	Stock No.	Price Each
06005B-104-TB	3/16″	3-12	**96M0008**	190.00
06005B-106-TB	5/16″	3-12	**96M0009**	190.00
06005B-109-TB	7/16″	3-12	**96M0010**	156.00

(113764)

CAM OVER TORQUE-LIMITING WRENCH

mountz the torque tool specialists®

- Unique cam action provides high repeatability while eliminating overtorquing
- Anodized quality finish with stainless steel head
- Comfortable rubber hand grip
- Slim profile and light weight
- Non-length dependent
- ESD compliant (IEC 61340-5-1:1998)
- Features an externally adjustable micrometer scale and easy-to-use positive locking adjustment system

Mfg. Part No.	Drive Size (In.)	Range (lbf.in.)	Stock No.	Price Each
020340	1/4	10-45	**49M1882**	490.00

ADJUSTABLE TORQUE-SENSING WRENCHES

UTICA

- Two calibration adjustments (major and fine) permit easy, precise torque settings
- Dual scale models give readings in in-lb/Newton Meters or ft-lbs/Newton Meters
- patented spring-loaded locking collar locks scale on desired reading
- Slim, lightweight design reduces fatigue

"Click" type torque-sensing wrenches provide audible "click" and/or a few degrees of travel to provide fast, simple indication of micrometer-accurate torque settings. Patented low-friction torque control mechanism produces accurate readings in either direction.

IMPACT AND NON-IMPACT PUNCH DOWN TOOLS

FLUKE networks

D914S™

D814™

Fluke Networks™ punch down tools provide technicians a variety of options. The popular **D914S™ series** impact tool features a rounded edge handle with soft rubber grip to reduce recoil, preventing hand fatigue and slipping while terminating. It also includes a built in probe plc/spudger and torque allowing you to choose from high and low impact settings. **D914™** and **D814™ series** spring-loaded impact tools make efficient connections with less effort. Increased versatility and flexibility of these punch down tools and a wide variety of interchangeable blades allows each tool to perform multiple functions. *Order additional blades separately below.*

PUNCH DOWN TOOLS

Mfg. Part No.	Description	Stock No.	Price Each
10061120	**D914S™** 66 and M110 Blades	**18C1550**	85.00
10051120	**D914™** with 66 and 110 Blade	**97C9297**	74.00

JACKRAPID™ TERMINATION TOOLS

FLUKE networks

- Seats and cuts all wires at once, saving up to 2 minutes installation time per jack
- High quality, consistent terminations
- Simple, one-handed operation and ergonomic handle reduces hand fatigue
- Unique design easily accommodates close-to-wall installation
- Replaceable blade head for use with multiple jack types

JR-ADC-2

JackRapid™ termination tools are innovative and time saving installation tools. JackRapid™ allows you to accurately terminate jacks faster than traditional impact tools. The patented jack termination tool seats and terminates all wires simultaneously with one squeeze of an ergonomic handle. Get clean, consistent cuts every time. The built-in blade cuts off the excess wire after it is seated in the connector, eliminating the need for a secondary trim step. With JackRapid™, you'll never punch into the palm of your hand or through drywall again.

QUICK CLIP WIRE INSERTION TOOL

JONARD INDUSTRIES CORP.

- Used for terminating jumpers on Quick Clip 3 and 4 beam terminals
- Cuts 22 and 24 gauge wire

Mfg. part no. JIC-950C Quick Clip multipurpose wire insertion tool performs several vital functions. The wire cutter is designed to cut 22 and 24 gauge wire, the hook at the back of the tool is used for both jumper and back-tap removal, and the bit inserts 22 or 24 gauge (0.5 mm or 0.6 mm) wire into the terminal block. Ideal for wire insertion in 3-beam (112 type blocks) and 4 beam (78 type blocks) terminals in Cosmic and Cosmic II distributing frames.

LAN PRONAVIGATOR™ NETWORK AND COAXIAL CABLE TESTER AND KIT

RoHS Compliant Available

GREENLEE COMMUNICATIONS A Textron Company

PA1543

PA901066

Mfg. part no. PA1543 LAN ProNavigator™ with remote is a UTP/STP and coaxial cable tester for patch cords or installed cable runs. Tests data and telephone cable for proper pairing for EIA/TIA-568A and B, Token Ring, 10 Base T and common Cat5, Cat5e, Cat6 configurations. Also tests continuity of 50 and 75 ohm coaxial cable with BNC terminations. Compact, lightweight and easy-to-use, the LAN ProNavigator™ detects open wires, shorts, crossed-wires and split pairs in only seconds. Test results at both ends. Generates oscillating audio tone for use with tone probes to locate cable. Uses 9V battery with auto-off function to preserve power. Includes belt clips and battery. **Mfg. part no.**

LAN AND TELECOM CABLE TESTING KIT

RoHS Compliant Available

GREENLEE. COMMUNICATIONS A Textron Company

RJ45 LAN Tester Features:
- True cable mapper
- Auotmatic display of mapping
- Dual speeds: Slow and Fast

Telephone Test Set and Tone Probe Cable Tracer Features:
- Check polarity of phone power lines
- View phone line status: dial tone, ringing line or busy line
- Provide talk power for phone lines and butt set use
- Four tone generator patterns
- Test continuity of wires, cable and loads
- Tone generator features Auto-Off function
- Locate patch and termination point of wire
- Identify cable pair carrying tone signal
- Audible speaker with adjustable volume control

Mfg. part no. PA1573 LAN and telecom cable testing kit is ideal for data and voice testing needs. Identify connector and cable pin-out with true cable mapping or utilize the full-range continuity, line condition, signal tracing and wire identification with tone generator and tone probe cable tracer. Kit includes: Tone and Cable-Check™ transmitter main unit, Tone and Cable-Check™ remote receiver unit, RJ-11and alligator clip cord, two RJ-45 shielded patch cords, inductive high-sensitivity probe, jack for headset, durable nylon carrying case with belt loop and two 9V batteries.

PROFESSIONAL TOOL KITS FOR TECHNICIANS, SERVICEMEN AND FIELD ENGINEERS

Xcelite®

TCMB100/ST

TCA100/ST

86-Pc. Professional Tool Kits Contain 53 Popular Tools:
- Including pliers, cutters, wrenches, snips, screwdrivers and nutdrivers
- 31 **Series 99®** interchangeable screwdriver and nutdriver blades and handles
- Two specialized screwdriver and nutdriver kits

46-Pc. Professional Tool Kit Contains 23 Popular Tools:
- Including pliers, cutters, screwdrivers and nutdrivers
- Weller® **WP25** 25W soldering iron
- 24 **Series 99®** interchangeable screwdriver and nutdriver blades and handles
- Offset ratchet screwdriver set, measuring tape and solder

TCS100/ST

TC series attached tool cases are durable, charcoal-brown leather-grained Marvelon vinyl featuring solid brass hardware, padded handle, removable 3-panel hinged tool pallet in lid, plus anodized aluminum divider and additional tool pallet in bottom. **TCMB series** tool case is super-tough, black polyethylene with rich-looking black anodized aluminum hardware, removable 3-panel hinged tool pallet in lid and additional tool pallet in bottom. **TCA series** tool cases are high-tech aluminum with smooth finish featuring a keyless combination lock, chrome-plated latches, tongue-and-groove lid with rubber gasket for a positive seal, removable tool pallet in lid and additional tool pallet in bottom. **TCS series** tool case is softsided, rugged Cordura® with dual heavy-duty zippers, leather wrapped handles and three outside storage pockets.

PLIER AND ELECTRONIC TOOL SETS

KNIPEX

00 19 57: 4-PIECE PRECISION RETAINING RING PLIERS SET

Practical, adjustable quick release fastener. Tool roll made of hard-wearing polyester fabric. Set includes: four commonly used, straight precision circlip pliers internal pliers for sizes 1/2 to 1″ and 3/4 to 2-3/8″ and external pliers for sizes 5/16 to 1″ and 3/4 to 2-3/8″ for highest requirements.

00 20 11: 3-PIECE ASSEMBLY PLIERS SET

Two-color dual component handles. Box set includes: 1 ea. 7″ cushion grip combination pliers, 1 ea. 8″ cushion grip long nose side cutting pliers and 1 ea. 6¼' diagonal cutter.

00 20 15: 4-PIECE INSULATED TOOL SET

All pliers VDE tested according to DIN EN/IEC 60900 1000V, pliers finish 6. Case made of high quality, shock-resistant plastic with foam insert for variable equipment. Outside dimensions (H x W x D): 65 x 327 x 275 mm. Box set includes: 1 ea. combination pliers, wire stripper, long nose side cutting pliers and diagonal cutter. Set contents are all insulated tools: 1ea. 7″ combination pliers, 1 ea. 6-1/4″ wire stripper, 1 ea. 8″ long nose pliers, 1 ea. 6-1/4″ diagonal.

00 20 18: 8-PIECE ELECTRONICS TOOL SET

Plastic, shock-resistant storage case, with foam insert. Set includes: 2 electronics pliers and 6 electronics screwdrivers. Set contents: 1 ea. 4½″ half round tip electronics pliers, 1 ea. 4½″ round head diagonal small bevel; 1 ea. precison slotted screwdrivers 0.4 x 2.5 mm, 0.5 x 3 mm, 0.6 x 3.55 mm, 0.8 x 4.0 mm; 1 ea. precision phillips screwdrivers #0 x 60 mm, #1 x 80 mm.

00 20 18 ESD

00 20 17: 6-PIECE ESD ELECTRONIC PLIERS SET

Case made of hard-wearing polyester fabric, pliers are held by elastic band, with zip fastener. Set includes: 6 ESD electronics pliers, electrically discharging version. Set contents: 1 ea. ESD electronic pliers 4-1/2″ flat tip, 4-1/2″ half round tip, 4½″ round tip; 1 ea. ESD 4-3/4″ oblique end cutter; 1 ea. ESD 4-1/2″ round head diagonal small bevel, 4½″ pointed head no bevel diagonal.

00 20 18 ESD: 8-PIECE ESD ELECTRONICS TOOL SET

Plastic, shock-resistant storage case, with foam insert. Set includes: 2 electronics pliers and 6 electronics screwdrivers, ESD electrically discharging version. Set contents: 1 ea. ESD 4-1/2″ half round tip electronics pliers, 1 ea. ESD 4-1/2″ round head diagonal small bevel; 1 ea. ESD precison slotted screwdrivers 0.4 x 2.5 mm, 0.5 x 3 mm, 0.6 x 3.55 mm, 0.8 x 4.0 mm;1 ea. ESD precision phillips screwdrivers #0 x 60 mm, #1 x 80 mm.

PTX SERIES WIRE-WRAPPING AND UNWRAPPING TOOLS AND KITS

OK Industries Div of Jonard Industries

RoHS Compliant Available

- Ergonomic design minimizes repetitive stress
- NiMH battery-operated or 115V electric-powered versions
- Rugged construction for field use
- Wraps and unwraps 18 to 30 AWG wire
- Rated maximum usage: 2,500 cycles/day

Mfg. part no. PTX-KIT1 kit includes tool, battery charger and two NiMH batteries. **Mfg. part no. PTXKIT1DH** includes all **mfg. part no. PTX-KIT1** kits content plus **mfg. part no. DFB224** wrap/unwrap bit set and Cordura tool pouch. Individual tools and accessories available separately; *go online or call.*

DUAL-FUNCTION WRAP/ UNWRAP BIT AND SLEEVE SETS

RoHS Compliant Available

OK Industries Div of Jonard Industries

- Combines both wrap and unwrap functions into 1 bit/ sleeve set
- Eliminates the need to carry extra tools or bits
- Wraps or unwraps 22-24 AWG or 24-26 AWG wire
- Used with **PTX series** tools

DFB224

The bit is precision-machined for high-quality wrapping in the clockwise direction, but also includes the removal mechanism that is used to unwrap when operated counter-clockwise.

M4™ 1/4″ HEX 2-SPEED SCREWDRIVER KIT

- Voltage: 4V
- Speed: 0 – 200 / 0 – 600 RPM
- Peak Torque: 44 in-lbs
- Chuck Type: ¼″ Hex Quick Change
- Tool Weight: 1.0 lbs
- Tool Length: 9.6″
- Battery: REDLITHIUM™ 2.0

2101-21

Featuring 44 in-lbs. of peak torque and a 21-position clutch with auto shut-off, the new screwdriver offers improved torque control during repetitive applications. Two speeds, 200 and 600 RPM, offer further user control for precision work. **Mfg. part no. 2101-21** kit contains: **2101-20** ¼″ Hex 2-Speed Screwdriver, (1) 48-11-2001 M4™ REDLITHIUM™ 2.0 compact battery pack. **Mfg. part no. 2101-22** kit contains: **2101-20** ¼″ Hex 2-Speed Screwdriver, (2) **48-11-2001** (1) M4™ REDLITHIUM™ 2.0 compact battery pack, and both kits contain #2 phillips bit and **48-59-2001** charger.

CORDLESS 12V SUB-COMPACT MICRO DRIVER DRILL

- Quick bit-loading ¼ in. hex chuck for bit insertion and release with one hand
- Metal gear housing for job site durability — 0 to 500 rpm
- Sub-compact 7″ length fits in tight areas for increased convenience
- Delivers 100 in.-lbs. of torque
- Battery fuel gauge for displaying remaining run-time
- Built-in LED for illumination of dark work spots
- Variable speed trigger for output power control
- Overmolded side and grip for secure grip and work surface protection
- 5-year manufacturer's warranty

Mfg. part no. 2401-22 sub-compact micro driver drill has the power to drive the majority of common small fasteners, and the run-time of full day screw driving without recharging. Comes complete with: #2 Phillips 1/4″ hex insert bit, 6F-7R ¼″ hex insert bit, 12V Li-Ion battery pack, 12V battery charger and storage bag.

M12 CORDLESS SUB-COMPACT BAND SAW

- One-handed cuts
- Powerful motor
- 1-5/8″ cut capacity
- Meets OSHA guarding requirements
- LED light
- Blade tension adjustment

M12™ sub-compact band saw is compact and lightweight at less than half the weight and size compared to a traditional deep cut band saw. The M12™ band saw weighs only 6.75 lbs and 12" in length, making it ideal for overhead or one-handed cutting applications. Includes sub-compact band saw tool, 30-minute charger, M12™ XC high capacity REDLITHIUM™ battery, sub-compact portable band saw blade and carrying case.

Mfg. Part No.	Description	Stock No.	Price Each
2429-21XC	M12 Cordless Sub-Compact Band Saw	94T3808	257.50

M18 CORDLESS LITHIUM ION BAND SAW KIT

- 45% lighter than deep cut
- 3¼″ cut capacity
- Tool-free adjustable material shoe
- LED work Light
- Blade ejection system
- Drop resistant pulley guard
- Cast aluminum gear case

M18™ Cordless LITHIUM-ION Band Saw Kit is the perfect tool for cutting metal in-place, overhead or in tight spaces.With 3¼″ cut capacity and low vibration, this saw delivers the cleanest cuts on the most common materials including strut, 2-1/2″ conduit, 3″ angle iron, 3″ copper and threaded rod without ruining the threads. Kit includes: M18™ cordless LITHIUM-ION band saw, (2) M18™ XC high capacity RED LITHIUM™ batteries, 1-hr.charger, blade and case.

M12 HACKZALL CORDLESS LITHIUM-ION RECIPRICATING SAW

Milwaukee

- Only 11″ and 2.6 lbs.
- M12™ RED LITHIUM™ battery
- Keyless QUIK-LOK™ blade clamp
- All-metal gear case
- Variable speed trigger
- Battery Fuel Gauge
- Accepts both HACKZALL™ and SAWZALL® style blades
- Built-In LED light

M12™ cordless LITHIUM-ION recipricating saw features compact and light weight design for superior control and versatility in tight spaces. A powerful motor delivers 0-3,000 strokes per minute and a 1/2" stroke length allows for fast cutting through a wide range of material such as drywall, wood, and PVC. Includes HACKZALL™ M12™ cordless LITHIUM-ION recip. saw, (2) M12™ RED LITHIUM™ batteries, 30-minute charger, (2) Hackzall™ blades and carrying case.

PARTICULATE RESPIRATORS

8210 8511 8576

High-quality particulate respirators provide comfortable, reliable worker protection in a wide variety of industrial applications. All particulate respirators are NIOSH approved, lightweight and come with adjustable noseclips. **Mfg. part no. 8210** provides protection against non-oil based aerosol particles. **Mfg. part nos. 8211, 8214, 8511** and **9211** feature 3M™ proprietary Cool Flow™ exhalation valve which offers easy exhalation for cool/dry comfort in work settings that involve heat, humidity, or long periods of wear. **Mfg. part no. 9211** features an innovative, 3-panel design that offers a low-profile for better visibility and conformability to a wide range of face sizes. **Mfg. part no. 8576** disposable P95 particulate respirator helps provide reliable respiratory protection against certain oil and non-oil based particles. The respirator features a carbon layer to remove nuisance levels of acid gases. Other styles available depending on conditions of use; *go online or call.*

Mfg. Part No.	Description	Pkg. of	Stock No.	Price per Pkg. 1-4

PADLOCKS AND LOCKOUT TAGS

BRADY

51339

99615

65520

Safety and Aluminum Padlocks
- Available separately and in keyed-different or keyed-alike sets
- Lightweight yet rugged
- Corrosion-resistant, chrome-plated six-pin cylinder
- Hardened chrome-plated steel shackle
- 1½″ Shackle has ¼″ diameter

Lockout Tags — Legend: DANGER DO NOT OPERATE
- Easy to write on using pencil, pen and marker
- ⅜″ diameter metal eyelet resists tearing and accepts most padlock shackles

SAFETY PADLOCKS
Feature one-piece, seamless, nonconductive, fiberglass-reinforced nylon body with ribbed design for easier gripping and handling. OSHA compliant — safer alternative to metal locks. Key won't release until shackle is securely closed. Each safety padlock includes one key plus "Danger" and "Property Of" labels. Body dimensions: 1-3/4″H x 1-1/2″W x 4/5″D. Color: red. Other colors are available; *go online or call.* **Sold individually and in keyed-different or keyed-alike sets.**

CIRCUIT BREAKER LOCKOUTS

BRADY

90891 Breaker Block Kit

66320 Universal Lockout

65688 Snap-On Lockout

65396, 65397 Clamp-On Lockout

65396, 65397 Clamp-On Lockout Installed

65329, 65321 Oversized Lockout

BREAKER BLOCKER KIT
480/600V Breaker Blocker kit is perfect for locking out oversized and irregularly shaped switches. Self-adhesive backed mounting rails are permanently installed into an electrical panel — no drilling required. Kit includes two yellow mounting rails, one red blocking bar (for indicating locked "Off"), one green blocking bar (for indicating locked "On" and three alcohol wipes. Blocking bars are 7½″ long. **NOTE:** Lock and tag not included.

Mfg. Part No.	Description	Stock No.	Price Each
90891	480/600V Breaker Block Kit	11J0926	26.74

UNIVERSAL MULTI-POLE BREAKER LOCKOUT
This universal multi-pole breaker lockout works with most major-manufacturer's multi-pole breakers that employ a tie-bar. Constructed of durable impact-modified nylon. Easy-to-install using patented thumbscrew design. **NOTE:** Lock not included.

Mfg. Part No.	Description	Pkg. of	Stock No.	Price per Pkg.
66320	Universal Multi-Pole Breaker Lockout	6	34R2304	87.64

120V SNAP-ON BREAKER LOCKOUT
Designed for 120V breakers that have holes in the switch tongue. Easy-to-use — just snap in place and apply lock (not included). Dual cavities accommodate different size switch tongues. Accepts lock shackles up to 9/32″ in diameter. Size: 0.83″H x 0.35″W x 2.15″L.

65688	Snap-On 120V Breaker Lockout	6	94C3967	29.40

CLAMP-ON BREAKER LOCKOUTS
Clamp-on breaker lockouts work on a wide range of single-pole and internal-trip multi-pole breakers. Made of rugged polypropylene and impact-modified nylon. Easy-to-install using patented thumbscrew design. Accepts lock shackles up to 9/32″ in diameter. Includes detachable cleats to provide positive restraint for breakers with long, sliding switch throws. *Order additional cleats separately below.* **NOTE:** Lock not included.

Mfg. Part No.	Description	Pkg. of	Stock No.	Price per Pkg. Each
65396	120/277V Clamp-On Breaker Lockout	1	11K6490	14.90
65965	120/277V Clamp-On Breaker Lockout	1	30C4272	13.19
65397	480/600V Clamp-On Breaker Lockout	1	11K6491	16.19

OVERSIZED BREAKER LOCKOUTS
Oversized 480/600V frame lockouts fit breaker switches up to 2¼″ wide and ⅞″ thick. Constructed of durable polypropylene and glass-filled impact-modified nylon. Updated design gets better grip and works on move breaker models. **NOTE:** lock and tag not included.

65329	Oversized 480/600V Circuit Breaker Lockout	1	11K6456	16.91

FIRE BARRIER PRODUCTS

RoHS Compliant Available

3M

Fire Barrier IC 15WB+ Sealant

DT200 Fire Barrier Putty Sleeve Kit

Fire Barrier Pillow

Fire Barrier Quick Pass Device 4″ Round

Firestop caulks are used to prevent the spread of fire, smoke, toxic fumes and moisture for up to four hours. Good for both joint and through-penetration application. Re-enterable/repairable. **Mfg. part no. CP25WB+ CAULK** is a no-sag, non-halogen formula; fast-drying tack-free in approximately 10-15 minutes, paintable. Color: brown. **Mfg. part no. IC 15WB** is a low cost, latex based, intumescent smoke and firestopping sealant for wall and floor penetrations. Easy-to-handle formulation that bonds to concrete, metal, wood and cable jacketing. Dries to a firm, rubber-like solid. Provides up to 2 hours of fire protection. Color: yellow. UL listed.

FIRE BARRIER CAULK

Mfg. Part No.	Description	Stock No.	Price Each
● IC-15WB-10.10Z	Fire Barrier Caulk, 10.1 Fl. Oz Cartridge	81H7444	14.38

COMPOSITE SHEET

Composite sheet is a thin one-part composite system comprised of four components, used for shielding cable trays and conduit, HVAC ductwork and vital process equipment from radiant heat, flame spread and smoke. Fire ratings of up to 4 hours.

Mfg. Part No.	Description	Stock No.	Price per Box
● CS-195+3X2-BOX	Composite Sheet — 3′ x 2′ (Boxed)	81H7129	464.04

FIRE BARRIER MOLDABLE PUTTY

Moldable Putty+ is a one-part, halogen-free product designed to firestop electrical outlet boxes and a wide variety of through-penetrations including cable, conduit, insulated pipe and metal pipe, which penetrate fire-rated construction. Pliable. Easy to mold into any shape. Adheres. Sticks well to most surfaces but not to the applicator's hands. Conformable. Color: red-brown.

Mfg. Part No.	Description	Stock No.	Price Each
● MP+	Moldable Putty — 1.5″ x 11″ Stick	81H7504	37.14

RATE-OF-RISE/FIXED TEMPERATURE HEAT DETECTORS

Edwards Signaling

- UL listed for 50 ft. (15.2m) spacing
- Single pole — normally open contact
- Low profile with mounting plate
- Pure white finish
- Mounting flexibility with screw terminals
- Easy twist-on installation
- On-site testing of rate-of-rise feature
- Positive operating indication — for fixed temperature element

280B-PL series heat detectors offer fixed temperature or combination rate-of-rise and fixed temperature detection.

439D SERIES VIBRATING FIRE ALARM BELLS

Edwards Signaling

- Heavy duty die cast housing
- Rugged, compact mechanism
- Under dome mechanism
- UL & CSFM listed, FM approved

Fire alarm bells are diode polarized, vibrating bells designed for use with fire alarm control equipment. The gongs are made of select, alloy steel to sound the loud, resonant tone required in fire alarm systems. They are epoxy powder coated red. Supplied mounting plate installs directly on surface or on any single gang box, 3 ½" (89mm) or 4" (102mm) octagon, or 4" (102mm) square electrical box. Rated for outdoor use with optional **mfg. part no. 449** weatherproof back box; *go online or call.*

GENERAL REPLACEMENT, INTERCOM AND OUTDOOR TREATED SPEAKERS

RoHS Compliant Available

Quam Since 1930

25C25Z80T 30A05Z8 30C25Z80T 4C3Z80T 4C5Z8

Precision centered voice coils with 8 or 40Ω impedances (designated **"Z8"** or **"Z45"**). Use 45Ω speakers for intercom applications. Outdoor treated speakers (**OT suffix**) resist wind, moisture and temperature extremes. Alnico magnet speakers (designated **"A"**) are magnetically shielded. Ceramic magnetic speakers (designated **"C"**) are unshielded. All conform to industry standard mounting centers. Finish: black baked powdered epoxy.

NOVEC™ AEROSOL CLEANERS

3M

- Non-flammable
- Low toxicity
- Non-ozone depleting
- Non-corrosive
- Fast drying, virtually no residue
- Contains no HCFCs, HFCs, nPB or HAPs

Based on proprietary 3M solvent technology, Novec™ aerosol cleaners are designed to remove tough soils – while reducing the impact on people and the environment. They offer a responsible alternative to HCFC 141b-based cleaners.

Contact Cleaner

NOVEC™ CONTACT CLEANER

Novec™ Contact Cleaner effectively removes light oils, greases, silicones, dust and particulates from sensitive electronic and electrical equipment. It is compatible with plastics and can be used on energized equipment or components.

Mfg. Part No.	Description	Stock No.	Price Each 1-4
NOVEC(TM) CONTACT	Novec™ Contact Cleaner, 11 oz.	**78K7084**	27.19

NOVEC™ CONTACT CLEANER PLUS

Novec™ Contact Cleaner Plus is formulated with extra cleaning power to remove stubborn oils, greases and silicones, as well as fluorinated oils and greases, dust and particulates, from sensitive electrical and electronic equipment. This includes connectors, printed circuit boards, electromechanical devices, scales, relays and circuit breakers. Excellent compatibility with plastics and other materials of construction.

NOVEC-CCPLUS	Novec™ Contact Cleaner Plus, 11 oz.	**47R4845**	28.73

NOVEC™ ELECTRONIC DEGREASER

Novec™ Electronic Degreaser effectively removes oils, greases and handling soils from electric motors, electrical equipment, precision devices and other electro-mechanical or sensitive devices. Industrial strength cleaner. Test on plastics before using – may damage acrylics, polycarbonates, ABS and PS.

NOVEC(TM) ELECTRONIC DEGR	Novec™ Electronic Degreaser, 12 oz.	**78K7083**	25.34

NOVEC™ FLUX REMOVER

Novec™ Flux Remover removes rosin solder fluxes, waxes and similar contaminants. It is also effective in removing hydrocarbons, silicone and fluorochemical oils and greases from devices such as electric motors, generators, precision devices and other electromechanical or sensitive equipment. Test on plastics before using – may damage acrylics, polycarbonates, ABS and PS.

NOVEC(TM) FLUX REMOVER	Novec™ Flux Remover, 12 oz.	**78K7082**	25.35

DeoxIT® CONTACT CLEANER AND REJUVENATOR

CAIG LABORATORIES, INC.

D100P

DN5S-6N D50W D100L-2DB D100L-25C

- Dissolves oxidation and corrosion
- Cleans, lubricates and protects
- Reseals surfaces on metal contacts
- Improves connector performance/reliability
- Reduces intermittent connections
- Improves signal quality and data speeds
- Reduces arcing and RFI
- Reduces wear and abrasion
- Improves the flow of electricity
- Temperature range, -34°C to 200°C

DeoxIT® dissolves oxides and sulfides that form on metal contact surfaces, removing the sources of resistance. This restores the contact's integrity and leaves a thin (organic) layer that coats and seals the metals. When contact surfaces are exposed to dust, smoke, soot, and other solids suspended in the atmosphere, non-metallic films can form, inhibiting conductivity. Metal oxide formation is the most common cause of oxidation. Salt-laden air in coastal areas corrodes metals, forming chloride films. DeoxIT's® unique properties allow it to work on stationary or moving contacts and connectors with similar or dissimilar metals. Its advanced formula contains deoxidizers, preservatives, conductivity enhancers, arcing and RFI inhibitors and anti-tarnishing compounds that significantly increase the performance and reliability of electrical equipment. **NOTE:** After cleaning with DeoxIT®, apply DeoxIT® Gold (indoor applications) or DeoxIT® Shield (harsh environments; water, salt, pollution) for maximum performance and protection; *order separately online or call.*

Mfg. Part No.	Description	Size	Stock No.	Price Each

DeoxIT® GOLD CONTACT CLEANER, CONDITIONER AND PROTECTOR FOR PLATED METAL ELECTRICAL CONNECTIONS

CAIG LABORATORIES, INC.

GN5S-6N Spray | G5S-6 Spray | G5 Mini-Spray | G100L Brush Applicator

- Ideal for gold plated surfaces
- For critical and low signal applications
- Improves conductivity and maintains optimum signal quality
- Prevents dendrite and fretting corrosion
- Prevents data errors, lockups and intermittents
- Protects base metals from oxidation
- Reduces arcing, RFI, wear and abrasion

DeoxIT® GOLD Pen Applicator

DeoxIT® GOLD Wipes

DeoxIT® GOLD Needle Dispenser

DeoxIT® Gold (formerly ProGold) is specifically formulated to improve conductivity, lubricate and protect plated connectors and contacts for maximum performance and protection. It deoxidizes minor amounts of surface contamination, and penetrates plated surfaces and molecularly bonds to the base metals. Unlike other products, it also stabilizes connections between similar and dissimilar metals. Provides long-lasting protection on gold, as well as silver, rhodium, copper, nickel and other precious metals in connectors and on contacts. **NOTE:** On oxidized/corroded surfaces, pre-clean with DeoxIT®. For severe environments (humidity, salt, pollution, etc.), treat with DeoxIT® and finish with DeoxIT® Shield; *ordered separately online or call.*

FLUX-OFF® PRECISION FLUX REMOVERS

RoHS Compliant Available

ITW Chemtronics®

Flux-Off® flux removers are formulated to remove all types of rosin (type R, RA, and RMA), no-clean (both rosin and synthetic, type SA), and water-soluble (type OA) flux. Removers available in aerosol, BrushClean™ System and liquid form for benchtop dispenser, vapor degreaser, ultrasonic, and dip tank applications. All aerosol/BrushClean™ products feature the "All-Way" spray valve.

Flux-Off® CZ is an ozone-safe, nonflammable flux remover safe for use on plastics. Washes away types R, RMA, RA, SA, and OA fluxes. Flux-Off® VZ is an economical non-ozone depleting, non-flammable flux remover.

Mfg. Part No.	Description	Size	Stock No.	Price Each
ES7200	Flux-Off® CZ	12 oz.	00Z1593	57.95
ES7208B	Flux-Off® CZ BrushClean™	5 oz.	00Z1594	28.75
ES6200	Flux-Off® VZ	12 oz.	97H7681	24.72

Flux-Off® Rosin is an ozone-safe flux remover that's safe for use on plastics. Washes away rosin and rosin-based no-clean fluxes.

ES1035	Flux-Off® Rosin	10 oz.	00Z1137	21.54
ES1035B	Flux-Off® Rosin Brush Clean™	10 oz.	07C8878	22.02
ES835B	Flux-Off® Rosin Brush Clean™	5 oz.	00Z1472	12.80
ES135	Flux-Off® Rosin	1 gal.	25C4512	81.79
ES535	Flux-Off® Rosin	5 gal.	50B9381	266.12

New and improved Flux-Off® No Clean flux remover removes all types of no-clean encrusted flux. Same great features as original but now without HCFC-141b. Nonflammable, dries fast and leaves no residue. For use in ultrasonics and soak tanks. Contains HCFC-225. Test on plastics.

ES1695	New and Improved Flux-Off® No Clean Flux Remover — Aerosol	12 oz.	97C8419	36.21
ES895B	New and Improved Flux-Off® No Clean Flux Remover —BrushClean™ System	6 oz.	97C8421	23.72

New and improved Flux-Off® No Clean Plus is a powerful cleaner that removes encrusted no-clean and synthetic fluxes from hard-to-reach areas. Ozone safe, dries fast and leaves no residue. For use in dip or soak tanks. Flammable. Test on plastics. Recommended for post-solder operations, PC boards, SMD pads, chip carriers, screen and stencils, heat sinks, sensitive circuit components and more.

ES1696	New and Improved Flux-Off® No Clean Plus	12 oz.	97C8420	20.43
ES896B	New and Improved Flux-Off® No Clean Plus BrushClean™	6 oz.	97C8422	13.50

Flux-Off® Water Soluble is an ozone-safe flux remover for cleaning water soluble flux from boards with water sensitive components. Safe to use on plastics. (NOTE: Formerly Flux-Off® II and Flux-Off® NR 2000.)

ES1530	Flux-Off® Water Soluble	13.5 oz.	00Z1083	18.31
ES130	Flux-Off® Water Soluble	1 gal.	50B1927	99.62

Flux-Off® Heavy-Duty flux remover removes encrusted rosin and synthetic-based (type SA), nonflammable, no-clean and rosin fluxes. Can also be used to remove uncured epoxy from misprinted boards. Test on plastics.

ES1631	Flux-Off® Heavy-Duty	12 oz.	00Z1883	52.75

Flux-Off® Aqueous cleans water-soluble and no-clean fluxes, and type R, RMA and RA fluxes. Ideal for use in ultrasonics and in-line cleaners.

ES132	Flux-Off® Aqueous	1 gal.	50B9379	46.94

ES1678

ES1210

Mfg. part no. ES810, Electro-Wash® PX, is a one-step buffer gel removal cleaner, ideal for fiber-optic connectors and cables.

Mfg. part no. ES1603, Electro-Wash® PR, is a regular-strength cleaner safe for use on plastics. It's flammable and ozone-safe.

Mfg. part nos. ES1611 and **ES2211**, New and Improved Electro-Wash® NX, are extra-strength, nonflammable cleaner degreasers. 141b-free; contain HCFC-225.

Mfg. part no. ES1614, New and Improved Electro-Wash® NR, is a regular-strength, nonflammable cleaner degreaser. 141b-free; contains n-propyl bromide.

Mfg. part no. ES1621, Electro-Wash® MX, is an extra-strength plastic-safe universal cleaner with a moderate evaporation rate. Ideal for cleaning contamination from semiconductive cores of high voltage cables.

Mfg. part no. ES1137, the Mighty Liquid™, is a powerful universal cleaning solvent.

Mfg. part no. ES1607, Electro-Wash® NXO is an ozone-safe, nonflammable, extra-strength universal cleaner/degreaser. Test on plastics. Also available in 1-gallon quantities; *go online or call.*

Mfg. part no. ES7100, Electro-Wash® CZ is the non-ozone depleting, nonflammable cleaner safe for use on plastics. Contains CIROZANE™ CFC replacement chemistry based on HFE technology from 3M. Also available in 1-gallon quantities, *go online or call.*

CONTACT CLEANERS/ LUBRICANTS

RoHS Compliant Available

ITW Chemtronics®

Contact cleaners remove oily carbon soils, greases, and oxides from contact surfaces. Use in all phases of electronics and electrical contact maintenance, including metal contacts, plastic embedded contacts, relays, breakers, and controls. All aerosol products feature the All-Way spray valve.

ES1677

ES1612

ES1626

ES1629

Mfg. part no. ES7300, Pow-R-Wash™ CZ, is an ozone safe, nonflammable cleaner safe for use on powered-up contacts and surrounding plastics. Contains Cirozane™ CFC replacement chemistry based on HFE technology from 3M.

Mfg. part no. ES 6300 Pow-R-Wash™ VZ, is an economical non-ozone depleting, nonflammable contact cleaner safe for use on live circuits.

Mfg. part no. ES1677, New and Improved Pow-R-Wash™ PN, is a nonflammable contact cleaner safe for use on powered-up contacts and surrounding plastics. 141b-free; contains HCFC-225.

Mfg. part no. ES1612, New and Improved Pow-R-Wash™ NX, is an extra-strength, nonflammable contact cleaner that quickly removes soils and oxides. 141b-free; contains HCFC-225.

Mfg. part no. ES1613, New and Improved Pow-R-Wash™ NR, nonflammable contact cleaner that quickly removes soils and oxides. 141b-free; contains n-propyl bromide.

Mfg. part no. ES1605, Pow-R-Wash™ PR, is a regular-strength, flammable contact cleaner that is safe for use on plastics. Ozone-safe.

Mfg. part no. ES1626, DPL® Lubricant, can be used to clean, protect, and lubricate all electrical and electronic switches, contacts, relays, plugs and sockets. Safe on plastics, inhibits corrosion and reduces friction.

Mfg. part no. ES1629, New and Improved Kontact Restorer, is a 1-step contact cleaner and lubricant. 141b-free; contains n-propyl bromide.

STATIC FREE™ HARD SURFACE TREATMENT

ITW Chemtronics®

- Provides static dissipation to hard surface
- Long-lasting dissipative protection; up to 30 days
- Effective in relative humidity below 15%
- Noncorrosive, amine free formulation
- Meets static decay criteria of MIL-B-891705C
- Nonflammable
- Safe on surfaces not harmed by water
- Nonabrasive
- No surfactants, no phosphates

Static Free™ Hard Surface Treatment is formulated to provide static dissipative properties on a variety of hard surfaces. This aqueous based formulation is suitable for most non-porous surfaces, dries fast and will rapidly render the surface static dissipative.

Mfg. Part No.	Description	Stock No.	Price Each
ES3260	Static Free Hard Surface Treatment – 32 oz trigger sprayer	83T1900	11.90
ES160	Static Free Hard Surface Treatment – 1 gallon	83T1894	24.33

(201286)

STATIC FREE™ CARPET TREATMENT

ITW Chemtronics®

- Provides static dissipation to porous surfaces
- Reduces static build up for carpet and fabric surfaces
- Leaves no film
- Effective in relative humidity below 15%
- Chloride and amine free formulation
- Noncorrosive, neutral pH
- Meets static decay criteria of MIL-B-891705C
- Safe on surfaces not harmed by water
- No surfactants, no phosphates
- Low odor

Static Free™ Carpet Treatment is a water-based formulation created to prevent static electricity build up on carpet fibers and other fabric surfaces. Its specialty formulation controls the generation of static charges on all types of fabric surfaces.

Mfg. Part No.	Description	Stock No.	Price Each
ES3261	Static Free Fabric Treatment Treatment – 32 oz trigger sprayer	83T1901	10.19
ES161	Static Free Fabric Treatment – 1 gallon	83T1895	25.04

STATIC FREE™ FLOOR FINISH

ITW Chemtronics®

- Gives a non-yellow high gloss finish for conventional flooring
- Easy to apply and maintain
- Eliminates need for static control tiles
- Dries in 30 minutes
- Provides a surface resistivity 106 – 109 ohms per ANSI/ESD S7.1
- Meets slip resistance standard ASTM D-21.0

Static Free™ Floor Finish is used to dissipate static charges and prevent static charge generation while providing a high gloss finish for conventional flooring. It can be easily applied to a variety of flexible and hard surfaces, such as vinyl composition, vinyl asbestos, linoleum, rubber, sealed wood, sealed concrete and terrazzo.

Mfg. Part No.	Description	Stock No.	Price Each
ES167	Static Free Floor Finish – 1 gallon	83T1897	45.38
ES567	Static Free Floor Finish – 5 gallon	83T1903	143.98

DUSTER AND FREEZE SPRAYS

RoHS Compliant Available

multicomp

- Environmentally safe
- Non-ozone depleting
- Evaporates rapidly
- Zero residue

SPC12778

SPC12779

Mfg. part no. SPC12778 non-flammable duster is formulated with HFC-134a, a pure, moisture-free, odorless inert gas that removes microscopic contaminants, particles, dust, lint, metallic oxide deposits and other soils without the use of harmful solvents.

Mfg. Part No.	Description	Size (oz.)	Stock No.	Price Each 1-13
SPC12778	Non-Flammable Duster Spray	10	78H4044	11.45

Mfg. part no. SPC12779 non-flammable freeze spray is formulated with HFC-134a, a rapidly evaporating liquid that chills to -62°F (-52°C). Used as a troubleshooting aid for intermittently faulting capacitors, resistors, semiconductors, and other defective components. Can also detect cold solder joints, cracks in PCBs, and oxidized junctions.

SPC12779	Non-Flammable Freeze Spray	10	78H4045	11.37

PRECISION-V HIGH-PRECISION SOLVENT CLEANER

RoHS Compliant Available

TECHSPRAY

PRECISION V

Features

- Nonflammable with no flash-point
- Low VOC — 37% (EPA), 75% (CARB)
- Non-ozone depleting
- Residue-free
- Rapid evaporation
- Safe on most plastics
- Ideal replacement for AK225

1651-16S

1651 series Precision-V high-performance, high-precision flux remover cleans R, RA, RMA and SA type flux residues after high-temperature reflow, wave and hand soldering. Ideal for both lead and lead-free electronic and electrical soldering processes. Effective on both rosin and no-clean fluxes. And because Precision-V flux remover is non-ozone depleting, it's the ideal replacement for cleaners containing Freon, HFC-141b and AK225. Formulated to reduce VOCs within your facility. Ideal for aviation and other applications where strict VOC caps apply (based on EPA VOC exemptions). Bulk chemicals ideal for cold/bucket cleaning and ultrasonics (not intended for vapor degreaser).

Mfg. Part No.	Description	Size	Stock No.	Price Each
1651-16S	Precision-V Flux Remover — Aerosol Spray	16 oz.	34P2758	35.03
1651-P	Precision-V Flux Remover — Glass Bottle	1 pint	51P2802	47.49

ECO-STENCIL WATER-BASED SMT STENCIL CLEANER

RoHS Compliant Available

TECHSPRAY

- Eco-friendly "green" high-performance cleaning
- Safe for equipment stencils, tools, squeegee, misprinted boards, work surfaces
- Removes unsoldered eutectic (leaded) and lead-free solder pastes
- Quickly clean off uncured adhesives
- Non-flammable
- Biodegradable
- Low VOC
- Non-ozone depleting

1-Qt. Trigger Spray

1-Gal. Container

Wipes

ECO-STENCIL™ MANUAL STENCIL CLEANER

Eco-Stencil™ manual stencil cleaner effectively removes all types of solder paste (e.g. water-based, RMA, no-clean, lead-free) and uncured adhesive from screens, misprinted boards and equipment. Completely safe on stencils, squeegees, and equipment surfaces. One quart trigger spray and one gallon containers are ideal for surface and tool cleaning. Trigger spray eliminates the need for propellants, which can have a global warming impact. Convenient pre-saturated wipes, in a pop-up dispenser, are lint-free and resistant to tearing/shredding. Fully compliant with the requirements of CARB (California Air Review Board), European REACH (Registration, Evaluation, Authorization & Restriction of Chemicals) and the initiatives of WEEE (Waste Electrical and Electronic Equipment Directive), RoHS (Restriction of Hazardous Substances), and SVHC (Substances of Very High Concern). Even the packaging is recyclable.

Mfg. Part No.	Description	Stock No.	Price Each
● 1570-QT	1-Quart Trigger Spray	10R1050	13.80
● 1570-G	1-Gallon	10R1049	25.95

CHEMICAL CLEANERS & ACCESSORIES

DUSTERS AND FREEZERS

RoHS Compliant Available

TECHSPRAY

Economy Duster 1673 | Duster 1671 | Combo Pack Duster 1671 | Freezer 1672

- Moisture-free
- Non-flammable, (except **mfg. part no. 1673-10S**)
- Non-ozone depleting

Dusters blow away microscopic contaminants, lint, dust, metallic oxide deposits and other soils that can cause heat build-up or shorts in sensitive electronics. Freezers chill down PC boards for troubleshooting intermittently faulting capacitors, resistors, semi-conductors, and other defective components.

Mfg. part no. 1673-10S Economy duster has a powerful blast for quick dust removal. It should not be used around open flames or sparks.

Anti-Stat Freezer 1747 | Vortex Duster 1697

Mfg. Part No.	Description	Size	Stock No.	Price Each
● 1673-10S	Economy Duster	10 oz.	88K0924	7.48
1671 series Non-flammable ultra-pure duster is 100% pure HFC-134a and is deal for energized circuit cleaning.				
● 1671-10S	Duster	10 oz.	00Z1980	13.16
● 1671-15S	Duster	15 oz.	00Z1981	19.46
1697 series Vortex™ dusters are 100% pure HFC-134a and blast at a much higher velocity. **Mfg. part no. 1697-8S** Vortex™ 360° duster sprays upside-down for cleaning hard-to-reach places. They are ideal for the removal of dust, lint and other contaminants from computers, printers as well as optical cleaning equipment.				
● 1697-10S	Vortex™ High-Velocity Duster	10 oz.	14C8044	17.60
● 1697-8S	Vortex™ 360° High-Velocity Duster	8 oz.	14C8045	16.06
1672 series Diagnostic freezer sprays are used as a troubleshooting aid and chill PC boards down to -60°F.				
● 1672-10S	Freezer	10 oz.	00Z1982	14.11
● 1672-15S	Freezer	15 oz.	58K0004	21.31
Mfg. part no. 1747-10S Anti-static, diagnostic freezer spray is used as a troubleshooting aid in static sensitive areas. Chills PC boards down to -40°F and leaves behind a light, anti-static residue to avoid static build-up.				
● 1747-10S	Anti-Static Freezer	10 oz.	00Z1983	20.79

ZERO CHARGE ANTISTATIC CLEANERS, FLOOR COATINGS AND HAND LOTIONS

RoHS Compliant Available

TECHSPRAY

1743-QT 1743-50PK 1720-G 1702-8FP

Zero Charge® screen and keyboard cleaner and presaturated wipes, with regular use, will eliminate static charge from sensitive surfaces and provide long-term static protection. Removes hand oils, ink marks, dust, fingerprints, nicotine, syrup, carbon, and other soils from work areas. Non-streaking, foaming action cleans plastic and glass. Non-ozone depleting.

Mfg. Part No.	Description	Size	Stock No.	Price Each
1743-QT	Zero Charge® Antistatic Screen and Keyboard Cleaner with Trigger Spray	1 Quart	81H3814	19.71
1743-50PK	Zero Charge® Antistatic, Presaturated Screen and Keyboard Cleaner Wipes in Individual Packets	50 Wipes	51R6163	26.67

Zero Charge® static-dissipative floor coating is a high-gloss, zinc-free floor finish designed for use in electronic production areas, computer rooms and other static-sensitive areas. Contains a non-migratory, static-dissipative polymer, which will maintain a constant surface resistivity of 10^6-10^9 ohms throughout the humidity spectrum. Provides a glossy yet slip-resistant finish.

1720-G	Zero Charge® Static-Dissipative Floor Coating	1 Gallon	01C1846	71.21

Zero Charge® antistatic hand lotion contains natural ingredients including aloe vera and vitamins A and E. Special blend of moisturizers penetrate rapidly leaving the skin soft and non-greasy. This antistatic formulation is designed to improve the contact between personnel and grounding devices such as wrist and heel straps. Does not contain silicone or lanolin found in conventional hand lotions that can interfere with PCB manufacturing.

1702-8FP	Zero Charge® Antistatic Hand Lotion with Finger-Pump	8 Oz.	33K2643	7.77
1702-G	Zero Charge® Antistatic Hand Lotion	1 Gallon	68K7284	63.75

TECHSPRAY

100% Cotton Cleanroom Wipes

Recycled Wipes, Small

Recycled Wipes, Large

- Eco-friendly "green" high-performance cleaning
- Highly absorbent
- Biodegradable and sustainable

TECHSPRAY RENEW™ high-performance eco-friendly wipes are fully compliant with the requirements of European REACH (Registration, Evaluation, Authorization & Restriction of Chemicals) and the initiatives of WEEE (Waste Electrical and Electronic Equipment Directive). These wipes do not contain RoHS (Restriction of Hazardous Substances) restricted substances, SVHC (Substances of Very High Concern) listed substances, or halides.

100% COTTON CLEANROOM WIPES
Highly-absorbent hydro-entangled cotton wipes absorb six times their weight. Lint-free and extra low chemical extractables make them ideal for cleanroom environments and stencil cleaning. Recommended for ISO 14644-1 Class 5 (US FED STD 209E Class 100) or higher cleanrooms. Thickness: 11 mils. Size: 9"W x 9"L flat. **Sold in bags of 100-count.**

multicomp

MicroWhite SD | Dyclean ESD-Safe | White Magic with P.A.T.

MICROWHITE SD WIPES
MicroWhite SD knitted lightweight wipes are made from 100% polyester that are durable yet soft and non-abrasive. Provide excellent water and oil absorption. Particles, metallic ion contaminant and extractable are very low. Laundered by ultra-pure D.I. water, and packaged in a Class 10 cleanroom. Size: 9x9". Color: white.

Mfg. Part No.	Description	Wipe Size	Stock No.	Pkg. of	Price per Pkg. 1-24
● DYC100-01-MICROWHITE-SD-99	MicroWhite SD Cleanroom Wipes	228.6x228.6"	19P4635	150	63.20

DYCLEAN ESD-SAFE WIPES
Dyclean ESD cleanroom wipes are knitted polyester with carbon fiber and designed for use in ESD-sensitive environments. Size: 9x9". Color: white.

● DYC100-01-DYCLEAN-ESD-99	ESD-Safe Cleanroom Wipes	228.6x228.6"	01P0783	150	73.39

KIMWIPES Ex-L
Kimwipes Ex-L delicate task wipes are made from 40% post-consumer and 30% pre-consumer wastepaper. Feature extra low lint performance, will not scratch or contaminate, and offer gentle absorbency. Convenient pop-up dispensing box offers controlled one-at-a-time usage and easy portability. Ideal for applications such as: electronics assembly, semiconductor fabrication, research and development and general office use. Size: 15Wx17"L. Color: white.

● DYC100-03-34256	Kimwipes Ex-L Wipes	381x431.8"	01P0786	140	24.58

WHITE MAGIC WIPES WITH P.A.T.
White Magic double-knit wipes feature Anticon® with Particle Attraction Technology (P.A.T.) that attracts 35 times more particles than other wipes and retains 95% of particles captured for less chance of recontamination. Packaged in an ISO Class I cleanroom environment, these wipes start out twice as clean as competitive wipes because they arrive with minimal particles, fibers and ions. Works well with solvents. Size: 9L x 9"W. Color: white.

● DYC100 30-493200-530	White Magic Wipes with P.A.T.	228.6x228.6"	01P0782	150	58.83

AEROSOL SPRAY ADHESIVES, CLEANER AND PENETRANT

RoHS Compliant Available

3M

Super 77 Aerosol Adhesive | 90 Aerosol Adhesive | 5-Way-Penetrant

Mfg. part no. 77 Super fast-drying transparent spray adhesive has high-tack, low-misting high coverage. For permanently attaching foils, carpeting, foams, paper, cardboard, etc., to painted or unpainted base materials. **Mfg. part no. 90** high contact strength adhesive is an easy-to-use aerosol that dries in minutes and features a low-misting lace spray for accurate application. Great for bonding decorative laminate. Adheres polyethylene and polypropylene to wood, metal, and more. **Mfg. part no. 90-Inverted** is the same high-strength aerosol adhesive as **mfg. part no. 90** but sprays upside down making it ideal for whenever spraying downward is more convenient and effective.

Mfg. Part No.	Description	Size (oz.)	Stock No.	Price Each 1-4
● 77 SUPER	Super 77 Multipurpose Spray Adhesive	24	00Z1147	30.12
● 90	High-Strength 90 Aerosol Adhesive	-999	98M0084	33.65
● 90-INVERTED	High-Strength 90 Inverted Aerosol Adhesive	24	73R4366	39.92

CITRUS CLEANER AND 5-WAY PENETRANT
Mfg. part no. Citrus-Based Cleaner is a liquid cleaner/degreaser that can be used to dissolve and remove dirt, grease, tar, and many non-curing type adhesives. It can also be used to degrease substrates for adhesive bonding in place of many chlorinated or petroleum-based solvents. **Mfg. part no. 5-Way Penetrant** displaces moisture and dries out electrical apparatus. Helps prevent shorting and increases conductivity. Inhibits rust. Frees rusted bolts, lubricates and cleans, drives out moisture. Also excellent as a tapping liquid for stainless steel and aluminum.

● CITRUS-BASED-CLEANER-24OZ	Citrus-Based Industrial Cleaner	24	93K5577	33.02

SCOTCH-WELD™ HOT MELT ADHESIVES

RoHS Compliant Available

3M

Mfg. part no. 3798 LM Jet-melt™ "gummy-glue" low-melt adhesive is heat-applied and removable. Can be used on a wide variety of heat-sensitive substrates including most corrugated coated substrates. It's easy-to-use and obtains strength in seconds. Fast setting thermoplastic is tack-free and solvent-free. Applied at 265°F (129°C). Color: clear. Designed for application using a 3M™ Polygun™ LT applicator, *ordered separately online or call.* **Sold in 1-lb. pkgs.**.

Mfg. part no. 3789 Q Scotch-Weld™ high-performance general-purpose hot-melt adhesive for bonding some flexible and rigid plastic substrates. Can be used with some supported and unsupported vinyls, leather, and wood substrates. Not recommended for polyolefins. Fast setting, thermoplastic. Applied at 385°F (196°C). Color: clear. Easily dispensed through 3M™ Polygun™ TC applicator; *ordered separately online or call.* **Sold in 1-lb. pkgs.**.

Mfg. Part No.	Description	Stock No.	Price per Pkg. 1-4
● 3798-LM	Jet-Melt "Gummy-Glue" Low-Melt Adhesive	93K5584	61.78

SCOTCH-WELD™ TWO-PART EPOXY ADHESIVES

RoHS Compliant Available

3M

DP-100 | EPX Applicator

- Convenient Duo-Pak™ cartridges

Scotch-Weld™ two-part epoxy adhesives provide reliable bonds and seals for a broad spectrum of applications. These fast-setting, room-temperature curing, two-part epoxy adhesives bond to a variety of materials: metals, ceramics, wood and plastics. **Mfg. part nos. DP-460EG** and **DP4XLEG** electronic-grade (EG) two-part epoxy adhesives that are an excellent alternative to mechanical fasteners and lower-grade adhesives. These EG epoxies produce far lower contamination levels of ionic and outgassing impurities than typical epoxy adhesives making them ideal for the fabrication and assembly of critical components. Precision dispensing is made easy with **mfg. part no. EPX Applicator** metal hand-held Scotch-Weld™ EPX™ adhesive applicator; *ordered separately below.*

SCOTCH-WELD™ INSTANT ADHESIVES AND ACTIVATOR

3M

RoHS Compliant Available

SF20-20 PR600-56 RT3500B AC452-2

Super Fast Cyanoacrylate Adhesives Features:
- Rely less on surface moisture for cure speed than standard cyanoacrylates
- Designed to join together difficult-to-bond plastics and rubbers, acidic and/or contaminated surfaces
- Use for a super fast cure in high speed production applications
- **SF 20** is a low viscosity and **SF 100** a low-medium viscosity cyanoacrylate

Engineered-Grade Plastic and Rubber Cyanoacrylate Adhesives Features:
- Exceptional performance on difficult-to-bond plastic and rubber substrates
- May be bonded to like substrates or in combination with metal or composite substrates
- **PR100** is a general purpose, low viscosity bonder
- **PR 600** is a medium viscosity cyanoacrylate with some gap-filling capability
- **PR 54** is a fast curing, very high viscosity, gap-filling gel used on poorly mating components, porous substrates and vertical surfaces

➤CONTINUED➤

SCOTCH-WELD™ INSTANT ADHESIVES AND ACTIVATOR (CONT.)

Rubber Toughened Cyanoacrylate Adhesives Features:
- Formulated with a unique elastomer that maximizes impact, vibration, peel, and thermal cycling resistance
- Provides tough, flexible bond ideally suited for substrates and dissimilar materials
- **RT300B** is a medium viscosity cyanoacrylate
- **RT3500B** is a high viscosity bonder with good gap filling capabilities

High-Temperature Cyanoacrylate Adhesives Features:
- Provides superior performance for demanding applications where high temperatures, thermal cycling, or shock resistance is required
- High temperature resistant toughened cyanoacrylate with some gap filling
- Withstands intermittent exposure up to 250°F (121°C)
- **HT700** is a medium viscosity cyanoacrylate

Rapid Flash Cyanoacrylate Accelerator Activator Features:
- Enhances cure speeds on porous and acidic surfaces, and difficult to bond polyethylene and polypropylene
- Acetone-based formulation flashes off rapidly
- Gives excellent adhesion
- Overspray may attack some plastics

Scotch-Weld™ cyanoacrylate instant adhesives offer more than a range of seconds-fast bonding for substrates ranging from metal to plastic, wood to rubber. These liquid and gel formulations give you a wide selection of other properties to help improve production and end use.

CHIPBONDER® SURFACE MOUNT ADHESIVES

RoHS Compliant Available

LOCTITE®

Chipbonder® surface mount adhesives are idea for high-speed syringe dispense and stencil print assembly processes. Designed for bonding surface mount devices to printed circuit boards prior to wave soldering. Suited for applications where high-speed dispensing, high dot profile and high wet strength are required.

3616™ 7360™

CHIPBONDER® 3621™
Mfg. part no. 3621™ epoxy surface mount adhesive is suited where ultra-high syringe dispense speeds from 25,000 to 55,000 dots/h are required. Meets the challenge of lead-free wave solder processes with water- and alchol-based fluxes. Good green strength, superior humidity resistance and good electrical chararacteristics. Ready-to-use syringes fit straight into a variety of air pressure/time dispensing systems. No mixing required, heat cure. Color: red (uncured).

Mfg. Part No.	Description	Size (ml)	Stock No.	Price Each
3621	Chipbonder® Surface Mount Adhesive — Syringe Dispense	10	31M3706	49.74

CHIPBONDER® 3616™
Mfg. part no. 3616™ epoxy surface mount adhesive is suited where high stencil print dispense speeds from 20 to 150 mm/s are required. Suitable for printing a range of dot heights with one stencil thickness. Ideal for use on all common open squeegee and enclosed head stencil printing systems, such as ProFlow®, PumpPrint®, and Varidot®. Easy-to-use — no mixing required, heat cure. Color: red (uncured).

LOCTITE®

PRISM® HIGH-PERFORMANCE INSTANT ADHESIVES

401™ Prism® surface-insensitive instant adhesive is designed for hard-to-bond surfaces that require uniform stress distribution and strong tension and/or shear strength. Provides rapid bonding of a wide range of materials, including metals, plastics and elastomers. Suited for bonding porous or absorbent materials such as wood, paper, leather and fabric. Low viscosity. Easy-to-use, requires no mixing. Transparent, dries clear.

Mfg. Part No.	Description	Tube Size (gm.)	Stock No.	Price Each 1-4
● 40104	401™ Prism® Surface-Insensitive Instant Adhesive	3	00Z790	11.04

454™ Prism® surface-insensitive instant gel adhesive designed for the assembly of hard-to-bond materials that require uniform stress distribution and strong tension and/or shear strength. Provides rapid bonding of a wide range of materials, including metals, plastics and elastomers. Suited for bonding porous or absorbent materials such as wood, paper, leather and fabric. The gel consistency prevents adhesive flow even on vertical surfaces. High viscosity. Easy-to-use, requires no mixing. Transparent, dries clear.

Mfg. Part No.	Description	Size	Stock No.	Price Each 1-4
